owner of these works. It is proposed to continue the enlargement of the canal as far west as Huntingdon, to meet the demands of the coal traffic the Broad Top and Allegheny coal fields, as fast as it can be done without trespassing upon the net revenues of the railroad. This object could be effected at an earlier date by the organization of a separate company for these works, and raising by a mortgage upon them the amount necessary for this enlargement. The canal when so enlarged will be of increased importance in the development of the mineral resources of the interior, affording as it will, the capacity for the passage of boats of double the present tonnage with a comparatively slight increase in the cost of moving it to the transporter. As the bituminous coal fields of Pennsylvania are about twice the distance from tide water at Philadelphia that the anthracite coal fields of Schuykill county are, this company has felt the importance of thus affording cheaper water transportation of the former article to this market.

The earnings of the Philadelphia and Erie Railroad in 1865 were:

From passengers	$828,590 21
" troops	94,451 46
" freights	1,083,925 31
" express matter	26,887 20
" mails	19,085 61
" miscellaneous sources	21,201 00
Total earnings	$2,074,140 79

The operating expenses during the same period were:

Conducting transp	$537,517 74	
Motive power	562,648 89	
Maintenance of way	627,050 09	
†Maintenance of cars	18,835 56	
	$1,746,052 28	
30 per cent. due on lease to meet interest on bonds, taxes, &c.	598,708 00	
		$2,344,760 28
Showing a loss in operating the line (including 30 per cent. of receipts to pay interest on the debt of the Philadelphia and Erie Railroad Company and taxes) of		$270,619 49

This loss is largely due to the March freshet in the Susquehanna, already referred to as so destructive to the canals, but still more disastrously felt throughout the line of the Philadelphia and Erie Railroad. Five spans of superstructure of the bridge at Williamsport, and one at Muncy, over the west branch of this stream, were swept away by the force of the county and toll bridges driven against them by a rapid current. The whole line of road from Sunbury to Erie presented innumerable evidences of the destructive effect of this flood; piers of bridges were undermined and destroyed, culverts swept out, banks broken, and the slopes of excavations and embankments badly washed.

The effects of this extraordinary flood in the streams followed or crossed by the road have shown that the changes made in its profile during the construction of its unfinished portions were judicious, and that the location of the line is now such as to render it safe from serious disaster hereafter from a similar rise of waters. Most of the injury sustained was from insecure foundations to piers of bridges, insufficient drainage, too narrow banks, and the incomplete condition of the work generally, except to the superstructure of bridges, all of which would have passed uninjured but for the force with which other bridges were driven against them.

From a very natural desire to see this work in operation—which had been so many years in progress—the directors of the Philadelphia and Erie Railroad Company opened the middle division of their line long before it was in a condition for effective service, and at the beginning of a winter of unusual severity; hence its business, small and unorganized, had to be conducted through a wilderness, unprovided with accommodations for labor, and with an undisciplined force at a very heavy increased cost to this company. These difficulties, added to the increased cost of maintaining a line unfinished in all of its details, and the disastrous flood which followed the breaking up of winter, have resulted in the loss above stated, nearly all of which is properly chargeable to construction account.

The whole revenue of the Pennsylvania Railroad Company, from its several lines, is as follows, viz:

From the Pennsylvania Railroad and branches	$17,459,169 49	
From Pennsylvania canals	181,015 38	
From Philadelphia and Erie R. R.	2,074,140 79	
		$19,714,325 66
And expenses of operating these lines:		
Pennsylvania Railroad ordinary	$10,881,930 04	
Pennsylvania Railroad, extraordin'y	2,388,128 50	
Pennsylvania canal	279,843 51	
Philadelphia & Erie Railroad	1,746,061 28	
Thirty per cent. reserved to pay interest on debt of P. & E. R. R. Co	598,708 00	
		15,894,671 33
Balance		$3,819,654 33
The payments made during the year to the shareholders, of two semi-annual dividends of 5 per cent. each, the balance of interest and coupon accounts, the lease of Harrisburg and Lancaster Railroad, taxes on dividends and coupons ($515,433 01,) and the annual sum due to the State ($460,000) for the purchase of the Main line amounted to		3,597,496 98
Leaving a surplus of		$222,157 35

This result is exhibited after charging all expenditures for new work, and additional rolling stock, &c., amounting in the aggregate to $2,388,128 50, together with an instalment of $100,000 upon the principal of the debt due the State, and losses on leased railroads, to expense account; which added to similar charges made during the last four years, gives $8,125,915 15 thus disposed of.

With a view to prevent an undue enlargement of the capital of the company, so difficult to restrain in corporate enterprises, all interest paid during the construction of the company's railroads, together with all discounts allowed upon bonds sold, and all doubtful investments, have from time to time been charged to and paid out of the annual net revenues of the road. There is nothing therefore in the accounts of the company representing fictitious values; on the contrary, its property is worth in specie much more than it is represented at upon its books. The main line and branches of your road were constructed under small contracts for cash, when labor was low, and at rates fully one-half less than those now prevalent. In consequence of the conservative policy mentioned, the shareholders have from the day of payment of each instalment received six per cent. interest free of taxes upon their investment *from the net revenues of the road* until May, 1862,* since which time the regular and extra dividends have averaged over eighteen per cent. per annum.

If the increase of rolling stock, &c., paid for from the net revenues of the road, as already stated, were added to the surplus profits as shown by the Treasurer's statement, it would exceed the original cost of the company's road and outfit between Harrisburg and Pittsburg, when finished with a single track and siding.

The present condition of the company's property, therefore, cannot but be viewed with great satisfaction by its shareholders. Estimated at its specie value it may be safely stated as follows:

Main line of railway, branches and extensions, including shops and depots, Harrisburg and Lancaster Railroad, and canal		$13,000,000
Equipment of all the company's railway		8,000,000
Real estates		3,000,000
Material on hand, cash and cash bal		3,500,000
Investments in other lines		9,500,000
		$56,000,000
Liabilities.		
Capital stock	$20,000,000	
Stock Harrisburg and Lancaster Railroad Co	1,182,500	
Funded debt	16,585,000	
Bonds of Harrisburg and Lancaster Railroad Company ($700,000) and other obligations, say in all	2,232,500	
		40,000,000
Surplus		$15,000,000

Which added to the capital stock would make its real value $35,000,000, instead $20,000,000.

If this estimate was predicated upon the cost of creating this property at present values, it would present a much larger balance.

For the past two years the actual net revenues of the company have been equal to legal interest upon one hundred millions of dollars. But in consequence of the abnormal condition of the traffic from which they were derived, it has not been deemed prudent to fully represent them by an increase of capital stock. They have mainly been appropriated to the increase of the company's property, and the amount thus disbursed charged to current expenses. In justification of this policy it will be borne in mind that the increase in the traffic of the line for the past four years is not due to a natural development of its business, but is mainly to be accounted for by the acts of the Southern States, which, at the commencement of hostilities, immediately closed the markets of the Southwest, heretofore enjoyed by the producers of the northwestern States, under the vain expectation that they will thus seduce the patriotic feeling of that section from its allegiance to the Union. This object signally failed, while the unusual demand for western products in Europe, that immediately followed, stimulated by high prices (enhanced by the continually increasing volume of the currency), threw this business on the East and West trunk lines, which at an early period were reduced to three, by interruptions to the Baltimore and Ohio railroad.

This increase of traffic was quickly met by enlarging your equipment, notwithstanding the high prices demanded for rolling stock, and a continued apprehension that an early termination of the rebellion might render the construction of many miles of sidings necessary for its accommodation while out of service. If the rebellion had ceased, as every indication seemed to warrant, in season for a full cotton crop during the past year, this would now, to a considerable extent be the condition of things. But the southern planter having been required by the rebel government to continue to devote his labor to raising provisions until too late to put in cultivation a crop for the past year, he has not yet become, to a material extent, a customer of the Northwest. The exhaustion produced by the long continuance of the war, added to the loss of this crop, has thus

† In addition to this amount $62,148 49 was expended by the Pennsylvania Railroad Company for repairs to the cars in use on the Philadelphia and Erie Railroad.

* One dividend was passed during the financial crisis of 1857, to compensate for which three semi-annual dividends of four per cent. had been paid.

deferred the full transfer of traffic to its original channels to a more distant period. Still this diversion of freights, as small as it has been, is now felt in the reduced quantity and rates charged for transportation. At present neither of the trunk lines have their rolling stock for through traffic fully employed.

The capacity of the East and West trunk lines, at present, is not only ample for the through traffic offering, but, with the addition of the new road already opened from Erie, and the second tracks to the present lines now in progress, they will be found largely in excess of the business requirements of the country. Their construction during a period of low prices will prevent any competitor that may hereafter enter the field from meeting the contest upon equal terms.

Whatever may be the immediate effects of competition between railways, its ultimate result, when capital is brought into the contest in excess of the demand for its use, is to tax commodities with the increased interest which such capital in the end always exacts. Under the influence of a speculative feeling in England some years since, railways were built so largely in excess of the legitimate demand for their use, that with all the advantages of cheap labor and materials for operating them, the rates now charged are generally nearly twice those prevalent on similar lines in this country, while they still continue, in most cases, comparatively unremunerative to the shareholders.

As the cost of transportation is largely dimished by the quantity and regularity of the supply of freight, it follows that the local traffic of the State can be more cheaply accommodated by branch lines to the existing trunks (which occupy the only natural routes of intercommunication between the East and West within the State, and in the success of which the Commonwealth and the city of Philadelphia are deeply and directly interested,) than in any other way. These branches can be located so as to accommodate a larger extent of country than additional through routes would afford.

At an early stage in the history of this Company, its directors, under the influence of an enlightened policy, by subscriptions to their stock, extended efficient aid to the construction of railways from its terminus to the sources of traffic in the West. The investment made to the Marietta and Cincinnati line, from a misappropriation by that Company of the means thus furnished, proved unproductive, and it has long since been charged to profit and loss upon our books. The credit of the line between Pittsburg and Chicago, in which this Company held $816,000 of stock, also gave way in 1857, with eighty-two miles of its line west of Plymouth scarcely begun, bringing this large investment into great jeopardy. Your directors, however, promptly agreed that this Company would furnish the iron, required for the completion of the road, while the president, with the use of his individual credit and exertions, brought the whole line into early use, thereby not only saving the original investment and largely increasing the traffic of this Company, but enabling it subsequently to dispose of its interest in the line at a profit. The result of this operation has been applied to the completion of the line between Pittsburgh and Steubenville, commenced under the patronage of the city of Pittsburg and Allegheny county, but abandoned after a much heavier expenditure of municipal bonds than of cash. The cost of completing this work, in consequence of the late period of the war at which it was commenced, has greatly exceeded our anticipations, but the outlay, it is believed, will eventually prove remerative in its direct profits, as well as upon the traffic of our line, which has already felt its influence beneficially upon the current of travel since it was opened for use in October last.

In addition to the assistance afforded to these lines, and the completion of a second track of its own road (except eleven and a half miles), this Company has furnished the means for the extension of the Broad Top railroad to Bloody Run; for the completion of the Bald Eagle Valley Railroad, between Tyrone and Lock Haven; the Tyrone and Clearfield railroad; the Ebensburg and Cresson railroad; the Western Pennsylvania railroad to Freeport, and the Philadelphia and Erie railroad, besides other lines of less extent, all of which have been brought into successful operation.

The Company is also extending its road to the Delaware river at Greenwich Point, in the city of Philadelphia, for the accommodation of the oil and other heavy traffic, from which line a short branch can connect with League Island, an object of much importance in the event of the general government locating a navy yard at that point It is also furnishing the means for the construction of a road to join the Philadelphia and Trenton railway at Frankford, by which it is expected to return to the Philadelphia division much of the business that has avoided this city in consequence of interruptions to its transit through it. No new project has been undertaken during the year, except the conversion of the abandoned canal below Freeport into a railway to connect with the Fort Wayne railway, in Allegheny City. This line will be cheaply built, and it is believed that it will prove remunerative from its local business alone.

It is to this liberal and progressive policy that the prosperity of this Company is in a large measure due. The construction of these various works, and the large equipment purchased for them, have, in consequence of the high prices of and materials, required a much larger outlay than anticipated when they were undertaken. The unexpectedly large traffic during the past summer and autumn alone caused an immediate increase of equipment, &c., above our estimate, of over $1,200,000, and from present indications this will have to be increased this year for the accommodation of the coal, oil, and lumber interests, a further sum of one and a quarter millions of dollars. The equipment for the through business seems to be sufficient.

The business of the Philadelphia and Erie railroad is now nearly twice what it was estimated at when you were asked to authorize its lease, fully justifying the belief that its stock, at no distant period, will prove a remunerative investment.

The expenditures upon these several enterprises, including the equipment of the Philadelphia and Erie railroad and other lines, have heretofore been met (without any material enlargment of the obligations of this Company) from the revenues of the Pennsylvania railroad and from the sale of securities received from these companies; but the popularity and large supply of United States bonds, bearing a high rate of interest, continually pressed upon the market during the past year has precluded the sale of even the best railway securities at ordinary rates. To meet future outlays, it may, therefore, be necessary to change to some extent the usual means for raising funds to meet the obligations of the Company.

The expenditures for new work (including equipment, &c., charged to expense account) amounted in 1865 to $6,010,287 12, which have been met from the surplus revenues of the road and the sale of securities held by the Company. The outlays for similar objects this year will not be less than $3,000,000.

After many years of unsuccessful efforts to induce the New York trunk lines to abandon their policy of committing a share of their freight business to private freight expresses, the Pennsylvania Railroad Company, for the purpose of counteracting the diversion of traffic from its route, caused by these organizations, and to provide at least equal facilities for the merchants of Philadelphia, assented to the introduction of similar lines upon your railways. The cars to be provided at their own expense, and of a compromise gauge, that they might reach all important points in the West or Northwest without transhipment. These fast freight lines were to maintain agents in all the western cities, who would personally superintend the prompt and proper delivery of freights, and see to the settlement of claims for damages or delays. The result has been to secure a class of business, without interfering with the ordinary tonnage of the Company, that has not heretofore been reached.

In consequence of partisan representations originally made during an important litigation, and then shown to be false, having since been wantonly and industriously persisted in, from interested motives, we feel it to be due to you to reiterate, in as few words as possible, the policy which has ever governed the directors in relation to the traffic over your line to and from Philadelphia and the West.

Neither the inclinations of your directors or officers nor the interests of the Company have permitted them to entertain for a single moment the policy of discriminating against the commercial or manufacturing prosperity of this city. On the contrary, the Company has always kept the prosperity of these interests steadily in view, as conducing to its own; and in this connection has sacrificed many hundred thousand dollars in their support and defense. In the memorable contest between the east and west trunk lines, in 1859, the New York railroad companies attempted by a reduction of their rates from and to New York to those charged by the Pennsylvania Railroad Company from and to Philadelphia, to break up our discrimination in favor of this city. But these reductions were met by similar reductions on the part of this Company at Philadelphia, and the competition was thus continued on both sides by further reductions, until the losses became so heavy that the New York lines deemed it expedient to surrender the point contended for. Our western connections participated in this contest, and in the final adjustment of rates that followed, the policy of a minimum discrimination in favor of Philadelphia was secured, as large as practicable, which differences have not, with the consent of this Company, been departed from, but from many points and at different periods have been very largely increased.

It is quite true that the Pennsylvania Railroad Company may have carried freights upon the same day out of New York for less rates than from Philadelphia, while at other times the rates from Philadelphia are much less than the established differences would indicate. This is due to the vicious practice or want of system existing among railway companies for regulating rates on through traffic, under which they may be suddenly reduced or raised at one point before the act is communicated to the other. The rates of the Pennsylvania railroad are always kept under the control of its officers, and whenever reductions are made by the New York lines they are promptly met at Philadelphia by the invariable policy of the Pennsylvania Railroad Company. This policy will of course require any competing line, old or new, to conform to it, but contracts to secure an object that both parties may be interested in violating can be of no value, however carefully drawn up. The only security is in the disposion of the controlling parties to meet the object desired.

It is confidently affirmed that no case of seeming discrimination against Philadelphia has occurred which, on examination, will not find its full explanation in the reductions of a rival line, or a comparison of rates of different dates.

The commercial and manufacturing interests of Philadelphia have been largely promoted by the operations of the Pennsylvania Railroad Company in the establishment by it of rates of freight already far below those anticipated when the work was undertaken. But this is not the only thing required to centre commerce in this city, as seems to be the general belief. The rates of freight have really but little to do with this question, provided they are fixed so as to meet fully the efforts of competing avenues to divert traffic from her route. The large receipts of the Company are the best evidence that such a diversion has not taken place. Mercantile enterprise must seize hold of the products of the West, so abundantly flowing over this avenue, and by its activity, aided by capital, purchase or secure by actual consignment, and ship them to other markets. There is no other way to add to the commerce of Philadelphia, and any

movement to that end will meet the hearty co-operation of this Company.

If the advantages of locality possessed by this city are permitted to pass by unimproved by her merchants, they must not complain that those of the West seek other markets to sell and buy in. The Pennsylvania Railroad Company has offered every facility to bring to the city the products of the great West, as well as for their storage while here, and will feel deeply interested in any corresponding effort upon the part of our merchants and capitalists to avail themselves of the advantages thus provided.

Although this Company was organized only for the purpose of carrying freight and passengers to and from the interior and the West, yet it has repeatedly signified its disposition to aid in the establishment of a steamship line between this port and Europe, that the necessity for sending western products to New York for shipment abroad might at least be diminished. This aid has been offered by subscription to the shares of a company to be raised for that object, or by paying six per centum upon the amount of capital so invested, together with other valuable and important business facilities, and they still hope that the mercantile community will co-operate in such manner to render aid efficient. In the success and profitableness of such an enterprise, commenced and managed upon a proper basis, your directors have no doubt, and with the consent of the shareholders, this Company will, unaided, establish such a line of steamers.

Since your last annual meeting the General Superintendent of your main line of works (Enoch Lewis, esq.,) has resigned his office, a post which he had acceptably and efficiently filled for nearly six years. His successor, Edward H. Williams, esq., has acted for nearly a year past as Assistant General Superintendent, and in that capacity has evinced quantities that it is believed will give to his administration a success equal to that of his predecessors.

The General Superintendent of the Philadelphia and Erie Railroad Company, Joseph D. Potts, esq., has also left the service of the company for more profitable employment elsewhere. His place has been filled by the appointment of Alfred L. Tyler, esq., whose previous success in the management of railroads commended him to the notice of your directors.

The acknowledgment of the Board are due to the untiring efforts of the officers of the Company generally for the efficient manner that the business of the line during the past year has been conducted, notwithstanding the disorganization that existed in the labor of the country during the first half of the year.

By order of the Board.

J. Edgar Thomson, President.

GENERAL ACCOUNT.

Capital stock		$20,000,000 00
Bond Account ($16,584,840) viz:		
First Mort. 6 per cent. Dollar Bonds, payable 1880	4,980,000 00	
Second Mort. 6 per cent. Dollar Bonds, payable 1875	2,621,000 00	
Second Mort. 6 per cent. Sterling Bonds, payable 1875	2,283,840 00	
Bonds due the State of Pennsylvania, bearing five per cent. int.	6,700,000 00	
Mortgages and ground rents on real estate	165,284 32	
Total shareholders' capital and funded debt of company		$36,750,124 32

Dividend on pref. stock	94,400 00	
	$42,302 33	$81,463 20
Bal. from previous year	306,243 65	348,545 98
Total amount at credit of profit and loss December 31, 1865	$348,545 98	$430,009 18

Compared with 1864 the gross earnings of 1865 show an increase of $49,578 64; with an increase in expenses of $101,740 10—making the decrease in net earnings, $52,162 46.

The company have 10 locomotives; 12 passenger, 6 baggage, and 261 freight cars. The report says:

On the 15th of August last a collision occurred, about five miles from Bridgeport, between a passenger train and an engine going out on a trial trip, which resulted in the death of eleven persons and the injury of about twenty-seven others. It was not deemed advisable to contest our liability for the damages ensuing therefrom, and up to the close of the year 1865, the sum of $30,727 97, had been expended towards their settlement, by which amount the item of "damages" has been increased. It is probable that the further sum of about $45,000 will be sufficient to discharge the remainder of the claims for damages from this accident. By reference to the balance sheet hereto annexed, it will be seen that the indebtedness of the Housatonic Transportation Company has been increased, $44,615 68 during the year, and that of the "Bills receivable, $115,000 consist of the notes of this company, from

which it appears that our investment in the said company had up to the 1st of January been increased, to $186,696 26." Since that date an arrangement has been made, to close up the affairs of that company about the 15th of March, 1866, and to take $100,000 of the stock of the "Bridgeport Steamboat Company," a new corporation with a capital of $250,000, and comprising among its remaining stockholders many of the leading manufacturers and merchants of Bridgeport and of the Naugatuck Valley. The losses which we have thus far experienced from our connection with steamboats have mainly resulted from the sinking of our propellor in 1864, which cost about $30,000, and from the very destructive competition to which our line has been subjected, during the whole time of its continuance, up to the 23d of November last, at which time it was terminated by the withdrawal from the route of the competing line, and the subsequent forced sale of their boat, which was purchased by the new company, the organization of which is such that very little apprehension is felt of any renewal of competition. The Bridgeport route, under these circumstances, is one of the best leading out of New York, and sanguine expectations are entertained that the operation of the route will be very profitable. When a full settlement shall have been made, it will probably appear that our stock in the new company has cost us about $180,000.

For the purpose of funding the floating debt of the company, bonds were issued on the 1st of August, payable in 20 years at 7 per cent., but only 11 500 have been sold.

Very large expenditures have been made during the year for renewals of bridges, iron, ties and other materials, and the condition of the roadway is now superior to what it has been at any former time. The number of miles run during the year was 192,989.

Sec. and Treasurer.—CHARLES K. AVERILL, Bridgeport, Ct.

Chicago and Great Eastern Railway.

The contract recently entered into between the Atlantic and Great Western and Chicago and Great Eastern Railway Companies is to the following effect:

The Atlantic and Great Western Company are to establish forthwith a through line over the two roads between the Atlantic cities and Chicago and the Northwest, making the Western connection *via* Richmond and Dayton, or *via* Richmond and Urbana, and the eastern connection *via* Salamanca. In case the line should be shortened by the construction of a new link in Ohio and Indiana, the Atlantic and Great Western Company has the right to lay a third rail, to make a six foot track from Chicago to New York and Philadelphia; and has also the option of leasing the Chicago and Great Eastern Railway Company from Chicago to Richmond in perpetuity.

Hudson River Bridge.

The Bridge over the Hudson River at Albany, was opened rather informally on the 22d ult. Shortly after 3 o'clock, a train consisting of a locomotive, and two passenger cars, with a baggage car, started from the depot at Albany for a trip across the bridge. The directors of the Bridge Company, several of the officers and directors of the New York Central Railroad, together with the officers of the Hudson River, New York and Harlem and Albany and Boston roads, and a few invited guests were passengers on the train.

The Hudson River Bridge Company was chartered in 1856. In May, 1864, the work of construction was commenced. The following is a brief description of the Bridge: There is an open structure of truss work 2,020 feet in length, and supported on 21 piers, or 23, including that at each end. The piers are 50 or 60 feet high from the base, and the floor timbers of the bridge are 25 feet above ordinary tide water, and 5 or 6 feet above the point reached by the highest freshets. The piers have sufficient width for a double track, though only one has been laid for the present. The material used is oak and pine, heavily braced with iron and apparently of great strength. Add to the above length the approaches on each side, and the whole length of the structure is nearly one mile. There are 13 spans 87 feet long, one of 142 feet and three of 172 feet, while the two spans at the draw are 110 feet each.

The cost of this structure thus far is estimated at $1,100,000, including the purchase of a considerable tract of land; and a further expenditure will be required to complete the contemplated arrangements of the Bridge Co. The property is owned in common by the New York Central, the Hudson River and the Western Railroads—one-half by the former, and one-fourth by the two latter companies. The first regular passenger train—the Cincinnati Express—consisting of four passenger cars and a baggage car, passed over the bridge on the 25th. A freight train, consisting of eight loaded cars, belonging to the "Red Line"—through cars from Chicago to New York—also passed over safely. The bridge has nobly withstood the action of the ice, and has not been conquered by the freshet, as certain sage philosophers have prophesied it would be. On the contrary, the ice from above was broken up by coming in contact with the heavy stone piers and abutments of the bridge. It would roll up the abutments, says our informant, and crumble in pieces, falling back with a crashing sound, and pass down the stream. There will be no interruption to travel on this account. Trains cross the bridge while the ice is in motion.

Tennessee Bonds.

The following letter from the Secretary of the State of Tennessee has been received in this city by a bondholder:

A law has been passed and published by which the State debt now due in bonds or coupons, is to be funded by the issuance of new bonds, bearing the same interest as the old. The engraving is now progressing in your city, and as soon as it is completed and the bonds filled out, they will be ready for negotiation at my office. But as the bonds and coupons are all payable in New York, the proper officers of the State will, after giving public notice for sixty days attend in New York for the purpose of issuing the new bonds. This notice will be given in New York papers, and the negotiation will take place in June.

Railroad Earnings—Monthly.

The earnings of the St. Louis, Alton and Terre Haute Railroad for the month of Jan., 1866, were	$178,119 22
Corresponding month of previous year	170,078 62
Increase	$8,040 60

☞ Private advices from San Francisco state that the Western Union Telegraph has been extended, under the supervision of Colonel Bulkly, over 400 miles above New Westminster, on Frazier River. Reports from Col. Bulkly's exploring parties show that the obstacles to be overcome are of far less magnitude than predicted by some, and it is believed that a connection between Russia and America will be complete before a twelvemonth.

☞ The works of Mr. Krupp, in Prussia, the largest steel-maker in the world, in 1852, produced 68,000 tons; in 1861, the production was 454,000 tons, and in 1865, the works turned out nearly 2,500,000 tons of steel. This immense establishment contains 350 casting places and muffles, 136 steam engines, 31 steam hammers, and other appointments in like proportion.

☞ The Lower House of the Kansas Legislature has passed the Senate bill granting 300,000 acres of land to the Leavenworth, Lawrence and Galveston road, the northern tier road and border tier road. Track laying has commenced on the Lawrence and Leavenworth branch of the Union Pacific Railroad.

☞ The net earnings of the Norfolk County Railroad for the year 1865, were $12,040 41. It paid no dividends, and is in the hands of Isaac Davis and others, trustees of the bondholders of the corporation.

☞ All the railroads in Alabama have been repaired except the Selma and Meridian road. Repairs on this road near Demopolis and the Tombigee are being rapidly pushed forward.

☞ Resolutions favorable to the construction of the "Herkimer, Mohawk and Ilion Railroad," were adopted at a recent meeting of interested citizens of those localities.

☞ The Prescott *Journal* says that measures are being taken "to ensure the building of a branch Railroad to connect Prescott with the river road from St. Paul to Winona."

☞ The Woonsocket branch of the Boston, Hartford and Erie road earned in 1865, $18,868 97 less than its expenses. This branch is thirty-four miles long.

American Railroad Journal.

Saturday, March 3, 1866.

Stock Exchange and Money Market.

We are satisfied that the real dangers to which this country is yet most exposed, and against which we have mainly to guard, are those of finance. In other words, that the monetary condition of the country requires more consideration and care than any other question. It is true that political agitation, is for the time being, very exacting, very engrossing; it seems as if ready to engulf and swallow up even the most revered institutions. We have witnessed many times before a very intense feeling in the Nation under the influence of party excitement. Certainly there never was a fiercer condition of opposing sentiment than occurred during the struggle on the Missouri compromise. That again, with regard to Kansas, actually took the shape of a local war as a part of the question running to the extreme of party excitement and rage, and ready to do its worst. Yet both these questions were settled in their turn, and have given way to still more important ones which are also being settled by our old and reliable philosophy, the "logic of events," and by force. *But* political economy, which is after all the science of our material interests, steps in as a sound regulator and needed balance wheel, and by its inexorable movement and counteraction of forces, compels men to think, to pause, to legislate and to reform. In this JOURNAL of October 25, 1862, we endeavored to show that this principle would decide the contest with the South, and that political economy should alone decide it in our favor. We did not even allude to the question of slavery as the disturbing element. This article was republished by the league publishing committee of this city, as a part of its series, and has since, as we know, found favor at the South from the nature of the arguments used, which were not partizan, not heated, not in the interest of any class, but which could be understood and appreciated by all reflecting persons. We then said that "under the surface of all National glory, under all the glare of Governments, and all the patriotic devotion of loyal citizens to their country, there is at the bottom a common sense principle on which even the noblest sentiments and the very obligations of duty rest." In other words, however great or honorable may be the character or conduct of any people, it will be found that whatever is admirable has arisen out of and from their material stability, the constant development of their resources, the extension of their enterprise, their uninterrupted progress, and their security in "life, liberty and the *pursuit* of happiness." "Take these away from any Nation, and it retrogrades at once into anarchy, or sinks into the grave of oblivion. All the renown we have gained hitherto, has been accompanied by a solid and accumulating success, the result of our enterprise and industry, of our natural resources developed, of our genius for appreciating them, and a Government strong enough for their protection." In this spirit it is that we have written on finance during the whole of the late struggle, and have had confidence in its result. In this spirit we have watched the operations of the Treasury, and study its policy now. It is with these convictions that we stand by the measures of the Secretary, founded on the immutable principles of honesty and justice, the real interests of industry and commerce, of public and private morals.

The necessities of war compelled us to renounce for a time the usual honest forms of business. We issued obligations to pay money to be raised in future years, without immediate provision for its payment, currency nominally of par value, and compelled its circulation at that rate when it was not actually worth more than 30 cents on the dollar; we in fact, committed one of the greatest crimes of National power, for the debasement of coin is no more nor less a wrong than ours has been; and as a consequence we have subjected the people to a system of taxation more rigorous, searching, and often unequal than is known to any other civilized Nation. The four or five hundred millions of dollars now annually taken from

the earnings and savings of the people are so much taken from their wealth, and are going into the hands of the non-productive classes by the force of accumulation. A large portion of this is destined to become the wealth of unfriendly foreigners, and to become that of Nations which are willing enough that we shall be their debtors and dependents.

To return then to the spirit and teachings of the article of 1862, already quoted, we may see that the danger of the country is in its finance, in the disturbance of its material interests, and therefore in the actions of those parties whose conduct endangers them. Though no particular admirer of the policy of Mr. Seward, we cannot withhold our admiration of the philosophic temper with which he recently spoke at the Cooper Institute. He very calmly regards our difficulties as sure to be settled in the course of time. He looks with a sort of contempt at the ephemeral nature of political power, of the short-lived greatness of Presidents and Secretaries, and the certainty of a solution of our political troubles in due season.

"Time and the hour run through the roughest day," though the day may be extremely stormy. It is not so certain that others are as willing to be the prisoners of hope as Mr. Seward; on the contrary, it is to be feared that a very different spirit prevails, and that measures may be followed up which will necessarily impair the material interests which we contend are the foundations on which the best Governments repose. Thus two measures in particular have endangered the future to a very great extent; the one, the refusal thus far of Congress to permit the return of eleven States to the Union, although we fought to bring them back—successfully too; and the other, the attempt to establish an enormous and expensive system of regulating the labor of the freedmen of the South, interfering with the interests of employer and employed, filling the land with swarms of officeholders, under a pretence of benevolence, and taxing the people from twenty to fifty millions a year to keep up this system.

The loyal States cannot bear this enormous additional drain; rich as they are, they have to work; the earth has to be stirred up annually, or it does not yield its fruits. The South is bound to contribute its share of the common burdens but yet there is a party in Congress which is determined to prevent this result. We are told there shall be no representation from these eleven States, and we see thus far there is no taxation. Till there is restoration, there will be but limited cultivation and little production; with small production there will be small taxation, and indeed beyond the revenue collected at a few Southern ports, the receipts into the Treasury are trifling, and will continue so to be.

And yet we have legislators who are willing to shut off the supplies of these eleven States forever; and if not forever, yet for a long period, while they are willing to tax the other States from twenty to fifty millions a year to keep up a political scheme of their own in those States.

No Secretary can work miracles in this material age, without the means. One-half the resources and some of the greatest natural and most valuable products of the country are to be excluded from his calculations as a resource, until extreme parties are sure of a future triumph by the exercise of the old tyrannical principle of ostracism. Against any such policy we protest. It is a wrong to the credit and resources of the country, a direct attack on its good faith, when it has all along declared to the world that the Union had not been dissolved, and should not be; that the States were still one, though separated for a time, and that their whole wealth and industry were pledged, and should be employed to meet the public engagements. This solemn engagement to which the Government has always been pledged, is now sought to be violated. If the Union was worth what it cost, what we have said it was worth, what it *has* cost to maintain it, it must be retained, and now by the arts of peace. War has done its entire and dreadful duty, conciliation and forgiveness always follow in the train of wise and enlightened victory. The Romans did not hesitate to incorporate vanquished Nations into the empire, we should not refuse to acknowledge our own repentant brethren, who are ready once more to keep step with us to the music of the Union.

Finally, we repeat that the question of finance really underlies everything just now, and we should not look with complacency on any political action which is likely to endanger our present stability by further disruption, or the injury of our returning material interests.

We notice the gradual decline of gold the previous week, and a tendency downwards. The dealers in gold after all, only want a margin to play with. It is of no consequence to *them* whether the range is between 30 and 35, or 40 and 45. They can make as much money in the one case as the other. But the people gain largely by the appreciation of the paper dollar. It makes a very great difference whether a man can get 5 or 6 more loaves of bread for his dollar to-day than he could yesterday; and this is a material question which every consumer can appreciate. Mr. McCulloch understands this perfectly, and as gold declines, he finds less and less embarrassment with his currency. It is of less consequence as to the amount of paper which can be kept afloat, for that will be regulated finally by the demands of business and the wants of commerce, than that it should be sound and redeemable. There is no doubt we can employ more paper usefully than any other nation in the world, but there is no reason or necessity for our using a depreciated currency one day longer than the necessity requires. Mr. McCulloch, happily for us, recognizes the soundest principles of finance, which is in fact a study of morals as well as business. We should never forget this.

Governments stand firmly both at home and abroad, and in London are far ahead in character, to consols themselves. There is considerable inquiry for railway securities, which if we have no fresh political disasters will be sure to come up to their proper value. Every man who holds a dollar of any monied security is bound to give his whole heart and influence to the speedy restoration of the Union. This is the skeleton key of our finance and of our prosperity. It is nothing less than treason to postpone it unnecessarily for a single day.

The New York exports, exclusive of specie, for the week ending February 27, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$5,168,465	$3,199,051
Prev. reported	32,204,167	32,028,187
Since January 1	$32,367,632	$35,227,238

The New York imports compare as follows:

	1865.	1866.
Dry goods	$1,128,584	$4,619,244
Gen. merchandise	2,044,077	2,651,599
Total for the week	$3,172,661	$7,250,843
Prev. reported	13,861,353	39,878,303
Since January 1	$17,034,014	$47,129,146

The balance in the Sub-Treasury on Wednesday was $106,128,646.

The Great Railroad Controversy.

The case of the Philadelphia and Erie Railroad Co., and the Pennsylvania Railroad Co., *vs.* the Catawissa Railroad Co., the Atlantic and Great Western Railway Co., and the Philadelphia and Reading Railroad Co., was decided in Philadelphia on the 26th ult., by Judge Read, of the State Supreme Court in favor of the plaintiffs—the injunction prayed for being granted. The purpose of the suit was to test the validity of the contract by which the Catawissa Railroad was leased to the Great Western for 999 years, at a fixed rent of $1,000 per day. During the time of the trial it was announced that the decision, whichever side it favored, would not end it. Now, however, the decision of Justice Read, being so very decided on all material points, it is pretty generally conceded that the decision, so far as the Courts are concerned, is final. On the strength of the validity of the contract the preferred stock of the Catawissa road advanced to nearly par; and after many fluctuations in prices during the progress of the trial, on the announcement of the decision, which was against the validity of the lease, sold largely as low as 32 for the preferred, and about 26 for the common.

The Philadelphia *Ledger* of 1st inst., says that there is, since the decision, a more pacific relation, between the litigant parties, and some probability exists that an arrangement will be made by the Great Western with the Philadelphia and Erie Railroad Co., that will give to the former the right of way over the latter's road—either by transhipment at Corry or by the substitution of a third rail on the Philadelphia and Erie road.

Reno, Oil Creek and Pithole Railroad.

We learn from the Reno *Times* that gangs of workmen are engaged on the line between Rouseville and Plumer, and the grading is nearly complete. Ties and rails are laid most of the way, as far as the Humboldt Refinery, where it is probable there will be a station and switches. To build the several bridges over Cherry Run is now the principal task. The piers of the bridge at McClintockville are being filled with stone, and the rails are laid entirely across.

Another locomotive for this road has arrived and been put to service. It is from the Locomotive Works of Danforth, Cooke & Co., Paterson, N. J. Four new locomotives are now in operation upon the new line, beside the second-hand construction engine that was the pioneer. Work is rapidly going forward upon the line.

Memphis, Clarksville and Louisville R. R.

The work of repairing this road south of Cumberland River, is being pushed forward as fast as circumstances and the means at the disposal of the receiver will permit. The Tennessee and Cumberland River bridges have been let out to Bristol & Co., who have also contracted to rebuild all the defective trestle work between Clarksville and Paris. The roads will be in running order from Clarksville to Paris, and all connections completed by the first of April, with the exception of the bridge across the Tennessee River, which will be finished by the first of July.

☞ Of the $383,680 of certificates of indebtedness issued by Wisconsin under the law of last winter, all but about seven thousand dollars have been redeemed at the State Treasury.

Portland and Rochester Railroad.

The Legislature of Maine has amended the charter of this company, allowing them to change the location of their road, and extend it as they deem best, also empowering the city of Portland to subscribe to not over $300,000 of stock, provided $150,000 be taken otherwise. The Boston *Journal* says "the road will be built to Alfred the coming season and it is thought will reach Rochester next summer. If continued to Nashua, as intended, Boston will lose much of the trade of Portland, which will go to New York. The enterprising managers of the Eastern, the Boston and Maine and the Portland, Saco and Portsmouth roads should be wide awake if they would counteract the new movement."

Interest and Dividends.

The Chemung Railroad Company will pay a dividend of three per cent. on demand, free of the Government tax, at the Treasurer's office, No. 9 Broad street, Room No. 11.

Interest on the bonds of the Central Railroad and Banking Co., of Georgia, due 1st March, will be paid at the National City Bank of New York.

The Pacific Mail Steamship Co., have declared a quarterly dividend of five per cent., payable Feb. 28.

The coupons on the bonds of the Cleveland and Pittsburg Railroad Co., due March 1, will be paid at the Ocean National Bank.

☞ The Wilmington (N. C.) *Journal* notices the arrival at that port of 175 tons of iron for the Wilmington and Manchester Railroad, and also 175 tons for the Wilmington and Weldon road, both from New York. The Presidents of the two companies are now at the North, making arrangements for the complete restoration of their roads, so as to place them in a condition to accommodate the public, both in travel and the freighting business, on a more ample scale than can be expected of them at present.

☞ An act was passed by the Legislature of this State on the 19th ult., authorizing the city of Utica to take stock in the Utica, Chenango and Susquehanna Valley Railroad, and to sell its bonds to provide for the payment thereof. The amount not to exceed $500,000, for a term not exceeding 20 years, at a rate of interest not exceeding 7 per cent. per annum. The acceptance or rejection of this act is to be decided by the citizens of Utica at the polls on the 8th, 9th and 10th of March.

☞ The Jackson County *Banner* says that the Tomah and Lake St. Croix Railroad Co., have made a new arrangement with the contractor, Mr. D. A. Baldwin, of New York, which "secures the expenditure of $25,000 in grading and ties upon the *east* end of the road before the first day of June, 1866; the completion of one-third of the entire line on or before May 5, 1867. Mr. Baldwin is backed by prominent and heavy capitalists connected with the Pennsylvania Railroad, and the assurances are that *the road will be built.*"

☞ The bill incorporating the Valley Railroad Co., also the bill to incorporate the Lynchburg and Danville Railroad Company, has passed both branches of the Virginia Legislature. The former with an amendment prohibiting the construction of the road beyond a point within twenty miles of the Virginia and Tennessee Railroad.

Finances of Wisconsin.

The following abstract of the message of the Governor to the Legislature of Wisconsin, will show the financial condition of the State, September 30, 1865. At that date the whole amount of the State debt was as follows:

State bonds held by individuals	$747,700
" " " trust funds	194,100
Certificates of indebtedness, trust funds	700,000
Temporary loan from trust funds	663,000
Currency receipts issued by treasurer	359,753
Total State debt	$2,664,553
Of which there is due to the school fund	$156,100
" " " Normal school f'd	313,000
" " " University fund	88,000
Whole amount due trust funds	$1,557,100

Of the State Bonds, $568,200 have been taken up and cancelled by the State during the year.

Provision has been made for the payment of $528,000 of the temporary loans of the Trust Funds, and the receipts ($359,753) issued by the State Treasurer, from the taxes collected for 1865.

Both amounts will be paid in February next, and when paid the State debt will amount to $1,776,779, a little more than two dollars for each individual in the State.

The balance of the temporary loan from the Trust Funds, $135,000, was made after the levy of the tax for 1865.

The revenues of the State for the fiscal year 1865–'66 are estimated as follows:

Balance in Treasury, Sept. 30, 1865.	$185,263 01
Bank tax (estimated	36,000 00
From Railroads and Insurance Co's.	196,000 00
Tax on suits, licenses and boarding U. S. convicts	4,500 00
Trust f'ds, available for war purposes	200,000 00
State tax	900,278 76
Due from the U. S. on war claims	160,000 00
Total revenue	$1,682,041 77

There was received during 1865, from the United States, on account, the sum of $300,238 26.

The Secretary of State estimates that the whole amount of expenditure from the State Treasury for this fiscal year will be $1,677,900, for the following purposes, for current expenses of State Government, viz:

Salaries and permanent appropriat'ns	$64,450 00
Legislative expenses	70,000 00
Miscellaneous expenses	57,650 00
	$192,100 00
Balance due on corporations	$61,800 00
Appropriations not anticipated	30,000 00
Interest on State debt	160,000 00
Payment of temporary loan	528,000 00
Due on currency receipts	384.000 00
State Prison & charitable institut'ns.	122,000 00
War expenses	200,000 00
Total expenditures	$1,677,900 00
The whole amount received into the General Fund during the last fiscal year was	$1,918,615 49
Balance in the fund Sept. 30, 1864.	32,349 85
	$1,650,965 34

The disbursements amounted to $1,491,536 20. Balance in the fund Sept. 30, 1865, $159,429 14.

The whole amount expended during the year for ordinary State expenses was $234,687 14, of which $88,000 were for the last Legislature.

There was paid to the State Prison and charitable institutions the sum of $127,325 50.

The balance of the disbursements were for transfers to other funds, payment of State debt and interest, and for other extraordinary purposes not connected with the usual expenses.

The amount of productive Normal School Fund on the 30th of September, 1865, was:

Due on certificates	$130,547 87
" mortgages	186,034 00
" State bonds and certificates of indebtedness	278,000 00
Total	$594,581 87

The receipts and disbursements of this fund during the last fiscal year, were:

Receipts—transferred from other funds.	$95,653 89
Disbursements—$88,000 being loans	91,805 55
Balance Sept. 30, 1865	$3,848 34
The receipts of the Normal School fund income for the last fiscal year were	$12,225 34
Disbursements for the same year	1,955 05
Leaving a bal. in the f'd Sept. 30, 1865.	$10,270 29
The amount of productive Drainage F'd was at the close of the last fiscal year.	$56,399 79
The receipts during the year were	27,824 24
	$74,223 93

The disbursements were:

Loans	$12,682 00
Transferred to Normal School Fund	14,324 22
Delinquent tax and printing	257 59
Total	$27,209 71

The receipts of the Drainage Fund income for the last fiscal year were:

For interest	$4,989 38
Transferred from Swamp land income.	7,701 25
Total	$12,690 63

The disbursements were:

Apportioned to counties	$9,621 21
Clerk hire, appraising, etc	1,638 29
Refunded	268 54
Transferred to Normal School F'd inc.	1,334 65
Total	$12,872 69

The amount of the School Fund at the close of the fiscal year, was:

Amount due on lands sold	$675,037 11
" mortgages	289,122 75
" from State on bonds and certificates of indebtedness	1,000,700 00
Total	$1,964,859 86

The receipts for the last fiscal year were:

For sales of land	$31,029 31
Dues on lands paid	188,495 62
Loans paid	132,176 95
From the United States 5 per cent.	148,784 06
Taxes	22,628 06
Penalties, fines refunded & transfer'd.	5,186 30
Total	$528,300 00

The disbursements were for:

Loans	$480,778 00
Delinquent taxes	21,309 20
Advertising and printing	3,329 82
Refunded items	1,746 79
Transferred to Normal School Fund	14,170 58
Total	$521,334 19

The interest accruing from the school fund, together with 25 per cent. of the income of the Normal School Fund, constitutes the School Fund Income, the receipts of which during the fiscal year were:

For interest	$158,042 47
Transferred from Swamp Land Fund.	3,224 49
Penalties, sales of Dictionaries and timber	2,014 52
	$163,281 48

The disbursements are as follows:

Appropriated to the State Sup't	$151,816 34
Transferred to other funds	4,237 46
Refunded interest	8,551 26
Dictionaries	800 00
Clerks in land department	8,552 32
Protecting lands from trespasses	2,739 89
Appraising forfeited mortgage lands.	221 40
Printing, advertising, etc	891 20
	$177,809 87

The cost of the care of the school lands and the management of the fund during the year, amounted to $95,734 43.

The receipts of the Swamp Land Fund during the last fiscal year were, $91,411 40. The disbursements for the same period, mostly transferred to other funds, were $95,391 13—leaving the fund overdrawn $2,625 26.

The receipts of the Swamp Land Fund Income for the fiscal year amounted to	$19,463 20
Balance in fund, Sept. 30, 1864.	2,683 72
	$22,146 92

The disbursements for the same period amounted to $21,964 07, mostly transferred to other funds.

The proceeds of the sale of lands, granted by Congress for the support of a State University, constitute a University Fund. The amount belonging to this Fund, September 30th, 1865, was $160,780 55. The receipts of this fund on account of sales of land, &c., was $47,581 42, and the disbursements $44,156 56.

The receipts for the University Fund income, for the last fiscal year were, for interest $11,757 77. Disbursements, $12,718 39.

The whole cost of managing this fund and protecting the University Lands for the fiscal year, was $1,047 60.

The balance of the fund for sick and wounded soldiers is $22,059 84. Balance of the Governor's Contingent Fund, $2,657 84.

The receipts of the war fund for the last fiscal year were as follows:

Loans from the trust fund.	$818,000 00
From the United States	300,238 26
State tax for war purposes	200,000 00
Semi-annual payments in State b'ds	44,677 25
Refunded items	1,413 68
Total	$1,364,329 19
Balance in fund Sept. 30, 1864.	2,173 87

Disbursements were for:

Extra pay to soldiers	$1,030,537 36
Transfer to other funds	2,087,165 75
Interest on war bonds	75,040 00
Labor in State Armory	917 50
Clerk hire, printing, etc	25,475 58
	$1,340,669 19
Balance in fund Sept. 30, 1865.	$25,833 87

There has been paid out of the State Treasury, for war purposes, since the beginning of the rebellion to the first day of January, 1866, not less than $3,900,000.

There has been raised by counties, cities and towns for war purposes, up to June 1st, 1865, $7,752,505 67. Total expended by the State, $11,652,505 67, $762,402 09 of which has been reimbursed by the General Government.

The five per cent. due the State from the United States, on account of sales of land within this State, so long withheld in consequence of an unsettled claim against the State of money received by the Territory of Wisconsin for lands sold,

heretofore granted by Congress to aid in the construction of the Rock River Canal, has finally been paid and a full settlement obtained.

The amount received on the 17th day of May, 1865, as balance due to that date, was $148,784.06.

On the 18th day of November last $5,670 28 was received, being the amount which had accrued since the date of settlement, all of which has been placed in the proper funds.

The whole amount of taxable lands in the State is, 17,563,316 52 acres. The aggregate valuation of which is $91,433,693 64. Aggregate valuation of city and village property $33,151,291 10. Aggregate valuation of real property is $124,604,984 64.

During 1863 there was collected $382,130 State tax, and $2,245,697 48 county, town and city tax. The total being $2,627,827 48. The whole cost of collecting these taxes was $230,895 73, being about nine per cent. Of this sum $160,000 were paid to town treasurers. During the year 1864 the taxes were very much greater. From the returns of the assessors, made pursuant to section 5, chapter 471 laws of 1865, it appears that the whole tax collected was not less than $7,000,000, the cost of collecting which was not less than $400,000.

The Commissioners of School and University Lands report that there were sold, during the last fiscal year:

School lands	41,480 37 acres.
Swamp land	40,669 99 "
University lands	3,371 62 "

Chapter 537 of the general laws of 1865, repeals all existing laws relating to the proceeds of sales of, and to the granting of swamp and overflowed lands to counties, and directs that all such lands heretofore and hereafter received by the State, and moneys received or due for such lands, or in lieu thereof, shall be divided into two equal parts, one to be denominated the Normal School Fund, and the other the Drainage Fund.

The Commissioners of School and University Lands are charged with the duty of making the partition, and were directed for that purpose to take one dollar as the equivalent for an acre of land, and having determined the amount of each fund, they are required to divide the Drainage Fund, between the several counties of the state in proportion to the number of acres of swamp land in each county, and having thus determined the share of each county, they are required to set apart such share in the manner indicated by the law cited. The division made according to the terms of the law, gives to the Normal School Fund nearly all the productive funds which have arisen from former sales of swamp lands, and gives to the counties, for their share, lands only, with a few exceptions, where there was not sufficient unsold land in counties to make up their proportion. The lands belonging to the counties or Drainage Fund are directed to be sold for cash and the moneys transmitted to the county treasurers each year, to be divided among the towns in each county in proportion to the amount of swamp land in each.

The lands belonging to the Normal School Fund are to be sold as usual and the proceeds placed to the credit of that Fund.

The revenue accruing to the School Fund from the Swamp Land Fund, is by the provisions of this law cut off, the Swamp Land Fund being abolished, but in lieu thereof, twenty-five per cent. of the income of the Normal School Fund is to be annually transferred to the School Fund Income, until that income shall reach the sum of $200,000 annually.

The Commissioners of School and University Lands report the whole amount divided to be 2,218,854 13 acres and dollars, and the amount of the Drainage Fund to be 1,109,427 06 acres and dollars, of which amount 1,034,103 65 are acres of land which have been set apart to the various counties, in proportion to the number of acres of Swamp Land in each county; 56,039 72 are dues on contracts for the sale of Swamp Lands, and $414 21 money, all of which has been set apart to such counties as were, in the partition, entitled to the same. The further sum of $18,819 48 is due to various counties, to be paid from the proceeds of the first sales of Swamp Lands.

The Normal School Fund received 504,595 36 acres of land.

Which represents	$504,595 36
For dues on contracts	129,964 87
Forfeited mortgaged Lands as appraised	34,625 25
Investments in bonds and certificates of indebtedness and mortgages	459,061 07
	$1,128,246 55

Which amount is subject to the claim of the drainage fund of $18,819 48, to be paid from the first sale of Swamp Lands.

This law puts at rest forever, all questions connected with the disposition of swamp lands, and has given to each locality its share, the proceeds of which can be managed by the citizens thereof to suit themselves, and renders the citizens of each town directly interested in the sale and protection of the lands, and endows the Normal School with a fund sufficient to enable the Regents to eventually establish one Normal School in each Congressional District.

From the report of the Superintendent of Public Instruction it will appear that the number of children in the State over four and under twenty years of age is 335,582, of which 223,067 only attended public schools. Number of teachers employed 7,532, at an average cost for male teachers per month $36 45; female teachers $22 24. The total amount apportioned for school fund was $151,816 34, and the total amount expended during the year for the State School Fund, $1,036,068 57. Value of school houses and sites, $1,669,770 06.

The Bank Controller reports that the whole number of State Banks doing business on the 1st day of October, 1864, was 64, with an aggregate capital of $3,003,000

Whole number Oct. 1st 1865, 21, with an aggregate capital of	801,000
Decrease of banks, 43, and of capital	$2,202,000
The whole amount of securities held in trust for bank'g associat'ns Oct. 1, 1864, was	$2,264,669 98
The amount held Oct. 1, 1865, was	284,157 20
Decrease in 12 months	$2,380,512 78
The amount of circulation outstanding Oct. 1, 1864, was	$2,560,673 00
The amount Oct. 1, 1865	274,734 00
Decrease in 12 months	$2,285,939 00

The number of railroads making reports to the State is 8, having a total length of 1,638 miles.

Capital actually subscribed	$33,849,478
Number of through passengers	280,205
" way passengers	1,622,688
Amount received for transp	$10,139,517 69
" " passengers	3,044,045 60
" of taxes paid	362,088 48

There were 80 Fire, Marine and Life Insurance Co's doing business in the State the past year with a total am't of capital stock $53,707,265 57

Total assets	89,945,238 54
" liabilities	68,043,416 26
Total amount of premiums received in the State during the year 1864	1,929,064 21
Amount of tax paid during the year	31,419 40

The total amount expended on the State Capitol to date has been $321,295 23.

The number of County Agricultural Societies which report to the Secretary of State in accordance with the provisions of section 4, chapter 55 laws of 1858, is twenty-one, the total receipts of which amounted to $12,265 10—amount paid on premiums, $5,085 94.

The following is a list of some of the most important products of the State for 1864, with their valuation:

		Value.
No. of bushels of apples	113,649	$119,619
" wheat	8,842,466	9,188,013
" barley	385,047	416,432
" rye	430,028	374,116
" oats	9,563,480	4,515,809
" buckwheat	246,048	177,605
" corn	7,210,434	4,568,494
Tons of hay	611,247	5,056,714
Cattle and calves on hand	447,898	6,459,526
Hogs on hand	327,234	1,144,565
Horses and mules	143,511	10,069,150
Sheep on hand	1,038,999	1,915,248

The receipts of the State Agricultural Society in 1865, were $11,404 90; and the disbursements, $8,330 52—leaving $3,074 38.

☞ The Titusville and Union Railroad Company are asking of the Pennsylvania Legislature an extension of the time for the completion of their road from a point at or near Centreville, to a point at or near Union Mills, for one year from March 22, of the present year. The bill also gives the company the power to extend the main line of their road from Centreville, by the most direct and practicable route to the mouth of Pithole Creek, the same to be completed in two years.

☞ In addition to the proposed railroad from Cairo to St. Louis, another line from Cairo to Vincennes, Ind., is mentioned, by which it is proposed to make a broad gauge connection with the Ohio and Mississippi Railroad, and thus secure a direct route to New York.

☞ The Cincinnati Chamber of Commerce have resolved that it is expedient for the city of Cincinnati to contribute $11,000,000 as a bonus to any association of capitalists who will speedily furnish a first class railroad between Cincinnati and Knoxville, Tenn.

☞ Mr. Dodge, chief engineer of the Winona and St. Peter Railway, has been engaged in surveying the proposed railroad line which is to connect the Milwaukee and St. Paul railway with Winona. It is reported that he has nearly completed the survey.

☞ The bill chartering the Newark and New York railroad company has passed the New Jersey Senate by a majority of two. It had previously passed the House.

☞ A bill granting State aid to a railroad on the west side of Lake Champlain, from Plattsburg to Montreal, is now before the Legislature of this State, and has been reported upon favorably by the Railroad Committee of the Assembly. The bill provides for payment by the State of $5,000 per mile, from time to time, as ten miles of the road are built and ready for operation. The road is to be completed in two years. This road will bring New York city fifty miles nearer to Montreal, and will turn the great tide of commerce from the North and West, that now seeks tide water at Boston and Portland, to New York *via* the Hudson River.

Journal of Railroad Law.

The case of Malden and Melrose Railroad Co. *vs.* City of Charleston, recently tried in Massachusetts, decides that if the expense of keeping a bridge in repair is imposed by statute upon several towns and a railroad company jointly, with a provision that the municipal authorities of one of the towns shall have the care and superintendence of it, and shall employ all services necessary in the care of it, no action lies against said town, in favor of the railroad company to recover for damages as sustained by the latter in consequence of a defect in the bridge.

The action was brought by the Railroad Company to recover for damages to the plaintiff's cars, and for damages recovered of the plaintiffs by passengers therein sustained by reason of their cars coming in contact, on Malden Bridge, in Charlestown, with a swinging gate, which the defendants had carelessly left unfastened. The declaration contained several counts. After the plaintiffs had opened their case in the Superior Court, Allen, C. J. ruled that, upon the true construction statutes upon which the liability of the defendants depended, the plaintiffs were not entitled to recover, and ordered a verdict for the defendants, which was returned accordingly; and reported the case for the determination of the court.

HOAR, J. The foundation of this action, in all its forms of declaration, is the liability of the defendants for an obstruction, defect and want of repairs in and upon the Malden Bridge; and if they have no responsibility for the condition of the bridge, except jointly with the plaintiffs, it is manifest that the action cannot be maintained.

The bridge, where the obstruction was found and the injury to the plaintiff's car occurred, was situated in the city of Charlestown. By Gen. Sts. c. 44 § 1 "highways, townways, streets, causeways and bridges shall be kept in repair at the expense of the town, city or place in which they are situated, when other provision is not made therefor," and by § 22 of the same chapter, if a person receives bodily injury or damage in his property, through a defect or want of repair in a bridge, he may recover the amount of damage sustained thereby, of the county, town, place or persons obliged by law to repair the same.

By referring to St. 1859, c. 99, § 2, it appears that "other provision" is made for the repair of this bridge, than the general obligation imposed upon the city in which it is situated. That section expressly provides that "the said bridge shall be kept in repair at the expense of the city of Charlestown." Six other towns named, "and the Malden and Melrose Railroad Company" The same statute provides the manner in which the expense shall be apportioned and assessed upon the several corporations thus jointly made liable; and by § 6 it is directed that the "Mayor and Alderman of the City of Charlestown shall take the care and superintendence of said bridge, and shall employ all services necessary in the care thereof." We think this provision does not affect the responsibility of the defendants for the maintenance of the bridge. The several corporations required to pay the expense of maintaining it having no common agents or officers to whom the duty of taking charge of it could be conveniently assigned, the Mayor and Aldermen are designated for that purpose.

But they are made the agents of all the parties who are required to support the bridge, and not one of them exclusively.

A city, town or county is not necessarily responsible for the care and fidelity of its officers in the execution of duties imposed on them by law. If the care of this bridge had been intrusted to the county commissioners of Middlesex county, it would not have made the county liable for its condition. The responsibility for the safety and convenience of the bridge, and the liability to pay the damages occasioned by defects or want of repair in it, being by law imposed upon the parties "obliged by law to repair it" and the plaintiffs and the defendants being each one of these parties, one of them cannot maintain an action against the other founded upon a common neglect of duty.

Judgment on the verdict.

Railroad Earnings.—Weekly.

The traffic of the Great Western Railway for the week ending Feb. 23, 1866, was as follows:

Passengers	$24,933 11
Freight and live stock	41,134 71
Mails and sundries	2,414 35
Total	$68,482 17
Corresponding week of 1865	31,066 27
Increase	$37,415 89

The earnings of the Grand Trunk Railway for the week ending Feb. 17, 1866, were:

Passengers	$26,273 00
Express, freight, mails and sundries	4,750 00
Freight and live stock	69,625 00
Total	$100,648 00
Corresponding week, 1865	90,426 00
Increase	$10,222 00

The earnings of the Chicago and Northwestern Railway for the third week in Febuary, 1866, were $81,911 90
Corresponding week of previous year. 125,248 76
Decrease $43,336 86

The earnings of the Western Union Railroad, for the week ending Feb. 14, 1866:

	1866.	1865.
From freight	$6,778 68	$7,449 47
" passengers	2,867 85	2,680 52
" express	130 22	162 80
" mail	296 58	296 58
Total	$10,073 33	$10,589 37

Receipts from Jan. 1, to Feb. 14:

1866	$64,555 43
1865	62,318 85
Increase	$2,236 58

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Feb., 1866, were $56,988 00
Corresponding week of 1865 87,962 00
Decrease $30,974 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in February, 1866, were $43,470 00
Corresponding week of previous year.. 52,937 00
Decrease $9,467 00

The earnings of the Michigan Central Railroad for the 3d week in Feb., 1866, were. $57,200 00
Corresponding week of previous year.. 65,523 00
Decrease $8,323 00

Pacific Mail Steamship Company's
THROUGH LINE TO
CALIFORNIA,
And Carrying the U. S. Mail,

LEAVE PIER NO. 42 NORTH RIVER, FOOT OF Canal Street, at 12 o'clock noon, on the 1st, 11th and 21st of every month (except when those dates fall on Sunday, and then on the preceding SATURDAY), for ASPINWALL, connecting, via Panama Railroad, with one of the Company's steamships from Panama for SAN FRANCISCO, touching at ACAPULCO.

March.		Connecting with
1st	ARIZONA,	GOLDEN CITY,
10th	HENRY CHAUNCEY,	COLORADO
21st	NEW YORK,	CONSTITUTION.

Departures of 1st and 21st connect at Panama with steamers for SOUTH PACIFIC PORTS, 1st and 11th for CENTRAL AMERICAN PORTS. Those of 1st touch at MANZANILLO.

Baggage checked through. One hundred Pounds allowed each adult.

An experienced Surgeon on board. Medicines and attendance free.

For Passage Tickets or further information apply at the Company's ticket office, on the wharf foot of Canal Street, North River, New York.

3m9 F. W. G. BELLOWS, Agent.

MILO HATCH, For 20 years Cash'r Mech. Bank, Augusta, Ga.
CHAS. H. PHELPS, For 6 years Ag't and Cash'r Southern Express Co.

HATCH & PHELPS,
9 WALL ST., N. Y.
(Entrance, New Street,)
BANKERS, BROKERS,
AND
General Purchasing Agents.

New York, Saturday, March 10, 1866.

Our Consular System Commercially Considered.

It is well understood at the Department of the Treasury at Washington that we do not collect, by twenty millions per annum, as much revenue as we should upon our foreign imports. Many articles which come in from France and Germany especially, are invoiced below their real value; and on the face of the documents accompanying the goods there is nothing to discover any fraud when it is attempted. Very recently French wines and perfumery, and Belgian cloths, have been seized after considerable trouble and difficulty, and the revenue laws only sustained by tedious litigation.

One of the causes of this is to be found in the character of our consular agencies. For many years past it has been the practice of most incoming administrations to give these foreign consulates to mere partizans, and the more active and unscrupulous they were the better was their chance of success. And the consequence has been that these commercial agents have been of the most useless class of officials, ignorant of trade, commerce and manufacturers, unacquainted with international law, and generally devoid of any ability other than that which is required for exhibitions on the stump. A good Consul is a most important agent, and an efficient protector of the revenue. It is in his power to detect many frauds in their origin and nip them in the bud. If he is acquainted, as he should be, with the prices and home values of the goods which pass under his notice, and receive his official declarations, he could in most cases effectually protect the revenue from spoliation. Generally, however, the American Consul is totally ignorant of his duties and its requirements, and if not indifferent to them, he seeks and retains his position for the salary and fees which enable him to live abroad free of expense. He never thinks beyond this, and the commerce of his country is left to take care of itself.

In 1861 an association was formed in this city by a number of its most distinguished citizens to consider the condition of the commerce of the United States and "its most urgent necessities." James Gallatin, Esq., was appointed chairman.

On the 26th of July in that year he made an elaborate and able report on the subject. We find the following statement in that document. "Your committee are deeply impressed with the fact that the development of our commercial and industrial resources has occupied a very subordinate place among the objects which for a quarter of a century or more have engrossed the attention of the Government." A condition of things which the late war did not improve, but for which restored peace now no longer offers any excuse. We have reason to believe and to hope that the policy of the administration is shortly to be improved in this respect, and that large and liberal changes will be made in our diplomatic and consular corps. The British Government may in this respect be imitated with advantage. In August, 1860, Lord John Russell, issued a circular to her Majesty's Consuls at foreign ports which shows the care with which British commercial interests are studied. Among other things they were directed to inquire, what dues were levied on British trading vessels, and what restrictions were imposed on their free navigation; whether British ships were prohibited from bringing or taking cargo or passengers to or from any part of the world; to state whether any differential dues imperial or local were levied, and if so, their amount, whether they affected trade with the United Kingdom or Colonies, and whether under any and what circumstances drawbacks or repayments were allowed. They were also instructed to give a short analysis of any local laws and regulations affecting seamen. The information thus collected was published, and furnished the most valuable information to the merchants and ship owners; and from that day to this the British Government has used its whole power to enlarge its commercial operations, and has furnished material for successful diplomacy in the removal of restrictions and the reduction of foreign duties. Nearly all the tariffs of Europe have been reduced very greatly within the last two years in favor of Great Britain which is thus an exclusively favored nation, while on the other hand we are going on under old commercial treaties and conventions more than a generation old, and are losing the trade of the world without an effort to save it. We undertake to say that the American Government is almost wholly in the dark on all these subjects, that it has no precise information with regard to them, that there is not at this moment in a single department of the Government, copies of the tariffs of the countries as lately modified, that our merchants are not advised at this moment of the duties now charged on their goods in many parts of Europe, the East Indies or South America, and are left to obtain their knowledge at a loss of time and money.

So that the immediate and pressing want of the day is a revision of our Consular system as the first step towards a restoration of our commerce, and properly prepared reports from competent and active commercial agents. The few ponderous folios which are in existence are filled with useless local details of but little value, and are of no importance to the American merchant or ship owners. The man who should attempt any foreign transaction on the information derived from those volumes, would find he was running just as much risk as ever.

We are therefore free to express the conviction that if the commercial interests of this country are ever to be considered as worthy the attention of the politicians in power, the time is at hand for a change in our policy. We have been sending our bonds and securities pretty freely abroad, it is

high time we sent something else. We have ships and goods and an unlimited supply, but what we want to know is where they can be sent, on what terms, and under what restrictions, and what commercial agencies we may trust to look after our interests at the places of sale. We should be glad if the association in this city whose labors were suspended by the war, would resume their operations and give their aid to the Government. The various reports then resolved upon would be of great advantage to the Treasury and Commerce generally, andmig ht expedite the changes which are so imperiously demanded by the great and growing necessities of the country.

Western (Mass.) Railroad.

The receipts and expenditures of this road for the years ending Nov. 30, 1864 and 1865, have been as follows:

Receipts:

	1864.	1865.
From passengers	$1,148,818 31	$1,366,565 25
" freight	1,738,796 12	1,926,220 48
" mails, etc	111,884 31	138,798 37
	$2,994,998 74	$3,431,584 10
Expenses, viz:		
Repairs of roadway	$388,682 91	$427,804 17
" engines	149,705 34	179,079 21
" cars	234,575 73	274,148 10
" buildings, ferry, etc	86,419 75	85,331 80
Transportation exp	928,119 22	1,202,572 46
General expenses	30,638 76	28,989 84
	$1,818,141 71	$2,204,925 58
Net income	$1,176,857 03	$1,226,658 52
Add gain on P. and N. A. R. R		5,672 89
		$1,232,331 41
From this deduct—		
Interest on State loans and exchanges	$457,295 79	
One per cent to sinking fund	50,000 00	
Ten per cent. dividend	543,662 00	
Excise tax on dividends	28,613 77	
		1,079,571 58
Surplus carried to contingent fund		$152,759 85
Add balance of do. Nov. 30, 1864	$863,227 12	
Less Gov. tax on surplus of last year, and corrections on dividends	4,530 95	
		858,696 17
Total contingent fund Nov. 30, 1865		$1,011,456 02

Compared with 1864 the gross receipts show an increase of $436,585 36, with an increase in expenses of $386,783 87—making the increase in net earnings $49,801 49.

The receipts of the Pittsfield and North Adams Railroad were $102,931 25; and the expenses $71,410 61—leaving net earnings $31,520 64. One dividend of 3 per cent. amounting to $13,500, was paid, and the balance, $18,020 64, less $12,347 75 used to pay State tax, was carried to Western Railroad account as above.

The value of the Massachusetts sinking fund November 30, 1865, was $2,506,262 13; and of the Albany sinking fund $946,077 87—making the total value of both funds November 30, 1865, $3,452,840, against $3,153,046 52 in 1864—an increase in funds of $299,298 48. The report says:

The debts for which these funds are especially provided are as follows: $4,319,520 is expressed in Massachusetts Sterling, and $1,000,000 in bonds of the city of Albany. Of the latter $250,000 will become due on the first day of July next, and the balance in 1870—71 and '76. The Trustees of the Albany fund have in hand securities readily convertible into cash to meet the bonds of July next, and it is not too much to say, that in our opinion no funds or trusts can produce a better line of securities than are to be found in these two. In addition to the Sterling and Albany bonds, there has been issued under authority of an act of May 21st, 1855, $950,000 of bonds payable in 1875 which have been termed dollar bonds. These three classes of securities constitute the entire indebtedness of the Corporation. The Sterling bonds amounting to $4,319,520 and payable in gold, fall due in 1868–'69–'70 and '71 and it is submitted that a prudent foresight suggests the propriety of being prepared with all the means of the Corporation, should a favorable opportunity offer, for the liquidation, at any time, of a portion or the whole of this indebtedness. At the rate at which these bonds have been held in London, it is supposed that with the present rate of exchange they can be purchased by paying about twenty per cent. premium in currency. While it might not be advisable at present to make that sacrifice by purchasing on account of the sinking fund, it may become desirable to purchase for account of the Corporation, an with Legislative authority to is sue stock as these bonds shall be cancelled, an opportunity may offer when the entire indebtedness of the Corporation may be paid before maturity and stock substituted as the representative of its property.

The property of the Corporation, its roadway, iron and rolling stock, are in excellent condition. The aggregate of freight transportation during the year has been less than in 1864. From December to August, both inclusive of the present year, the amount of freight offered for transportation has been in each of the several months less than in the corresponding months of last year, and yet in the months of October and November last, the amount of freight forwarded eastward from Albany and Troy has been 29,975 tons in excess of that taken from the same points during the corresponding months of the preceding year. For a few days in the early part of November, this rush of freight overtaxed the means at hand for transporting it across the river at Albany. This however was soon relieved by the New York Central generously allowing us the use of some 400 of their cars to go through, *via* Troy, to Boston, without unloading, and before the close of the month all freight was forwarded as it arrived, with only the delay always heretofore incident to the unloading and carting at Albany. 53,118 tons being the amount forwarded during the months specified in 1864, against 83,093 tons for the same time in 1865. While the canal freights were during this period in no manner diminished, a much larger proportion than usual of the railroad freights from the west were destined for Boston; added to this sudden increase of freights, about thirteen thousand tons were grain in bulk, much of which was for connecting roads, and an article which from the unavoidable delays incident to unloading requires double the number of cars that would be needed for ordinary freights. From our position with reference to these connecting roads we must of necessity furnish to a great extent cars for the distribution of this as well as of every species of joint freight.

Hitherto grain in bulk has been carried in comparative small quantities to Boston, a point to which in view of facilities now at hand, more should go than to all others, and we believe that with the bridge at Albany completed so that cars can be loaded with this species of freight for Boston as readily at Buffalo, as at Albany, it will only require access to deep water and proper facilities for unloading and storage to make this a most important branch of our traffic. We are much gratified that our neighbors of the Boston and Worcester are moving in this matter, and we confidently expect that by the time the American Steamship Company shall be ready to load their ships for European ports, that they may have this only remaining link filled, so that an uninterrupted line of railroad may in fact exist between all the great cities of the West, and the Atlantic at Boston.

To meet the contingencies which the experience of the past year teaches us at any time to expect, although the bridge at Albany will give incalculable relief, and will in our opinion enable us to transfer to some more estern point any future blockade, we have already largely increased the building of freight cars, and are of opinion that it should be continued so long as any question remains of the ability of the Western Railroad to meet the full expectation of the public.

In our last annual report it was stated that the Hudson River bridge at Albany had been commenced and the belief expressed that before the close of the year its use would be secured to us. The magnitude of the structure has delayed its completion longer than we had hoped, but with the masonry for a double track now complete, and with a most substantial superstructure for a single track nearly so, there seems little doubt that we shall in a few days pass over it with our trains. Upon this structure with its approaches and adjoining real estate a million of dollars have already been expended, and a further considerable amount will be required to complete the contemplated arrangements of the bridge company. The property is owned in common by the New York Central, the Hudson River and the Western Railroads—one-half by the New York Central and one-fourth each by the Hudson River and Western.

The necessary preparations for pressing forward to completion the second track have already been made, and the work should be commenced with the opening of Spring. The whole distance over which a double track is now unfinished is forty miles, and two seasons should suffice for its completion.

It is obvious that to carry out the suggestions herein made, a considerable increase of capital will be required, From the stock issued in August last we have at hand the means of commencing, but it will be admitted by all that no important work should be commenced without full provision for the future, and it is submitted that for the purpose of completing and equipping the road, with some necessary increase of depot and storage accommodations, for the expenditures upon the bridge made and to be made, and should opportunity offer, to pay in advance of maturity any of the indebtedness of the Corporation, leave be obtained from the present Legislature to increase the capital stock to such an amount as may appear reasonable, or which, with the existing debt, may equal the cost of the property.

The equipment of the road consists of 78 locomotives, 39 8-wheeled first class and 6 8-wheeled second class passenger cars; 12 8-wheeled baggage, 863 8-wheeled box, 307 8-wheeled platform cars, 62 gravel and 46 hand cars.

The number of miles run by locomotives with passenger trains was 446,022; with freight trains, 864,240; with gravel trains, 48,252—total number of miles run, 1,358,514, a decrease from the previous year of 71,709.

The number of passengers carried was 1,010,373, of which 81,024 were through, and 929,349 way passengers. Of the through passengers 80,021 were first class, and 1,003 were second class. Of the way passengers, 929,267 were first class, and 82 second class. The whole number of first class passenger was 1,009,288; second class 1,085. The passenger traffic shows an increase of 78,658.

The number of tons of merchandise moved was 693,754; of which 500,130 were carried east, and 193,624 carried west. The through tonnage eastward amounted to 87,254; do., westward, 29,173. All other tonnage eastward, 412,876; do., westward, 164,451. Equivalent number of tons car-

ried one mile, 54,190,069—equal to 347,372 tons carried over the whole road. The decrease in merchandise traffic in 1865, was 22,818.

An aggregate of 98,116,557 passengers or tons of freight carried one mile in 1865, against 99,792,980 passengers or tons of freight carried one mile in 1864.

The cost of transportation for each passenger and each ton of freight one mile has been 2.247 cents against 1.822 cents in 1864; or assuming the cost of transporting each ton of freight to equal the cost of two passengers the same distance, we find the cost this year to be 1.447 cents per passenger, and 2.894 cents per ton for freight, against 1.154 cents per passenger, and 2.318 cents per ton for freight per mile in 1864.

The cost of the Western, Albany and West Stockbridge, and Hudson and Boston Railroads to November 30, 1865, has been as follows:

Western Railroad	$7,581,945 24
Equipment	1,095,712 97
Albany and West Stockbridge R. R.	2,388,359 22
Hudson and Boston Railroad	192,838 98
West Stockbridge Railroad stock	13,000 00
	$11,271,856 41

The means provided for the construction and equipment of the same has been as follows:

Capital stock	$5,627,700 00	
Sterling bonds	4,319,520 00	
Albany City bonds	1,000,000 00	
Total means	$10,947,220 00	
Amount paid sinking funds	459,578 62	
	$10,487,641 38	
Dollar bonds	950,000 00	
		11,437,641 38
Balance of construction fund unexpended		$165,784 97

Nova Scotia Gold Fields.

From the official reports published in the *Royal Gazette* we learn that operations are progressing in the districts of Stormont, Wine Harbor, Sherbrooke, Tangier, Montague, Waverly, Oldham and Renfrew. In the districts combined there were, in the month of October, 71 mines being worked, 681 men employed on an average, and 34 crushing mills in operation; there were 2,157 tons of quartz crushed, which yielded 2,389 oz. 3 dwts. 16 grs. In the month of November there were 78 mines being worked, 672 men employed on an average and 2,226 tons of quartz crushed, the total yield of gold being 2,012 oz. 14 dwts. 20 grs. In the month of December there were 67 mines being worked, 666 men employed on an average, and 2,320 tons of quartz crushed, the total yield of gold being 1,642 oz. 8 dwts. 3 grs. One crushing mill erected at Renfrew, was added in the month of December. The total yield of gold in the combined districts, for the quarter ending December 30th, 1855, was 6,044 oz. 6 dwts. 15 grs. being an increase over the corresponding quarter of 1864 of 586 oz. 18 dwts. 10 grs.

A Sea Ferry.

The travel is so great between London and Paris that a proposition has been laid before the British Parliament for the establishment of a railway ferry across the channel, similar to that at Havre de Grace, on the railroad between Philadelphia and Baltimore. The steamers are to be large enough to take on a whole railway train, just as it is done on the Susquehanna. It is expected that the passage will be accomplished in about one hour, and this hour is to be devoted to dining passengers and in the examination of luggage by the custom officers on either side, so as to avoid detention. The time from London to Paris is now ten hours, but the proposed plan is designed to reduce it to eight.

Northern (Canada) Railway.

The annual meeting of this company was held in Toronto on the 28th ult., when the report of the Directors for the year 1865 was read, and with the usual financial statements and traffic returns, laid before the proprietory. The report is a satisfactory one, and shows that the road is steadily prospering; the gross traffic receipts for 1865, amounting to $473,780 50 as against $467,266 15 in 1864, or an increase of $26,514 45. The ordinary working expenses for the year are stated at $275,841 00, and the net revenue applicable to dividends at $179,387 63, out of which a dividend of 6 per cent. on both classes of the company's bonds has been paid, and an additional dividend of 1½ per cent. on the second preference bonds and the balance of $5,893 88 added to the reserve fund. The expenditure during the year in maintaining the road and for the new works has been considerable, about ten miles of the track having been relaid, the property at nearly every station improved, and the carrying capacities of the company generally increased. Among the exceptional items, we find the cost of the Barrie branch, "with all its buildings and appurtenances," set down at $11,246 91.

The Missouri State Debt.

St. Louis, March 5.—Governor Fletcher has signed the bill which recently passed the Missouri Legislature, providing for the consolidation and payment of the bonded debt of the State. By the provisions of this bill all over due interest is to be funded and incorporated with the principal in new bonds and the payment of interest is to be resumed on the 1st of January, 1868. The bonded debt of Missouri, including unpaid interest, amounts to $30,000,000. It is estimated by the members of the committee by whom this bill was reported, that under its operation the entire State debt will be liquidated in twenty years.

Pennsylvania Railroad.

The following gentlemen have been elected directors of this road for the ensuing year: J. Edgar Thomson, Josiah Bacon, John Hulme, G. Rosengarten, Wistar Morris, Alexander Nimick, Pittsburg, Samuel T. Bodine, Joseph B. Myers, Edward C. Knight, and Washington Butcher.

Titusville and Union Railroad.

The contractors for the above road broke ground at Union Mills on the 19th ult. The road will be 23 miles in length, and it is said will reduce the distance between Erie and Titusville from 66 to 50 miles. It is expected that the road will be completed by the 1st of July. Cost, $180,000.

☞ Application is to be made to the Canadian Parliament for an Act to incorporate a company to construct a railway from New Market, Barrie, or other point on the line of the Northern railway, to the narrows of Lake Simcoe *via* Beaverton or Orillia, thence through the Muskoka District to Parry Sound and French River. Also for an act incorporating a new company to take up and complete the Hamilton and Port Dover Railway, from Caledonia to Hamilton.

☞ The Lafayette (Ind.) *Journal* says that the Louisville, New Albany and Chicago Railroad Company are making preparations to relay forty miles of the middle division of their track with the Compound Rail early this spring.

Richmond and Newport News Railroad.

On the 27th ult., in the Virginia Legislature, the Senate bill to incorporate the Richmond and Peninsular Railroad Company was taken up and passed. The bill provides that G. L. Thompson, James K. Wilkes, John E. Wilson, F. O. Prince, Samuel Sneeden, Edmund Pectrim, Frank O. Forbes, John O. Reid, Ambrose C. Dunn, Thomas H. Wynne, Stuart Gwynn, James Sellers and others, shall be incorporated the Richmond and Newport News Railroad Company with a capital of three million of dollars; that said company shall build and equip said railway from the city of Richmond to Newport News, with such guage as may connect with the Virginia Central railway and the York River railroad, with which it is authorized to connect, and they with it; that said road shall be commenced in six months and completed in two years; and if this company do not comply, any other persons or company who will comply shall be entitled to the charter; that said company according to the laws of Virginia, condemn land for their roadway, depots, &c., provided they shall not condemn more than two acres of land in the city of Richmond, nor more than fifty acres at any one point in the country below Richmond.

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of this road for the years ending October 31, 1864 and 1865, were as follows:

	1864.	1865.
From passengers	$2,423,088 83	$2,992,656 20

Leaving		$69,282 66
Balance to credit of revenue, Nov. 1, 1864		1,168,532 05
		$1,237,814 71

In addition to the above-named expenditures, there has been disbursed during the year on account of—

Susquehanna Bridge	$347,704 70	
Second track	163,063 81	
		510,768 51
Leaving balance to credit of revenue Oct. 31, 1865		$737,046 20

The details of the new work above alluded to are as follows:

New bridge	$35,212 72
" locomotives	363,447 63
" passenger cars	44,224 24
" freight "	18,347 04
" stations, buildings, etc	74,733 08
	$565,964 71

The new equipment added to the stock consisted of 15 locomotives, 16 passenger cars, 4 express cars, and 30 gravel cars. Nine miles of second track have been laid, and nine miles additional have been graded ready to receive the ballast. The Susquehanna Bridge has been prosecuted without intermission; five additional piers have been built, and made nearly ready for the superstructure; and three others, left incomplete in 1864, have been finished. The whole number required for the bridge is thirteen—ten of which have now been constructed. The eastern abutment is nearly finished; and the masonry of the other, at Havre-de-Grace, has been brought to the level of the coping of the piers. Two spans of superstructure, (250 feet each) have been erected, and two more are ready for raising. The company are now required by statute to report its operations for each year ending October 31st, and henceforth the books of the company will be made up to the 1st May and 1st November, and dividends will be payable 1st July and 1st January.

The company have 52 locomotives (11 of which are in use on the New Castle and Wilmington, New Castle and Frenchtown, Delaware, Eastern Shore, and Junction and Breakwater Railroads;) 83 eight-wheeled passenger, 17 eight-wheeled baggage and mail, 9 eight-wheeled express, 1 special, and 1 paymaster's car, 380 eight-wheeled house cars, 66 stock, 255 platform, 74 market, 57 lumber trucks, 72 dump cars, 55 four-wheeled dump cars, 31 road cars, and 32 hand cars. Of the above cars, there are in use on the Philadelphia and Baltimore Central Railroad, 1 passenger, 30 house, 7 platform, 2 stock cars, and 4 eight-wheeled lumber trucks.

The number of miles run by engines with passenger trains was 553,746; with freight trains, 334,802; with other trains, 92,917—total, 981,465; of which 880,167 were run by coal burning, and 101,298 by wood burning engines.

Number of passengers carried, 1,385,921, of which 401,843 were through, and 984,078 were way; number carried one mile, 77,791,162; of which 17,419,794 were through, and 18,937,398 way; number carried one mile north, 41,433,970; do., south, 36,357,192.

Tons of freight carried 235,929; of which 85,103 were through; and 150,825 way; of the through freight 17,751 tons were moved northward, and 67,352 southward. Of the way freight, 77,780 tons were moved northward, and 73,045 southward. The total tonnage northward was 95,531; do., southward, 140,398. Number of tons carried one mile northwardly, 5,492,478; do., southwardly, 10,057,157—total, 15,549,635.

Superintendent.—H. F. KENNEY.

☞ The Pittsburg, Fort Wayne and Chicago Railroad have bought the Cleveland, Zanesville and Cincinnati Line.

Pacific Railroad.

The various addresses of Mr. Colfax on this truly National topic have been extensively published. From the text of one of these, evidently corrected by the Speaker, we make the following interesting extract on the practicability of the route. He says:

"If I had ever entertained doubts, as I have not, as to the practicability of its construction, they would have been dissipated by the journey on which I have been commenting. From the Missouri Valley to the Rocky Mountains—one-third of the distance—the grade is already substantially made by nature. From the mountains to Salt Lake, either directly across the snowy range to the middle park, by which a tunnel might be needed, or around more circuitously by Bridger's Pass as we traversed, there are no difficulties greater than those surmounted by the Baltimore and Ohio Railroad in crossing the Alleghanies. The last third of the line from Salt Lake to the Sierras, a route is practicable by the valley of the Humboldt, abounding in mines; or a shorter one still may possibly be found. You will observe that I have not included the Sierras themselves in this calculation, for the indefatigable energy and enthusiasm of the people of the Pacific coast have settled that question already. Those frowning mountains have been regarded by many in the past as almost impassible for railroad trains, and to the eye they seem so yet. But the Central Pacific Railroad, under the vigorous and effective management of ex-Governor Stanford, the Crocker brothers and their associates, is being pushed onward up the mountain grades, faster, I am compelled to say, proportionately, than on the level plains on this side of the country. It is to cross the Sierras at Donner lake pass, 7,000 feet above the sea; but its grade is nowhere to exceed 105 feet to the mile, while on the Baltimore and Ohio Railroad they have grades up to 116 feet. I visited this line to inspect personally the progress of the work. Not laborers by the hundreds, but by the thousands, swarmed on its deep cuts and heavy fills. Its officers do not advertise for any given number; but, being very earnestly in earnest, they offer work to as many thousand as will come. Four thousand were busy as bees, and almost as closely packed together at some points, when I rode on horseback up the steep mountain sides they were cutting down and into the deep ravines they were filling up, using, too, over 100 kegs of powder per day for blasting. Nor was I surprised, therefore, on receiving a telegram the day before leaving San Francisco, stating that they had just commenced running trains on the twelve mile section I saw so rugged and incomplete but a month before, having reached a point 55 miles from Sacramento, and an elevation of 2,500 feet, making 24 miles of such road completed this season, and expecting to reach a point 13 miles further, at an elevation of nearly 4,000 feet, and within 85 miles of the summit, by the opening of the new year. Incredible as it may seem to those who know the character of this herculean work, they expect to reach the summit before the snow flies next year, and within three years afterwards to run their trains into Salt Lake. Such remarkable energy is worthy the highest praise, and should be emulated by those building the Eastern portion of the line.

"The completion of this railroad is almost the first and last thought of every Californian. It seems uppermost of all wordly desires in every heart. Wherever we met the people on the outer line of the Republic—in social circle or at festive scene, in public hall or private parlor, on the road side or the mountain top, in field or shop, in vineyard or in valley, in mine, or mill, or cottage—the anxious, longing question was always propounded, with an earnestness that proved their deep solicitude: "When will the Pacific Railroad be built? Can't the Government hasten its completion?" And from matron, and bride, and maiden would come, with eyes sparkling with joy at the thought, the expression: "Then, then we are promised that we can go home." I think it is not extravagant to say that this enterprise, so full of interest and prospective joy to them, is not forgotten in their prayers. One of the most eloquent sermons I heard at San Francisco—alluding to the fact that gold mines, with their social discomforts and privations, with many vices that often accompany the pioneers in such a life, do not always of themselves build up well ordered States—closed with a reference to the Pacific Road as a great reformatory measure, which would bring its tens and hundreds of thousands from the older settled regions, and thus elevate the moral standard, as it increased the population, of the Pacific slope."

Hudson River Railroad.

Receipts and expenses for fiscal years ending Jan. 30, 1864 and 1865.

Receipts—	1865.	1864.
Passengers	$2,099,951 72	$1,911,964 13

☞ The Summerside *Journal* is advocating a line of Railway from Charlottetown to Summerside as a means of overcoming the disadvantages which the Richmond Bay and the North Shore fisheries of Prince Edward Island labor under at present in bringing their fish to market. By the establishment of the proposed line, with its small boats running as tenders from Shediac, and touching at the Ports in Prince Edward Island, the present disadvantages under which the trading points in Richmond Bay and along the North Shore of the Island will be overcome, and the line will secure a profitable traffic.

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	Feb. 1, 1866.	March 1, 1866.
Debt bearing int. in coin.	$1,167,149,741 80	$1,177,867,291 80
Debt bearing interest in currency	1,197,295,881 06	1,185,428,980 50
Matured debt not presented	1,099,330 32	985,979 64
Debt bearing no interest.	458,846,547 52	463,586,707 52
Total	$2,824,391,500 70	$2,827,868,959 46
Coin in Treasury	$51,443,161 84	$55,736,192 12
Currency	56,050,186 23	60,282,767 12
	$107,493,348 07	$116,018,959 24
Debt less cash in the Treasury	$2,716,898,152 63	$2,711,850,000 22

The total debt shows an increase of $3,477,458 76. The balance in the Treasury shows an increase of $8,525,611 17. Deducting the amount on hand from the aggregate debt, both on the 1st of February and the 1st of March, the decrease of debt would be $5,048,152 41. The debt bearing bearing interest in coin has increased $10,717,550 00. The debt bearing interest in lawful money has decreased $11,866,900 56, owing to the conversion of 7-30s into 5-20s, which last have increased $10,717,550. The compound interest notes have decreased $6,000,000, and the United States Notes of the old and new issue, $466,850. The debt bearing no interest has increased $4,740,160, owing to the increase of gold certificates, and the debt on which interest has ceased has decreased $113,351. The fractional currency has increased $970,490, and the temporary loan $3,822,099. The coin in the Treasury has increased $4,293,031 and the currency $4,232,481. The amount on temporary deposit in the treasury is $118,577,939—an increase of $3,822,099.

British Iron Trade.

The quarterly meeting of Iron Masters was held at Birmingham on the 11th of January. The attendance was good, and the prospects of the trade were generally considered satisfactory. Pig iron was firm, and some considerable sales were effected. 5,000 tons of Barrow Hæmatites changed hands at £3 15s.; 500 tons of Mathews' Corby'ns Hall at £4. Other brands brought £3 to £4. The official list of prices of Staffordshire finished iron remains unchanged. Good Marked Bars, £8 10s.; Best Bars, £9 10s.; Sheets, singles, £10; doubles, £11 10s.; angles, £8 5s. to £9; Nail Sheets, £9; Latten, £13; Rods, £8 10s.; Hoops, £9 10s.; Gas Strip, £8 10s.; Canada Plates, £13; Best Boiler Plates, £10; Common, £9 10s. All other sorts in proportion. Puddled Bars—Common Squeezers, £6 5s. to £6 7s. 6d.; Common Cinder Hammered, £6 10s.; Good Mine Pig Puddled Bars, £6 12s. 6d. to £6 15s.; Best Britannia Puddled Bars, £6 10s.

☞ The St. Croix *Herald* says that "Alfred Whitehead, Esq., one of the contractors for the building of the Woodstock Branch was in town this week. The first sod was turned on Thursday at Bedell's Brook, 4½ miles from Woodstock, and a crew of men are already engaged in grading at that point."

Saturday, March 10, 1866.

Stock Exchange and Money Market.

The general financial condition of the country is evidently improving; and if no political difficulties occur to involve it in new and needless expenditure, we shall make our way out of our difficulties with great certainty. The policy of Mr. McCulloch has been assailed by various parties without a real comprehension of its character. The necessity and propriety of resuming specie payments at no distant day, an honest policy, is perverted into a design on his part to rapidly contract the currency and bring the evils of a tight money market upon us without preparation. This is simply absurd. If the measures of the Secretary tend to raise the value of his legal tenders and of the Government securities, as they are now doing, they are bringing us back to specie values without really contracting the currency. We have maintained that it is quite possible to do so; and we have good reason to believe that the currency question is the least of his difficulties. Let our paper fully appreciate and it will take care of itself. We have free trade in money; and only let it be really worth what it professes to be, and the laws of business will provide the necessary supply. Who can object to a paper dollar being worth its face? Whowill be injured by this improvement in its value? Will the country or the people be any the poorer for having more money in their pockets by 30 per cent. than they now have? The clamor against a specie basis and against contraction is a false alarm, and is not worthy of a moment's heed. It is a most interesting fact, that as gold declines in our market, our foreign securities advance in Europe, and are becoming steadier every day. The recent fall of four per cent. in the price is really a boon to the country, and is of material advantage to its interests. If speculators are caught with large stocks on hand at inflated prices, they alone are to blame for their losses. They have been warned for the last year of the certain change from a fictitious to a real basis of values and prices; and no combinations of interests, or cries of danger from selfish combinations, can overthrow the solid principles on which finance and business must finally rest. We do not in the least regret to see a fall in prices. There is no reason why the cost of living in this productive country should be higher than in any other part of the world; no reason why our cereals and manufactures should be excluded from the commerce of the world by being held at unreal and fictitious prices, such as no other people can afford to pay for them; and the sooner we understand this the better it will be for us. Let us then persevere in the upright as well as sensible course on which we have entered, and the country will emerge into an unparalleled prosperity with rapid pace.

Since the 1st of November last, as it appears from official statements, the National debt has been diminished $20,000,000, the legal tenders have decreased $27,725,197, and the short obligations $12,000,000 more; and yet money is as cheap and abundant as ever, and the public undisturbed by scarcity or panic. The 7-30s have also lessened in amount from $830,000,000 to $818,044,000, showing a decrease of about $12,000,000. Thus we exhibit the spectacle, (a most gratifying one,) of ability to lessen our liabilities, and an honest attempt to do so. The effect moral and financial cannot be overstated.

Again, we have the satisfaction of knowing that these movements on our part are in harmony with those of the business interests of the country. Our exports of specie are falling off, and the fact is recognized abroad. An English paper says:

"The receipts of gold from the United States experienced a great curtailment last year. Thus in the first eleven months of 1865, the arrivals were valued at £3,971,200, against £9,381,739 in the corresponding period of 1864, and £6,557,131 in the corresponding period in 1863. The imports of gold from the United States in the whole of 1864, were valued at £7,479,790, against £7,520,682 in 1863, £9,731,434 in 1862, £38,434 in 1861, £3,917,755 in 1860, £7,909,342 in 1859, and £4,502,464 in 1858."

On the other hand, our own supply of the precious metals is on the increase. The actual surplus of gold in the Treasury on the 1st of March, belonging to it, was $43,108,592; and it also held, of deposits, $12,627,600 more. Let the price of gold fall to 10 or 15 per cent., and the result will be in the highest degree beneficial to all classes, except those of speculators; and these have made so much in the past four years that they can afford to part with their oppressive advantages without exciting an undue sympathy.

We regret to see the continued attempts made in certain quarters to befog the simplest questions of finance; to insist that the National debt is increasing; and to mistake the real balances in the Treasury. The fact is, that on the 1st of August last, the total of the debt was $2,757,781,190, and on the 1st of March, $2,711,850,000—showing a decrease in six months of $45,931,190. Again, if we subject the calculation to another formula, that of taking the actual cash items as the basis, we find the public debt, August 31, 1865, to have been $2,738,759,513, and February 28, 1866, $2,696,083,420—showing even then a decrease of $42,096,093. So that it amounts to a complete demonstration in whatever form we choose to make the statement.

The deliveries of gold from California since July 1, 1865, to the close of February, 1866, were $16,750,791; against $10,085,332, in the corresponding period of the previous year—an increase of $7,665,459.

The exports of gold and silver from this port since 1st July last, amounted to $16,522,487; and for the same period the preceding year, were $25,617,277—showing a decrease of $9,094,890. The value of our exports in currency since 1st July, 1865, has been $142,926,684, against $168,477,733. the same period the year preceding; but the actual value is much greater, as gold is many per cent. lower than in the preceding period, and of consequence the currency value much greater. As these approach equality, the real balances will grow in our favor.

Considerable anxiety prevails in the higher circles of finance at an apparent disagreement in the policy of the Comptroller of the Currency and the Secretary of the Treasury on some very important points. This is to be regretted, as there should be not only unity, but subordination. The Comptroller is, however, quite uncontrolled by the Secretary, and holds his office by an independent tenure. Yet his duty, important as it is, is but the *complement* of those of the Secretary. All he can do is to keep within the prescribed bounds of the law, and the regulations of the department. We therefore disapprove of the publication of his opinions on the passing subjects of the day, interfering with Congressional legislation, and discussing the measures proposed by the Secretary for its action. With regard to one of these reported differences, we take the liberty of referring to a letter from our friend T. W. Olcott, Esq., of Albany, a gentleman who refused Mr. Clark's place, and who would have been fully competent to take Mr. McCulloch's. He says: "The papers state that they differ, but I cannot believe that they do, unless it be in regard to the reserve fund. I think the Secretary rather favors this feature of the bill, which I regret. For a reserve to be of any value, or support, must be an available reserve. If it cannot be used in an emergency, it will only tend to cripple and destroy. Par redemption in New York, Philadelphia and Boston, are indispensable to a sound currency; and the Secretary, I am sure, so regards it, and also favors the removal of the Bureau to New York. I think with you that the Secretary is not a politician, and only aims at an honest and successful management of our finances. He thus will have the cordial support and co-operation of the commercial and monied power of the Nation."

It is a cheering sign for the times when such thoughtful and experienced men as Mr. Olcott give their attention to public affairs. We are certainly in a crisis of a new character. There are many persons who consider the political complexion of the hour more alarming than was even the rebellion; who fear that we have met the introduction of a new and strained power in legislation hitherto unknown in our history, a disposition to change the checks and balances of the constitution as hitherto maintained; to trust to repression, exclusion, interference and force, rather than to law, precedents and local requirements; and that we are in fact in danger of an *entire* change in our system. The adoption of a resolution in the House of Representatives, emanating from the same source as that which attempted to legislate on gold during the last session of Congress, is believed to be an attack on the financial policy of the Secretary of the Treasury, and to be a further attempt on the public security. We confess, however, to no very great fears of the result. The people of this country are far too wise and patriotic to be in real danger from this class of politicians. These men "come like shadows, so depart;" they will leave the stage as rapidly as they came upon it. The real, material, permanent and progressive interests of this country are too great to be shaken by resolutions and Congressional reports. The good sense of the people, which has prevailed hitherto over all kinds of combinations, is not less now than it was at any previous period. It is our Palladium, and may be relied upon.

Our foreign exports the last week were very large, amounting to $6,803,831, exclusive of specie, and in these were included 17,442 bales of cotton.

We are pleased to state that the exporting power of the country is on the increase; and that the Southern States are producing cotton and cereals with much greater success than was supposed. The accounts from Georgia and South and North Carolina, are particularly favorable in these particulars.

Foreign exchange still rules below par, and it is not profitable to ship specie at present rates.

Governments stand firm, at home and abroad. The fear that our bonds will return upon us when they advance in our market, appears to be groundless. The truth is, that a rise here will usually produce a rise abroad; and there is no reason for their being sent here for a sale, when it is so much easier to dispose of them there under any such rise. We therefore have no apprehensions on this point, nor have we entertained any at any time.

It is observed that the Spring trade opens dull, and that buyers are reserved and cautious. The conviction is general, that prices must yield, and it is productive of good effects. There is never any harm in prudence and economy. The real substantial wealth of individuals and Nations is in their savings, not in their imaginary profits. "Out of debt, out of danger," is a good saying, and to observe the rule is to ensure security. If there be those who have extended themselves on high prices, they have no one to blame but themselves, and the country should not be kept down, out of fears for them.

The very doubt in the public mind as to engaging in new transactions is a wholesome feeling, and a proper preliminary to a return to a sound condition. The patient who would recover his health from an attack of surfeit, must begin by abstinence.

The balance in the Sub-Treasury on Wednesday was $89,211,437 27.

The New York exports, exclusive of specie, for the week ending March 6, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,919,574	$6,803,831
Prev. reported	37,367,632	35,227,238
Since January 1	$40,287,206	$42,031,069

The New York imports compare as follows:

	1865.	1866.
Dry goods	$1,009,691	$2,547,990
Gen. merchandise	1,510,546	3,559,766
Total for the week	$2,520,237	$6,107,756
Prev. reported	17,034,014	47,129,146
Since January 1	$19,554,251	$53,236,902

Barrow Hæmatite Steel Co.

This company was originally formed for the manufacture of steel under the Bessemer Process from the Furnaces of Messrs. Schneider, Hannay & Co. The company have since arranged (Jan. 1, 1866,) for the transfer to them of the Hæmatite Iron Ore Mines and Furnaces belonging to that firm. In addition to the supply of Iron Ore and Hæmatite Pig Iron, and the manufacture of Steel Rails, which was the primary object of the company, they manufacture Tyres and Axles, Plates for Ship Building, Boilers, Girders, Bridges and Roofs—Bars, Angles, Guns and every description of forgings in steel. CHARLES CONGREVE & SON, Sole Agents, No. 8 Broad street, New York.

Italian Finance.

We have received from Col. T. B. LAWRENCE, our popular and able Consul General at Florence, a copy of the Discourse of Signor Scialoja, Minister of Finance in Italy, or in other words, the official budget, with the explanations and suggestions usual in such documents. It occupies nearly three pages of the *Journal of Italy*, and is an elaborate and interesting paper, though not of special interest to our own readers at this moment. An analysis of its contents would be a valuable contribution to the pages of some of our leading magazines.

Letters of Peter Cooper.

We have received from this distinguished gentlemen a pamphlet containing his well expressed views on the necessity for a wise discriminating tariff to protect American labor, and the relations between labor and sound finance. We have read it with great interest and an entire approval. We hope it will have a wide circulation, for it contains sound opinions, solid arguments and just reasoning. It is really a source of great satisfaction to think that we have such men among us, who not only write well, and whose lives are a splendid commentary on their principles.

City Passenger Railroad Fares.

Judge Daly has decided in the Court of Common Pleas of this city, in the case of George W. Black against the Sixth Avenue Railroad Company, that the six cent rate of fare is illegal. The ground of this decision was that the company, having its charter on condition that the rate of fare shall not exceed five cents, cannot increase the rate, unless authorized to do so by some paramount authority; and that the imposition of the internal revenue tax of one-eighth of one cent, which tax the company may add to its fare if possible, confers no right whatever to collect the other seven-eights. The Judge holds that the defendants (the company) may be enabled possibly to devise some mode by which the two and a-half per cent. (about one-eighth of one cent,) may be obtained; if they cannot they must lose it.

The Great Railroad Controversy.

The *U. S. R. R. and Mining Register* publishes at length the elaborate decision of Justice Reed in Philadelphia on the 26th ult., with the following remarks:

The Supreme Court of Pennsylvania has a bench of five Judges. Their names are: George W. Woodward, C. J.; Associates, Jas. Thompson, William Strong, John M. Read, Daniel Agnew.

The pleadings were before a single Judge at Nisi Prius, and the case may be appealed to the Court in Banc; but it will be observed that Judge Read says, emphatically, that the Catawissa lease and contract of date Nov. 1, 1865, "*is invalid and void*;" and as Judge Read is a throrough-bred *lawyer*, with a brain crammed with the lore and practice of the legal profession, his mind being ever a-hunger and a-thirst for that meat and drink on which a jurist subsists his intellectual faculties, we confess that we see little chance for the Catawissa lease before the Court in Banc; but regard the Catawissa road as dislodged from the combination, and hereafter to be counted "out." And hence as a faithful chronicler we feel constrained to write—as the result of the first action in the war for a new combination route between the Allegheny and the Schuylkill—Catawissa *hurt*.

Northern Pacific Railroad.

The Boston *Journal* advocates the passage of the bill recently introduced into Congress, to secure the speedy construction of the Northern Pacific Railroad and Telegraph. It urges that this route has as strong claims on the Government for its aid as the Central route; that the two routes, being five hundred miles apart, cannot, by any possibility, interfere with each other, and that the Northern route should be completed as soon as possible, in order to afford immediate and direct means of communication with Montana and Idaho, so that the wonderfully rich mines of these rapidly growing territories may be made available without delay, and be laid under contribution to the national finances.

Southern Pacific Railroad.

The stockholders of the Southern Pacific Railroad have just held a meeting at New Orleans to take measures for the early prosecution of the work. The road is proposed to be constructed from the Texas State line, between Shreveport and Marshall to El Paso, a distance of 800 miles. There it will connect with the California Southern Pacific Railroad. Texas has made grants of about 10,000 acres of land, in alternate sections, for every mile of railroad completed within her borders. The grant to the Southern Pacific Railroad Company will be 8,000,000 of acres.

Baltimore City Passenger Railroad.

The following are the sums paid to the City Register by the City Passenger Railway Company, as the park fund, being one-fifth the earnings of the company during the past fiscal year: January, $16,996 85; April, $15,037 92; July, $18,964 39; October $21,561 53—making a total of $72,560 69. The amount paid the city register during the first quarter of the present fiscal year, ending 31st of December last, was $17,073 28, being an increase of $108 89 over the receipts of the corresponding quarter of the previous year.

☞ Railroad trains are now running between Norfolk and Petersburg.

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway for the week ending Mar. 2, 1866, was as follows:

Passengers	$27,473 95
Freight and live stock	40,110 44
Mails and sundries	2,236 27
Total	$69 820 66
Corresponding week of 1865	41,630 72
Increase	$28,189 93

The earnings of the Grand Trunk Railway for the week ending Feb. 24, 1866, were:

Passengers	$30,444 00
Express, freight, mails and sundries	4,750 00
Freight and live stock	76,521 00
Total	$111,715 00
Corresponding week, 1865	117,504 00
Decrease	$5,789 00

The earnings of the Western Union Railroad, for the week ending Feb. 28, 1866:

	1866.	1865.
From freight	$4,992 35	$5,608 57
" passengers	2,742 05	2,799 36
" express	752 74	282 80
" mail	296 58	296 58
Total	$8,783 72	$8,987 31

Receipts from Jan. 1, to Feb. 28:

1866	$81,107 07
1865	80,981 05
Increase	$126 02

Railroad Earnings--Monthly.

The earnings of the Chicago and Northwestern Railway for January and February, 1865 and 1866, have been as follows:

	January.	February.
1866	$523,565 85	$405,633 88
1865	541,004 79	482,164 28
Decrease	$17,438 94	$76,530 40

The earnings of the Milwaukee and St. Paul Railway Company, exclusive of the eastern division of the La Crosse and Milwaukee Railroad, for the months of January and February were as follows:

	January.	February.
1866	$131,707 00	$122,621 00
1865	98,181 00	86,528 00
Increase	$33,526 00	$36,093 00

The earnings of the Michigan Central Railroad for the month of Feb, 1866, were $265,796 00
Corresponding month of previous year 279,137 00
Decrease $13,341 00

The earnings of the Chicago and Rock Island Railroad Company for the month of Feb., 1866, were $174,164 00
Corresponding month of previous year 246,331 00
Decrease $72,167 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of Feb., 1866, were $283,177 00
Corresponding month of previous year 366,361 00
Decrease $83,184 00

☞ The question of building a railroad between Potsdam Junction and Caughnawaga is being discussed in the Southern Townships. The editor of the Huntingdon *Journal* has recently had an interview with Mr. Brydges, in which that gentleman assured him he would be disposed to assist to the utmost of his power.

Journal of Railroad Law.

In the case of George H. McIntyre *vs.* New York Central Railroad Company, the Court decided that where a passenger upon a railroad, a female, being ordered by an officer of the train, while the cars were in motion, in a dark and rainy night, to pass forward, in attempting to step from one car into another, fell between the cars and was instantly killed; the deceased was not so clearly guilty of negligence as to warrant the taking of the case from the jury on that ground. It was also decided that where in such an action there is no proof showing that the services of the deceased might have been of some value to her next of kin, a non-suit should not be directed. As the statute gives a right of action in such a case, nominal damages at least should be given, if such right is established at the trial.

The action was brought under the statute (Laws of 1847, p. 575, ch. 450,) to recover for the death of Mrs. Knight, the plaintiff's intestate, occasioned by the negligence of the defendant's employees, upon its cars in November, 1859. The facts of the case are substantially as follows:

On the 14th of November, 1859, Mrs. Knight, in company with her father, started from Rutland, Vermont, on their way West. They took the defendant's cars at Schenectady, and proceeded safely until they reached Syracuse. At Syracuse, the car in which they were seated was detached from the train, and they were ordered forward into the next car. They had just time to get into the next car forward when the train started. The car which they entered was very full, and they could find no seats. After the cars started, an officer of the train, probably a brakeman, came in and ordered the standing passengers to pass forward, saying that there were plenty of seats forward, Mrs. Knight, her father and others followed him, and in passing from the platform of one car to the platform of another, Mrs. K. fell between the cars and was instantly killed. It was dark, and had been raining and freezing; the train had been moving so long, at the time the order was given to go forward, that it was then in very rapid motion. The deceased was about 45–48 years of age, a widow, and had three children living. She was a seamstress, and earned some money over and above her maintenance. The children of Mrs. Knight are all grown up. At the close of the plaintiff's case the defendant made a motion for a non-suit upon the grounds:

1st. That the plaintiff's intestate was guilty of negligence.

2d. The plaintiff had failed to show pecuniary damage to the next of kin.

3d. The plaintiff had failed to show any negligence on the part of the defendant.

The motion was granted, and the judge refused to submit the case to the jury.

To this the plaintiff excepted, and the exceptions were ordered to be heard at the general term, in the first instance.

By the Court, E. Darwin Smith, J.—The nonsuit was granted in this action upon one or more of three grounds, but upon which one, the case does not state. I shall therefore consider them in the order in which they occur. The first grounds is that the "plaintiff's intestate was guilty of negligence."

I do not think that she was so clearly guilty of negligence as to warrant the taking of the case from the jury on this ground. She was ordered, as several witnesses testify, by one of the officers or persons in charge of the train, who spoke in a very authoritative manner to leave the car in which she was standing, and proceed to the forward car. No seat had been furnished her in the car where she then was, and it could hardly be expected that she should remain standing during the journey. Being a woman, and traveling with a very old man as an escort, she would naturally obey the commands of a person belonging to the road, and could hardly be called negligent in so doing.

There was evidence I think sufficient to take the case to the jury, upon the question whether the death of the intestate was caused by the defendants' negligence. The defendant was clearly responsible for the acts of the person in charge of the train, by whose direction the intestate attempted to pass from one car to another. The non suit I presume was granted upon the remaining ground, that the plaintiff failed to show pecuniary damages to the next of kin. There is some proof on this point, showing that the services of the decedent might have been of some value; certainly as much as there was in the case of Oldfield *vs.* New York and Harlem R. R. Co., (14 N. Y. Rep., 310,) where the deceased was a child of six or seven years of age, whose services could have been but of small pecuniary value to her parents. But the Court of Appeals have decided this question in the above cited case, where Judge Wright, (p. 314,) amongst other things, says that the "nominal damages, at least, were recoverable;" and Judge Comstock in the same case, at (p. 230,) says, "that without any special proof of pecuniary loss, nominal damages at least could be recovered." In the case of Quin, Adm'r *vs.* Moore, 15 N. Y. Rep., Judge Comstock, in a case arising under the same statute, says (p. 434:) "It may be added that, as the statute expressly gives the right of action, nominal damages, at least, could be recovered." It is quite clear that if a right of action was established at the time, nominal damages at least, should have been given. So far therefore, as this question is concerned, the nonsuit was erroneously granted.

But is argued that this Court will not grant a new trial when the plaintiff is only entitled to recover nominal damages. (Hopkins *vs.* Grinnell, 28 Barb., 536, John. Cas. 267, 2 Cowen, 479.) The cases in which this rule has been so stated put the refusal to grant the new trial upon the express ground that the plaintiff could in no event recover anything but nominal damages. Some cases assert that this rule cannot be applied when the question is presented upon exceptions or upon error in Superior Court of review. In Herwick *vs.* Stoner, (5 Wend., 584,) Judge Marcy said, he had always supposed that the party who had been affected by an error, be the extent of the injury ever so small, "it can require of us, *ex debito justitiæ* to correct it." The question is presented in this case upon exceptions. The plaintiff's counsel asked to go to the jury, and the judge refused to submit the case to the jury, and the plaintiff's counsel duly excepted.

I think the rule was correctly stated in the opinion of my brother Welles, in Hopkins *vs.* Grinnell, when he asserts the rule to be, that where it

is apparent from the whole case that the plaintiff can in no event recover anything but nominal damages, a new trial should not be granted. But in this case the jury would not I think have been limited to mere nominal damages. If they had given damages for an amount sufficient to entitle the plaintiff to recover full costs or a larger amount within reasonable limits, the Court, I think, would not have set aside the verdict. The deceased was a woman from forty-five to fifty years of age. She had three grown up children, and her life obviously could not have been in a pecuniary sense very valuable to her children, all of whom were settled in life and capable of supporting themselves. She probably could have done little more for the residue of her life than support herself by her personal efforts and industry; but this was a question for the jury.

She was killed near Syracuse in this State, and her home was with her daughter in Springfield, Pennsylvania. If the jury had found a verdict, as I think they might have done, for an amount that would have indemnified her children for the expenses attending the preserving and removal of her remains to her former home, and her burial and incidental expenses, I think we could not have set it aside. At least I do not think we can say, as matter of law, that a jury may not give over six cents damages. I cannot see in such case, upon what principle any considerable amount of damages could be given; but is perhaps hardly in order to discuss that question now, if we hold, as I think we must, that the jury is not limited in such a case to mere nominal damages. I think there should be a new trial all costs to abide the event.

New trial granted.

New Eastern Outlets for the Pittsburg, Ft. Wayne and Chicago Railroad.

The *Western Railroad Gazette* says that the Pennsylvania Railroad Company, by the sale of $1,600,000 of stock held by them, to the Pittsburg, Ft. Wayne and Chicago Railroad Co., no longer own a controlling interest in that road, while the adoption of the Steubenville route as their principal thoroughfare westward has brought home to the Pittsburg and Fort Wayne the necessity of looking for independent outlets for their traffic to Eastern cities. It believes that arrangements are already being negotiated with the Atlantic and Great Western Railway Co., for a close connection with their road at Mansfield to New York and Boston, and that an offer of $3,000,000 has been made by a prominent capitalist in behalf of the Pittsburg, Fort Wayne and Chicago Railroad Co., to extend the Connellsville road to Cumberland, their to connect with the Baltimore and Ohio, thus constituting a new and independent route from Chicago to Baltimore—and also to Washington, as soon as the proposed line from that city to Point of Rocks is completed. The *Gazette* concludes as follows:

The Pittsburg Fort Wayne and Chicago, in conjunction with the Pennsylvania Railroad, is no longer virtually a continuous line extending over a vast extent of territory, and tributary to Philadelphia interests. A large share of its northwestern traffic will no doubt pass over the Pennsylvania road as heretofore, but much of it also will be diverted to new markets over new consolidated lines, through such railway combinations as may be hereafter perfected, as may best subserve the interests of its owners, independent of dominating influences the wishes of any powerful eastern corporation might prompt them to exert, for their own paramount or exclusive advantage.

Iron and Steel Association.

The general objects of this association are to procure, regularly, the statistics of the trade both at home and abroad; to provide for the mutual interchange of information and experience, both scientific and practical; to collect and preserve all works relating to iron and steel, and to form a complete cabinet of ores, limestones and coals; to encourage the formation of such schools as are designed to give the young iron-master a proper and thorough training, preparatory to engaging in practical operations; and, generally, to take all proper measures for advancing the interests of the trade in all its branches. The association numbers 265 members, representing furnaces, rolling mills, etc., in nearly all of the Northern States.

A quarterly meeting of this association was recently held in Washington, and was attended by quite a number of factors from different parts of the country. The Secretary submitted a report concerning the iron interests in the United States, which states that the correspondence from 300 persons in the trade sets forth the difficulties under which they are laboring, and goes to show that if manufactured iron is offered below the present rates the mills must cease work or lower the wages, and that the disaster overhanging the the trade can only be averted by increasing the duty on iron. The total amount of pig iron produced in 1865 in the United States is 910,555 tons. The products of the rolling mills in the same year, 833,049 tons, being a decrease of 19,329—253,017 tons of which were rails rolled in 37 mills having double that capacity. The amount of steel of all kinds was 15,862 tons. The amount of revenue paid on iron and steel was $9,218,808 62. The report closes by noticing the imports of iron during the year, which amounted to 202,033 tons, valued at $8,959,628. The report was accepted and ordered to be printed.

Cleveland and Mahoning Railroad.

The Pittsburg *Dispatch* thus refers to the proposed extension of the Cleveland and Mahoning Railroad to that city:

It is not generally known, perhaps, that a corps of surveyors, under the leadership of Mr. Sigismund Leow, the well-known engineer, have for several days back been engaged in locating a route for the contemplated extension of the Cleveland and Mahoning road to this city. Mr. Leow has eleven men in his party, and thus far his progress has been all that could be desired. He has already reached the vicinity of Beaver Creek, and up to that point the grades have proven even easier than the friends of the enterprise had been led to anticipate. The entire length of the extension will be about sixty-five miles, and as its completion will give us another route to the lakes and the great West, the importance of the work as a most valuable link in our railway connections can hardly be over-estimated. The new line will cross the Allegheny River near Sharpsburg, and will connect with the Connellsville road at the outer depot of the company, in Scotch Bottom, about four miles from the city. The passenger trains will come direct to the city over the track of the Allegheny Valley road, but through freight will pass around the city to the depot of the Connellsville road, already referred to. The surveys will be completed in a very few weeks, and from the favor with which the enterprise seems to be regarded, and the means and energy of those having it in charge, the prospects for the early completion of the work are exceedingly promising.

In this connection we ought to state, perhaps, that while at work in a strip of woods in the Connoquenessing Valley, Mr. Leow and his party came rather suddenly on a large force of surveyors employed by the Pennsylvania road to locate a line from Homewood, on the Pittsburg, Fort Wayne and Chicago road, to Blairsville, on the the Pennsylvania Central. The meeting was altogether unexpected, and the first intimation that Mr. Leow had of the object of the other party was from the party themselves. For nearly eight miles they worked side by side, but Mr. Leow having the advance, he was enabled to select his choice of route, and of course, he took the best.

☞ An act amending the Revenue Law of the State of Pennsylvania has passed both branches of the Legislature. It requires every bank to pay a tax of one per cent. to the Commonwealth on the par value of each share of its stock; and railroad, canal and transportation companies, not liable to taxes on incomes, to pay, in addition to present taxes, a tax of three-quarters of one per cent. on their gross receipts. The revenue derived from this latter source is to be applied to the payment of the principal and interest of the debt contracted under the act of May 15, 1861, creating a loan, and to provide for the arming of the State. The special act providing for a tax of five cents per hundred dollars was not repealed; as that tax is specially pledged to the holders of a loan of three millions of dollars, the terms of the contract would not allow of that repeal. This loan will soon be disposed of, and, as the finances of Pennsylvania are in a promising condition. State taxation on real estate will probably soon cease.

☞ The Legislature of New York has passed an act requiring the Ogdensburg and Lake Champlain Railroad Company to grant fairly and impartially equal terms of accommodation, privileges and facilities in the transportation of cars, passengers, baggage and freight over the Plattsburg and Montreal Railroad, as are now granted and afforded to any other connecting railroad or railroads, at similar rates and charges. The Supreme Court is authorized to compel the performance of such arrangements; but the Ogdensburg and Lake Champlain Co., shall not be compelled to run their cars out of the State of New York, nor give credit to the Plattsburg and Montreal Co., nor any other company, for any business done by such company.

☞ The Panama *Star* is informed that the engineer entrusted with the survey of the passage supposed to exist between the Tuyra and the Atrato Rivers, with the view of opening an interoceanic communication, has returned from his exploration, and has been quite successful. His report and map will be published as soon as possible.

☞ The North Branch Canal Company has been re-organized under the name of "The Pennsylvania and New York Canal and Railroad Co;" as authorized by act of 20th March, 1865. It is said that the upper portion of the road, from the Towanda company's railroad to the Erie railway at Waverly, will be commenced the present year.

☞ Active preparations are being made by the Manassas Gap railroad company to commence the reconstruction of their bridges, etc., between Strasburg and Harrisonburg.

Duties on the Conclusion of the Reciprocity Treaty.

The following articles, which are now free of impost, will be subject to the following rates of duty after the 17th of March, 1866:

Wheat	20 cents per bushel.
Flour	20 per cent. ad. val.
Corn	12 cents per bushel.
Oats	12 cents per bushel.
Rye	15 cents per bushel.
Barley	15 cents per bushel.
Potatoes	25 cents per bushel.
Beans and peas	10 per cent. ad val.
Ashes	15 per cent. ad. val.
Hides, furs and skin	10 per cent. ad val.
Animals of all kinds	20 per cent. ad val.
Flax	$15 per ton.
Butter	4 cents per pound.
Cheese	4 cents per pound.
Tallow	1 cent per pound.
Poultry	35 per cent. ad val.
Plants, shrubs and trees	30 per cent. ad val.
Fire-wood	20 per cent. ad val.
Timber, lumber, &c., unmanufactured or manufactured, in whole or in part	20 per cent. ad val.

Cost of Pumping Water.

The Chief Engineer of the Philadelphia Water Works, in his recent report, gives a detailed statement of the cost of pumping water, at each of the works belonging to the city. We have condensed his statement as follows:

Fairmount Works, run with water power, pumped during the year 1865, 7,082,015,640 gallons. The cost of raising this water into reservoir, per million gallons, was $2 35; including interest on cost of works, it would be $7 44 per million gallons.

Schuylkill Works, worked by steam, pumped 2,005,038,484 gallons. The cost of raising one million gallons was $17 76, and increasing interest on cost of works, $22 25.

The Delaware Works, also worked by steam power, pumped 1,429,591,700 gallons, at a cost of $28 45 per million gallons, raised to reservoir, and with interest on cost of works added, $34 75.

The Twenty-fourth Ward Works, with steam power, pumped 534,923,360 gallons, at a cost of $34 67 per million gallons raised into stand-pipe, and $40 83 when interest on the cost of the works is added.

Overland Telegraph.

Between Cape Clear in Ireland and the Great Amoor River in Asia there is an unbroken line of communication; also between Fraser's River, in British Columbia and New York. The length of the lines is about 14,000 miles, and the gap in the belt of communication around the world is about 8,500 miles. Mr. Collins, the proprietor of the overland telegraph, states that by his route there are but 39 miles of water intervening between New York and Paris. The Emperor of Russia has agreed to continue the line on his side to Behring's Straits. As to the management of the line, repeating instruments will be introduced every 200 or 300 miles, which, without the aid of human touch, will transmit the message, giving it the force it had when it started. In calculating the business of the company, it must be considered that the sun will shine on the line for twenty-one hours and twelve minutes each day, and that of course will be the length of the company's day. The line will probable be completed in 1867.

☞ The project of constructing a railroad from Hartford, Conn., to Middletown, is again agitated, and surveyors are now at work on the route. It is designed to run parallel to the river bank as far as practicable.

Philadelphia and Erie Railroad.

The Pennsylvania Legislature have passed the bill authorizing the Philadelphia and Erie Railroad Company to construct branches. Sections 1 and 3 read as follows:

SEC. 1. That the President and managers of the Philadelphia and Erie Railroad Company be and they are hereby authorized to survey, locate and construct one or more branches of railroad, extending from any point or points on the main line of their road, to any point or points in any county through, or in which the said main line passes, *or in any adjoining county*, with a view to the development of the territory within the said limits, and furnishing an outlet for its productions; and the said company shall have the same rights, privileges and powers, in respect to the location, construction and management of each and all of the said branches, and the operating thereof, as are conferred by their charter in respect to their main line of railroad, and by other laws supplementary or relating thereto.

SEC. 3. That in the construction of any of the branch railroads, the said company shall have the right to cross any other railroad or railroads at grade, and connect any of the said branches with such or with any railroad or railroads, so as to form continuous lines of uniform gauge.

The New Station at Toronto on the Great Western Road.

The opening of a new station or depot at Toronto by the Great Western Railway Company, was the occasion of a fine celebration on Saturday last, at which the dignitaries of the cities of Hamilton and Toronto, with many other distinguished Canadians were present. A pleasure trip to the Suspension Bridge, a good dinner, and sundry capital speeches, were a part of the programme, and fully carried out. The new station, besides being a very elegant structure, will furnish increased facilities for the transaction of the company's business.

Southern Pacific Railroad.

LOUISVILLE, Ky., March 5.—John Waskom, President, and A. T. Smith, Secretary of the Southern Pacific Railroad, are expected here from Texas during the week, and a general meeting of the stockholders of the road will take place during the present month.

Direct railroad communication between here and Memphis will be rapidly completed, the Louisville and Nashville Railroad having loaned the Memphis, Clarkesville and Louisville Railroad three hundred thousand dollars for that purpose.

Mobile and Ohio Railroad.

Notwithstanding the Mobile and Ohio Railroad is making constant additions to its rolling stock, it is still unable to move freight as rapidly as could be desired. There is now about 300 car loads of goods at Columbus, Ky., awaiting transportation in this direction. It is known that freights from the West are less by this road, notwithstanding its great length, than by water *via* New Orleans to Mobile, which in some measure accounts for the great demand upon it for transportation.—*Mobile Bank Note Reporter.*

☞ We understand the first cargo of rails have been shipped from England for the St. Stephen Branch Railroad. The work on the line is progressing favorably, a large crew of men are still employed, sleepers are being delivered at different points along the line, the bridge superstructures over the principal streams are all contracted for to be completed by the 1st of May, all the heaviest cuttings will be done by the 1st of April, and the construction of the cars have been commenced in the car shop at St. Croix.

Repair and Maintenance of the Canals.

The Legislature has passed an act appropriating out of the revenues for the fiscal year commencing Oct. 1, 1865, the sum of $453,000, to pay the expense of the ordinary repairs of the public works during the said year, and make good certain deficiencies in existing appropriations, as follows:

To the Eastern Division	$179,000
Middle Division	177,000
Western Division	97,000

$666 68 are also appropriated to pay deficiency in the salaries of clerks of Canal Board and Contracting Board.

Commerce of Canada.

During the 12 years and 6 months ending the 30th June last, the imports into Canada were of the following value, viz:

From Great Britain	$228,120,919
B. N. American Provinces	7,308,451
B. West Indies	678,937
United States	240,942,126
Other foreign countries	17,765,752
Total imports	$494,816,185

To Contractors.

The Allegheny Valley Railroad Company will receive, until the 22d inst., proposals for the grading, masonry, ballasting and ties required on 15 sections of their road (about one mile each in length,) extending from Oil City southward, and on 15 sections extending from Mahoning Creek northward, to the vicinity of Brady's Bend Iron Works. Maps, profiles, etc., are now ready for examination at the office of the Chief Engineer, Pittsburg, Penn.

Pittsburg and Connellsville Railroad.

It is stated that an offer of $3,000,000 has been made by a prominent capitalist in behalf of the Pittsburg, Fort Wayne and Chicago Railroad, to extend the Pittsburg and Connellsville road to Cumberland, there to connect with the Baltimore and Ohio, thus constituting a new and independent route from Chicago to Baltimore, and also to Washington, as soon as the proposed line from that city to Point of Rocks is completed.

Washington County Railroad.

The Hagerstown *Herald* has been informed by the President of the Washington County Railroad, Mr. Edward Meally, that E. D. Smith & Co., commenced work on Monday morning last, on section No. 11, on the land of Mr. Martin Line, near Keedysville.

☞ The Vernon County *Censor* says a meeting was recently held in Viroqua to mature the plan for the construction of a railroad, from Prairie du Chien to La Crosse. The object is to secure an act from the Legislature to enable the towns along the line to subscribe aid for the work.

☞ The receipts from Customs at New Orleans for January were $667,428 98, against New York, $12,441,391 31; Boston, $1,014,632 46; Philadelphia, $508,613 78; Baltimore, $284,770 64. New Orleans is thus the third city in importance in the Union.

☞ An act incorporating the Chenango Valley R. R. Co., with authority to construct a railroad from the Ohio State Line to a point on the Pittsburg and Erie Canal near Wheatland Furnace, not to exceed three miles in length, has passed both houses of the Pennsylvania Legislature.

Washington County Railroad.

We observe from the proceedings of the Washington County Railroad Company at its last meeting at Hagerstown, that the completion of the road leading from the Baltimore and Ohio railroad to Hagerstown within one year is regarded as a certainty.

Interest and Dividends.

The Indianapolis and Cincinnati Railway Company have declared a half-yearly dividend of four per cent., free of Government tax, payable on the 20th March.

☞ The people of Philadelphia, in October next, are to decide at the ballot-box the question of running cars on Sunday.

☞ Work upon the Buffalo division of the Atlantic and Great Western Railway, from Buffalo to Randolph, has commenced at Cataraugus Station.

☞ A meeting of the stockholders of the Boston, Hartford and Erie Railroad Co., is to be held at the office of the Erie Railway Co., in this city, on the 14th inst., "to see if it will authorize the issue of bonds and the securing the same by mortgage of the franchise and property of said company, and, if so, to pass any and all votes proper in the premises. Also to see if said company will change its by-laws so that there may be chosen an Assistant Treasurer, who shall perform such duties as may be prescribed by the directors."

PARDOW, DOUGHTY & Co.

American Railroad Journal.

New York, Saturday, March 17, 1866.

American Enterprise in the West Indies.

The recent friendly visit of Mr. Seward to St. Domingo, and the assurance of confidence extended by him to the present liberal Government now established there, has turned the attention of some of our enterprising men to that island as a fitting place for the extension of a profitable intercourse. It appears from some documents which have been placed before us, that already a large tract of land has been secured in the North of the island, in the famous Royal valley watered by the navigable river Yaqui, comprising 300,000 acres, of which a glowing account is given the public. This tract is said to offer the following inducements for developments. The climate is salubrious, the soil fertile, and its natural productions rich and diversified. Sugar, cotton, corn and tobacco, coffee, and cocoa, are easily raised. The woods on the estate purchased are the most valuable known in commerce and the arts, such as pine, oak, and mahogany, logwood, fustic and satinwood, for all of which there is a constant demand, and of which there is an unlimited supply. In addition to these the mineral wealth of the locality offers large advantages to the enterprising. A well known gold field stretching from the borders of the river Yaqui, reaches to the crest of the mountain chain of the Cibao for twenty-five miles. All the streams passing over it contain gold of the finest quality, 23 carats fine, and it is so abundant that the natives of the country with a common gourd can wash out each an ounce a day. It is a well known fact that immense supplies of the precious metals were formerly obtained here by the Spaniards, principally from the Cibao. The metal is found in loose flakes and small grains, and even nuggets of 32 lbs. weight have been known to be obtained. As compared with California, Colorado, or any other American gold or silver bearing state, St. Domingo offers large returns on very easy terms. The outlay necessary to obtain them is very small, and the saving in time and machinery is all in favor of enterprises directed to the island.

But in a purely commercial light there is much to be considered. Cotton grows spontaneously of a soft and fine texture. On any one acre 1,000 lbs. may be gathered, the sea island variety has been planted with perfect success.

Sugar is easily and cheaply cultivated, the cane growing 18 and 20 feet high, does not require replanting but reproduces itself. The product of each acre may be stated at from 3 to 4,000 lbs., and can be sold on the spot for from 1 to 2½ cents per lb., affording a large profit to the exporter. Coffee is also easily raised and produces from 2 to 3,000 lbs. per acre. Cocoa is abundant and of a fine quality. Tobacco is very extensively grown, the crop in 1857 under every disadvantage of the disturbances on the island bring about seven millions of pounds. Hides are abundant, as immense heads of cattle roam through the forests. The article brings 5 to 6 cents per lb. Beeswax also abounds, while cocoa nuts, oranges, lemons, plantains, bananas, pine apples and other tropical fruits exist in great plenty. Rice is also a staple of the country, and of an excellent quality.

In short, nature is bountiful in the highest degree, and in the valley alluded to, does not offer her bounties at the expense of health. The average temperature in the hottest season is 76° to 78° at mid day, and at night bed covering is necessary for comfort.

The opportunities for commercial traffic are constant and inviting. We are informed on good authority that flour brings $16 to 18 in gold, salt pork $50 per bbl., mackeral $20 in gold, codfish $12 50, cotton prints 40 to 60 cents, specie, per yard, liquors in bottle average 1 to $2 each, lard sells for 40 cents per lb., cheese 25 cents, pilot bread 7 cents.

In fact the whole of our American products and all kinds of American manufacture are saleable in considerable quantities on the island, with a certainty of increased demand as the country resumes its quite and repose.

Here then at our very doors lie a country with which we may drive a profitable business, extract gold on the largest scale, obtain copper of the best quality, the most precious of woods and the most valuable kinds of food. A few day's sail places enterprise within reach of easy gratification and distance opposes the smallest obstacles to success.

It is well known that this JOURNAL devotes much of its attention to commercial subjects, and advocates a policy on the part of the Government to extend our trade and navigation, wherever it is practicable to do so. There is much talk just now of our obtaining the island of St. Thomas from the Danish Government as a naval station for our squadrons in the West Indies. Here is a spot already selected by an American interest which would cost the Government nothing but the outlay for wharves and storehouses on a navigable river of convenient access. Not that any such idea prevails for a moment among those interested in the country, but it is very evident that an American settlement at the mouth of the Yaqui would answer all the purpose of the station at St. Thomas, and cost little or nothing to the Government.

At any rate, we are disposed to encourage every effort to extend our commerce in this direction, and we hope we shall hear more of the present enterprise which we have casually had occasion to notice.

Albert County Branch Railroad.

We learn from the St. John *News*, that a company for the construction of this road has been temporarily organized. Hon. W. H. Steeves is President; Thos. McHenry, Secretary; Hon. E. B. Chandler, Treasurer; and Hon. A. E. Botsford, James Steadman, Geo. Calhoun, and E. R. Burpee, Esqs., Directors. Three parties are now engaged

in surveying the route, and it is expected they will be through by the 20th of March. Operations on the road will, it is thought, be commenced about the first of April.

Illinois Central Railroad.

The receipts from operations of this road for the years ending December 31, 1864 and 1865 have been as follows:

	1864.	1865.
Freight	$3,706,632 72	$4,040,587 03
Passengers	2,360,398 55	2,722,262 32

Compared with the year 1864, the gross income from traffic in 1865, shows an increase of $851,761 17; with an increase in operating expenses of $1,049,055 04—making a decrease in net earnings of $197,293 87. Deducting the charter tax, the loss is $288,269 67. The balance to credit of Interest Fund Account, being amount applicable to interest and dividends, is $592,786 02 less than the previous year. The President in his report says:

This railway, communicating between the northern and southern States, lost at the opening of the war its southern business, which had been growing up for many years. During the war, our large armies were supplied to a great extent over this line, furnishing a substitute for the traffic lost. Upon the return of peace, army business was mostly discontinued, and as considerable time must elapse before the former relations between the two sections could be restored, solicitude was felt for the traffic in the interval. It may be also added, that the close of the war found the season too far advanced to admit of planting, thus leaving what the war had spared of the capital and industry of the South, to a great extent unemployed. It will be perceived that these circumstances placed this railway largely upon its local resources for traffic during the past season. Notwithstanding Illinois sent to the field over 200,000 men, we find that the population and area of cultivation have steadily increased during the war, more especially on the line of this road. The gross earnings of the line, for 1865, were $7,181,208 37, against $6,329,447 20 in 1864, being an increase of $851,761 17. The Mobile and Ohio Railway, an extension of our line from the Ohio River to the Gulf of Mexico, is hardly yet reopened; other southern lines tributary to ours have not been placed in working order. When these and other old channels of trade shall have been re-opened, and the business relations of the North and South restored, we confidently expect to increase our traffic. As the season for planting approaches, we are beginning to realize strong confirmation of this. For sixty days past all the rolling stock we could spare has been used in the transportation of supplies for the South, showing that the cotton, sugar and tobacco plantations are now being reconstructed. It is demonstrable that during the war the local business of the road has been growing, and when the full volume of restored southern trade shall have been added, I can hardly perceive how we can fail to realize an increase in the aggregate.

Since our last annual report, we have earned $7,181,208 37; received from collections in the land department, $1,933,915 40; expended on permanent structures and increase of equipment, $854,434 22; and for operation, $4,509,794 43. We have paid to the State our annual tax of seven per cent. on the gross earnings for the year ending Oct., 31st, 1865, amounting to $496,489 84; have paid interest on the funded debt, $810,050, and two dividends of five per cent. each on the capital stock, amounting to $2,236,584 21, in addition to a stock distribution of ten dollars per share, and have reduced our funded debt by the redemption and cancellation of bonds, $900,500. We commenced the new year with a balance of net cash assets on hand of $1,703,525 25, being $550,000 in excess of the dividend of five per cent. declared for the 1st of February, 1866, and since paid, and with a stock of supplies on hand valued at $876,478 63. The amount of bonds canceled and in the hands of the Trustees, in anticipation of collections by the land department, was, on the 31st of December, $2,341,500. During the past year your equipment was increased by the addition of 22 new locomotives (two more being nearly completed at our own workshops,) 5 mail and baggage cars, 62 platform cars, 1 derrick car, with shop machinery and tools, to the amount of $532,540 72; and your construction account was increased, for new iron bridges, new station buildings, engine houses, workshops, and other permanent improvements, $321,893 50. Wherever the condition of the property or the interests of the company required it, repairs have been made to station buildings, workshops, bridges, etc. The track has received extensive repairs, and is now in better condition than for some years. The machinery and rolling stock of the road, consisting of 148 engines, 112 passenger cars, and 3,337 freight cars, have received thorough and expensive repairs. They are now in good condition, and with the 22 engines added this year, are equal to a traffic of $8,000,000 per annum.

The contracts for station service at the three terminal stations, Chicago, Cairo and Dunleith, have been abrogated, and the business is now managed by salaried agents.

This company has no arrangements with any express freight lines. The only contracts of this nature are with the American and Adams Express Companies, for the carrying of money and parcels. Our revenue from these two companies, from arrangements entered into on the 1st day of May last, will amount to $180,000 per annum. These contracts are renewable yearly.

The following general statement is condensed from the reports hereto annexed:

Balance of net cash assets as shown in last Annual Report		$2,298,706 77
Gross earnings in 1865		7,181,208 37
Net receipts of land department		1,933,915 40
Decrease in working supplies		197,198 92
Decrease in miscellaneous assets		128,897 79
Profit and loss, New York office		57,862 45
Receipts on shares for payments of past due calls, and difference in conversion of canceled bond scrip into shares		14,520 00
Amount of 6 per cent. redemption bonds, issued in exchange for 7 per cent. construction bonds		477,000 00
		$12,289,309 70
Permanent expenditures—		
Masonry, bridging, new station buildings, etc.		$321,893 50
New engines, cars, machinery and tools		532,540 72
Operation expenditures—		
Maintenance of road	$1,296,193 22	
Maintenance of mach'y	1,261,752 44	
Train expenses	840,969 57	
Station expenses	578,030 44	
General expenses, salaries, claims and damages, etc.	532,848 76	
		$4,509,794 43
State tax of 7 per cent. on gross earnings, for the year ending October 31, 1865		496,489 84
Interest on funded debt		810,050 00
Sterling exchange on coupons payable in London		128,537 88
Dividends on shares		2,236,584 21
Payment of 8 per cent. bonds of '65		238,000 00
Payment of optional right bond		1,000 00
Bonds, canceled by land department collections, $1,054,000 & premium		1,212,100 00
Bonds redeemed and delivered to Trustees in advance of collections, in addition to those in their hands January 1, 1865, being excess of bonds paid off in 1865, over the am't canceled as above	$84,500 00	
Premium on same	14,294 37	
		98,794 37
Balance		1,703,525 25
		$12,289,309 70

During the past year the rates of transportation did not keep pace with the increase in the cost of operating and maintaining the line, as compared with the preceding year. The appreciation in prices of labor and supplies did not reach its maximum until about the close of the war, and has not receded upon the return of peace, although an early reduction in expenses may now be expected. As compared with the previous year, our earnings have increased $851,761 17, and operation expenditures $1,049,055 04.

The iron originally placed in the track was of a very excellent quality, but the time had arrived when large renewals had to be made, and hence during the past year the expenditures on this account charged to operation were greatly in excess of previous years. There were 6,578 tons of iron used in repairs of track in 1865, costing, with

ties, chairs, other materials and labor, $1,216,952 86, against 3,477 tons at a cost of $794,569 77 in 1864, showing an increase in 1865 of 3,100 tons, at a cost of $422,383 09 over 1864. There were also extraordinary expenditures in the machinery department, amounting to $140,000, caused by inability, on account of pressure of business, to make the needful repairs in the preceding year. This excess for iron, repairs of machinery and other extraordinary expenditures, amount to $575,000, after deducting the credit referred to by the General Superintendent. Deducting this amount from the operation expenditures and excluding therefrom the State tax, which in the above statement of account is treated as a separate item, the amount of operation expenditures in 1865 is $3,931,794 43, or $475,055 04 in excess of 1864, and the amount of net earnings $3,246,413 94, or $377,706 13 in excess of 1864. For further details of the operations of the transportation department, I refer you to the report of the General Superintendent, and accompanying statements.

The report of the Land Commissioner shows that sales were made to 2,364 purchasers, of 155,056.82 acres, at an average of $12 07 per acre, for $1,872,309 52, the average price per acre being $1 11 more than in 1864. Our rule now is, to require the payment of one-fourth down on all sales made, and to sell only to actual settlers. The total obligations now held by the company, upon most of which partial payments have been made, leaving a balance of $8,785,035 25, are good, and will be paid. There were 998,069.36 acres of land remaining unsold at the close of the year. During the past year the sales of land in the southern part of the State were much larger than in previous years, owing to the culture of cotton, tobacco and other southern products, which promises to enable us to dispose of large tracts of land hitherto comparatively unsalable. I believe this has been the most successful land enterprise ever organized in this country. While others have been regarded as monopolies and have met with strong public opposition, this, having been conducted on principles of uniform justice and good faith, has been free from local jealousies and discontent. No purchaser, being an actual settler upon the land, has lost his home through rigorous or harsh treatment on the part of the company. Where indulgence has been deserved, it has been extended to meet the necessities of the farmer. For further details of the operation of this department, I refer you to the report of the Land Commissioner, and accompanying statements.

During the past eight years the debt of the company has been materially reduced. In December, 1858, you had, in round numbers, $19,500,000 of debt; now you have $12,300,000. The share capital was then held by about 900 shareholders, and now by 1,450.

From the report of the Superintendent we learn that the motive power and rolling stock have been well maintained, and will compare favorably with its condition at the time of any former report.

The number of miles run by engines with passenger trains during the year was 1,010,961; with freight trains, 1,977,163; with construction trains, 69,878; with wood trains, 3,027; with switching trains, 446,437—total, 3,507,466, an increase over the previous year of 120,616 miles. Average number of cars hauled, 12.82; pounds of waste used, 55,514; gallons of oil, 34,787; cords of wood, 9,860; tons of coal and wood used, 97,560.70. Cost of repairs, $627,486 28. Cost of repairs per mile run, 17.89 cents. Cost of wages, 5.65 cents. Cost of cleaning, 1.24 cents. Cost of fuel, 10.65 cents. Cost of oil, waste and tallow, 1.99 cents. The entire cost per mile run by locomotives, including oil and waste, fuel, wages of enginemen and firemen, and repairing and cleaning engines, has been, 37.41 cents, against 32.52 cents in 1864, and 22.28 cents in 1863; the total cost being $1,313,337 26, $1,125,298 68, and $670,802 43 respectively.

The expenditures on account of machinery department have been large, principally caused by the high price of labor and materials, and the extraordinary amount of services required in former years by the Government, leaving the burden of the repairs to be performed during the past year.

The number of locomotives belonging to the company is 148, being an increase of 22 over the number of the previous year, of these 139 are coal burners. The number built in the company's shops during the year was 5, and 2 more are under way and will be completed early in the season.

The company have 69 passenger cars, 34 baggage, mail and express cars, 1 officer's car, 1 pay car, and 7 sleeping cars; 3,337 freight cars; 4 derrick, 3 wrecking, and 3 tank cars, and 14 snow plows. There have been added to the rolling stock during the year, 5 mail and baggage cars; 62 freight, and 1 derrick car; 50 flat cars have received coal car bodies. The repairs have been extensive, 13 passenger, 4 mail and baggage, and 157 freight cars have been rebuilt; 2,619 cars of all classes have received thorough repairs, and 745 were re-painted. The cost of repairing passenger cars was 3.28 cents, and freight cars, 1.22 cents per mile run.

In addition to the motive power and rolling stock that have been charged to permanent expenditures during the year, there has been a large amount of shop machinery and tools supplied to the various shops.

The amounts charged on account of road department for the year have been $1,493,575 23 to operation, and $321,893 50 to permanent expenditures. The items used in operation account were for repairs of track and bridges, amounting to $1,833 37 for each mile of road, and to 37.9 cents for each mile run by locomotives, being an increase over 1864 of $595 12 per mile of road, and 11.9 cents per mile run. There were used in the repairs of road during the year, 308,198 cross ties, 343,285 lbs. spike, 45,844 chairs, 52,521 fish plates and bolts, 19,822 bars of re-rolled iron, 10,987 bars of new iron, 17,001 bars of repaired iron, and 10,828 bars of old iron. The average cost of repairing iron was $1.02 per bar. The bridges and station buildings have received thorough and in many cases extensive repairs. There have been 2 miles of ballasting completed since the last report, in Cairo freight yard, and 3,400 feet on the east track south of Weldon shops, and the cost of stripping on Section 12, preparatory to getting out gravel, and about 140 miles of board and post fence.

The number of passengers carried was 1,092,787—an increase of 105,117. Number carried one mile, 88,614,440—a decrease of 12,197,286. Average number of miles traveled by each passenger, 73. Revenue per mile 3.07 cents. Do., per mile of road, $3,850 44.

Tons of freight transported, 1,034,946—an increase of 12,922. Tons carried one mile, 136,494 661—a decrease of 16,777,007. Average distance each ton was carried 132 miles. Revenue per ton per mile 3.10 cents. Average revenue per ton, $4 10. Tons of freight carried one mile north, 46,490,718; do., south, 90,003,943. Tons of local freight carried, 915,933; do., carried one mile, 120,745,225; do., carried one mile north, 42,177,514; do., south, 78,567,661. Tons of through freight, 119,013; do., carried one mile, 15,749,485; do., carried one mile north, 4,313,204; do., south, 11,436,281.

Land Department.

From the report of the Land Department we learn that the total land sales in 1865, were 154,252 acres, for $1,850,895 79. The aggregate sales from commencement to January 1, 1866, were 1,596,931 acres, for $18,811,673 44. The unsold lands amount to 998,069 acres.

The following is a statement of transactions of the Land Department for the year 1865, and general statement of accounts to December 31, 1865:

Land notes and contracts on hand as per report of 1864		$9,357,692 56
Received in 1865	$1,087,644 77	
Canceled in 1865	555,229 80	
		532,414 97
		$9,890,107 53

Making the aggregate in Trustees' hands		$3,171,294 00

Journal of Railroad Law.

The case of Smith *vs.* New York Central Railroad Company, lately decided by the Superior Court of this State, was an action brought for the recovery of damages alleged to have occurred to certain merchandise, through the negligence of the defendant as a common carrier, on or about the first day of February 1857. The property in question, and the claim for damage thereto, was assigned by the vendee, Milliman, to the plaintiff, before the commencement of the action. The action came on to be tried at the Monroe Circuit, in April 1864, before his honor James C. Smith, Justice, and a Jury. The plaintiff proved that January 29th 1857, Smith, Palmer & Co., delivered to the Western Railroad Company a case of cigars, directed in substance to R. Milliman, Rochester, New York, to be duly forwarded to him; that in February of that year the defendant delivered the cigars, in bad order, to the vendee, Milliman, that "the Western Railroad, and the New York Central Railroad connect together at Albany," also entries in the defendant's books at Albany, showing, in abreviations, the receipt of the cigars from the Western railroad by the defendant. The plaintiff offered in evidence the affidavit of A. A. Wemple, Co., general freight of the defendants at Albany, explaining said entries, rnd admitting that there were no entries, in the defendant's books at that place, for 1857, showing any damage to said cigars, which was excluded by the court. The plaintiff further proved the measure of damages, viz., $309, at that time, their value in the condition in which they were delivered to the vendee being nothing whatever; the assignment of the bill of sale, and the claim for damage thereto, to the plaintiffs. The plaintiff having rested, the defendant moved for a nonsuit; which motion was granted. A stay of proceedings for sixty days was ordered, to enable the plaintiff to make a case and exceptions, to be heard at the general term in the first instance.

By the Court, Johnson, J. The action was brought against the defendant as common carrier, by carelessness and negligence. The plaintiff, to maintain the action proved the delivery of the property in good order to the Western Railroad Company, in Massachusetts, to be transported to R. Milliman, in Rochester, New York; that the railroad of that company connected with the defendant's railroad at Albany; that the goods were delivered to Milliman at Rochester by the defendant's freight agent in a condition so damaged as to be entirely worthless. He also gave in evidence copies of entries in the defendant's books tending in some degree, to show that the goods were received by the defendant at Albany from the Western Railroad Company. This evidence was uncontradicted. The plaintiff was non-suited. I am of opinion that the non-suit was wrong and should be set aside. The defendants counsel insists that there was no evidence to show that the property was in a sound condition, when it was received by the defendant. If this is so, the nonsuit was proper. The plaintiff must of course give evidence sufficient to show that the goods were in good condition when they came to the possession of the carrier, as part of the evidence that they have been injured while in the carrier's custody. Merely showing a delivery by the carrier in an injured condition is not enough. It must be shown in what condition the carrier received them, in order to prove an injury in his hands. This may be shown by direct affirmative evidence, or by proof of facts and circumstances from which the presumption of fact arises, that the goods were in proper condition when the carrier received them. Enough was I think, proved in this case to raise such presumption. The property was placed in the possession of the Western Railroad Company in good order and condition, and until the contrary is shown, must be presumed to have continued in that condition, while in the possession of that company. It was delivered by the defendant, after being transported over its road from Albany to Rochester, in a damaged condition; and the further presumption necessarily follows, that it received the injury while in the possession of the defendant. The general rule is, that things once proved to have existed in a particular state, are to be presumed to have continued in that state until the contrary is established by evidence, either direct or presumptive. (Best on Presumptions, § 136. Sleeper *vs.* Van Middlesworth, 4 Denio, 431. Walrod *vs.* Ball, 9 Barb. 271. Cooper *vs.* Dederick, 22 id. 516.) Unless this rule is to be applied to goods delivered, to be transported over several connecting railroads, there would be no safety to the owner. It would often be impossible for him to prove at what point or in the hands of which company, the injury happened. But give to such party the benefit of the presumption that the goods he has delivered in good order in such case, continued so until they came to the possession of the company which delivers them at the place of destination in a damaged condition, and his rights will be com-

pletely protected. The burthen is then shifted upon the latter company of proving that such goods came to its possession in a damaged condition, by way of defense. This proof the latter company can always make, much more easily and readily than the converse can be proved by the owner. This is in perfect harmony with a well settled rule of law, as an exception to the general rule. The general rule undoubtedly is that the burthern of proof is always upon the party who asserts the existence of any fact which infers legal responsibility. But the exception is equally well established, that in every case the *onus probandi* lies on the party who is interested to support his case by a particular fact which lies more particularly within his knowledge, or of which he must be supposed to be cognizant. If the subject matter of a negative averment lies peculiarly within the knowledge of the other party, the averment is taken as true unless disproved by the other party. (1 Greenl. Ev. § 79. 1 Stark. Ev. 362–365. Wills on Circumstantial Ev. 183, 184.) This applies in all civil cases. A familiar instance is, the action to recover the penalty for the violation of the excise law. And it applies also in criminal cases in weighing the evidence, after slight evidence has been given, sufficient to raise the presumption that the allegation is true, in the absence of any evidence to the contrary. In this case, and all cases of like nature, I think it is enough for the owner to show that he delivered the property to the connecting road in good condition, and that the burthen is then cast upon the company delivering the goods injured in proving that they were not injured in their possession, or that they came to their possession thus injured. This evidence in almost every case is all that the owner can possibly give, inasmuch as he is not supposed to accompany his property in the transit. The defendant was unquestionably a common carrier in reference to this property, and subject to all the liabilities of such carrier to the plaintiff, though it may have received it from the Western Railroad Company alone, and upon its undertaking to transport the property to Rochester. The statute (2 R. S. 693, § 67 5th ed.) expressly makes any railroad company receiving freight for transportation, subject to the same liabilities as common carriers. The liability attaches upon the receipt of the property for the purpose of being transported, and is to the owner of the freight. But this liability is for its own acts, or for injuries which such freight receives while it is in custody for such purpose, and not for the acts of the other companies which may have previously injured such freight.

The plaintiff's counsel seems to insist that under § 67 of the statute above referred to, the defendant would be liable to the plaintiff, even though the goods were injured while in possession of the Western Railroad Company, and came to the possession of the defendant in the same injured condition in which it was delivered by the defendant at Rochester. But I do not think the statute was intended to create any such liability against any company except the one which first received and undertook to transport the freight. The language is "whenever two or more railroads are connected together, any company owning either of said roads so connected shall be liable as common carriers for the delivery of such freight at such place." It is obvious I think that this was intended to apply only to the company originally receiving and undertaking to convey and deliver the freight. In this respect the statute is only declaratory of the common law obligation of the carrier making the contract. He undertakes for all the carriers intermediate the points of shipment and delivery. (Bartis *vs.* The Buffalo and State Line R. R. Co. 24 N. Y. Rep. 269.) But an intermediate carrier, who was not a party to the original undertaking, would, I apprehend be liable only as an ordinary carrier, for loss or damage arising while the goods are in his possession as such carrier. This gives the owner his election, in case of loss or damage, to bring his action either against the carrier with whom the original undertaking was entered into, or against the particular carrier in whose hands the loss or injury has occurred. There can be no doubt, I suppose that the latter is clearly liable for his own default, without any aid from the statute.

Courts may take judicial notice of whatever ought to be generally known, within the limits of their jurisdiction. (1 Greenl. Ev. § 6.) This would I think, include notice of the great lines of public travel and transportation of property, and their connection with each other, and the general course of trade and transportation through the country. In a case like this the court would infer, without further proof than was given a delivery of the property by the Western Railroad Company, to the defendant to be transported by the latter as carrier to Rochester. I am clearly of the opinion therefore, that enough was proved by the plaintiff to put the defendant upon its defense, and to authorize a recovery by the plaintiff as no counter evidence was given. If these views are correct, it follows that the nonsuit should be set aside and a new trial granted, with costs to abide the event.

☞ A recent survey of the route of the proposed railroad between Manchester and Keene, N. H., shows that it is quite direct. The entire length to be built is 46 miles, and the estimated cost $1,500,000.

Nashua and Lowell Railroad.

The receipts and expenses of this road for the years ending March 31, 1864 and 1865, have been as follows:

Receipts:	1864.	1865.
From freight	$126,482 78	$150,189 88
" passengers	107,041 58	142,739 35
" expresses	2,860 20	3,740 02
" mails	2,890 02	2,831 06
" interest	2,148 23	1,493 72
	$241,422 81	$300,994 03
Disbursements:		
Repairs of road	$26,163 09	$41,212 55
" engines	9,610 81	16,768 04
" cars	15,277 55	20,641 38
" bridges, buildings, etc.	6,296 08	15,284 58
Fuel	24,794 01	34,570 76
Oil and waste	3,265 55	5,018 82
Rents	32,022 41	30,321 31
Conductors, etc	24,792 95	31,602 69
Merchandise and depot expenses	19,472 49	26,002 78
Miscellaneous	18,343 86	28,343 77
Dividends 8 per cent.	48,000 00	48,000 00
Contingent fund	13,384 01	3,227 35
	$241,422 81	$300,994 03

The following is a comparative statement of the receipts, expenses and net earnings of the road for the years ending March 31:

	Receipts.	Expenses.	Net.
1860	$235,950 16	$164,506 46	$71,443 70
1861	246,905 80	180,666 87	66,238 93
1862	185,657 37	142,548 17	43,109 20
1863	201,435 27	146,188 35	55,246 92
1864	241,422 81	180,038 71	61,384 01
1865	300,994 03	249,766 68	51,227 35

The financial condition of the company, April 1, 1864 and 1865, is as follows:

	1864.	1865.
Construction	$486,593 84	$486,593 84
Equipment	92,870 00	92,870 00
Fixtures and stock in shop	20,536 16	20,536 16
Real estate	17,698 54	113,023 54
Materials charged to other roads	39,652 43	56,766 44
Notes receivable	35,000 00	4,000 00
Cash on deposit	68,340 72	40,801 24
Sundry accounts	400 54	400 54
	$761,092 23	$814,991 76
Capital stock	$600,000 00	$600,000 00
Unclaimed dividends	1,269 00	1,451 00
Wilton railroad	7,000 00	7,000 00
Stony Brook road	8,850 00	8,850 00
Dividends declared	24,000 00	24,000 00
Notes payable		50,440 28
Contingent fund	119,973 23	123,244 48
	$761,092 23	$814,991 76

President.—F. B. Crowninshield.

Directors.—F. B. Crowninshield, Daniel S. Richardson, Edward Spalding, Onslow Stearns and Henry Sigourney.

Superintendent.—John B. Winslow.

Treasurer.—Edward Spalding.

☞ The Reno, Oil Creek and Pithole Railroad Company, and the Kersey Railroad Company have been consolidated. The latter company is the owner of the railroad track from Rouseville to Humboldt, upon Cherry Run, and this consolidation removes all the difficulties which have hitherto hindered the progress of the former upon that portion of the route, and ensures a more speedy completion of the line to Pithole than could otherwise have been accomplished. Regular trains are run between Reno and Rouseville; making close connection at Reno with eastward bound trains of the Atlantic and Great Western Railway, and at Rouseville with a regular line of hacks to Plumer, Pithole, and the oil regions above. The road will be completed to Plumer and Pithole in a few days.

☞ A meeting was held at Carmi, Ills., on the 24th ult., to consider the subject of the completion of the Illinois Southern Railroad. Resolutions in favor of White County issuing bonds for the sum of $100,000 in aid of the road were passed.

☞ A bill has passed the Wisconsin Legislature to authorize the towns on the line of the Prairie du Chien and La Crosse Railroad, to aid in its construction. Also to authorize Milwaukee and Prairie du Chien Railway to hold property in other States.

☞ The track of the new railroad line between Fall River and Braintree (formerly the Dighton and Somerset road) is nearly completed. The line crosses the track of the New Bedford and Taunton railway a short distance northerly of the Weir station.

American Railroad Journal.

Saturday, March 17, 1866.

Stock Exchange and Money Market.

It is a remarkable circumstance that in the progress of the country from an unsound to a sound currency, which has been thus far made without any damage to its interests, there still remains a portion of the press which stands up for the false basis, decries a return to the normal standard of values, and predicts all sorts of ruin to the people if they are not kept supplied with false money and prices of the highest range.

Thus we find in the money article of a leading journal a few days since, it was maintained as desirable for the interests of the country, that the premium on gold should again advance; that confidence was shaken by the *sudden disturbance of the paper dollar*, which means its improving in value and in purchasing power, and which most holders would think an advantage; in short, that the approximation of the gold and paper dollar "is of no assistance," in paving the way to a return to specie payments. The same journal also adds, that with the recovery of the gold premium, dry goods will be likely to assume a firmer tone. Those persons deferring purchases will become eager to buy. The dry good trade is thus propped up for the occasion.

Here then, we have the key to one movement not difficult to be understood. It is apparent enough to us. We have doubtless engaged in business on inflated prices a very large number of millionaire dealers. It is of common fame that their sales are ten, fifteen, twenty millions of dollars during a year. So, too, the large cotton and other manufacturing companies have enormous sums afloat in stock and debts at paper prices. These persons knew the risk they ran in continuing their business on a paper basis; but they made so much money by the operation they resolved to go on, and now their only fear is that the country may really become truly solvent. When we read articles misrepresenting the condition and the policy of the Treasury department; when facts are persistently perverted; when the fall in gold is lamented, and the rise in the value of the paper dollar spoken of as an alarming circumstance, we may fairly conclude that finance is yet in some quarters an unknown science, and to follow such blind guides much further we shall surely be led into the ditch. It is indeed a most extraordinary circumstance that any class of journals, boasting of experience and influence, should be found attempting to retard the return of the country to the paths of honor and integrity; should uphold for a single moment a system which is false and unreal, which has corrupted and demoralized trade and commerce, and has placed the whole power of the country in the hands of jobbers and brokers.

Now, for our part, we rejoice to see the premium on gold decline, and the value of the paper dollar appreciate. We see in these results the fulfilment of sound principle working on a solid basis, and exemplifying the value of our institutions when put to the test of trial. We notice with intense satisfaction that every time gold declines at home, our stocks rise abroad; that the money of the country is worth sixty millions of dollars in gold more than it was a month or six weeks ago. To deprecate and regret an equality between the gold and paper dollar is a most curious action on the part of a political economist and financier, and may be set down as one of the marvels of the hour, and unexplainable, except we trace out the interests which are at work together; and are combined to retard and not to promote the general prosperity. We cannot disguise our alarm at the ready prevalence of the easy doctrines intended to keep up inflation, raise the price of gold, sustain the enormous values of manufactured goods, and of the necessaries of life. All this is in the interest of a class of monied men who are desirous of perpetuating their profits, adding still more to their millions, and grinding out of existence a class of moderate business men who have hitherto been a large interest in the country, and a most reliable one, and are in fact the salt of the community.

It is very noticeable that while the speculating press is engaged in discouraging any return to specie payments, their columns are filled with the testimony of experts like Rothchild, who do not hesitate to affirm their opinions as boldly as ever, and scout at the idea of any system being permanent which is based on fictitious credits and paper that cannot be redeemed.

We might as well look this matter boldly in the face. The country cannot afford, in justice to its great and permanent interests, to be kept in an insolvent condition; it cannot be retarded in its general career by any individual interests. One rule for all in money, is the only safe rule in a commercial or free country; and uniformity in values in the gold as in the paper dollar is indispensable to the successful pursuits of industry and honest accumulation. All the special pleading in the world cannot change the facts that a false currency is a fraud, both of Governments and people; and the sooner it is done away with the better. We are just now in the right path, we have only to keep it, and we shall come out well. Everything favors our honest intentions. Our resources are large, our revenue is ample, our surplus on the increase; we have every assurance of our being able to maintain our credit throughout without the least difficulty. Nor should we be called upon to delay our return to a sound state of things, because we are told that in England it took many years to do so. There is no kind of resemblance between England and the United States; no parallel in their finance or legislation. The British people are always an unwilling people when called on to pay, or to be taxed. A farthing more or less, on a glass of ale would at any time endanger a political party in England; while here we submit, with the most perfect good humor, to taxes on every kind of drink, to an extent which is quite remarkable.

We have on many occasions suspended and resumed specie payments without much delay; certainly without taking 20 or 30 years to do it in; and we are under no necessity of delaying our own solvency in order to complete any parallel of English history. The rapid appreciation of our paper money is in fact a returning to specie payments; and for the very natural and sensible reasons that our debt is diminishing, and our resources growing up to the paper which represents them. The people believe their currency is intrinsically and truly as good as the gold it represents. So that we may ere long see a general equalization of gold and paper going on without any disturbance whatever. The difference between par and gold at 30, is much less than between it and gold at 285; and the steps to resumption actually grow easier every day as the differences disappear.

We have occasion to welcome a friendly laborer into the field of political economy, in the shape of a new series of DeBow's *Review*. This work, which was always one of meritorious research, is now revised under happier auspices, and with more correct convictions. The great disturbing element having been removed, we do not see why the material interests of the South and North may not move on together harmoniously. Certainly in the production of the great staple we see the grandest results for all. Mr. DeBow in he number of his *Review* for March of the present year, has considered at some length, and with much detail, the cotton interests of the South, the result of an extended personal tour through the cotton States. The crops is estimated by him as likely to reach 1,500,000 bales, after making all the necessary deductions, though many are sanguine of a much larger return. He says:

Under all the advantages of the old system of labor, and with the full agricultural force which existed in 1860, the crop of the cotton States, with a fair season, might reach five million bales; but taking the chances of such a season one year with another, it would be a reasonable estimate to say 4,500,000 bales.

The efficient negro population of the South has been reduced by the war, on a liberal estimate, one-fourth. Upon the supposition that all now in existence are willing to work up to the standard of the past, a deduction of one-fourth must therefore be made from the above figures,

But would it not be an absurb hypothesis to suppose that in the inexperience, the ignorance and wild hopes of sudden freedom, that the negro will be so productive an agent as under the regulations and system of slavery, which existed two hundred years? No one familiar with the character of the black races would make such a mistake, and there are no results so far which would cause us to make it. A fair deduction of another quarter will therefore be very safe. Thus the 4,500,000 bales must submit to be divided by two.

Here, then, we have a profitable crop of 2,250,000 bales, *with the whole cotton region under full cultivation*..

Is that an existing condition? Our observation, conversation and collected information from every source, leads to the belief that *not more than half of the cotton district will be cultivated*—that is, meaning by the district, the average lands of the country. More than half the number of acres may be put under cultivation; but it will not be of the richest and best lands—the prolific river bottoms. These, from the expense of working, and for other reasons, are left out. Any one who will examine the newspapers and land agencies of the South, will perceive the truth of this remark. To be on the safe side, however, assume that only one-third of the lands are uncultivated, and the crop is reduced to 1,500,000 bales.

This, in the opinion of the Editor of the *Review*, is a very fair calculation, and is based, it will be noted, upon assumptions which experienced men know to be more liberal than will probably be realized.

The figures *are not likely to be increased* by anything that is *now* to happen, and *may be greatly reduced* by the ignorance, neglect or desertion of the laboring forces, which, judging from the experience of all other countries, is more likely to occur than not, and reduce the crop to 1,000,000 or 1,200,000 bales.

No account is taken in the calculation of the application of white labor to cotton, beyond what was applied to it before the war. The extensive mortality of the war has made white labor at the South very scarce, and so far it is absorbed in the necessary pursuits of the mechanic arts and trade, which have been furnishing most lucrative employment. The wear and tear, and frightful destruction caused by the war, opened other channels of employment besides agricultural.

The increase of white labor at the South, so far as the next crop is concerned, from *immigration*, is too trifling to be taken into account. The aggregate number of laborers introduced is insignificant, and so far is largely absorbed in the cities, etc.

These are our views, and we are willing to stand by them.

Future years of emancipation may, and doubtless will, produce vastly improved results. Certainly the field is a wide one, and is open to enterprise and capital. We are among the hopeful.

It is worthy of notice that the supply of money continues very large. Dealers in fair credit have more offered to them than they know how to employ. So far, then, we have not yet suffered by any contraction in our currency to any visible extent, and the various losses due to contraction are yet to be experienced. On the contrary, prices keep up much too long and too high for the real benefit of the people. Who would believe that those consumers, who are in the habit of buying flour or other meal, such as buckwheat, in small quantities are actually paying at the rate of $16 per bbl. for flour, and as much for buckwheat, always until now the cheaper grain. The wrong has been pointed out again and again by the press, yet the swindle continues.

Thus, therefore, we see paper money abundant, the currency actually improving, and prices keeping up, to the great suffering of consumers of moderate means.

We see many paradoxes before our eyes as we contemplate our system of finance, and find it differing in its operations from many known rules of conduct elsewhere. It is safe to say that we are in fact returning to specie payments without much difficulty as yet, and without the prospect of much embarrassment in the future. The fall in gold is doing the business for us.

The tendency to a decline continues, and the press which favors inflation attributes the decline to the brokers themselves, who have generally resolved to lower prices on their own account. At least such is the ridiculous explanation given for the continual fall. Our 5-20s continue to rise on the foreign exchange, being now a fraction above 70.

The balance in the Sub-Treasury on Wednesday was $91,905,285 05.

The New York exports, exclusive of specie, for the week ending March 13, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$3,657,542	$3,669,361
Prev. reported	40,287,206	42,035,069
Since January 1	$43,944,748	$45,700,430

The New York imports compare as follows:

	1865.	1866.
Dry goods	$1,309,777	$3,898,261
Gen. merchandise	1,801,237	4,555,644
Total for the week	$3,111,014	$8,433,905
Prev. reported	19,554,251	53,236,902
Since January 1	$22,665,265	$61,670,807

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Missouri Railroads.

Proposals will be received by GEN. P. JOS. OSTERHAUS, President of the Board of Commissioners of the Southwest Pacific Railroad (heretofore known as the Southwest Branch of the Pacific Railroad,) until the 9th of May next, for the purchase of said road, and all the other property, appurtenances, privileges and franchises belonging thereto. Our correspondent in Missouri, Mr. Henry Kraut, who is a mining engineer of long standing and great experience, but who has no interest whatever in railroads, in a recent letter to us, says:

"I have carefully examined all the territory through which the Southwest Branch runs, or will have to run. The reports of the geologists of Missouri are far behind the truth. The geognosie of the mining engineer and mineralogist will show more riches; and the capitalist of the East is invited to pay particular attention to that part of Missouri where the Southwest Branch will go through. I have done so, and found that there is agricultural and mineral riches not surpassed by any country in the world."

Internal Revenue Decision.

The Commissioner of Internal Revenue, in reply to a letter in relation to the stamp duty on a subscription paper where the subscribers each agreed to take stock in a railroad company, has decided that such subscription, unless the sum subscribed is paid when the list is signed, is held to create a promise to pay a definite and certain sum of money, and, therefore, each person signing his name and not paying his subscription at the time should affix and cancel a stamp appropriate to a promissory note of the amount subscribed. If a person signs the list and pays the subscription at the time, his signing the paper would be a mere memorandum, and as such would not be subject to stamp duty. If a subscription list is made in such a form as that the subscribers bind themselves to pay only in the event of a certain amount being raised, then each signature is held to form an agreement or contract, and as such subject to a stamp duty of five cents. But if each signer agrees to pay unconditionally, then each creates a new instrument subject to a stamp duty as a promissory note.

To Contractors.

The North Missouri Railroad Co., St. Louis, Mo., will receive proposals until the 20th of April for the construction of the Extension of their road from Macon City to Iowa, and from Moberly to Brunswick—in all 93 miles. Bids will be received for one mile and upwards, or for the whole work. Proposals will also be received at the same time and place for the superstructure of bridges, iron or wood, of spans to vary from 20 to 200 feet.—*See Advertisement.*

☞ Messrs. GREENLEAF, NORRIS & Co., having established themselves in new and elegant apartments at No. 6 New Street, (Stock Exchange Building) are prepared to transact any business committed to their charge. Gold, Government, State, City, Railroad, etc., Securities bought and sold on commission. These gentlemen have been too long and favorably known on the street, to require any recommendation at our hands.

☞ We understand that the North Missouri Railroad Company are taking private bids for a bridge over the Missouri river, which will cost, at a guess, $500,000. The fact has not been officially announced for the reason that the examination for foundations are not completed.

☞ We invite the attention of our readers to the card of Messrs. VERMILYE & Co., in our present issue. Having enlarged and newly fitted up the apartments so long occupied by them at No. 44 Wall St., they are prepared to execute all orders for the purchase and sale of stocks, bonds, etc., which may be entrusted to them. Dealers in all classes of Government Securities. Compound Interest Notes, etc., bought and sold. Orders executed at the Regular Stock Exchange.

Erie vs. Illinois Coal.

The following are the results of a trial made with different coals on the Chicago and Rock Island Railroad:

1,083 bush. Erie Coal ... } ran the same distance.
1,831 bush. Illinois Coal. }

Erie Coal Costs.		Illinois Coal Costs.	
On the rail.....	$8 22⅔	At Peru.....	$4 50
Wheeling	40	Pit, say half tariff rate...	1 12½
Loading on tender	28½	Loading	28½
Total	$8 91	Total....	$5 91

To run the same number of miles, Erie Coal costs $386 10; Illinois Coal costs $432 91—equal to 12⅛ per cent. in favor of Erie Coal. Or Erie Coal at $8 91, and Illinois Coal at $5 27 are equal.

The number of miles run was 2,967; and the miles per bushel; Erie Coal, 2.87-100; Illinois Coal, 1.62-100.

Covington and Ohio Railroad.

The bill authorizing the construction of this important work has passed the Legislatures of Virginia and West Virginia in substantially the same form. A commission of five persons from each State will have charge of the whole subject, and will have authority to grant the charter to any company of capitalists who will give proper assurances that the road shall be promptly and efficiently built.

Railroad Earnings.--Weekly.

The earnings of the Chicago and Northwestern Railway for the first week in March, 1866, were $117,455 61
Corresponding week of previous year. 115,860 39

Increase $1,595 22

The earnings of the Chicago and Rock Island Railroad for the 1st week in March, 1866, were $55,172 00
Corresponding week of previous year.. 76.917 00

Decrease $21,745 00

The earnings of the Michigan Central Railroad for the 1st week in March, 1866, were.. $75,923 56
Corresponding week of previous year.. 74,339 48

Increase $1,584 08

The earnings of the Grand Trunk Railway for the week ending March 3, 1866, were:

Passengers	$33,506 00
Express, freight, mails and sundries..	4,750 00
Freight and live stock	87,770 00
Total	$126,026 00
Corresponding week, 1865	122,189 00
Increase	$3,837 00

The earnings of the Western Union Railroad, for the week ending March 7, 1866:

	1866.	1865.
From freight	$4,066 34	$3,839 19
" passengers	3,357 82	3,147 47
" express	250 09	162 80
" mail	296 58	296 58
Total	$7,970 74	$7,446 04

Receipts from Jan. 1, to March 7:

1866	$89,077 81
1865	88,427 09
Increase	$650 72

The traffic of the Great Western Railway for the week ending Mar. 9, 1866, was as follows:

Passengers	$31,881 07
Freight and live stock	44,338 85
Mails and sundries	2,457 28
Total	$78,677 20
Corresponding week of 1865	43,463 85
Increase	$35,213 34

Railroad Earnings--Monthly.

The following is a statement of the business done by the Illinois Central Railroad for the month of February, 1866:

LAND DEPARTMENT.

Acres Construction Lands Sold	9,177.13 for	$92,806 94
Acres Int. Fund Lands sold	322 84 for	4,838 54
Acres Free Lands sold ..	320.00 for	4,658 20
Total sales during month of Feb., 1866	9,819.97 for	$102,303 68
To which add Town Lot Sales		400 00
Total of all		$102,703 68
Cash collected in February		$115,549 53

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$167,908 56
do.	Freight	323,761 00
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	10,000 00
Total Receipts in month of Feb., 1866.		$512,027 89
Total Receipts in month of Feb., 1865.		528,972 00

The earnings of the Pittsburgh, Fort Wayne and Chicago Railway for the month of Feb., compared with the same period last year, have been as follows:

	1865.	1866.
From freight ..	$410,806 50	$290,380 06
" passengers	241,129 98	158,562 46
" express matter ..	9,782 60	8,512 50
" mails	7,825 00	7,825 00
" rent of railway ..	7,083 33	7,083 33
" miscellaneous ...	1,876 90	2,374 95
Total	$678,504 31	$474,738 30
Earnings Jan. 1st, to Feb. 28	$1,368,648 50	$1,030,226 78

The earnings of the Milwaukee and Prairie du Chien Railway for the month of Feb., 1866, were $84,897 44
Corresponding month of previous year 74,283 18

Increase $10,614 26

The earnings of the Chicago and Alton Railroad for Feb., 1866, were $207,913 01
January 1865 ..... 275,822 49

Decrease $67,909 48

The earnings of the St. Louis, Alton and Terre Haute Railroad for the month of Feb., 1866, were $155,893 13
Corresponding month of previous year 153,771 86

Increase $2,121 27

The earnings of the Toledo, Wabash and Western Railroad for the month of Feb., 1866. $194,166 80
Corresponding month of 1865. ..... 139,171 23

Increase $54,995 57

Missouri State Debt.

We give below a copy of the recent act of the Legislature of the State of Missouri for the conversion of the Railroad indebtedness of the State, with the accrued interest thereon to January 1, 1868, into Consolidation bonds, for the gradual payment of the interest on the same after that date, and the final redemption of the principal:

Be it enacted by the General Assembly of the State of Missouri, as follows:

SECTION 1. To provide for the funding of the principal and interest now due and unpaid, and interest accruing up to Jan. 1, 1868, of the railroad indebtedness of the State of Missouri, the Governor is hereby directed to cause to be issued consolidation bonds of the State of Missouri, in sums of one thousand dollars each, to be dated on the 1st day of January, A. D. 1868, and payable thirty years thereafter, with coupons attached for the interest thereon, payable semi-annually, as follows, to wit: at the rate of 3 per cent. per annum for the first four years, at the rate of 4 per cent. per annum for the next four years, at the rate of 5 per cent. per annum for the next four years, at the rate of 6 per cent. per annum for the next six years, at the rate of 7 per cent. per annum for the next four years, at the rate of 8 per cent. per annum for the next four years, and at the rate of 9 per cent. per annum for the last four years.

The principal and interest coupons shall be payable at the Bank of Commerce, in the City of New York, or such other bank as the General Assembly shall hereafter designate. The total amount of the consolidation bonds so to be issued shall not exceed thirty millions of dollars.

The said bonds shall be signed by the Governor countersigned and sealed with the seal of the State by the Secretary of State, and shall be registered in the office of the State Auditor, and the faith and credit of the State are hereby pledged for the payment of the interest and the redemption of the principal thereof.

SEC. 2. The said bonds shall be issued for the single object of consolidating the present railroad indebtedness of the State, and shall be used only in exchange for the bonds heretofore issued by the State, as well as those guaranteed by the State in aid of certain railroad companies, as follows: For the seven thousand bonds in aid of the Pacific Railroad Company; for the four thousand five hundred bonds in aid of the Pacific Railroad Company, for the Southwest Branch thereof; for the four thousand three hundred and fifty bonds in aid of the North Missouri Railroad Company; for the three thousand five hundred and one bonds in aid of the St. Louis and Iron Mountain Railroad Company; for the six hundred and fifty bonds in aid of the Cairo and Fulton Railroad Company; for the seven hundred bonds in aid of the Platte County Railroad Company, and for the interest on all of said bonds, as aforesaid; and also, in exchange for the revenue bonds now outstanding and unpaid, together with interest thereon.

SEC. 3. The holders of the bonds aforesaid shall, at any time after the passage of this act, have the privilege of exchanging said bonds and the unpaid coupons thereof, and those maturing up to and including January 1, 1868, for a like amount in consolidation bonds, in the manner following: the bonds to be exchanged for consol dation bonds shall be surrendered to the State Auditor, who shall cancel said bonds and coupons, and indorse such canceled bonds with the words "exchanged for consolidation bonds," which indorsement shall be attested by the Secretary of State. The State Auditor shall deliver, in lieu of the bonds so canceled, consolidation bonds to the full amount of said bonds and interest coupons unpaid up to and including those of Jan. 1, 1868: provided, that for any balance less than one thousand dollars, the State Auditor shall give in exchange certificates of indebtedness, which shall be convertible into consolidation bonds whenever presented in sums of not less than one thousand dollars. These certificates of indebtedness shall be signed and sealed by the Secretary of State and countersigned by the State Auditor, who shall keep an accurate register of all the bonds canceled, and of all the consolidation bonds as well as certificates countersigned by him and delivered in exchange.

SEC. 4. To provide for the certain and prompt payment of the semi-annual interest of these consolidation bonds, a tax of one-quarter of one per centum on all real estate and other property and effects subject to taxation, which is required to be collected under the provisions of the convention ordinance of April 8, 1865, entitled "an ordinance for the payment on State and railroad indebtedness," is hereby levied, and shall be assessed and collected for the year A. D. 1868, and every year thereafter, and shall be sacredly applied towards the payment of said interest coupons; and any surplus remaining shall go into a sinking fund, which is hereby created for the payment of the principal, and said sinking fund shall be invested in the consolidation bonds of the State of Missouri, but shall not be diverted or applied to any other purpose.

SEC. 5. Any sums which may be received by the State from the Pacific Railroad and the Southwest Branch thereof, the North Missouri Railroad and its west branch, the St. Louis and Iron Mountain Railroad, the Platte County Railroad, the Cairo and Fulton Railroad or either of them, whether on account of interest or principal of the debt due the State by said roads respectively, or of the tax provided for in the Convention ordinance of April 8, 1865, or any part thereof, or of any other tax which may hereafter be imposed, levied and assessed on any of the said railroads, and the proceeds of the sale of any of these railroads respectively, in payment of which any bonds or other obligations of this State are receivable by law, shall likewise be receivable in the consolidation bonds issued under this act and in the matured coupons thereof, and be placed to the credit of the sinking fund.

SEC. 6. The foregoing section, or any part of this act, shall not be so construed as to affect in any manner the relation of those railroads to the

State, nor so as to relieve the said railroads of any of their obligations to pay interest and principal for which the State holds a lien on said railroads.

SEC. 7. The privilege of bondholders to have their bonds and coupons exchanged for consolidation bonds, as provided in section three of this act, shall expire on the first day of January, A. D. 1869.

SEC. 8. The Secretary of State and State Auditor are hereby authorized to employ such additional clerical force as may be necessary, in the performance of the duties required of them by this act. And any other expense necessarily to be incurred under the provisions of this act shall be paid out of the treasury, and charged to the State interest fund.

TABLE.

Showing the Amount of the Consolidated Railroad Debt of the State of Missouri, Jan. 1, 1868.

	Principal.	Accrued interest.	Total.
Pacific Railroad.	$7,000,000	$2,940,000	$9,940,000
Southwest Br...	4,500,000	2,030,000	6,530,000
North Missouri.	4,350,000	1,827,000	6,177,000
Iron Mountain..	3,501,000	1,470,420	4,971,420
Cairo and Fulton	650,000	273,000	923,000
Platte County ..	700,000	294,000	994,000
Revenue Bonds (for interest of 1859).....	431,000	232,630	663,630
Total.....	$21,132,000	9,067,050	30,199,050

From which total there is to be deducted the amount paid in coupons and bonds by the several State banks and by the late owners of the Platte County Railroad, being about $200,000.

The above is a correct statement.

A. THOMPSON, State Auditor.

The local indebtedness, growing out of the War, classed as ahead of the Public Debt, is thus refered to in the report of the Joint Select Committee on the State Credit, which accompanies their Funding Bill:

The first class is known and distinguished as the war debt, and for its payment the State has issued and will issue Union Military Bonds, and has provided for the payment of the same by law, making them receivable for taxes, and levying the tax to an amount that will insure their payment on or before the first day of January, 1868. The war debt has been considered and treated in commercial language, as a preferred debt, the justness of which the creditors and the people of this State have not for a moment questioned, regarding the expenditure in the light of salvage to the endangered ship; or in other words, a debt created, the effect of which was to preserve and indemnify the bonds that were issued by the State prior to the war. The second class is known and distinguished as the bonded or railraod indebtedness of the State, and which will amount in principal and interest, exculsive of the bonds issued to the Hannibal and St. Joseph Railroad, on the 1st day of January, 1868, to thirty millions of dollars. The interest coupons on the bonds loaned to the Hannibal and St. Joseph Railroad Company having been promptly paid at maturity by that company, your committee do not consider it an indebtedness for which they are called upon to provide.

☞ The following statement will show the number of hogs packed in Cincinnati, the average weight, and yield of lard, in each of the last six seasons:

Year.	Number.	Av. Weight.	Yield of Lard.
1860–'61	433,799	221 5-35 lbs.	28 9-16 lbs.
1861–'62	474,467	224 23-34	29 5-18
1862–'63	608,457	203	25 21-28
1863–'64	370,622	188 11-12	23 1-8
1864–'65	350,600	201 1-8	24 1-5
1865–'66	354,079	238 18-31	32 13-25

The increase in the average weight in the past over the preceding season has been nearly 19 per cent., and in lard 37 per cent.

Car Wheels.

Perhaps in nothing is the traveling public more interested than the safety of car wheels, and the best mode of producing a car wheel which will be the most secure from accident, is a subject of vital interest to every railroad management. Many of the worst accidents occur from the breaking of the flange of the car wheel, and which if made of cast iron is always liable to break. Wrought iron which is undoubtedly the best, has never to any considerable extent been used in this country. Next to that, should be strictly cold blast charcoal iron remelted only in a Reverberatory Furnace. No good car wheel can be made from iron remelted in a Cupola Furnace. In all cases the iron if of good quality will degenerate and assume all the appearances, qualities and tenacity of common anthracite iron, if used in a Cupola Furnace bring in contact with the coal the same as in an anthracite blast furnace, the melted iron carrying with it the sulphur and other impurities of the coal which co-mingles with the fluid iron, besides the unequal melting of hard or soft pig will not produce a uniform casting from the same heat or melt.

Iron remelted in a Reverberatory Furnace, does not come in contact with the coal, and is collected in a common pool before casting commences, when it becomes thoroughly mixed, before casting or pouring commences. It is by the process of remelting increased in tensile strength many thousand pounds to the square inch, while by the cupola process of remelting it loses in tensile strength many thousand pounds to the square inch.

The cupola mode is the cheapest, and hence the desire to have cheap wheels has led to this almost universal mode of producing car wheels upon which the safety of railway trains and of the life of travelers so much depends. I fear the subject has not been fully inquired into by railroad managers. If what I have said will arrest their attention, I am satisfied that their inquiries will result in a total abandonment of the cupola system of casting. SAFETY.

Chesapeake and Ohio Canal.

The canal is being prepared for the spring trade and will probably be opened by the 20th. It is confidently expected that the amount of coal to be transported over this channel during the coming season will be much greater than ever before. About fifteen new boats are on the stocks at the different yards in this city, and every preparation has been made for a heavy trade.—*Cumberland Civilian.*

☞ The tunnel for the Junction Railroad, Philadelphia, has been finished to the north side of Market street, and about forty feet tunneling more will complete the work. It is probable that by the 1st of May, cars will be able to pass through it. The work has been prosecuted with vigor, though, from the character of it, considerable time has been consumed in its construction.

☞ The citizens of Utica have accepted the act passed by the Legislature of this State on the 19th ult., authorizing the city to take stock in the Utica, Chenango and Susquehanna Valley Railroad Company, and to sell its bonds to provide for the payment of the same. The amount of bonds to be issued is not to exceed $500,000, for a term not exceeding 20 years, at a rate of interest not exceeding 7 per cent. per annum.

British North American Provinces.

The area and population of the various British North American Provinces in 1861, was as follows:

	Square miles.	Population.
Canada.....	350,000	2,506,755
New Brunswick	27,037	252,047
Newfoundland	33,850	122,638
Nova Scotia.....	17,279	330,857
Prince Edward's Island...	2,127	80,867
British Columbia	236,500	95,000
Total.....	666,803	3,388,164

The confederation of these provinces has long been a favorite project in Canada, while it has been strenuously opposed by Nova Scotia, Newfoundland, and the other maritime provinces. This opposition, however, seems to be wearing away, as the Newfoundland Legislature has recently decided in favor of it by a large majority. The probabilities of a great confederation being formed upon the north of the United States are not, therefore, as remote as they were; and the other maritime provinces may be expected at some future day, to decide in its favor, as Newfoundland has done.

Saratoga and Hudson River Railroad.

The new railroad between Athens and Schenectady, which has been in the course of construction, is now completed, and ready for business on the opening of navigation. It is thirty-eight miles in length from where it leaves the New York Central track two miles east of Schenectady to its terminus one mile north of Athens, on the west bank of the Hudson River.

Northern (Illinois) Railway.

The following gentlemen have been elected directors of this company for the ensuing year: J. A. Sleeper, L. L. Cond, Merrill Ladd, Henry T. Fuller, Cornelius Price, E. H. Mason, George Strong, S. C. Tuckerman, Darwin Andrews, G. A. Thomson, D. W. Dame, E. P. Barton, and A. B. Partridge. G. A. Thomson, of Racine, Wis., was elected President, and Merrill Ladd, of Chicago, Secretary and Treasurer.

Northern Pacific Railroad.

A dispatch from Washington says that "The House Committee on the Pacific Railroad has reported a bill in favor of the Northern Pacific line, providing for a guaranty by the Government for twenty years of the interest upon a portion of the stock on the security of the lands granted to the company and the income of the road."

☞ The Government of Nova Scotia have arranged with Mr. Fleming for the completion of the Pictou Railway which they found it necessary to take off the hands of contractors. The making of this arrangement necessitated Mr. Fleming's resignation of the position of Chief Engineer, and a Mr. McNab has been appointed in his place. The amount to be paid is $2,116,500.

☞ The Norfolk *Virginian* says: "The freight trains of the Norfolk and Petersburg Railroad are bringing cotton into this city from Griffin, Ga., and Memphis, Tenn. We understand that one thousand bales, destined for the steamer Ephesus, will arrive by the same route, in time for her departure to Liverpool."

☞ The Delaware and Raritan Canal was opened on the 15th inst.

Philadelphia and Erie Railroad.

The Governor of Pennsylvania has vetoed the bill recently passed by the Legislature, authorizing the Philadelphia and Erie Railroad Company to extend its branches into adjoining counties etc.; taking the ground that the privileges accorded by the bill is an infringement of private rights, and that its operation would be conducive to the fostering of monopolies, instead of the promotion of general prosperity.

☞ The ordinance providing for a subscription on the part of the city of Baltimore to $200,000 of the capital stock of the Western Maryland Railroad Company, in order to secure its completion to Hagerstown, has passed both branches of the city council.

☞ D. C. Coolman, Esq., has been appointed Chief Resident Engineer of the Atlantic and Great Western Railway; headquarters at Meadville, Pa.

Mr. Grinnell from the New Jersey Locomotive Works, has been appointed Purchasing Agent, and Superintendent of the Locomotive and Car Departments.

☞ I. G. Ogden Jr., Esq., of the Banking House of Messrs. Robinson & Ogden, No. 4 Broad street, has been unanimously elected a member of the New York Stock Exchange.

☞ John S. Barbour, Esq., has been elected President of the Orange and Alexandria railroad company.

Cattawissa Railroad.

The receipts of this road for the year ending October 31, 1865, were $370,223 33; and the payments, $252,170 54, viz: for maintaining and operating road, $220,636 12; interest, $20,800; State tax on capital and tonnage $2,102 91; United State tax $8,631 51.

☞ The Ottawa and Prescott Railway Bridge is rapidly approaching completion, and consists of an arch and chord of four spans of one hundred feet each, the piers being of solid masonry.

☞ The officers of the Brockville and Ottawa railway are: John G. Richardson, President; H. Abbott, Vice-President; J. W. B. Rivers, J. L. McDougall, A. McArthur, J. N. Travers, A. B. Dana. W. R. Worsley was elected Secretary and Treasurer.

☞ The Norfolk and Petersburg Railroad is now in good working order, the trains running regularly and making daily connections with the steamers on the bay route from Baltimore.

☞ The contractor, J. A. Boyd, broke ground on section 11, (the summit of Parr's Ridge) of the Metropolitan Branch of the Baltimore and Ohio Railroad on the 25th ult.

☞ We see it stated that the Hudson River Railroad Company have ordered six thousand tons of Steel Rails, sufficient to lay sixty miles of road, and as the iron wears out it is to be replaced by steel. They cost twice as much, and will wear ten times as long as iron.

☞ The Utica *Observer* says that $50,000, the amount required by the Utica and Black River Railroad Company as a condition of extending their road from Boonville to Lyon's Falls, has all been taken. About $10,000 of the subscription was by citizens of Carthage.

MANHATTAN

Life Insurance Company,

No. 156 Broadway, New York.

(New Marble Building.)

Cash Capital and Accumulation over

$1,800,000

The triennial dividend of profits of this company has resulted in a bonus or addition to a policy of more than 50 per cent. on the whole premium paid.

The dividends are paid in the life-time of the assured, thus aiding them to pay future premiums.

POLICIES are made incontestable after five years from date, for or on account of errors, omissions and misstatements in the application, except as to age.

ANNUITIES are granted on favorable terms.

HENRY STOKES, President.

C. Y. WEMPLE, Secretary.

J. L. HALSEY, Ass't Sec.

S. N. STEBBINS, Actuary.

FIFTEENTH ANNUAL REPORT OF THE MANHATTAN LIFE INSURANCE COMPANY Of New York.

JANUARY 1, 1866.

Net assets, January 1, 1865		$1,823,724 77
RECEIPTS DURING THE YEAR.		
For premiums, extra premiums, &c	$1,104,919 13	
For interests and rents	136,800 52	
For interest and rents accrued	39,877 56	
	1,281,597 21	
		$3,105,321 98
DISBURSEMENTS.		
Paid Claims by death on Policies and Bonus, and payment of Annuities	$205,144 55	
Paid Expenses, Salaries, Taxes, Revenue Stamps, Medical Examiner's Fees, Commissions, &c.	191,932 70	
Paid Dividends, Re-Insurance, Purchased Policies and Bonus, Interest on Dividends, &c	89,053 93	486,131 18
		$2,619,190 80
ASSETS.

Law of Common Carriers as to Lien for Freight, Compensation, &c.

To what extent a carrier has a lien for his freight on goods carried by him has been much discussed, and is not entirely determined. A distinction is made in this regard, between a private carrier and a common carrier. Private carriers have no such lien, while common carriers have. No legal proposition is better established than this. A common carrier may not only refuse to carry goods, unless the freight is paid to him, but if he carry them, and the freight is withheld, he may retain the goods, and obtain his freight from them in any of the ways in which a party enforces a lien on personal property. (Hunt *vs.* Haskell, 24 Me., 339; Fox *vs.* McGregor, 11 Barb., 41.) A relinquishment of possession of the goods by the carrier or other person who has a lien upon them, is an abandonment of the lien. By a transfer of the possession, the holder is deemed to yield up the security he has by means of the custody of the property, and to trust only to the responsibility of the owner or other person liable for the charge. (Bailey *vs.* Quint, 22 Vt., 464; Bigelow *vs.* Heaton, 6 Hill, 43.) But it was said by Judge Beardsley in the last case, that the lien might be retained after delivery by the agreement of the parties. So if a carrier be induced to deliver goods to the consignee, by a false and fraudulent promise of the latter that he will pay the freight as soon as they are received, the delivery will not amount to a waiver of the carrier's lien, but he may disaffirm the delivery, and sue the consignee in *replevin*.

It has been questioned whether a common carrier, who carries the goods of a party, but without his order or knowledge, can maintain a lien for the freight. Generally the owner would have the right to refuse such service, and require that the goods should be replaced, or he might have his action for intermeddling with his property. But if the facts were such as to leave to the owner only the option between receiving his goods or rejecting them, the carrier cannot maintain his lien. (3 Parsons on Contr., 208.)

A common carrier can acquire no lien on goods belonging to the United States Government for services rendered in transporting such goods. (Dufolt *vs.* Gorman, 1 Minn., 301.) And while he holds them on this ground, they are not at his risk as a common carrier, for he is responsible only as any other party who holds property as security for debt.

AGENCY OF CARRIER.

It is settled that when the carrier cannot find the consignee, or learns that he is a swindler and would cheat the consignor, he is bound to protect the owner and consignor, and for that purpose to hold the goods or store them in some proper way for his use. (Stephenson *vs.* Hart, 4 Bing., 476.) And so he is, if the consignee refuses to receive the goods. He would be bound to give notice to the consignor only, if that, under the circumstances, would be reasonable care. The carrier may also be a factor to sell for the owner, either by express instructions or by usage of trade. (Williams *vs.* Nichols, 13 Wend., 58. When this is the case, after the carrier has transported the goods, and is engaged in his duty as a factor for sales, he is responsible as a factor only, or for his negligence or default, and not as a carrier. But after he has sold the property and has received the price which he is to return to the owner, his responsibility as a carrier revives, and in that capacity, he is liable for any loss of the money.

Thus when the owners of a steamboat, which ran upon the Ohio River took produce to be carried and sold by them for a certain freight, and were bringing back in the same vessel the money which they obtained on the sale of the produce, when the vessel and the money were accidentally consumed by fire, it was held that under the usage of trade in the western waters, they were acting as common carriers in going, as factors in selling the produce, and as common carriers in bringing back the money, and were liable for its loss notwithstanding the accident. (Harrington *vs.* McShane, 2 Watts, 443.)

COMPENSATION.

The amount of compensation for the carriage of freight and passengers by railroads, is usually fixed by law. Where the compensation is not so fixed, the carrier may determine it himself. But having adopted and made known a usual rate, he is so far bound by it, that on a tender of this rate he must receive the goods, and can recover no more if they are not prepaid and he carries them. And whether it be fixed by law or by his own established usage, it must be applied equally and indifferently, all persons being charged the same price for the carriage of the same quantity of similar goods for the same distance. It seems that although a carrier need not receive goods until the price of carriage is paid, yet if he does so receive them, he cannot maintain an action for their carriage until the goods are delivered. (Barnes *vs.* Marshall, 14 Eng. L. & Eq., 45; 8 Q. B., 785.) If the hire to which the carrier is entitled is not paid, he is not bound to deliver the goods, and if he now retains them in his warehouse or place of business, he is liable in case of loss or injury, only for negligence. His liability is no longer that of a common carrier, but that of a depositary for hire or gratuitously as the case may be.

SPECIAL AGREEMENTS AND NOTICES.

We have in a former article set forth the law upon the question how far a common carrier may vary or restrict his liability by special agreements and notices. It is well settled that the common law liability of a carrier may be varied or altogether destroyed by special agreement. But the carrier cannot by mere notice extinguish his peculiar liability, although he may in this way materially modify or qualify it. A public notice

so spread abroad that all might know it, and brought to the distinct knowledge of the sender, would undoubtedly, says Judge Parsons, (2 Parsons on Contracts, 24,) justify the carrier who proposed to confine himself to certain departments, or to exclude certain classes of goods, and in accordance therewith refused to take parcels of the excluded description. A common carrier does not necessarily agree to take all sorts of goods any more than he does to carry them to all places. An express company between New York and Boston does not agree to carry a load of hay or a cargo of cotton. The carrier has a right to refuse, without notice, articles which obviously differ from his usual course of business, and he has also a right to define and limit that business and give notice accordingly. (1 Hurl. & N., 63.)

So, too, he has the right to say to all the world and to each sender that he will not carry goods beyond a certain value; or that, if he carries such goods, he must be paid for it by a premium on the increased risk. This is reasonable, and it is consistent with public policy, because it tends to give the carrier exact knowledge of what he carries, and of what risks he runs, and thus to induce him to take the proper care, and proportion his caution and his means of security to the value of the goods. In this country it would seem to be pretty nearly if not quite settled, that it is incompetent for a carrier, either by notice or express contract, to exempt himself from liability for his own negligence. The strongest case that we have seen to this effect is the case of Sager *vs.* The Portsmouth R. R. Co., 31 Me., 228. There the defendants had transported the plaintiff's horse from Boston to Portland. It was upon a cold day in November. The horse was carried in an open car, and suffered serious injury from the exposure to the cold. This action was brought to recover damages for that injury. The defendants introduced a paper signed by the plaintiff whereby he agreed to exonerate the company from all damage that might happen to any horses, oxen or other live stock, that he should send over the company's road; meaning thereby that he took the risk upon himself of all and any damage that might happen to his horses, cattle, &c.; and that he would not call upon said company or any of their agents for any damage whatever. At the trial the learned judge instructed the jury that this contract would not exempt the company from liability for their own malfeasance, misfeasance or negligence. And this instruction was held correct.

It would follow then, that where the carrier interposes such general notice, as "all baggage at risk of owners," the sender may disregard it and the baggage will be at the risk of the carrier; or he may expressly refuse to be bound by it, and insist that his baggage shall be carried under the responsibility which the law creates; and if the carrier refuses to take the goods, he will render himself liable to an action. But if the notice be only limited and qualified, and in itself reasonable, the sender having knowledge of it is bound by it. Nor can he insist that the carrier shall receive and transport his goods without reference to it.

In a recent decision in New York, a rule of law of much importance is asserted; it is, that a railroad company is bound to introduce improvements which are ascertained to be practicable and conducive to safety, and are therefore liable for an injury caused by neglect in not introducing them.

From what we have already said, and from the authorities we have cited, it may be inferred, that the right of a common carrier to limit his responsibility by a special contract cannot be considered as settled, or clearly defined. The common law makes a common carrier responsible for all damage, excepting only that which is caused by an act of God, or by a public enemy. If this responsibility rests only on usage, it disappears of course, when the parties make an express contract, covering the same ground; because usage binds parties only on the supposition that it entered into their intention and their contract. If this responsibility is matter of positive law, whatever be its origin—then of course, it cannot be evaded or modified at the pleasure of the parties. And if either of these grounds were taken, no question would remain. But neither of them is taken. For a time some Courts were disposed, as we have seen, to hold the responsibility of a common carrier to be determined by law, and to be beyond the reach of contract. But it is not so now. It is held, that his responsibility rests upon and is preserved by "public policy."

Merchants' & Consumers' Anthracite R. R. Co.

The bill recently introduced into the Legislature of Pennsylvania to incorporate this company has passed both houses. The bill gives the new company the power to construct a single or double track road from any point on the Delaware River near Philadelphia to any point in the Schuylkill County coal region, with authority to make branches and use intervening roads. The company is intended to be a coal transporting road mainly, and is designed to be a rival to the Reading Railroad. The new company is restricted in its charges to two and a half cents a mile per ton for freight on coal.

Milwaukee and Prairie du Chien Railway.

The earnings of this road for the years ending December 31, 1864 and 1865, have been as follows:

	1864.	1865.
From freight	$1,149,958 27	$1,389,458 78
" passengers	509,712 78	562,911 23
" mails, etc.	51,609 83	33,141 70
	$1,711,280 88	$1,985,511 71
Expenses, viz:		
Repairs of track	$227,001 92	$288,005 16
" bridges	41,533 47	37,688 39
" build'gs, etc.	40,367 77	54,782 02
" locomotives	125,899 37	115,133 10
" cars	182,511 40	174,681 77
" tools, etc.	22,778 87	10,537 00
General management	34,896 81	37,343 76
Foreign agency, etc.	8,503 73	13,076 78
Station service	119,969 70	125,113 65
Conductors, etc.	47,177 88	50,890 32
Enginemen, etc.	65,330 23	71,489 96
Supplies	26,919 01	26,043 63
Fuel	119,566 29	131,606 81
Oil and waste	24,949 52	28,819 67
Loss and damage	12,416 80	9 812 10
Legal expenses	7,571 47	6,695 42
Car service	2,282 32	691 09
McGregor ferry exp'ses	7,750 69	24,560 15
New York office exp.	5,453 72	5,025 07
Taxes, insurance, etc.	83,069 70	118,884 41
	$1,206,950 67	$1,337,880 26
Net earnings	$504,330 21	$647,631 45
Bal. from previous yr.	278,581 69	229,938 01
Interest received on loans, discounts, etc., and from McGregor Western Railway, under lease contract in 1865	6,620 14	25,676 86
	$789,532 04	$903,246 32
Disbursed as follows:		
Improvements at Prairie du Chien	$91,429 62	$16,496 17
Surveys M. & D. R. R. routes	4,370 81	
Account of Milwaukee & Miss. R. R. under liens on property	788 25	517 25
Account of N. W. Telegraph line		14,154 25
Real estate	8,875 85	10,289 42
New locomotives		55,838 87
New cars		23,755 08
Interest on bonded debt	106,400 00	38,202 50
Instalments of sink'g fund—		
Due April 1	31,768 50	80,995 00
Due October 1	66,312 50	83,847 50
Reserved sinking fund		1,435 00
Dividends on pref. stock	249,650 00	286,068 00
Balance to new account	229,938 01	291,647 28
	$789,522 04	$903,246 32

Compared with the year 1864, the gross earnings of 1865 show an increase of $274,230 88, with an increase in expenses of $130,929 59—making the increase in net earnings, $143,301 24.

The earnings of the Southern Wisconsin Branch, (included in the above,) were as follows:

	1864.	1865.
From freight	$41,598 20	$35,399 06
" passengers	26,559 43	26,744 82
" mails, etc.	2,953 11	2,953 11
	$71,210 74	$65,096 49
Expenses	29,650 52	31,808 49
Net earnings	$41,560 22	$33,288 00

The business of the road from which the above earnings were realized is shown in the following recapitulation:

Freight traffic:	1864.	1865.
Tons of local freight	143,670	129,599
Do. carried eastward	89,645	72,035
Do. carried westward	54,025	57,564
Tons of through freight	135,060	161,317
Do. carried eastward	111,762	128,353
Do. carried westward	23,298	32,964
Tons of local & through	278,730	290,916
Do. carried eastward	201,407	200,388
Do. carried westward	77,323	90,528
Income fr. local freight	$535,507 90	$536,910 57
" through fr'ht	611,772 37	834,348 10
" local & th'gh	1,147,280 27	1,371,258 67

The above statement shows a decrease in the number of tons of local freight carried, as compared with previous year, of 14,071 tons. Compared with 1863, there is a decrease of 49,899 tons.

Passenger traffic:	1864.	1865.
Local passengers	241,145	260,498
Through "	16,233	20,096
Income from local	$318,870 97	$384,123 72
" from through	81,066 89	105,756 29
" from military	115,274 92	123,031 22

The above statement shows that there has been an increase in the passenger traffic of the road, aside from military service, which has been the case each year, since the organization of the company, and evidences the gradual improvement of the country.

The mileage of trains in the years named was as follows:

	1864.	1865.
Passenger trains	308,331	310,857
Freight trains	551,155	529,937
Wood and repair trains	83,697	72,494
Total miles run	938,183	913,288

The expenses per mile (cents) run including extraordinary renewals were as follows:

	1864.	1865.
Repairs of road and bridges	28.62	35.66
" locomotives	13.42	12.61
" cars	19.45	19.12
Engineers, firemen and wipers	7.07	8.60
Conductors, baggagemen, etc	5.03	5.57
Fuel	12.75	14.41
Oil and waste	2.65	3.16
Other expenses	39.66	47.36
Total per mile	128.65	146.49

The mileage of freight cars and the average load per car are shown in the annexed statement:

Going East	2,976,894	3,310,267
" West	1,829,450	2,115,842
Total	4,806,344	5,426,109
Average load east	9.16 tons.	8.1144 tons.
" west	4.25 "	4.811 tons.
" east and west	7.28 "	6.1894 tons.

and the mileage of empty freight cars was—

Going East	717,064	503,438
" West	1,635,093	1,657,679
Total	2,352,157	2,161,117

The mileage of passengers or the equivalent of passengers carried one mile in 1864 and 1865, compare as follows:

	1864.	1865.
Eastward	5,323,371	4,617,324
Westward	5,483,282	6,178,822
East and west	10,806,653	11,796,146

—the average rate per mile having been in 1864, 3.65 cents, and in 1865, 3.73 cents.

The equipment of the road consists of 7 1st class passenger, 29 1st class freight engines; 6 2d class, and 3 old engines not in use; 28 first class passenger and 2 second class passenger cars, 10 baggage, 3 mail and express, 513 box, 25 stock, 71 flat, 50 hand and 30 ditching cars—making in all 702 cars.

GENERAL ACCOUNT.

	1864.	1865.
First mortgage bonds	$966,000 00	$402,000 00
1st preferred stock	2,414,500 00	3,082,000 00

Cash in New York	158'859 73	236,517 49
" Milwaukee.	124,454 77	102,487 77
	$8,452,350 99	$8,755,527 07

The principal statistics relating to the operations of the company, since its re-organization are embraced in the following statements:

Statement showing the amount of each description of stock—

	Common.	1st Pref.	2d Pref.	Total.
	$	$	$	$
As re-organ'd	2,761,800	1,095,400	1,086,800	4,944,000
Less returned by trustees and cancelled	314,600	66,800	101.400	
1861	2,761,800	1,060,800	1,020,000	4,842 600
1862	2,761,800	1,041,000	1,014,000	4,816,800
1863	2,761,800	1,061,000	1,014,000	4,836,800
1864	2,988,073	2,414,500	1,014,000	6,416,573
1865	3,014,000	3,082,000	1,014,009	7,110,000

The movements in the funded debt (convertible into 1st Preferred stock) have been as follows:

On re-organization of company	$2,556,000
Less return by trustees and cancelled	30,000

	Purchased by sk'g f'd.	Converted into 1st Pref.	Outstanding Dec. 31.
1861	....	.....	2,556,000
1862	72,000	.....	2,454,000
1863	34,000	10,000	2,410,000
1864	90,500	1,353,500	966,000
1865	164,000	398,500	402,000

The following exhibits the total stock and debt as re-organized, and at the end of each subsequent fiscal year:

	Stock.	Funded Debt.	Floating Debt.	Total.
	$	$	$	$
As re-organized	4,944,000	2,556,000	.....	7,500,000
Dec.31,'61	4,842,600	2,526,000	199,810	7,568,410
" '62	4,816,800	2,454,000	221,282	7,492,082
" '63	4,836,800	2,410,000	228,429	7,475,229
" '64	6,416,573	966,000	445,139	7,827,712
" '65	7,110,000	402,000	318,472	7,830,472

The floating debt includes $141,266 59 which stands in the general account as "Convertible property and old debts account," and bills payable, pay-rolls, dues to other companies, etc., against which the company held at all times cash and credits sufficient to discharge them.

The sources of the gross earnings of the first 5 years operations have been as follows:

Year.	Passenger.	Freight.	Mail, etc.
1861	$211,250	$835,173	$61,931
1862	357,027	855,902	50,805
1863	294,885	904,157	48,215
1864	509,713	1,149,958	51,610
1865	562,911	1,389,459	33,142
Total	$1,835,786	$5,136,649	$245,703

And the profits from earnings are deduced as follows;

Year.	Aggregate Gross earnings.	Operating and taxes.	Profits from earnings.
1861	$1,108,354	$672,315	$436,039
1862	1,163,734	748,993	414,741
1863	1,247,257	793,747	453,510
1864	1,711,281	1,206,951	504,330
1865	1,985,512	1,337,880	647,632
Total	$7,216,138	$4,759,886	$2,456,252

The taxes in 1861 were $11,143; in 1862, $26,612; in 1863, $51,030; in 1864, $72,230; and in 1865, $112,234.

The income account shows the total earnings (less cost of operations) to have been as follows:

	Profits.	Int. &c.	Total.	T'l incl. bal.
1861	$436,039	$.....	$436,039	$436,039
1862	414,741	5,623	520,364	713,288
1863	453,510	5,169	458,679	669,736
1864	504,330	6,620	510,950	789,532
1865	647,632	25,677	673,309	903,247
Total	$2,456,252	$43,089	$2,499,341	$3,511,792

And the disbursements as follows:

	Interest.	Sink'g Fund.	Dividends.
1861	$118,405	$9,150	$.....
1862	172,900	13,900	156,264
1863	170,485	33,995	155.060
1864	106,400	98.080	249,650
1865	38,202	166,277	286,068
Total	$606,392	$320,502	$847,042

	Improvements.	Other disbursements.	Total.	Balances to credit.
1861	$.....	$15,610	$143,165	$292,874
1862	67,852	92,165	502,181	211,057
1863	26,181	5,484	391,155	278,581
1864	91.430	14.034	559,594	229,938
1865	16,496	104,555	611,598	291,647

In the "other disbursements" of 1862 are included purchases of 59 1st mortgage bonds, 98 shares 1st pref. stock, and 60 shares 2d pref. stock, the aggregate cost of which was $62,922 49.

Paterson and Newark Railroad.

We understand that a party of engineers have been at work for the last week staking out the exact route of this road prior to the commencement of active operations.

The length of the line will be, from Paterson to New Jersey Railroad junction, 11.93 miles; from thence to Jersey City 6 miles, in all 17.19 miles. It is proposed, if the stock is all subscribed, to commence operations on the line by the first of next month, and it is expected to complete it by the 1st of November if everything works well. Negotiations are pending with the New Jersey Company to run the engines and cars over their lines through to Jersey City. The gauge will be 4½ feet, but the cross-ties will be wide enough to admit the laying of a third rail for broad-gauge cars.

The Mahoning Railroad.

The preliminary surveys of this road made under the direction of Sigismund Loew, Esq., are nearly completed. The road will be sixty-eight miles in length, and will reduce the distance between Cleveland and Washington city, *via* Connellsville railroad and Point of Rocks, eighty-three miles.

☞ The Alexandria *Journal* says that a large force of workmen have been sent out on the Loudoun and Hampshire road to clear the track from Thornton's to Herndon, and to put it in order. It is confidently expected that in the course of two weeks the trains will run as far as the last named station, which is thirteen miles from Leesburg.

Alexandria and Fredericksburg Railroad.

The surveys of the Alexandria and Fredericksburg Railroad have been completed, and the work of location is in progress. Col. Stewart, who is the active man in the work, says that the ground will be broken on Monday if the arrangements can be made with the Richmond, Fredericksburg and Potomac Railroad Company for a connection. The work is to be pushed with energy; the calculation being that the road will be in running order in a year. We understand that the whole work, grading, superstructure and rolling stock, has been, or is about to be, contracted for with one house at the rate of $46,000 per mile.

☞ According to a recent statement of Secretary McCullough, the available balance in the United States Treasury, including all sums in the hands of Assistant Treasurers and the National Banks, was on the 10th inst., $123,423,885 91; consisting of coin, $57,799,921 37; currency, $65,623,964 54; of which sum, $21,780,358 55 was on deposit in National Banks.

Railroads of Massachusetts, 1865.

We give below from the *American Railway Times*, a tabular statement showing in detail the result of the operations of each road of the railroad system of Massachusetts for the fiscal year ending November 30, 1865. The following is a comparative statement of the gross amounts of the *whole* system for the past and preceding year:

	1864.	1865.
Number of companies	51	50
Length of roads, miles	1,570	1,610
Aggregate capital	$77,614,305	$78,075,045
Amount paid in	66,629,823	65,565,482
Aggregate cost of roads	73,723,920	72,175,091
Total revenue	16,478,596	18,974,914
Funded and floating debt	22,859,585	25,068,218
Surplus earnings on hand	5,093,550	5,562,436

The results of *operation* for the past two years, may be found in the following abstract:

	1864.	1865.
Number of railways	38	37
Length of main lines	1,272.4	1,304.3
Length of branches	163.5	196.1
Double track and sidings	545.2	571.6
Cost of railways	$61,896,123	$69,625,115
Capital paid in	46,643,848	47,644,540
Funded debt	14,178,801	12,737,871
Floating debt	1,578,548	1,749,536
Total debt	15,775,750	14,517,047
Interest paid on debt	1,141,655	1,091,855
Dividends paid	3,448,115	3,491,105
Surplus	4,993,411	5,438,255
Receipts from passengers	6,649,343	8,829,213
Receipts from freight	6,158,442	7,719,875
Receipts from mails, &c.	735,636	699,589

(1) Formerly New York and Boston and Providence, Hartford and Fishkill. The returns are incomplete.

(2) Owned and operated by the New Bedford and Taunton Railroad Company.

(3) 29 miles in Massachusetts and 52 in Connecticut. The cost given is that in Massachusetts; the operating details are of the whole, as they cannot be divided.

(4) 25 miles in Massachusetts; 85 in all. The cost, debt, etc. are of the portion in Massachusetts; the expenses, receipts, etc. are upon the 30 miles north of Granby.

(5) Leased to the Housatonic Railway Company of Connecticut.

(6) Operated by the Boston and Providence Railway Company.

(7) Operated by the Eastern Railway Company.

(8) Operated by the Boston and Lowell Railway Company.

(9) Operated by the Nashua and Lowell Railway Company.

(10) The Eastern Railway Company has purchased the Essex Railway.

(11) Operated by the Boston and Maine Railway Company.

Minnesota Bonds.

The Minnesota Legislature has passed a law for the adjustment of the old railroad bonds. These bonds amount to something near $2,500,000, issued to aid in the construction of railroads in that State, some six or seven years ago, since which time no interest has been paid on the same The law recently passed, however, provides for the appointment of three commissioners, whose duty is to ascertain the present whereabouts of said bonds, how much the holders paid for them, and if a satisfactory arrangement can be made, new bonds are to be exchanged for the old ones, subject, however, to the approval of the Legislature and a direct vote of the people.

Mississippi and Missouri Railroad.

The holders of the Second Mortgage bonds issued by the Mississippi and Missouri Railroad Company have commenced proceedings in the United States Circuit Court for foreclosure. The amount of these bonds was $700,000, but inasmuch as no interest has been paid thereon, the firm amounts to $1,000,000 or more. Underlying this mortgage are several others which were given upon different sections of the road, but not upon the entire concern. The case will probably come up for hearing at the May term at Des Moines, when it is probable that either a temporary or permanent Receiver will be appointed to wind up the old M. & M. Co.'s affairs. This case is one of huge proportions—embracing various and conflicting interests, where an immense amount of capital will be sensibly affected.—*Davenport Democrat.*

☞ The New Jersey Central Railroad has determined to issue to existing stockholders 20,000 shares of new stock in the proportion of two shares for each eleven shares of old. Fifty dollars per share is to be paid up prior to the 1st of June, and the rest as wanted for construction or equipment. This company is, we understand, aying a third track, and is in a very prosperous condition.

☞ The earnings of the Louisville and Frankfort and Lexington and Frankfort railroads for January 1866, were $43,537 54; and the expenses $28,345 03—leaving a balance of $27,498 87.

American Railroad Journal.

Saturday, March 24, 1866.

Stock Exchange and Money Market.

The continued and steady decline of the premium on gold has been the subject of general conversation the past week in financial circles. Various efforts seem to have been made to retard the fall, but without effect; and the consequence appears to be a general disposition to meet the depression of prices, not only in gold, but all other articles affected by it. This downward tendency appears to be in harmony with the general expectation, with the understood policy of the Treasury department, and with the real interests of the country; so that we may consider we have entered upon the work of liquidation and settlement; and our financial system may be considered as assuming a permanent form in which it is to appear as a solid fabric, and to be considered a fixed policy. Gold has now almost reached the lowest point it has touched in about three years, when sales were made as low as 122; and the question is now, how much lower will it yet go? This is the problem of the hour, and an interesting one.

Everything apparently favors a still further decline. Our foreign exchanges are still in our favor, they have for some time past ruled below par; our cotton exports are large, and our foreign securities are in good demand and on the rise. We see, therefore, no reason why there should be any call or demand for gold in this market. There is certainly none beyond what the customs demand may make from week to week; and there is supply enough for all this, and to spare. It would seem, therefore, that there is not likely to be a pressure here for gold, nor an advance on its price for any apparent natural causes within our observation. There is nothing we can see in our foreign exchanges which can put up the price again to anything like the former rates. The appreciation of the paper dollar has thus been going on most quietly and favorably for some time past, and without the least perceptible revulsion or panic. Prices have yielded with some reluctance; yet they have yielded, and a sense of relief on the part of consumers is already experienced. Just as soon as prices once more assume their normal condition, we shall see fresh activity and wholesome engagements in business. There is a very proper hesitation to engage in new contracts, which have been ruling at prices that are prohibitory; but when these can be adjusted at rates that are more general and remunerative, we may expect to see a general disposition arising to engage in business transactions and general commerce.

Hitherto the advantage has been all in favor of the specially producing classes, at the expense of the consumers; this is to be equalized by a just average and greater fairness, as prices become more regular. We imagine that the change going on will be met without very great embarassment to the country. The large fortunes made during the war will be able to endure a fair share of shrinkage. The people of fixed incomes have for several years past been compelled to practice economy, and a general necessity for caution has been inculcated by all sound public writers for some time past. We are certainly as well prepared for what is before us, as we ever shall be. And we cannot see what we are to fear from having our legal tenders rising to a par value. We do not see how the holders of these notes can be the worse for having really more money in their pockets than they have had for a long time before; or to know that they can buy more bread and clothing for their money than they could do at any former period since the war. The fact seems to be that we are, without knowing it, approaching the resumption of specie payments; and when without an effort, as if by general consent, a paper dollar and a gold dollar shall be received and pass at par for all the necessaries of life, we have accomplished the greatest results in finance, and are again on the road to substantial prosperity.

The tone of public confidence is a remarkable feature of the times. The people have found out

their immense strength, they see their own great resources, they perceive not only means enough, but a surplus; and they very naturally ask whether they are not equal to their engagements, and able to perform them to the letter. It is not strange then, that the legal tender is rising in public estimation daily, under the full effect of conviction that it is after all a reality. In this way, we are working out our own safety by curious yet unobtrusive principles; while theorists are actually debating whether they are likely to occur in our own case. We must expect that, as a part of the policy of the times, the action of Congress will have a considerable effect on the financial condition of the country. The temper of that body is not yet fixed as to its policy. It would appear to be in favor of a return to a sound basis, although an effort has been made to retain the present issue of legal tenders as a limit of unchecked currency. The latest proposition, that of Mr. Hooper, empowering the Secretary of the Treasury to sell any description of the bonds, authorized by the act of March 3, 1865, at rates not below par, and to receive in payment therefor any existing notes, bonds or certificates, and to retire an amount of existing notes, bonds or certificates equal to the amount of the new bonds sold, appears just now to be all that can be expected from legislation. The idea of a foreign loan appears to have been abandoned.

The reports which come to us from the Treasury department continue to be of a most favorable character, notwithstanding the temporary disagreement on the part of the Comptroller of the currency with the statement of the Secretary. It is to be regretted that a subordinate functionary should have it in his power to throw doubt on the department by any such imprudence of conduct, and it is important that such proceedings be henceforth rebuked in a proper manner. A lack of confidence in the official statements of the Secretary would be a great misfortune, and is certainly not what is due to that official, who has thus far gained the confidence of the people. In his statements, we may continue to place every reliance, for he is a man supremely engrossed in his duties, and without any ambition beyond the consciousness of having performed them faithfully. No one who knows this officer can do otherwise than perceive that politics as a pursuit have no part of his time or attention. It is our duty therefore to stand by him in his efforts after solvency, punctuality and retrenchment. The Treasury department has so often been made a political machine that we can scarcely recognize it as a business office merely; and yet, as such, it more than ever merits our confidence. It is rumored that it has, however, recently appealed to the patriotism of certain portions of the Government to unite in some plan of a more complete restoration of the now disordered and disorganized portions of the Union.

This is a very natural view of an important subject as taken by a Minister of Finance, who feels the value of a concentration of revenue for the financial object. There is no doubt, but that if the Nation was again in perfect accord, with its will and its feeling united, the difficulties still remaining would disappear like the mist before the sun. We may theorize as much as we like, the real truth is, that we must have for perfect success, a perfect union, or at least as much of it as is possible, considering the infirmities of human nature. An enlightened self-interest may be trusted as a guide to a large extent in this matter also, and the golden rule adopted, if we will have golden results.

It is noticeable that the Money Market retains great ease, the rates are low, and all parties with good securities are readily supplied. Indeed money is rather a drug in the market most of the time, and prudent houses are at a loss what to do with their supplies. We know of parties who have refused the control of bank capital without hesitation, as bringing an unwelcome responsibility.

Governments continue firm, with an increasing demand for 7-30s and compound interest notes. The demand is likely to be sustained, for the principle of accumulation is now actively at work among all the holders of National securities, while the opportunities of rapid speculation are diminishing.

Perhaps the only opportunity that is left is in the change of prices in commodities as affected by those in gold under the present aspect of affairs already alluded to in the previous portion of these remarks. Prices certainly have shown a remarkable inconstancy within the last year, their character being in no way measured by the current quotations, but actually defying them at times.

Many articles are even yet much higher than they were this time last season, and the reverse. So they were in England during the transition to specie payments, contrary to general expectation at that time, just as now. We are to-day paying greatly too much for many articles which are really cheap and abundant. The life that is costly and hard to maintain is not the life for which it is worth so much to live; and any financial system which makes life a sorrow and a burden, is a false and unjust one. It may be easily demonstrated that the best system of finance is but another form of sound morals.

The New York exports, exclusive of specie, for the week ending March 20, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$3,572,860	$5,091,287
Prev. reported	43,944,748	45,700,430
Since January 1	$47,517,608	$50,791,717

The New York imports compare as follows:

	1865.	1866.
Dry goods	$1,143,081	$3,183,369
Gen. merchandise	2,562,202	2,626,509
Total for the week	$3,705,285	$5,809,878
Prev. reported	22,665,265	61,670,807
Since January 1	$26,370,548	$67,480,685

The balance in the Sub-Treasury on Wednesday was $86,027,571.

As will be seen by our quotations of American securities abroad, our 5-20s stand at 70 and upwards, and are fast taking the lead on the foreign lists.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Iowa Central Railroad.

At a meeting of the stockholders of this company recently held at Oskaloosa, the following gentlemen were elected directors: David Morgan, John Milliken, Andrew C. Williams, John White, Wm. H. Seevers, Henry H. Prime, and Wm. T. Smith, Homer D. Ives, A. A. Ramsey, H. L. Woolford, T. A. Graham, and Peter Melindy. President, Wm. T. Smith, of Mahaska; Vice President, Peter Melindy, of Black Hawk Co.; Treasurer, John White, of Mahaska; Secretary, Samuel Thompson. It is said that the prospects of this road are good, and that the stock will all be taken in time to put the entire line under contract early in the season. The work of grading and bridging from Cedar Falls to Toledo is all under contract, and will be completed by the 2d of July of this year, ready for the iron and rolling stock. The engineers have completed a part of their surveys in Appanoose county, and the connection has been made with the North Missouri Railroad. The grading and bridging in each county will be commenced as soon as the weather will permit. The road will meet the North Missouri road at a point in the southwestern corner of Davis county, and run north on the dividing ridge between the Chariton and Des Moines, which divide is in fact an extension of the great table that parts the waters of the Mississippi from those of the Missouri. Reaching Monroe county, the line follows a spur of the same ridge, and thence strikes the Des Moines at Eddyville. North of that river, it passes through the counties of Mahaska (by Oskaloosa), Poweshiek, Tama (by Toledo), Black Hawk, to Cedar Falls. At that place it will connect with the road now being constructed up the Cedar Valley towards St. Paul.

Metropolitan Railroad.

The route of approach to Washington City for the Metropolitan Railroad has finally been determined upon. The line passes within half a mile of Rockville, crosses Rock Creek at Duval's Mill, and crosses the Seventh street turnpike near Silver Spring, then follows the ridge to the head of a branch of the Tiber, down this creek to the city limits (Washington) at the end of Delaware avenue, then down this avenue to the present depot. This line will require the construction of about 1½ mile more than a line which was before contemplated running down the Sligo, and using the present track of the Washington Branch road for four miles, as the route chosen will come within half a mile of the present station. This route makes an actual saving of travel to western passengers of no less than forty-nine miles. The ground has been already broken at some of the heavier cuttings preliminary to active operations.

Missouri Railroads.

Four Missouri Railroads are offered for sale within the present year. The St. Louis and Iron Mountain Railroad, 86½ miles, is to be offered on the 13th day of September, and the Cairo and and Fulton Railroad, 78 miles, on the 17th of September; and for the Platte County Railroad sealed proposals are invited until the 30th day of June next; as for the Southwest Pacific Railroad until the 9th of May.

☞ A bill has been introduced into the U. S. Senate, and referred to the Committee on Public Lands, to aid in the construction of the Kansas and Neosho Valley Railroad, connecting the great lakes, Iowa, Missouri and Kansas with Texas and the Gulf of Mexico, and to secure to the Government the use of the same for military, postal and other purposes.

☞ The Kansas City *Journal* says that the Missouri Pacific and Union Pacific Railroads have the contract for the transportation of some 10,000 troops destined for the plains, and for the vast amount of supplies and Government freight for Fort Riley and western posts in Colorado and New Mexico. The transit of these is to commence about the first of April.

☞ Among the passengers for Europe by Wednesday's steamer, was Mr. W. L. Banning, of St. Paul, Minn., President of the Lake Superior and Mississippi Railroad Company. Mr. B. takes out bonds to the amount of $4,500,000, for sale in the European capitals. Mr. B. goes armed with maps and voluminous statistics concerning the tracts of country through which the L. S. & M. Railroad line passes, and he has no doubt of the ready sale of the bonds.

☞ All stage lines, express and despatch companies operating west of the Missouri river, have been consolidated, under the name of Holliday's Overland Mail and Express Company, and reduced the fare 25 per cent. from April 1st.

Southern Pacific Railroad.

A New Orleans dispatch says the Southern Pacific Railroad directors have concluded a contract with a French company to extend the road west of Marshall, Texas. The President has also concluded arrangements to complete the connections between Shreveport and Marshall in time to ship the present cotton crop.

Telegraphic Transfers of Money and Exchange.

We call the attention of our readers to the advertisement of WELLS, FARGO & Co., by which it will be seen this house continues to effect telegraphic transfers of money to California and Oregon, with its wonted promptness and dispatch. They also offer exchange in sums to suit, drawn on London, Dublin and Paris, and on the most favorable terms.

To Contractors.

The Water Commissioners, New Bedford, Mass., will receive proposals until the 19th prox., for a construction of a Dam at the storing Reservoir, a Brick Conduit nearly 6 miles in length, and Receiving Chamber, involving considerable earth and rock excavation, and a large amount of brick and stone masonry. For particulars see Advertisement in another column.

☞ In the House of Reprentatives, on the 15th inst., the Senate acts granting aid in the construction of a railroad and telegraph line from the town of Folsom to the town of Placerville, in the State of California, and also for a railroad and telegraph line from Placerville to the most feasible point of intersection with the Pacific Railroad, in the State of Nevada, were taken from the table, read twice, and referred to Committee on Pacific Railroad.

☞ The Fredericksburg *Herald* says that "Messrs. G. H. C. Rowe and J. L. Stansbury, have been appointed to contract for the disposal of the Fredericksburg and Gordonsville railroad. These gentlemen will proceed north at an early day for the purpose. The gift of $272,000 in work, and requisite of only $140,000 more to complete the road on this connecting link in a great line, will doubtless attract attention."

☞ The earnings of the Pennsylvania Division of the Atlantic and Great Western Railway, extending from the State Line of New York to the Ohio State Line, 93 miles, were for the eleven months ending October 31, 1865, $1,461,278 09; and the expenses, $881,879 53—making the net earnings $579,398 56. The total amount of funded and floating debt is $4,533,152 50.

☞ The Reno, Oil Creek and Pithole Railroad has been opened to Rouseville. The bridge over Oil Creek at McClintockville has been completed and trains have commenced running between that point and Reno. The opening of the road through to Pithole will not be long delayed.

☞ The commissioners for the State of Virginia and West Virginia are to meet in Washington city on the 28th instant, to inaugurate measures for the sale of the franchises and property of the Covington and Ohio Railroad.

☞ The Louisiana Legislature has taken measures to provide for the payment of the accrued interest and that to accrue on State bonds.

Eastern (Mass.) Railroad.

The receipts of this road for the years ending November 30, 1863, 1864, and 1865, were:

	1863.	1864.	1865.
From passengers	$587,588 16	$777,426 91	$950,033 98

Tons of freight transported	85,095	118,989	121,490

The earnings, operating expenses, etc., since April 1, 1861, when the present company came into possession, have been as follows:

	Gross earnings.	Operating expenses.	Earnings less exp.	Rent, taxes and interest.	Net income.
1861 (9 mos.)	$93,835 02	$74,414 60	$19,420 42	$5,250 27	$14,170 15
1862	151,730 83	101,067 54	50,663 19	11,897 03	38,766 16
1863	195,055 20	121,965 63	73,089 57	16,405 69	56,683 88
1864	270,671 60	193,867 64	76,803 96	22,504 76	52,299 20
1865	306,766 59	233,808 64	72,957 95	28,495 23	44,462 72

On the 1st of March, 1864, the Amherst, Belchertown and Palmer railroad, 20 miles in length, was purchased by this company, and paid for by an additional issue of 567 shares of stock. By the terms of the purchase, the company assumed the indebtedness of the A., B. & P. R. R. Co., amounting to $7,838 96. In the amount expended for improvements in 1864 is included the above amount, and $4,544 29 for Extension road from Amherst to Montague. This road is 14 miles long, and will connect at Grout's Corners with the Vermont and Massachusetts railroad. It is now under construction, to be completed by July 1, 1866, for $285,000. To defray in part the cost of the Extension, six per cent. bonds have been executed to the amount of $300,000, secured by mortgage upon the entire line between New London and Montague. The amount of these bonds negotiated, and the expenditures incurred to date on the Extension, is exhibited in the annexed

Balance Sheet, December 31.

	1863.	1864.	1865.

Railroad Earnings--Monthly.

The earnings of the Erie Railway for the month of February, 1866, including Buffalo Division, were $983,855 44
Corresponding month last year 1,011,735 25

Decrease $27,879 81

The earnings of the Housatonic Railroad for January and Febrnary 1865 and 1866, have been as follows :

	January.	February.
1865	36,249 00	$31,090 71
1866	30,387 57	27,279 48
Decrease	$5,861 43	$3,811 23

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway for the week ending March 10, 1866, were :

Passengers $37,453 00
Express, freight, mails and sundries.. 4,750 00
Freight and live stock 81,737 00

Total $123,940 00
Corresponding week, 1865 ..... 110,006 00

Increase $13,934 00

The traffic of the Great Western Railway for the week ending Mar. 16, 1866, was as follows :

Passengers $33,884 88
Freight and live stock..... 50,671 23
Mails and sundries..... 1,799 40

Total $86,355 51
Corresponding week of 1865 ..... 55,687 00

Increase..... $30,668 51

The earnings of the Chicago and Northwestern Railway for the second week in March, 1866, were..... $122,335 77
Corresponding week of previous year. 111,786 49

Increase..... $10,549 28

The earnings of the Chicago and Rock Island Railroad for the 2d week in March, 1866, were $48,537 00
Corresponding week of previous year.. 57,815 00

Decrease $9,478 00

The earnings of the Michigan Central Railroad for the 2d week in March, 1866, were..$76,889 49
Corresponding week of previous year.. 76,468 09

Increase $421 40

The earnings of the Chicago and Great Eastern Railway in March have been as follows :

	1st week.	2d week.
1865.....	$13,341 24	$19,064 24
1866.....	25,023 87	25,616 54
Increase	$11,682 63	$6,752 30

The earnings of the Western Union Railroad, for the week ending March 14, 1866 :

	1866.	1865.
From freight	$5,714 74	$3,429 20
" passengers	3,400 02	2,788 26
" express	250 00	162 80
" mail.....	296 58	296 58
Total.....	$9,661 34	$6,676 84

Receipts from Jan. 1, to March 14 :

1866 ..... $98,739 15
1865 ..... 95,103 93

Increase $3,635 22

☞ The Dubuque and Sioux City railroad will soon be opened to Iowa Falls, 15 miles west of Ackley, the present terminus, and 50 miles west of Cedar Falls.

Where are we Drifting ?

It is contended that during the year 1865, the goods imported into the port of New York, were of the official value of $224,742,419 ; and that they brought in a large profit no one can doubt. But during the first two months of the present year the imports have been going on at much greater rate, being said to be five times greater than for the corresponding period of the last year. The textile fabrics thus far imported are stated to be of the value of $32,561,379 against $6,094,325 last year. So it is said a similar increase has taken place with regard to the imports in fancy goods, copper, steel, fish, hides, wines and spices, not all equally increased in amount, but generally so. The fabrics of wool, cotton, silk and flax for the first two months of the present year are as large in amount as the totals of the same articles during the two corresponding months of 1863, 1864 and 1865.

So that we see before us certain consequences of a most unpleasing character, which it is wise in us to consider and examine. At present we have nothing in our foreign trade, to give us any equivalent advantage for our excessive imports. We have no foreign market that we can call our own except it be in cotton ; everything else has competition to encounter and low prices. We have been able to get rid of a large amount of our Government securities, and in this way keep up our remittances to the balances due abroad, but this system cannot be kept up forever ; nor would it be desirable that it should be.

In this view of the subject, considerable anxiety prevails as to what the policy of the country shall now be ? Must we resume as soon as possible ? Shall we raise our tariff duties ? Shall we contract our legal tenders ? Shall we fund ? Shall we keep on with all sail set, or take it in ?

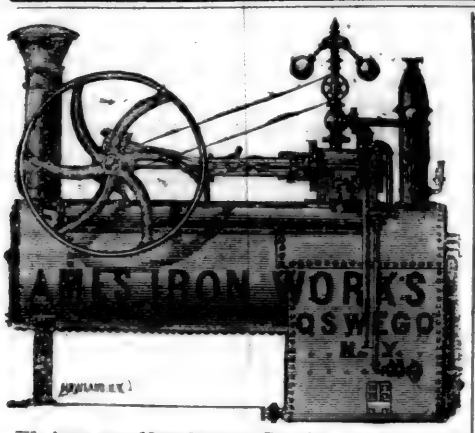
The manufacturing interests contend that the revenue they are directly and indirectly giving the Government, will be endangered by any attempt at contraction, that the cost of production is even now greater than the price at which sales are effected ; and that if the least attempt is so made there will be a crash of which no one can foresee the consequences. Then the recent movement in Congress to prevent any reduction of the amount of legal tenders in circulation at the present time, is hailed as a step in the right direction, and one which will also preserve the present condition of things from a disastrous change. It has been always predicted by our own and foreign writers when on this subject, that whenever any attempt should be made to come back from a false to a sound basis of finance, the array of opposing interests would be found to be almost unconquerable. So many powerful causes work together to favor delay, that a forward movement becomes almost impossible.

There can be no doubt of the morality of the main question itself. The duty of the nation is to liquidate and discharge its debts as early as practicable, to return to prudence and economy, to retrench, save and accumulate ; this is sound wisdom, it is justice, it is safety. To tamper with this duty is to run the greatest risks, and yet there are those who are willing to incur them.

It must be admitted the subject is full of difficulty. It is apparently Scylln and Charybdis that awaits us on the one side or the other. Inflation and disorder, contraction and explosion are held out as before us on either side, and we are warned that either is possible and the alternative close at hand.

Some problems in regard to this country remain yet to be solved, as many others have been. It has not yet been determined what amount of paper currency can be safely maintained in circulation, nor what amount of gold is necessary to sustain the amount of paper afloat, or what are the aggregates of annual interchanges foreign and domestic to support the exchanges of paper and make them easily and readily convertible, for without this, exchanges are without real value, and are but the evidences of disorder and the sources of distrust.

We may, therefore, very seriously pause at considerations like these, and if we hesitate it is but natural. It would seem as if we can only take refuge in adhering to certain fixed facts, and immutable principles, by which the world always has been and always will be governed, and from which we shall never be exempt. These are simple and inexorable. To be out of danger, we must get out of debt ; to return from an expanded to a less dangerous condition, would seem to be the commonest act of prudence for a nation as well as for individuals, and that therefore caution, restriction and contraction are really the true path of duty.



☞ The Matamoras *Ranchero* says that a rail road is to be built from San Fernando to Montery, so as to have a port entirely and unmistakably within Mexican territory, and rapid through communication with it. The port will probably be at the Barra de Jesus Maria, not many leagues south of Bagdad.

☞ The time for the completion of the construction of the railroad from Dunkirk to Fredonia has been extended two years from Feb. 10, 1866.

☞ The extension of the charter formerly granted for the construction of a railroad from Waterville, Me., to Solon, *via* Norridgewock and Anson, gives seven years for the construction of the road, and parties interested are strongly of opinion that it will be in operation within three years. Efforts will be immediately put forth to secure the stock.

NEW BEDFORD WATER WORKS.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the Water Commissioners in New Bedford, until 12 o'clock M, April 19th, 1866—

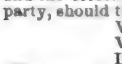
For the construction of the DAM at the Storing Reservoir, with well-chamber and gate-house, &c.

For the construction of a brick CONDUIT, nearly six miles in length, with ventilators, man-holes, &c., &c

For the construction of a RECEIVING RESERVOIR, with influent and effluent chambers, &c.

The work consists of about 120,000 cubic yards of earth excavation; 3,000 cubic yards of rock excavation; 10,000 cubic yards of puddle bank; and about 11,000 cubic yards of brick and stone masonry.

Plans may be seen and specifications obtained at the office, on and after April 2d, 1866.



The Commissioners reserve the right to reject any one or all of the bids offered; and in making the awards will award the raising of the Road crossing the Storing Reservoir to one, the Dam to another, the Conduit to another, and the Receiving Reservoir to another—or all to one party, should the interest of the city seem so to demand.

WM. W. CRAPO, WARREN LADD, DAVID B. KEMPTON, } Water Commissioners.

GEORGE A. BRIGGS, Chief Engineer.
W. J. MCALPINE, Consulting Engineer.
New Bedford, March 19th, 1866. 4t12

Raritan and Delaware Bay RAILROAD.

On and after Monday Feb. 12th, the Express Train will be Discontinued.

THE STEAMER WILL LEAVE PIER No. 5. North River, daily (Sundays excepted), at 3 P. M., connecting with train for Manchester, Toms River, Long Branch, &c., &c.

Freight for Camden and Intermediate Stations

will be taken at LOW RATES on the 4 o'clock line, reaching Camden the next morning.

SALE OF THE ST. LOUIS AND IRON MOUNTAIN RAILROAD.

THE UNDERSIGNED HEREBY GIVE PUBLIC notice that they have been duly appointed, confirmed, qualified and established a Board of Commissioners for the ST. LOUIS AND IRON MOUNTAIN RAILROAD, under and in pursuance of an act entitled "An act to provide for the sale of certain railroads and property by the Governor, to foreclose the State's lien thereon, and to secure an early completion of the Southwest Branch Pacific, the Platte County, the St. Louis and Iron Mountain, and the Cairo and Fulton Railroads of Missouri," approved February 19th, 1866; that they have authority to buy in railroad, together with the lands, appurtenances and franchises heretofore belonging thereto, and now forfeited to the State, at the sale thereof advertised by the Governor of the State of Missouri to take place at the east front door of the Court House, in St. Louis, Missouri, on the TWENTY-SEVENTH DAY OF SEPTEMBER next, and again to sell the same.

And the undersigned Commissioners as aforesaid, in further pursuance of said act approved February 19th, 1866, do hereby invite proposals for the purchase of said St. Louis and Iron Mountain Railroad, with the lands, rolling stock, and other personal property, appurtenances and franchises heretofore belonging or appertaining to said railroad and forfeited to the State as aforesaid.

The proposals of bidders shall each state the price bid for the road, and property connected therewith, and shall state that they are based on the following terms and conditions, which are established to govern the sale of said roads by said Board of Commissioners, First—The price or consideration bid shall be payable as follows: one-fourth on closing the contract, and the balance in five equal annual instalments; the first instalment payable in one year, the second in two, the third in three, the fourth in four, and the fifth in five years thereafter, with six per cent interest on deferred payments, payable annually; provided that all sums bid may be paid at any time, in either cash or the bonds or other liabilities of the State, or bonds guaranteed by the State. Second—The roads and all rolling stock belonging thereto shall be kept in good serviceable condition during the progress of the work to completion of said roads. Third—The St. Louis and Iron Mountain Railroad shall be finished to a point south of Pilot Knob, to connect with the Cairo and Fulton Railroad line, in three years, and finished to the Mississippi river, opposite to or below Columbus, Kentucky, in five years after the date of sale of said road; and the purchasers of said road shall expend in each and every year between the date of sale and the completion of the road at least the sum of five hundred thousand dollars in the work of graduation, masonry, or superstructure on said extension; provided that the faithful annual expenditures required shall entitle the purchaser to an extension of time of payment of principal of purchase money due that year until two years after maturity of last instalment; and provided that an annual statement of expenditures on the road shall be made, under oath, by the treasurer and two directors thereof, and filed with the Secretary of State.

Proposals will be received until the 30th day of November, 1866. They must be directed to Robert A. Watt, President, or to Chester Harding, Jr., Attorney of the Board of Commissioners of the St. Louis and Iron Mountain Railroad, St. Louis, Mo., and indorsed "Proposals for the purchase of Iron Mountain Railroad."

Awards must be approved by the Governor before they will be binding upon the State. The Commissioners reserve the right to reject any and all proposals not satisfactory.

Copies of the act approved February 19th, 1866, and other information can be had by addressing the President or Attorney of the road at St. Louis, Mo.

ROBERT A. WATT,
CHARLES S. RANKIN,
BERNARD G. FARRAR,
Board of Commissioners for the St. Louis & I. M. R. R.
8m12

AUCTION SALE OF THE ST. LOUIS AND IRON MOUNTAIN RAILROAD,

WHEREAS, BY AN ACT OF THE GENERAL Assembly of the State of Missouri, entitled "An Act to expedite the Construction of the Iron Mountain Branch of the Pacific Railroad," approved December 25th, 1852, and "An Act explanatory and amendatory of said act," approved February 23d, 1853, there was loaned to the St. Louis and Iron Mountain Railroad Company bonds of the State to the amount of seven hundred and fifty thousand dollars, afterwards by an act entitled "An Act to aid in the construction of the St. Louis and Iron Mountain Railroad," approved March 3d, 1855, there was loaned to said company by the State the further sum of seven hundred and fifty thousand dollars, afterwards by an act entitled "An Act to secure the completion of certain railroads in this State," which became a law on the 16th of December, 1856, there was loaned to said company by the State the further sum of one million and five hundred thousand dollars, afterwards by an act to amend the last mentioned act, approved March 3d, 1857 there was loaned to said company the further sum of two hundred and seventy-six thousand dollars, and afterwards by an act entitled "An Act in relation to the St. Louis and Iron Mountain Railroad Company," approved March 9th, 1859, there was loaned said company by the State the further sum of two hundred and twenty five thousand dollars: and

Whereas, By each of the said acts of the General Assembly it was provided that said company should pay the interest on said bonds semi-annually, and that in case said company should make default in the payment of either interest or principal of said bonds, or any part thereof, it should be lawful for the Governor to sell said road and its appurtenances by auction to the highest bidder, first giving at least six months' notice of the time and place of such sale, by advertisement, to be published once in each week in the paper which shall publish the laws at Jefferson City, and in two public newspapers printed in the city of St. Louis; and

Whereas, The said railroad company has made default in the payment of the interest due on said bonds, and the General Assembly aforesaid, by an act entitled "an act to provide for the sale of certain railroads and property by the Governor, to foreclose the State's lien thereon, and to secure an early completion of the Southwest Branch, the Platte County, the St. Louis and Iron Mountain, and the Cairo and Fulton Railroads of Missouri," approved February 19th, 1866, has authorized the sale of said railroad under the provisions of the several acts hereinbefore referred to; now, therefore, by authority of the said several acts of the General Assembly, I will, on the

TWENTY-SEVENTH DAY OF SEPTEMBER, 1866,

At the east front door of the Court House, in the city of Louis, between the hours of nine o'clock in the forenoon and five o'clock in the afternoon of said day, sell at auction to the highest bidder for cash or any indebtedness of the State, the said St. Louis and Iron Mountain Railroad so far as the same is finished or projected, with all the rights, privileges and franchises to which said company is entitled under the several acts of the General Assembly of this State, made in reference to said railroad, or under any law, general or special, and all property whatsoever of said railroad company, road, road-bed, rolling stock, fixtures, tools and appurtenances, and all depots buildings, furniture, machinery, materials, lands, lots, stocks or other property whatsoever, real or personal, belonging to said railroad company, or to which said railroad company has any claim in law or equity.

THOS. G. FLETCHER,
6m12 Governor of Missouri.

CIVIL ENGINEERS, ABOUT TAKING the field, or otherwise engaged, can obtain the services of several assistants, thoroughly drilled in draughting, surveying, levelling, railroad location, calculation, &c., &c.; being about to graduate in the Engineering course of Union College. Some of them though well qualified to run level or transit, to lay out railroad curves, &c., would be willing to commence as rodmen or in similar positions. Address Prof. GILLESPIE, Schenectady, N. Y. 2t12

New York, Saturday, March 31, 1866.

Southern Pacific Railroad.

We have received a Circular signed by the President, Vice President and four of the Directors of the Southern Pacific Railroad Company, addressed to the Representatives of the State of California in Congress, asking public aid in the construction of a Railroad from the Bay of San Francisco to San Diego, and Eastward to the Colorado river, with a view to a connection at that point with a road or roads leading across the country to the Mississippi river, and to connections with the Northern and Eastern Railroads, and ultimately with the Gulf of Mexico.

The particular aid asked is a grant of twenty sections of land per mile, instead of ten as now proposed in a bill known as that of Senator Brown. The Circular claims that the route advocated is needed for trans-continental business, and the adequate protection of the Southern frontier, and for the settlement and development of the rich mineral, agricultural and pastoral lands of Arizona, New Mexico, Western Texas, the Indian territory, Kansas, and South Western Missouri. It is claimed to be the shortest route across American soil, with easy grades, and to be free from snow. It is not more than 1,200 to 1,250 miles from San Diego to good ports on the Gulf of Mexico. While opening a new and valuable route to commerce, it will not interfere with the Central Pacific route; and it is claimed that the efforts of the Nation should not be confined to the construction of one road. Besides the commercial reasons, political ones are adduced in the circular in favor of the project, viz., the importance of the port of San Diego in the case of a foreign war, a point of immense importance under such a possibility, and demanding attention. The cost of construction is estimated by Lt. Park in the Railway Reports, Vol.7, at from $50,000 to $120,000 per mile.

The Circular is carefully written, and presents the subject in a calm and conclusive manner, and will no doubt have full weight with the body of legislators to whom it is addressed.

Report on Coal.

We are indebted to S. H. Sweet, Esq., late Deputy State Engineer and Surveyor of New York, for a copy of his elaborate report on the subject of COAL, particularly as it affects the interests of this State, whether we regard it as fuel or motive power, or whether as the mere material for transportation, it comes into importance as an element of business and traffic without regard to its final uses. We have given the work a very careful and deliberate examination, and rise from its perusal with great satisfaction. It is the most perfect thing of the kind which has yet emanated from an official source; and is embellished with numerous well prepared and accurate maps of the various coal regions described in the text. These maps are exceedingly valuable; and the tables which accompany them are full, complete and satisfactory. Mr. Sweet enters upon his subject with all the zeal of a skilful geologist, and prefaces his remarks with preliminary descriptions of the different ages of the world's formation, according to the most approved theories of the day, following the arrangements of the foreign school, as modified by our American groups of rocks which carry their own peculiar names.

The distribution of coal is then treated of, and the extent of the various deposits given throughout the world. Our own are on the grandest scale; the one reaching from and through the North in Pennsylvania, Southeastern Ohio, Western Virginia, Eastern Kentucky and Tennessee, to Alabama—sweeping over 63,000 square miles; the other, the Illinois basin, including the Western part of Indiana and the Northwest part of Kentucky, little less in area than the preceding; a third occupying a portion of Missouri west of the Mississippi, and another covering the central portion of Michigan. The solid contents of all our own productive coal fields are estimated to be four thousand millions of tons.

Yet enormous as is the supply of the article, the price has remained almost fabulous. Cannel coal, which in 1861 was sold in New York at $6.50 per ton, has brought in 1864–'65, $25 to $28, and other qualities in proportion—affording the most enormous profits on the one hand, and a large loss to consumers on the other. It is very evident that this inquiry of Mr. Sweet comes in good season to attract the attention of economists.

The report gives a very interesting account of the condition of the neighboring mines of Nova Scotia and their values; and of the productive anthracite coal fields of Pennsylvania, divided into the Schuylkill, the Lehigh, the Middle District and the Northern or Wyoming and Lackawanna.

We have also a description in detail of each Pennsylvania coal basin, and the routes from each to market, by water and rail; for it will be observed, that the author has with great intelligence kept in view the question of supply, and closely considered the relations of these coal fields to the New York markets—a matter of material consequence in an economical point of view; and the consequence is, that the report is not merely a guide to the mines, but a price current to regulate the real value of the article itself.

Indeed, we become at once familiar with the whole process of mining, transporting and selling coal; see whence it comes; how far it is transported; what is to be the extent of its uses, and what further supplies may be depended upon in future generations.

The accompanying tables furnish the most exact data for calculations of an interesting character, extending to all kinds of transportation by land and water, and the appendices contain statistical details of great value to engineers and railroad interests.

It is impossible, in a brief notice such as the present one, to do justice to this report, which touches mileage, tonnage, freights, routes, cost, production, canals, and the whole range of interests that underlie the subject of coal. We think that we have here a manual of valuable information, which cannot be too generally known, and we hope it will either be published at the public expense on so large a scale as to be within reach of every intelligent person, or else may be made the subject of particular publication by some of our enterprising first class booksellers, as a contribution to the material interests of the country which cannot be too generally known and understood.

Seaboard and Roanoke Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: Wm. L. Savage, Nalbro' Frazie and Moncure Robinson, of Philadelphia; George M. Vickers, of Baltimore; John M. Robinson and Richard Walke, of Virginia, and David A. Barnes of North Carolina. Wm. L. Savage, President; John M. Robinson, general superintendent; J. B. Pendleton, superintendent of machine shops; Richard Walke, secretary and treasurer; S. T. Hand, superintendent of roads and bridges.

McGregor Western Railway.

Under the lease contract made with the Milwaukee and Prairie du Chein Railway Company, March 11, 1865, that company assumed possession of, and commenced the operation of this road to Ossian, a distance of 35 miles, on the 1st day of April. On the 1st of August they took possession of the entire road of the company, finished and unfinished. The track was then laid to Counover, but not in condition to run. On the 29th of August, trains commenced running regularly to Counover, which is still the terminal point of the road.

The following statement will show the earnings of this road, including drawback, paid by the Milwaukee and Prairie du Chien and North Western Railway Company, from April 1 to December 31, 1865:

From freight		$172,756 68
" passengers		39,082 93
" mails and rents		1,499 67
		$213,339 28

And the expenses, were:

Repairs of track	$27,833 17	
" bridges	402 86	
" buildings, etc	1,818 39	
" locomotives	7,156 28	
" cars	10,867 80	
" tools & machin'y	2,694 52	
General management	5,927 64	
Station service	9,988 99	
Conductors, etc	4,763 55	
Engineers, etc	6,979 36	
Train supplies	5,952 09	
Fuel	15,012 19	
Oil and waste	2,956 01	
Rent of rolling stock	18,303 41	
Taxes	5,660 33	
All other expenses	2,109 78	
		128,446 47
Net earnings		$84,892 81
Interest on stock, notes, and saved on iron purchase		4,104 55
Material sold		940 17
		$89,937 53

Paid for real estate	$150 00
Judgments paid under article 4, Lease contract	1,199 76
Construction account amount paid under lease contract	49,291 30
Coupons due 1st August 1865, on McGregor Western Railways Co.'s bonds	34,440 00
Balance to new account	4,856 47
	$89,937 53

All accounts, and the entire management of this road, are under the same system and rules as the Milwaukee and Prairie du Chien line is worked.

Owing to causes mentioned in the report of the General Manager, such as the hasty and imperfect manner in which the road was constructed, the narrow excavations and embankments, and the consequent expenditures required in keeping up the track, the line fell in arrearages in April and May $5,450 02. From the 1st of June to the close of December, the earnings and interest gain were $217,443 83; from which deduct operating expenses, (including 8 per cent. on advances) real estate and judgments, as stated in the income account, amounting to $129,796 23—leaving a net gain of $87,647 60. Adding the deficit existing prior to the 1st of June, it shows the line netted in the seven months $93,097 62. In compliance with the lease contract, this net was applied first to the construction of new side track, shops, buildings, track, etc., and then to paying coupons on mortgage bonds due August 1, 1865, which were not paid until the 1st of December following.

Since the lease, the road-bed has been materially improved by widening the cuts and embankments. The necessary buildings were also commenced; and such as were partly built, completed. For this purpose, $34,428 04 was expended from the net earnings and charged to construction account. In addition to which, $12,077 10 was expended in laying new side track; and $2,786 16 for new track and surveying—making the total amount expended from earnings under the lease contract, $49,291 30.

The equipment on the road at the time of taking possession was valued at $130,230; for which 1st pref. stock was issued at 105; making the cost $124,028 57. In addition to which rolling stock to the amount of $94,418 74 has been supplied by the lessees—making the total amount $218,442 31. The equipment now consists of: 6 engines; 3 passenger, 3 baggage, 75 box, 13 flat and 6 hand cars, which is sufficient for the business of the road with its present length, and is throughout in efficient condition.

Thus the supplying of efficient and adequate rolling stock, and curing certain defects in the construction of the line enabled large earnings, out of which the line could be improved and the August coupon paid; so that at present no arrearages on mortgage interest exists, nor any floating debt.

Considering these results were obtained from a line which in the first instance was hardly in condition to be worked at all, and then only run 35 miles—subsequently 40—and since end of August, 50 miles, it would lend to great expectations for next year; and to still greater, if the company were enabled to extend it to a connection with the Minnesota Central, and to bridge the Mississippi river at Prairie du Chien.

The surveys have been made, and estimated will soon be ready to submit showing the cost of completing and equipping the road to Austin.

The number of passengers carried was 24,485; of which 11,219 went east, and 13,216 westward.

The number of tons of freight moved was 46,160; of which 30,776 tons went east, and 15,384 went west.

General Account, December 31, 1865.

Cost of material on hand		$14,843 78

The operations of the year show an increase of gross earnings of $1,034,467 86, including the portion of the line between Alton and St. Louis, 23 miles not in operation last year.

The gross earnings per mile in 1864, on 257 miles were $10,916 82-100.

The gross earnings in 1865 on the entire line, 280 miles, were $13,714 62-100 per mile, showing an increase of over 25½ per cent., estimated upon the basis of the number of miles operated during each year.

The net earnings per mile in 1864, were $4,955 32, and in 1865, $6,548 70, showing an increase of nearly 26 per cent.

Of the entire traffic of the line in 1865, 74½ per cent. was local, and 25½ per cent. through.

The passenger traffic was 71½ per cent. local, and 28½ through.

Freight traffic was 77½ per cent. local, and 22½ per cent. through.

The expenditures on account of additional depots, tracks, engines and cars, exclusive of repairs, amounted to $759,232 87.

During the year 15 new locomotives have been purchased and placed upon the road, and 18 rebuilt or thoroughly repaired.

The company have constructed during the year at their shops, 10 passenger cars, 1 baggage car and 201 freight cars.

The equipment of the road now consists of 66 locomotives; 32 passenger, 8 baggage, 4 express, 671 house, 138 stock, and 277 platform cars.

The number of miles run by locomotives with passenger trains was 400,616; with freight trains, 696,522; with wood trains, 33,336; with construction trains, 111,771, and with switching trains, 208,085—total miles run, 1,450,280.

The number of passengers carried was 557,316; of which 514,558 were way, and 42,758 were through.

Tons of freight moved north, 222,680; do., south, 238,331—total, 461,011.

With few exceptions, both engines and cars are in good condition for service.

The earnings of the line for the past year were reduced by the limited number of engines and cars employed, and it is estimated that the increasing traffic of the line will require during the year 1866, 10 additional locomotives, and from 300 to 400 cars.

Additional depot grounds and buildings are needed at Chicago, and at several other points upon the road. The length of many of the tracks for passing trains should be increased.

It is estimated that an expenditure of about $600,000 will be required during the year, in order to increase the capacity of the line to meet the requirements of its prospective traffic.

The St. Louis, Jacksonville and Chicago road was opened for traffic between Petersburg and its junction with the Chicago and Alton road near Monticello, a (distance of 88 miles,) on the first day of January of the present year, and a large additional traffic is being received from that source.

By the completion of that road northward to a connection with the Chicago and Alton, at a point from 80 to 100 miles from Chicago, all danger of a competing line to St. Louis is done away with, and the control of the Jacksonville line, practically vesting in the Chicago and Alton road, under the provisions of a perpetual contract, insures a great increase of traffic to the main line, which will probably render a double track from the junction to Chicago indispensable.

By reason of much difficulty having been heretofore experienced in the care and delivery of live stock, transported to Chicago on the different lines of railway, and the dissatisfaction on the part of dealers, causing shipments to Eastern markets in many cases by routes avoiding Chicago, the railway companies whose lines terminate at Chicago, united during the past year in the purchase of grounds and the construction of a union live stock depot, near the southern limits of the city; which in its magnitude and completeness for the purpose designed is unequaled. Its cost has exceeded $1,300,000.

The capital stock of its organization, known as the Union Stock Yard and Transit Company, being $1,000,000, and its indebtedness about $300,000.

The interest of this company in the enterprise is equal to 1-20, and its cost $50,000.

The successful operation of the Union Stock Depot, and the profits direct and indirect during the past two months, since its completion, fully justify the most sanguine anticipations of its projectors.

The advantages derived from the construction of the Alton and St. Louis road, and its control by this company, have been found fully equal to its expectations; and the transfer of passengers and freight between St. Louis and the terminus of the line on the opposite bank of the Mississippi River, under the contract with Messrs. Mitchell, Miltenberger and Tansey, has been conducted with entire satisfaction.

At the last session of the Legislature of Illinois, an amendment was obtained to the charter of this company, which provides that its Board of Directors shall consist of nine stockholders—one-third of the number to be elected annually—thus giving to the stockholders the control of their property, which by reason of an oversight was by the original charter vested in a Board of Directors, who were not only constituted life members at their pleasure, but empowered to fill vacancies, and thus perpetuate their control in the hands of such persons as they saw fit to select.

GENERAL BALANCES, DECEMBER 30, 1865.

Cost of road, equipment, &c.		$8,308,919 00

Secretary and Treasurer—W. M. LARRABEE.

General Superintendent.—ROBERT HALE.

Nashville and Chattanooga Railroad.

The Nashville and Chattanooga railroad company has resumed payment in full on their Mortgage Bonds indorsed by the State of Tennessee, without funding arrearages of interest as authorized by the recent Act of Tennessee. The whole mortgage is $1,500,000, at 6 per cent. The arrearages since 1861 is 30 per cent. to 1st of January last or $450,000, the whole of which the Company is now prepared to pay off in cash on the presentation of the back coupons at the Manhattan Bank in this City.

Railroads and Canals of Pennsylvania.

An abstract of the State Report for the year ending 30th October, 1865.

Compiled by the Hon. Isaac Slenker, Auditor General of the Commonwealth.

American Railroad Journal.

Saturday, March 31, 1866.

Stock Exchange and Money Market.

There is evidently a divided public sentiment on the financial policy of the country at this moment, and what it is likely to be. The movements of Congress on the one hand, and the opinions of the Treasury department on the other, are in widely differing directions. The Loan Bill, in the shape it has passed the House, prohibits the cancelling of more than ten millions of United States notes within six months after the passage of the act; and more than four millions in any one month thereafter. This is of course an effectual prohibition of contraction, and a support of paper money up to its present amount so nearly, as to bring no perceptible difference or change to the public. Of course there can be no contraction under this bill; and it is not intended there should be any. Now it is worth while to look at this condition of things with an impartial eye, and if possible an unbiassed judgment; and we shall be safe, we think, in relying upon certain fixed principles to guide our opinions, and to lead us to just conclusions.

One is, that we still have, and have had, an excess of paper money, which while it professed to represent true money, varied from 30 to 70 cents from the real value on each dollar, and indeed had no certain or fixed value at all from day to day. Out of this fact, there sprang up the well known evil of derangement of prices and current values; and the consequence was, that the consumers of the country were soon charged 200, 300, and even 400 per cent. more for articles of necessity than the usual price; and so high have been the rates on most of these articles, that large numbers of people have been deprived of the use of them entirely.

Now as long as paper money is so abundant as to be more plentiful than is required by the ordinary demands of business, it will continue to have this effect on prices, and to keep them up really in excess of their values. And thus we see, that though gold has fallen, yet as there is no contraction in legal tenders or bank notes, prices in all those articles where combination or necessity yet prevails, still keep up. It would be easy to give a list of these, but it is unnecessary.

One of the great arguments against contraction has been this: that the Government had the use of a large amount of legal tenders without paying any interest for them; and that if they were funded, the people would have to pay from 20 to 25 millions of dollars interest on the sum thus withdrawn and funded. No doubt the annual tax would be this large. We can indeed readily calculate, that the withdrawal of the legal tenders, and the funding of them as proposed, would cost every man, woman and child in the country annually one dollar each at least. This would be the tax for the cost of contraction. But there would happen some other things which might reconcile the country to this tax of a dollar per head, and this would be, the hourly and daily saving in all the outgoes of life, of 200 and 300 per cent. Take the daily expenses of any male or female, rich or poor, at the present time, and from these could be safely deducted full one-half, as soon as the prices which inflation has produced shall fall to the natural standard. The saving in expenditure by the fall in prices on the retirement of the depreciated paper currency would give entire ease to most families even in very moderate circumstances; and indeed give greater ability to meet taxation than exists even now. To make this statement more plain and evident, let the reader calculate for himself what he is now paying for his clothing, for his fuel, for his food, for his cotton garments, his boots and shoes; let the housekeeper count up what he is paying daily to his butcher, baker, grocer, coal dealer, etc.; and when he has fixed the amount according to the facts, let him ask himself if he could at once save two-thirds of this outlay, he would not be better off than he is now at present prices? Would it not be a clear saving of hundreds of dollars in almost every individual case? Certainly in the cases of those who are in any respectable condi-

tion of life, and have families dependent on them. Can there be a doubt but that a small annual tax per head of one dollar to meet the interest on the withdrawn and funded currency of the country, would not be a light burthen, when so much heavier ones were withdrawn which now press on the actual comforts of the people generally, or rather deprive them of such as they have hitherto enjoyed. This is the real test of the value of the policy which is now being discussed, perfectly well understood by political economists, who see at a glance what trouble and what suffering follow in the train of a currency which is forced on the public beyond its real and universal value. There was a time in the early history of this country, continental times they were, when five hundred dollars in paper would not buy a man a breakfast. And it was even then attempted to maintain its fictitious value by just the same arguments that are in fashion now. Those who held much of it, and who had speculated in it, and accumulated much of it talked of their interests, their claims and their dangers, just as some people talk now; yet it was impossible to carry the system against the common sense of men, their experience, and their business.

It is, however, very evident that the policy of the National Legislature is to pursue a course of expediency, and to retain in circulation many hundreds of millions of paper dollars. If this is to be a permanent measure we may expect, unless all experience fails in its lessons, to see prices mount up again; and as the paper dollar improves in estimated value, to have the country flooded with foreign goods in a style hitherto unknown, large as importations have sometimes been. Why should not this be so? This is the best market in the world for the foreign merchant, money is plenty, the people are liberal even to extravagance; as our money approximates to gold, the profit of the importer becomes more certain and tempting, for prices do not fall in any ratio to deter importation. It is well known that immense profits have for a long time been realized on foreign goods as gold has fallen, while prices have kept up, and this is what we may yet expect. It is asserted that the quantity of foreign goods ordered, arrived, in bond and to arrive, is of immense value; and if they are not yet fairly in the market it is because there has been a reasonable doubt in the minds of the people as to their real value as compared with other things Nothing but the good sense and prudence of the American people have kept them from absorbing on credit these vast foreign imports, most of them on foreign account. While on the other hand, we have been shut out of foreign ports by the high prices of articles produced among ourselves, with the stimulus of paper money.

Now we ask if it is advisable for us to adhere any longer to such a system than we can help. Is it not the part of statesmanship, as well as of honesty, to rectify the financial dealings of the country as soon as possible; to insist that a dollar means 100 cents, and no less, and shall not be forced into and kept in circulation for more than it is worth; that false coin, false tokens and unreal promises to pay money, shall not pass in place of the real and substantial money of the world.

We know well it is said that great interests depend on exemption from disturbance. The great manufactories with large capitals, enormous profits, and heavy stocks on hand, are endangered somewhat by any change which may come from a contraction of this irredeemable currency. But the loss, if any, which would fall on these corporations, would be on the other hand, an unloosing of great and heavy personal burthens which they have succeeded in placing on the entire masses of the consumers. In a choice between sufferers, we should be inclined to favor the classes who are most deserving of sympathy, and whose losses are not in profits expected, but in actual deprivations.

To sum up the whole question thus discussed, and to recur to the point first made, it may be demonstrated that while a return to a specie basis might cost the people of this country thirty millions of dollars as taxes in the shape of interest on the amount funded and withdrawn, yet they would save in their annual expenditures for the necessaries of life, by a fall from the present inflated prices, a sum of at least three hundred millions of dollars in the reduced price of the articles consumed. It would be an easy task to demonstrate this. And the statement is worth considering.

It is observable that gold took a small rise on Tuesday last, which circumstance was recorded with great satisfaction by a certain class of journalists who advocate continued inflation. They rejoice to announce that the paper dollar is not as good as it was a few days previously. It is expected that it will continue to depreciate, so that the reign of speculation may again revive, and values become again the sport of the hour.

On the other hand, we think the sudden rise of one per cent. is not based on sound calculations; but that the current of events, and the turn of exchange, will carry gold still lower in spite of all efforts to stay its downward progress. This is evidently the opinion of Mr. McCulloch, as expressed individually at least, in his latest letter; and this itself is doing the designed work. The only real demand for gold which presses on the market is for customs; and the supply is fully equal to the legitimate demand. It is perfectly well understood, that as exchange now rules, there is more reason to import than to export specie; and if we could ship other articles as advantageously as cotton—or if, in other words, there was as fair a market for them—there is no doubt but that we should witness importations of specie on a very considerable scale.

In reference to the general financial policy of the country, as it is now affected by Congressional action, a very novel and interesting question has been raised in banking circles in this city. It is this: How far the refusal of Congress to receive the Southern States into the Union may hereafter affect the legislation of Congress in regard to its future loans and conversions of securities. In other words, what may be the effect hereafter on the validity of acts of Congress changing the forms and tenor of the public securities, when eleven of the States to be bound by them, to be responsible for them, and to be held for them as debtor States like the others, are not permitted to take any part in the legislation which gives validity and force to the obligations! May not the question some day be sprung on the people, that the loans authorized by but a portion of the States cannot be enforced upon those who were excluded from taking any action with regard to them!

Are not those Members of Congress who are standing on pure party grounds against a frank, cordial and generous forgiveness of a defeated enemy, running a tremendous risk for the credit of the country, by trusting it to an imperfect and half-legislation, when the whole would not be too much to give strength and certainty to its financial obligations. We have reason to know that this view of the subject is giving considerable anxiety in financial circles in this city; and we commend the subject to the consideration of Congress itself. In these days of legal subtleties, verbal construction, and constitutional doubts, the question may be sprung whether financial bills, pledging the resources of the nation to future engagements, when a great portion of its representation is violently kept out of the Legislature, are of as binding in force as they would be with a full assent and co-operation.

It may be as well to ask whether this view of the subject may not also be taken abroad at some future day, when it shall again become necessary to assail, and if possible overthrow American credit. It would seem the duty of our thinking men in Congress to pause before they give further opportunity for mischief by their continued opposition to the policy of reconstruction in the shortest and simplest practicable forms which the wants of the Country, as a whole require. We have alluded to this subject with the best intentions, and we commend it to the consideration of thoughtful friends of the credit of the country.

The sudden rise of gold of about 1 per cent. on Tuesday last, was made the subject of great rejoicing in certain quarters. The holders of heavy stocks congratulate themselves on the prospect of a rise in prices, and a continuation of large profits at the cost of consumers. But we are inclined to the belief that this joy is premature. The public shows a fixed determination to buy as little as possible at present; and this will settle the matter, let the money article writers do their best to keep up prices and speculation. Men must have parted with their senses, if they are willing, in time of profound peace and returning prosperity, to pay 300 to 400 per cent. more for articles than they are worth and can be produced for, to oblige any particular interests. The total exchanges of property for money in this country, are known to be thousands of millions of dollars per annum. Is it worth while that the greatest part of the amount shall be at fictitious values? We surely think not.

Money continue very plentiful, and Exchange much below par. The week's exports, March 27th, were large, being of the value of $6,127,258, including 16,609 bales of cotton, of the value of $3,111,335. Government securities are firm and improing. 7-30s have reached par, and are inquired for freely. The 5-20s have gone up in Landon to 72, and beyond this on the Continent.

The New York exports, exclusive of specie, for the week ending March 27, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$3,608,485	$6,127,258
Prev. reported	47,517,608	50,791,717
Since January 1	$51,126,093	$56,918,975

The balance in the Sub-Treasury on Wednesday was $84,489,790 63.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns :—

New York.—N. Y. 7s, Bounty Loan, 99½; do., 6s, 1873, 93; Minnesota 8s, 97; Ohio 6s, 1886, 97; do., 1881, 96; Connecticut 6s, 93; Brooklyn 6s, Water Loan, 93; Central R. Railroad from Smithfield to Covington.

The stockholders of the Louisville and Frankfort and Lexington and Frankfort railroads have, by an almost unanimous vote accepted the amendment to their charter adopted at the late session of the Legislature, authorizing them to build a branch road to Cincinnati. The road will be commenced at once and be vigorously pushed to early completion.

Albany and Susquehanna Railroad.

The Albany and Susquehanna Railroad was opened on the 19th inst. to Unadilla, Otsego County, 100 miles from Albany; 55 miles have been added since 1st June last, leaving 40 miles to complete it to Binghamton. There has been expended in the construction and equipment to this time $3,868,166 90. Of this sum $300,000 has been expended west of Unadilla, which includes the cost of the right of way and depot grounds for the entire line. It is expected with the $500,000 balance of State aid, the road will be completed within the next year.

Steam Engine Packing.

L. G. Tillotson & Co., 26 Dey street, advertise a new patent self-lubricating steam engine packing, smooth, soft, tight, durable and clear, saving from 100 to 300 per cent., suitable to all openings and diameters, needing no oil, put in dry, and placed like ordinary packing. It is in general use, and the testimonials in its favor are of the best and most reliable character. It is found a great economy.

Goodman and Merrill.

These gentlemen have an office at No. 36 New street and 38 Broad street, this city, where they act as agents for the purchase, sale or lease of Southern lands; also as agents for the negotiation of Southern railroad bonds, and the purchase of railroad iron and railroad equipments. They will also purchase and ship plantation machinery of every description; and make advances on consignments of cotton, tobacco and wool.

Notes on Polytechnic Schools.

We have received a copy of these notes, the work of S. Edward Warren, C. E., a Professor of Descriptive Geometry, etc., in the Rensselaer Polytechnic Institute, Troy, a scientific school of which we are always pleased to speak in high commendation. These notes are full of valuable information, with large, liberal and profound views on the subject of practical education. Published by John Wiley & Son, 535 Broadway.

Montana Gold Mining Company.

This is a Colorado Company, with a capital of $400,000, in the hands of most respectable parties, with a large property on 16 lodes near Central City in Colorado, with stamp mill and large and valuable water powers. The report of the condition of this company is a very favorable one, and will attract attention from its intrinsic merits and progressive value, which cannot be doubted. Our personal knowledge of some of the parties interested, induces us to give it a favorable notice and our good wishes, aside from the real and substantial character of the property, and to recommend it to the notice of the public.

☞ R. B. Hall, Esq., of Louisville, Ky., has taken the contract to complete the eleven miles of Southern Pacific Railroad between Shreveport and Marshall, making a continuous aggregate of forty-two miles of road.

☞ Harvey Rice, Esq., of Concord, has been appointed Superintendent of the Ogdensburg Railroad, vice George V. Hoyle, resigned.

☞ An officer of the Montgomery and West Point Railroad states that work will probably be commenced on the bridge across the Chattahoochee in two weeks.

Railroad Earnings.--Weekly.

The earnings of the Grand Trunk Railway for the week ending March 17, 1866, were:

Passengers	$40,472 00
Express, freight, mails and sundries	4,750 00
Freight and live stock	78,592 00
Total	$123,814 00
Corresponding week, 1865	112,710 00
Increase	$11,104 00

The traffic of the Great Western Railway for the week ending Mar. 23, 1866, was as follows:

Passengers	$31,455 72
Freight and live stock	34,508 84
Mails and sundries	2,122 91
Total	$68,087 47
Corresponding week of 1865	42,859 93
Increase	$25,227 54

The earnings of the Chicago and Northwestern Railway for the third week in March, 1866, were $115,838 41
Corresponding week of previous year. 111,615 02
Increase $4,223 39

The earnings of the Chicago and Great Eastern Railway for 3d week in March were $25,472 80
Same period last year 19,458 98
Increase in 1865 $6.013 82

The earnings of the Michigan Central Railroad for the 3d week in March, 1866, were $68,854 00
Corresponding week of previous year 78,370 00
Decrease $9,516 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in March, 1866, were $55,671 00
Corresponding week of previous year 58,771 00
Decrease $3,100 00

The earnings of the Chicago and Alton Railroad for the second week in March, 1865, were $152,923 00
Corresponding period previous year 148,408 00
Increase $4,515 00

The earnings of the Western Union Railroad, for the week ending March 21, 1866:

	1866.	1865.
From freight	$4,095 70	$3,421 16
" passengers	3,476 03	2,751 88
" express	250 00	162 80
" mail	296 58	296 58
Total	$8,118 31	$6,632 42

Receipts from Jan. 1, to March 21:

1866	$106,857 46
1865	101,736 35
Increase	$5,121 11

Union Railroad Depot.

We understand that it has been fully decided to erect a grand Union Railroad Depot at Albany, for the accommodation of the New York Central, Hudson River, Harlem, Boston and Saratoga Railroads. It is to be located on Broadway, from Lumber to Colonie streets, and will be 600 feet deep by 100 feet wide. The "Head Centres" of all these corporations have been in Albany recently, and have agreed that a mammoth depot will be speedily built.

☞ It is proposed to build a railroad from Mansfield, Mass., on the Boston and Providence Railroad, to Framingham, on the Boston and Worcester Railroad.

Debt of North Carolina.

The following is a copy of an act to provide for the payment of the State debt of North Carolina contracted before the war:

Whereas, It appears by the estimate of the Public Treasurer, that the debt of the State upon coupons now due on bonds issued under acts passed prior to the 20th day of May, A. D., 1861, is about the sum of $2,500,000, and that the coupons falling due in the year 1866 will amount to about the sum of $650,000, and that the bonds of the State, due and to become due in the year 1866, amount to the sum of $364,000, making an aggregate sum of $3,514,000 of the public debt, which was contracted before the war, to be provided for during the present fiscal year; therefore, in order to provide means to enable the Public Treasurer to pay said debts—

Sec. 1. *Be it enacted by the General Assembly of the State of North Carolina, and it is hereby enacted by the authority of the same*, That the Public Treasurer be and he is hereby authorized and directed to cause to be prepared and to sell bonds of the State to an amount not exceeding the sum of $3,600,000, for the purpose of paying said debt, which bonds shall bear date the first day of January, 1866, and to be made payable thirty-four years thereafter, with coupons bearing 6 per cent. interest, payable at such places as the Public Treasurer may prescribe; the said bonds shall be of the denomination of $100, $500 and $1,000, and shall not be disposed of for less than par, and in all other respects shall be issued agreeably to the provisions of the 19th chapter of the Revised Code, and the said bonds and the interest accruing thereon shall be exempt from taxation.

Sec. 2. That the bonds of the State which were issued under acts prior to the 20th day of May, 1861, and which have already become due, or may become due before the first day of January, A. D. 1867, shall bear interest at the rate of six per cent. per annum, from the time the same shall have or may become due.

Sec. 3. That the act shall be in force from its ratification.

Ratified the 9th day of March, 1866.

Journal of Railroad Law.

In the case of O'Hanlon *vs.* The Great Western Railway, tried in the court of Queen's Bench England it was decided, that when goods have been intrusted to a carrier to convey to a particular place, and by his default they are not delivered, the party entitled to them will be warranted in procuring other similar goods at the place, if there be a market for them, and the measure of damage will be the price at which such goods can be obtained in the market. If, however, there is no market for such goods at the place of delivery, the damages must be ascertained by taking into consideration various matters, such as (in addition to the cost price) the expense of transit and reasonable profits.

The action was brought against the defendants for breach of contract as carriers in not delivering certain goods delivered to them to be carried from Leeds to Neath, the declaration stating that "the said goods remained undelivered as aforesaid for a long and unreasonable time, and the same became and were and still are wholly lost to the plaintiff, whereby and by means of which said premises the plaintiff has not only lost the said goods, but also by means of the said premises, he has been greatly impaired and damnified in not being able to carry on his trade and business of a draper for want of the said goods," &c. To this the defendants pleaded payment of £22, into court. The plaintiff replied that he had sustained damages beyond that amount.

The case was tried before Blackburn, J., at the Swansea Assizes, when the Jury returned a verdict for the plaintiff for £25, being £3 more than the amount paid into court. It appeared upon the trial that the plaintiff was a tailor who travelled with his workmen from place to place, working up articles for the retail trade, and selling at different places the articles so worked up, and which were sent to him to meet him at such places. In the present instance he had ordered certain goods to be sent to him from Leeds to Neath, in Glamorganshire, by the Great Western Railway, so as to be delivered to him there on the 9th and 10th of November, 1863. The goods had been forwarded on the 6th November, but from some unexplained cause they never arrived, and the plaintiff and his men were kept idle waiting the arrival of such goods for many days, and he then purchased other goods of the same vendor. But in consequence of the state of things he was necessitated to sell at a loss a horse and cart which he had with him for the purpose of his business.

The defendant's counsel having moved for a rule to enter a verdict for defendants on the ground that the £22 paid into court covered the cost price of the goods and the charge of bringing them to Neath, and thus the plaintiff was not entitled to any further damages, the plaintiff's counsel contended that the plaintiff was entitled to damages beyond the cost price and carriage of the articles; namely, for his loss of profit upon them, and to himself in consequence of the non delivery; Rice *vs.* Baxendale, 7, H. & N. 96, 30 L. J. 371, Ex.; Wilson *vs.* The Lancashire and Yorkshire Railway Co., 6 H. & N. 211 Black *vs.* Baxendale, 1 Ex. 410.

Blackburn, J. I am of opinion that this rule should be discharged. It would seem that goods costing about £20 were sent by the defendant's line of railway from Leeds to Neath, but that somehow or other they were lost on the way; and the question is what damages is the plaintiff entitled to recover? It has been argued for the defendant that, according to the rule laid down in Rice *vs.* Baxendale, the measure of damages would be the value of the goods at the place and time, where and when they ought to have been delivered, which in this case would have been in Neath on the 9th November. To this rule we agree; for where, at the place to which goods are to be sent there is a market, the measure of damages under the rule will be the price at which such goods can be bought in the market. We have no such means of settling the market value, and it must be ascertained by taking into consideration various matters, including in addition to cost price and expenses of transit, reasonable importer's profits. As to what these are, it may be difficult to prove by evidence before a jury, but they should consider what are fair and reasonable profits, which persons in the ordinary course of business in such a case would be likely to make.

The defendants have paid into court less than ten per cent. interest on the actual cost and expenses, and the question is, were the jury warranted in giving more? I think they were; and in this case they have done so; and although they have been liberal, I see no ground for disturbing their verdict.

Mellor J. I agree with my brother Blackburn. It is impossible to lay down the rule that

in a place where there is no market, the market price is to be limited to the cost price and the expenses of carriage; another element must be added namely the importer's profits. No man brings goods to a place to dispose of without adding something to their price beyond what they cost him to bring them, and that addition is the importer's profit. I think the verdict ought to stand.

SHEE, J. I am entirely of the same opinion. I take it that when a carrier fails to deliver goods with which he has been intrusted, at the right time, the person to whom the duty of carriage is owing, is entitled within a reasonable time to go and purchase similar goods at the place where the carrier undertook to deliver them. If there is a market there he suffers no damage beyond the cost of supplying himself in the market, where such goods can be obtained, then according to the proper construction of Hadley *vs.* Baxendale, the damages should be ascertained by arriving at the probable cost of such goods obtainable there, including the reasonable profit of importation; that is such a sum as a dealer selling them would require as his fair profits on the transaction.

Rule discharged.

James River and Kanawha Canal.

Messrs. Belot des Minieres & Co., have obtained a charter from both the Virginia Legislatures, entitling them to complete the James River and Kanawha Canal. By means of this great work the Ohio will be connected with the seaboard, and a safe, cheap, and very direct communication be opened to the West. Nor is this all. France needs coal, iron, and ship timber, and these are to be found in immense quantities along the line of the proposed highway. It is the intention of the French company to avail itself of these resources, and with the active co-operation of the home Government, to proceed at once, as soon as the canal shall be cut through, to a systematic development of the untold mineral and agricultural wealth of the Allegheny region.

Through this line an immense trade and traffic will pass through Virginia, down to the James River and to the sea. The direct outlay of the company for work, food, labor, machinery and tools, will be enormous for years to come. The company propose to bring large colonies of French people to labor on the work, and settle on the soil; not only laborers of all sorts, and of both sexes, but skilled mechanics and manufacturers, and business men of education and enterprise. The skilled workmen and peasant class of France are among the most industrious in the world, and will, eventually, prove of great importance in the development of the minerals of Virginia, along this gigantic project of Messrs. Belot des Minieres & Co.—*Pittsburg Commercial.*

Charleston and Savannah Railroad.

The directors of this company announce that the corporation is insolvent, and that the road no longer belongs to them but to their creditors. They say that they are without resources, and that it will require nearly half a million of dollars to make the necessary repairs. They make the following exhibit of the present indebtedness of the company:

State guaranty	$505,060
Interest unpaid	124,545
Mortgage bonds	1,397,000
Interest unpaid	217,875
Total indebtedness	$2,244,420

They estimate the value of the road (one hundred miles) at one million dollars, and the rolling stock, depots, lands, &c., at three hundred and sixty-five thousand.

Interest and Dividends.

The Hartford and New Haven Railroad Company have declared a quarterly dividend of $3 per share, free of Government tax, payable April 2.

The Panama Railroad Company will pay 5th April a quarterly dividend of 4 per cent. out of the earnings of the road, and 2 per cent. out of the earnings of vessels.

The Columbus and Indianapolis Central Railroad Company have declared a quarterly dividend of 2½ per cent., free of Government tax, payable at Columbus, Ohio, on the 26th inst.

The Philadelphia, Germantown and Norristown Railroad Company have declared a dividend of four per cent., payable clear of taxes, on the 2d of April.

The Pittsburg, Fort Wayne and Chicago Railroad Company has declared a quarterly dividend of 2½ per cent., free of of tax, payable April 18.

The coupons due October 1, 1860, on bonds of the Vermont Valley Railroad, will be paid on the 31st instant at the office of the company in Bellows Falls, Vermont, and at the National Park Bank in this city.

☞ The law of Virginia authorizing the funding of interest on the State debt, passed at the late session of the Legislature, provides that the holders of registered bonds of the commonwealth, issued before the 17th April, 1861, may invest the interests due upon said bonds in registered bonds of the State, bearing the same rate of interest as the principal, and payable in ten or thirty years, as the holder may elect. The holders of the coupon bonds of the State, issued prior to the above date, are permitted to invest the interest due in either coupon or registered bonds, to bear interest at the rate of the principal. All fractional sums of interest due on the above bonds, which cannot be invested as provided, shall be provided for in the form of certificates, payable in two, three or four years, with interest. The interest on the bonds of the restored government, issued since the creation of West Virginia, may be invested up to January, 1867, in bonds as before stated.

☞ The Pottsville *Miners' Journal* says that arrangements are being made to connect the Shamokin Valley and Pottsville Railroad with the Lehigh and Mahanoy Railroad (known as the Quakake) at Mount Carmel, by which passenger trains will be run direct from New York to Erie, *via* Sunbury. The connection it is said, will be completed by the first of May. The New Boston Coal Company are pushing their lateral railroad from the mines at New Boston very rapidly. They expect to have it completed by the first of June.

☞ The new iron railroad bridge over the Ohio river at Steubenville, on the Pan Handle route, is completed, and trains cross regularly. This road connects with the Pennsylvania Railroad to Pittsburg, thence via Harrisburg, Reading, Allentown, Easton and the Central Railroad of New Jersey to New York. There are but *two* changes of cars by this route from St. Louis to New York; and but *one* from Cincinnati and Chicago.

☞ The bonds and stock of the Chicago and Great Eastern Railway has been placed upon the regular list of the Stock Exchange.

Baltimore and Potomac Railroad.

A bill has been introduced into the House of Representatives authorizing the extension, construction and use of a lateral branch of the Baltimore and Potomac Railroad into and within the District of Columbia. The bill recites that whereas the Baltimore and Potomac Railroad Company, incorporated by an act of the Maryland Legislature in 1853, are desirous to construct a lateral branch from the said Baltimore and Potomac Railroad to the District of Columbia, therefore they are authorized to extend within the District of Columbia a lateral road in connection with the road they are about to construct from the city of Baltimore to the Potomac River; the company being only empowered to construct one lateral road within the District. The company is required to construct the road at street intersections so as not to interfere with travel, and the level of the road to conform to corporation grade. The fare charged on the road within the District shall not exceed sixteen cents for a shorter distance than four miles. The bill was referred to the Committee on the District of Columbia.

Sheboygan and Fond du Lac Railroad.

At the recent annual meeting of this company at Sheboygan, Wis., a temporary Board of Directors was elected, viz: S. R. Palmer, of New York; E. Appleton, of Reading, Mass.; S. M. Barrett, of Cincinnati; A. G. Ruggles of Fond du Lac, and J. L. Moore of Sheboygan. It is proposed to sell the road to parties New York.

New York and Oswego Midland R. R.

The Madison *Observer* says that "surveying parties are already in the field on the eastern section of the projected Midland Railroad, as well as in the vicinity of Norwich. We understand that additional parties are to be immediately sent into the field to survey the route from Syracuse to Oswego, and also the proposed northern route from Syracuse through this section of country."

☞ It is said that the right of way for the New Lisbon (Ohio) railroad has been secured, and that hands are busy to work. It is expected that the road will be completed from New Lisbon to Niles, by the 1st of September.

☞ P. V. Daniel, Jr., President of the Richmond, Fredericksburg and Potomac Railroad, and Colonel Stewart, of the Alexandria and Fredericksburg road, having effected an arrangement for a connection, it is presumed that the work on the latter road will shortly commence, and that it will be completed to Mount Vernon by the 4th of July next.

☞ The Atlantic and Gulf Railroad has just been put in running order, the first through train having arrived at Savannah on the 13th instant.

☞ Notice is given in the Canada *Gazette* that a charter will be applied for at next session to incorporate a company to build a railway between Sorel and the main line of the Grand Trunk Railway.

☞ A bill to incorporate the Oshkosh and Mississippi railroad company has passed the lower house of the Wisconsin Legislature.

☞ A new railroad is projected in Connecticut to connect Millerton and Sheffield, by way of Lakeville, Salisbury and Chapinville.

Tennessee State Bonds.

The Governor of Tennessee has issued the following notice to the holders of the bonds of the State, on the subject of funding the arrearages of interest:

By virtue of an act of the General Assembly of the State of Tennessee, passed Nov. 23, 1865, I am authorized and instructed to issue the Six per Cent. Coupon Bonds of the State, bearing date Jan. 1, 1866, and payable Jan. 1, 1892, to an amount sufficient to pay off all the bonds and interest past due, as well as that to fall due Jan. 1, 1866, or bonds that may fall due in 1867, said bonds to be similar in every respect to the bonds issued under the act of February 11, 1852, and the acts amendatory thereof.

I am now ready to perform the duty imposed upon me by the aforesaid law, by issuing to persons holding bonds, or coupons, or entitled to interest, past due, new bonds in lieu thereof. Holders of bonds or coupons past due, or entitled to interest, will please file such bonds or coupons, or claims for interest, with the Comptroller of the Treasury, in amounts not less than one thousand dollars, and present the said Comptroller's receipt to the Secretary of State, who will deliver the new bonds.

☞ A bill to authorize the City Railroad Company of Milwaukee to issue bonds has passed both branches of the Wisconsin Legislature.

NEW BEDFORD WATER WORKS.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the Water Commissioners in New Bedford, until 12 o'clock M., April 19th, 1866—

For the construction of the DAM at the Storing Reservoir, with well-chamber and gate-house, &c.

For the construction of a brick CONDUIT, nearly six miles in length, with ventilators, man-holes, &c., &c.

For the construction of a RECEIVING RESERVOIR, with influent and effluent chambers, &c.

The work consists of about 120,000 cubic yards of earth excavation; 3,000 cubic yards of rock excavation; 10,000 cubic yards of puddle bank; and about 11,000 cubic yards of brick and stone masonry.

Plans may be seen and specifications obtained at the office, on and after April 2d, 1866.

The Commissioners reserve the right to reject any one or all of the bids offered; and in making the awards will award the raising of the Road crossing the Storing Reservoir to one, the Dam to another, the Conduit to another, and the Receiving Reservoir to another—or all to one party, should the interest of the city seem so to demand.

WM. W. CRAPO,
WARREN LADD,
DAVID B. KEMPTON,
} Water Commissioners.

Railways to the Pacific.

We have recently observed a disposition on the part of some, or at least one of our leading journals to discourage the construction of more than one railway across the continent to the Pacific. It is contended that by a union of the various interests, alone can the proposed communication be rapidly and effectually secured. And this is the conclusion to which the argument is directed.

We confess that we entertain very different opinions on this subject. We do not believe that one line of railway will be sufficient to do the business between the shores of the two oceans, and the two worlds separated by the Pacific Ocean. And looking also to the rapid settlement of our new intermediate gold bearing states and territories, to the rapid increase of their population, and the inducements they offer to enterprising emigration we perceive the most convincing signs that inter-communication will be as necessary to them as to the older States.

We certainly would not be content in the old settled states with a single line of railway in any one of them, and like causes producing like effects, it is plain to be seen that railways will be in as much demand at no distant day in the far west, as in the older and nearer east.

The American eye is a telescopic eye disregarding distance, and seeing the remote with as much distinctness as the present. It already notices that several routes of communication are certain to be required to accommodate the vast regions which lie between the Eastern and Western boundaries of the United States. And what is already foreseen, is begun to be attempted.

A very powerful organization exists to construct what is called the Northern Pacific Railroad, by the way of Lake Superior by a very favorable route, to which we have on former occasions alluded, and its projectors are engaged in a vigorous attempt to obtain such assistance from Congress as will enable them to go forward to its early completion. Still another route known as the Southern Pacific to pass from the Bay of San Francisco to San Diego, and thence to the Mississippi river is being discussed in California with much zeal, and with a great show of argument and necessity. Congress is already appealed to for its fostering care of this project.

Thus we have in all, three projects of great connecting lines between the Oceans, all of these earnestly supported by thinking men. And we do not believe these are too many.

No one will interfere with the other. On the contrary, they will aid each other, just as our railways in the east help each other by their connections and relations. Every one of them will have a terminus of its own, of the greatest importance, and all will command a special trade, while interior connections will develope interior centres of great value. It is not necessary for us to go into a calculation as to the probable business to be created by any continental line of railway to the Pacific. This subject has been fully examined and explained on former occasions, after being subjected to the most careful and critical examination by Engineers, experts, and commercial men. It is believed we are to see as a certain result the growth of a magnificent Empire on the Pacific, and the control of the commerce of Asia; more than this an entire change in the commercial routes of Europe, and the maritime ascendancy of the United States. More than this, this policy is to effect in another form a very important change in the internal resources and wealth of the country. One of the elements of our strength is too often overlooked, even by our most hopeful staticians. It is peculiar to us, and nowhere else to be found on the globe. It gives us an immense advantage over all other nations. And this is the rapid appreciation in the *value of land* in every part of the United States. What was but an open field fifty years ago is now in numerous instances the site of a flourishing town or city with an increasing population to which no one can now set any probable limits. The Eighth census gives a list of 140 of these flourishing places, of which a large number are of the first class, the rate of increase enormous, and their commercial position of great value. England has but about 21 principal towns, of which but ten exceed 100,000 in population, and they have generally attained their ultimate growth and prosperity. The land in that country admits of no further great appreciation in value; it is occupied to its full extent, and produces its utmost. Here, it offers its possessors continual improvement in value and production, with but small cost in the original purchase. The greatest wealth and the largest fortunes are every where seen to have followed small investments made but a few years since, and these opportunities exist every where, all over the land. The towns that have sprung up on the lines of our railways are innumerable, and their number will increase as these railways are multiplied. Here then is a rapid creation of the wealth of the country from the intelligent occupation of its soil, the location of commercial centres and the creation of business. In our estimates of the annual earnings of the industry of the country, we count on about six thousand millions as that annual increase, but who takes into account the enormous values which are springing up from these properties, which really cost little at the first but soon show a value of millions. Here we get a tangible addition to the means of the country which tells in revenue and taxation, and which makes it strong and permanent. No such spectacle is presented by any nation in Europe and is not likely to be. We have this superiority exclusively to distinguish us.

With this fact in our minds, how then can we hesitate to extend these facilities further West. The increase of connections with the Pacific coast

is sure to bring about the same consequences, we may see around us in the older regions. The plains are certain to be populated by an industrious race, who will be as quick to improve their advantages as we have been, and probably with more energy, and at a less of cost time, than we, who have been under European influences and prejudices more directly. We imagine that it is at no expense of our judgment that we can anticipate the most active scenes on the contemplated Great Western railways, a thriving and happy people throughout the new states and territories, flourishing and populous towns, and the greatest comfort and prosperity characterizing their condition. We cannot therefore join with any person in discouraging the construction of new lines of communication westward, with such results to be attained. On the contrary we think they are to be encouraged since they will equalize the relations of the northern, southern and middle portions of the country, and unite their general interests. Not a single one of these three great Pacific lines will interfere with the others, while all will have a common advantage in their termini, their sources of business and their markets for their products. All will be American in their design and their effects. So far then from discouraging these enterprises, we are disposed to support and encourage them, to help them on and aid them in their construction.

We do not see anything more worthy of national consideration than these great projects, which are so benign, so useful, so important, so productive and so beneficent.

We have as a people, the largest responsibilities ever thrown on a political assemblage of men, thus far we have acquitted ourselves well under them; we are able to go on still further, and in doing so we are conferring on the human race the highest blessings which it is in the power of intelligent free men to confer on their age and time.

Cleveland and Pittsburgh Railroad.

The earnings of this road for the years ending November 30, 1864 and 1865, were as follows:

	1864.	1865.
From freight	$1,571,155 11	$1,569,584 06
" passengers	832,821 57	1,029,065 60
" miscellaneous	108,338 82	97,727 86
	$2,512,315 50	$2,696,377 52
Expenses, viz:		
Motive power and cars	$620,900 32	$758,368 98
Maintenance of way and structures	460,350 55	551,416 19
Transportation and general expenses	424,385 67	649,798 39
	$1,505,636 54	$1,959,583 56
Earnings less exp.	$1,006,678 96	$736,793 96
To which add receipts from Pittsburgh, Ft. Wayne and Chicago Railway Co., being this company's share of surplus earnings		148,113 43
Balance		$884,907 39
Add balance from previous year		348,465 91
Total		$1,233,373 30
From which deduct—		
Interest on bonds, etc	$288,666 78	
Rent to P., Ft. W. & Chicago Railway Co	85,000 00	
Dividend paid	212,729 25	
New equipment	341,121 43	
		927,117 46
Leaving		$306,255 84

—which is the balance of net earnings account as will appear in the annexed financial statement. The report says:

The receipts for the year, omitting the amount received from the Pittsburgh, Ft. Wayne and Chicago Railway Company, are greater by $184,062 02 than the receipts of the year ending November 30, 1864. This increase is entirely from the transportation of passengers; for while the amount of freight carried is greater by nearly two millions of tons than was carried in the previous year, the amount of money received for carrying this increased amount of freight is less than was received in the previous year. It is very gratifying to find that while the freight business of the road has thus increased, the car service has been reduced, and that the local business of the road has been enlarged. It appears from the Superintendent's report that the increase of local freight from the Cleveland station is $45,606.

It is perhaps too soon to determine positively what the effect of opening the Panhandle road will be upon our business. It has always been considered by us a matter of doubt whether the business derived from the Steubenville and Indiana Road has paid for the additional expense connected with it. Since the opening of that line across the Panhandle to Pittsburgh, and the consequent withdrawal of their trains from our road, the business of our river division has been larger than ever in consequence of the increased local business, which seems likely to continue.

The increase in the expenses of operating the road is large, amounting to $453,947 02. This increase, so far as relates to motive power and cars, the maintenance of way and structures, is owing in part to the increased cost of materials and labor, and in part to the more extensive repairs which have been made upon the track.

Our joint account with the Pittsburgh, Ft. Wayne and Chicago Railway Company is largely increased from various causes, and the amount mentioned above is our proportion, or 26½ per cent. of the whole expense.

A portion of the expenses mentioned have arisen from the rebuilding of the bridge across the Allegheny river by the Pittsburgh, Ft. Wayne and Chicago Railway Company, of which they have charged us a proportion. The other increase in expenses is accounted for by the increase in the cost of labor and materials, as has been already stated.

We have included in the receipts the amount of $148,113 43 paid to this Company by the Pittsburgh, Ft. Wayne and Chicago Railway Company, which is our proportion of the joint earnings of the two roads beyond what was received directly by this company. It will be remembered that by the arrangement entered into between the two companies, each company retains its earnings, but a quarterly adjustment is made, and a division of the gross earnings of the two companies, in the proportion of 73½ per cent. to the Pittsburgh, Ft. Wayne and Chicago Railway Company, and 26½ per cent. to this company. In case either company has earned more than this proportion, the same proportion of the surplus is paid to the other company.

This arrangement has been in operation two years and a half, and the result thus far has shown its substantial fairness. It was anticipated by your Directors that this company might not earn its full proportion, as it of course withdrew all competition for business with its allied company, and sought only the joint interest of the two. It became the interest of the two companies, as a joint partnership, to send business over that portion of the roads of the two companies which would yield the greatest profit, and this was provided for in the contract; and if the public are equally well served, no one has reason to complain. To illustrate our meaning: The distance from Pittsburgh to Chicago in miles is not materially different by way of the Pittsburgh, Ft. Wayne and Chicago Railway, and the Cleveland and Pittsburgh Railroad, and its connections, the Cleveland and Toledo and Southern Michigan Railroads; but if freight is carried from Pittsburgh to Chicago by the road of the Pittsburgh, Fort Wayne and Chicago Company, the joint interest of the allied companies would receive payment for four hundred sixty-eight miles of transportation, while if carried by the other route, the distance for which the allied companies would receive compensation would be only from Pittsburgh to Cleveland, one hundred forty-five miles. It was natural to suppose, then, that certain business which previous to the alliance had been divided between the two companies would, after the union had been consummated, be done mainly by the Pittsburgh, Fort Wayne and Chicago Company. Of this the Cleveland and Pittsburgh Company have no reason to complain, because they receive their proportion of all the business done over either route. The Pittsburgh, Ft. Wayne and Chicago Railway Company have no reason to complain, because competition is removed and they receive a fair proportion of the joint earnings based upon the business of the two roads before their union, including a large amount of business belonging exclusively to the Cleveland and Pittsburgh Railroad, and in which they could in no other way acquire any benefit.

The actual result of this division of earnings from its commencement to the present time shows that during the two and a-half years of the working of this contract, the Pittsburgh, Ft. Wayne and Chicago Railroad Company have paid to this Company $45,433 92 more than they have received from us, a less amount than was anticipated by our Directors when this arrangement was commenced, in view of the considerations which have been already presented.

The statement made above, on which we have offered explanations, has reference exclusively to the business done upon the road, and the expenses connected with that business. The object of this statement is to show how much the company is earning from the operation of its road.

The income of the company from all sources during the year has been as follows:

Gross earnings, as above		$2,696,377 52
Received from Pittsburgh, Ft. Wayne and Chicago Railway Co		148,113 43
Net proceeds of sales 2,000 shares of capital stock		800,000 00
Miscellaneous issues of stock		137,900 00
Sale of real estate at Steubenville		500 00

		$3,985,851 47

It will be seen that the company received from the sale of stock, authorized at the last meeting, the sum of $800,000, and that there has been expended in construction, equipment and new structures, the sum of $876,317 64. This expenditure has been for objects of vital interest to the company, and the advantage will be found in the future increased earnings and reduced expenses of the company.

The amount $56,644 21 paid for real estate, finishes the payments on account of purchase of the land on the river at Cleveland, which is of the utmost importance to our increasing freight business, especially that of coal and ore. The whole cost of this property covering more than fifty-three acres in extent, and having a frontage on the Cuyahoga River of over three thousand feet, has been very reasonable. We have no doubt, if the Directors desired to sell it they could realize more than three times its cost, while for the use of the company it is almost invaluable.

This tract is on the opposite side of the river from the present termination of our road, and involves the building of a bridge across the Cuyahoga River. The consent of the State and city authorities has been obtained for this object, and it is expected that it can be commenced during the year. Wharves must be built upon our river front, and other improvements made upon the property, which will require the expenditure of a large amount of money, but it is unquestionably for the great permanent interest of the company. It is of such a character, however, that the work may be extended over a considerable period of time.

The final payment for building the bridge over Tinker's Creek at Bedford, has been made during the year. This bridge has cost the sum of $79,158 30, and is a permanent stone structure of the most substantial character.

With regard to the purchase of new iron for the track and new engines and coaches, we have only to remark that it has enabled us to put the track in fine running order, which is absolutely essential to the safe and economical transportation and general business of the company, and especially the large requirements of the coal trade. The new building for machine shop and round house, at Wellsville, are necessary for working the road in the best manner.

The new Union Depot, at Cleveland, which is built at the joint expense of the four railroad companies terminating here, is now partially covered, and it is hoped may soon be completed. It will add much to the convenience and comfort of the passengers, and will relieve the freight business of the companies from much embarrassment.

The financial condition of the company is in a high degree satisfactory.

It will be seen, by comparing the financial statement with the statement of last year, that the mortgage indebtedness has been reduced $137,616 26, and the unsecured indebtedness $59,141 65.

The mortgage indebtedness is now only $3,860,623 55, and the unsecured indebtedness is so small, that it could be paid at any time. No debts are unpaid which are due, and all the engagements of the company continue to be promptly met.

The company have 68 locomotives, 30 first class and 1 second class passenger cars, 6 express, 11 baggage and mail, 22 caboose, 1 paymaster's, 227 freight, 81 stock, 17 platform, 704 gondola, 16 wood, 84 gravel, 38 hand, 22 ditching and 1 wrecking cars. Miles run by passenger trains, 413,536; by freight trains, 723,393; by wood and gravel trains, 268,981; by mixed trains on Tuscarawas Branch, 23,831—total, 1,429,741, an increase over 1864 of 172,929 miles. Tons of freight carried one mile, 61,690,300, an increase over 1864 of 1,866,918 tons. Total number of cars hauled one mile, 9,825,270, a decrease in 1865 of 792,383.

Pittsburgh, Ft. Wayne & Chicago Railway.

To the Stock and Bondholders of the Pittsburgh, Ft. Wayne and Chicago Railway Co.

The following statement will give you a summary of the operations of the Railway, as connected with transportation, for the year 1865:

EARNINGS.

From passenger travel	$3,391,221 46
" freight traffic	4,739,067 88
" U. S. mail	93,900 00
" express business	149,658 02
" Cleveland and Pittsburgh Railroad Co. for use of track, &c., between Pittsburgh and Rochester	85,000 00
" rent of buildings and grounds	4,861 12
" miscellaneous sources	25,354 08
	$8,489,062 50

EXPENSES.

The transportation expenses for the year, including taxes, Federal, State and Municipal, were as follows:

Maintenance of way	$1,344,674 25	
" cars	531,103 94	
Motive power	1,520,948 54	
Conducting transp.	1,220,978 76	
General exp., including taxes	587,810 09	
		5,205,515 58
Which leaves a balance of		$3,283,546 98

For the net income arising from the operations of the Railway.

The financial operations of the year may be stated, in aggregate figures, thus:

INCOME.

Amount to credit of income over all payments and liabilities, Jan. 1, 1865	$189,737 63
Net income from operating road	3,283,546 98
Received from sale of 11,221 shares capital stock	1,122,100 00
Profit under the lease of the New Castle and Beaver Valley Railroad	34,331 43
Total	$4,629,696 04

DISBURSEMENTS.

Interest on bonds of all classes	$901,485 00	
Sinking fund	104,100 00	
Four quarterly divid'ds	901,282 50	
Construct'n and equipment	2,009,910 68	
Paid C. & P. R. R. Co. under contract	342,496 93	
		4,259,275 11
Which leaves a surplus of		$370,320 93
To which add investment in Akron Branch Road		179,829 40
Total above all expenses and liabilities, Jan. 1, 1866		$550,150 33

The expenses of working the road, as deduced from the above statement, has been sixty-one and one-third per cent. of the gross income.

In view of the decline in the rates obtained for transportation towards the close of the year, and the high prices of labor and material, this should be regarded as a favorable result.

The earnings of 1865 exceed the earnings of the year previous $1,368,596 80, or about 19.2 per cent. and the expenses of the past year exceed those of the previous year $1,104,116 95, or about 26.4 per cent. The three principal items constituting the expense of working the road, to wit: Motive Power, Maintenance of Way, and Conducting Transportation, bear about the same proportion to the earnings in 1865 as in 1864. The increased per centage of operating is found in the items of General Expenses, and Maintenance of Cars, the former by reason of an increase in the amount paid for taxes, which grew from $236,761 92 to $409,421 15.

The increased earnings were mainly derived as follows, to wit:

From freight	$590,564 88
" passenger	694,834 46
" express matter	81,351 80
	$1,366,751 14

The increased earnings from passengers was 26 per cent., while that from freight was only 14 per cent. The decline of freight rates the latter part of the year, and the passenger rates being undisturbed, explains the apparent increase in passenger business over the freight business.

The amount of earnings derived from military transportation was $546,330, being about 6¼ per cent. of the business of the Road, and $160,000 less than the same kind of business the previous year.

The whole number of tons of freight moved during the year was 26,313 tons less than the previous year, but the average distance that the whole was moved was 230 miles in 1865, against 203 in 1864. The falling off in the through tonnage was 67,898 tons, while there was an increase in the local of 41,585 tons. Of the decrease in the through tonnage, 50,209 tons was in the movement eastward, and 17,689 tons in the movement westward. There was an increase in the movement westward of the local freight of 45,280 tons, and a falling off of the eastward 3,695 tons. The average haul per ton of local freight in 1865 was 160 miles, against 145 miles in 1864. There was an increase in the eastward movement of cattle, sheep, hogs, and flour, and a decrease in horses, beef, and pork in barrels, whiskey, manufactures, and coal. And in the westward movement there was an increase in horses, products of the forest, railway iron, and coal, and a decrease in sheep, hogs, flour, and whiskey. The number of tons of merchandise moved in 1865, and in 1864, differed but one-half of one per cent. and that decrease was in the local movement eastward.

The principal features of the passenger travel are an increase of 176,990 in the number carried, or 14 per cent. The increase was almost wholly in the local travel, the through having only increased 1,862 in number. The through travel westward increased 6,975, while the eastward movement decreased 5,113.

The average distance traveled by the local passengers was 44 miles, against 41 miles the previous year, and the average distance traveled by the foreign was 200 miles, being the same as in the year previous.

It was estimated at your last meeting, that, if the business should offer at the then current rates, the earnings would amount to eight million dollars for the year 1865, and that, after paying operating expenses, there would be left $3,200,000. The gross earnings have exceeded the sum estimated about six per cent., but the net result is only $85,546 98 in excess of the estimate.

The Board is unwilling to venture an estimate for the current year, in view of the paralysis of the industrial and commercial interests of the country, growing out of the transition state through which it is passing. You will see in what follows that the condition of the property is such as will enable the officers to accomplish favorable results in the working of the road out of whatever traffic that may offer, and that the position which your road now occupies, is such as to give it a full share of the business of the country, whatever that business may be. The roadway has been very much improved in all departments, and is now in its entire extent, in most excellent order. It is believed that no continuous 468 miles of railway track west of this meridian is in as good condition as your road, and this good condition includes the road-bed, track, and bridges. And yet, to put the property in such a permanent and efficient state as should characterise all the leading railway thoroughfares in the country, considerable sums have yet to be expended, as will be seen by the report of Chief Engineer.

During the year the track has been renewed with rails as follows:

Re-rolled rails put in main track.....	9,143
New Rails,.....	2,007
Repaired rails,.....	217
	11,367

Which is equivalent to re-laying one-fourth of the entire main line between Pittsburgh and Chicago. More than one-half of the 468 miles of the main track has been renewed in the past two years, with new, rerolled, and repaired rails, and all paid for is out of the earnings of the road, a result which it believed no other Company has ever accomplished in a like period of time.

The renewal of cross-ties has been to the extent of 281,050, which is 52,222 more than last year, and is a larger number than the average required to keep a track in good condition.

Short sidings, and an insufficient number, is one of the usual causes of embarrassment to the successful working of such of our Rail Roads as have had a constantly increasing traffic. This evil is fast being remedied on your Road by extending old sidings and putting in additional ones. This kind of work has been done to the extent estimated in the last report, as the following table will show:

	Miles.	Feet.
Laid previously,.....	82	3,257
" during this year,.....	12	2,250
Total sidings,.....	95	227

The total length of sidings is equal, it will be seen, to one-fifth of the main track, or one mile of siding for every five miles of main track. This, with the 26 miles of double track west from Pittsburgh, and the 7 miles of double track east from Chicago, greatly facilitates the movement of trains compared with former years.

Every effort has been made to obtain the best railway iron made in this country, and we have no reason to doubt our success in this particular, but unfortunately this success is very far short of our expectations and wishes, and indeed short of what is necessary to make railways an object as a financial enterprise. Within the year rails have sold as high as $135 per ton, or cost, say on the track, $150 per ton, to last but three to five years. Such enormous drafts upon the income of railways must be remedied, if the system is to be permanently successful. Many plans have been devised and experiments tried to remedy, within reasonable limit of cost, this defect in rails, without having attained yet any material improvement. It is said that the rails, as made upon the Bessimer process in Europe, can be brought to fulfil the conditions requisite for complete success in railway management. With a view to test their merits, we have ordered some to be put in the track the current year. If found to answer the purpose, they will, of course, be largely manufactured in this country.

The number of locomotives now in service is 189, being two more than at the date of the last report. The two additional ones were purchased recently for switching service at Chicago, where a very large quantity of such work has to be done. The averge mileage for all the engines owned by the Company was 24,471, which is a very small fraction less than the mileage of last year.

The passenger equipment has been increased by 21 new first class coaches, and four baggage cars, and the whole of this class of equipment is now as follows: 1st Class Coaches, 94; 2d Class Coaches, 8; Emigrant, 18; Baggage, 22; Mail, 7; Express, 19.

The number of freight cars have been increased by building new ones, at the Company's shops at Fort Wayne, as follows, to wit: 71 box cars, 12 stock cars, 130 flat and coal cars, and the whole number now owned by the Company is as follows: 883 box, 547 stock, and 789 flat and coal cars.

The passenger and freight equipment was very materially improved during the year, and the locomotives have been kept in good order. The increase in the passenger and freight equipment has been such as to enable sush cars as were not in good condition to be spared from the road and sent into the shop for repairs. In the pressure of business in 1864, this could not always be done, and hence the expenditure for repairs during 1865, on this portion of the rolling stock, was greatly increased over the previous year, and increased beyond the usual per centage for car repairs.

The traffic of the Road has been moved with great promptness during the past year, excepting only a few days of delay that occurred at Pittsburgh to the east bound business in the month of November. This interruption was of too temporary a character to produce much inconvenience to either the Company or its patrons. The local freight traffic, which increased fourteen per cent. in quality, and eighteen per cent. in movement, was conducted with less complaint on the part of shippers, the past year, than at any previous period in the history of the Company.

The increased number and improved condition of the passenger coaches has also enabled the officers of the Company to give to passengers greater comfort than was enjoyed in the overcrowded condition of our coaches for several years past.

The amount expended for construction and equipment during the year was as follows: upon the eastern division, $1,149,575 87; and upon the western division, $860,334 81,—total, $2,009,910,-68, of which amount $988,624 84 was expended under direction of the Chief Engineer, and $1,021,-285 84 under the direction of the General Superintendent. The means for paying this large sum was derived as follows:

Sale of 11,221 shares of stock,.....	$1,122,100 00
Income derived from operating the Railway.....	887,810 68
	$2,009,910 68

This sum, added to the previous expenditures, makes the disbursements for construction and equipment, from 1862 to 1865 inclusive, $7,312,-342 68, during which period the share capital has increased from $6,500,000 to $9,312,442.

The above amount is double what the Board contemplated at the beginning of the year, but the pressure for the enlargement of the capacity of the road for business, the anxiety of the officers for improving the property with a view to ultimate economy in the working of the road, and the great cost of doing work of every character, led to the above result.

For the current year this class of expenditure will be kept within such limits as will enable the Board to pay for it, out of that portion of the capital stock unsold at the beginning of this year, which you authorized three years ago. No increase of the share capital beyond what has been heretofore authorized is asked by this Board.

In December last the stock business of the road in Chicago was removed from the yards on the grounds of the company, in the city, to the Union Stock Yards, occupying 320 acres of land, adjoining the south boundary of the city, and just west of your road. This was acquiesced in by your Board on account of the great inconvenience occasioned by the insufficient room, and besides the ground occupied by our Stock Yards was needed for shops, tracks, and other purposes connected therewith.

The concentration of the entire live stock business of Chicago, (which has now been accomplished,) outside of the city limits, was regarded as a measure which would result in benefiting the Railway, packing, shipping, and stock raising interest. Thus these Stock Yards in all their appointments are vastly larger and more complete than anything of the kind on this Continent, and were erected in the short space of six months, at a cost of one million four hundred thousand dollars.

Under the contract with the Cleveland and Pittsburgh Rail Road Co. for division of joint earnings, the payment to that Company out of the earnings of your Road for the past year amounted to the large sum of..... $342,496,93

Deducting from this sum the amount received by this Co. out of the earnings of the Cleveland and Pittsburgh Rail Road Co. in the year 1863 and 1864..... 129,077 66

$213,419 27

And the balance indicates the amount paid by this Company in three years for the advantages derived from the contract. The gross earnings of this Railway, during the existence of the contract, to the 31st of December last, was nearly $20,000,000, so that there has been paid to the Cleveland and Pittsburgh Rail Road Co. a very small fraction over one per cent. of this amount to secure harmony of action, permanence of rates, and unnecessary expenditure of money, growing out of an unprofitable competition for business. The amount thus paid is not large for the object gained. It was not, however, expected that any considerable sum should be paid out of the income of either party to gain these results, and therefore the Board of Directors of the respective Companies have concluded a supplement to the original contract which is herewith submitted for your information. This contract was executed on the 16th of February, 1866—having been made under the authority of the First Section of the original agreement.

During the year the title to the Cleveland, Zanesville and Cincinnati Rail Road, (better known as "Akron Branch,") was conveyed to this Company by the parties who purchased at judicial sale, in November, 1864; subject, however, to a mortgage for $200,000, and to secure a like amount of bonds bearing 7 per cent. interest, payable semi-annually, and the principal payable twenty years after date. The mortgage was made by the parties who conveyed title to this Company, although this Company is not bound to pay the morgage debt, yet it cannot acquire a complete title so long as the mortgage remains. The Road is worked independently of this Road, that is, not under the direction of the General Superintendent of this Road, nor with the rolling stock of this Company; but it is worked under the orders of the Board of Directors of this Company by the superintendent, Col. Simeon Perkins, who has been in charge of the property since it

was created. The net earnings to the close of the year have been $33,500, of which $14,500 has been paid for coupons on bonds, and to the parties in interest previous to the mortgage, thus leaving $19,000 as a balance to this Company. This sum, and future profits to a reasonable extent, it is proposed to set aside as a sinking fund with which to retire this mortgage debt. The amount paid for the title to this Road was $179,829 40, as stated in the general account. The Cleveland, Zanesville and Cincinnati Rail Road is 61 miles in length, having its northern terminus at Hudson, on the Cleveland and Pittsburgh Rail Road, and its southern terminus at Millersburg, the county seat of Holmes county, 23 miles south of Orrville, the point at which it crosses the Road of this Company. The equipment and track are in fair condition, and the business is steadily increasing, and is made by the purchase permanently tributary to this and the Cleveland and Pittsburgh Rail Road. The low price (about $6000 per mile, including equipment,) at which the Board was enabled to secure this property, and thus prevent it from falling into unfriendly hands, induced the purchase, which it is believed will prove profitable, and the policy a wise one.

On the first day of July last, this Company commenced to operate the New Castle and Beaver Valley Rail Road, under a contract dated the 29th day of June, 1865, which is herewith submitted. This Road is 15 miles in length, connecting with your Road at Homewood Station, 35 miles west of Pittsburgh, and terminating at New Castle, the county seat of Lawrence county, Penn., and there connecting with the Erie and Pittsburgh Rail Road, which has its northern terminus at the City of Erie, the whole forming a continuous line of Railway from Pittsburgh to the harbor of Erie, a length of 148 miles. The only rail route to the oil regions of the Allegheny Valley, from Pittsburgh, is over this road, *via* New Castle; and the shortest and best route from Pittsburgh to Franklin, and the oil basin adjacent, is over the New Castle and Beaver Valley Rail Road.

The gross earnings of the New Castle and Beaver Valley Road, from July 1st to December 31st, 1865, was $79,013 97. Of which the proportion (60 per cent.) due to this Company under the contract was..... $47,823 07
The General Superintendent reports the operating expenses to have been 13,011 64

Profit for six months..... $34,811 43

It is not expected that so large a percentage of profits will be maintained in the future, but there can be no doubt that the leasing of this short Road, occupying as it does the gateway of the Beaver, Shenango and Mahoning valleys, was an act of sound policy, and that it will always prove to be fairly remunerative to the Company, as also to the Stockholders of the New Castle and Beaver Valley Rail Road Co.

The Lawrence Rail Road Co., which is engaged in building a Rail Road from a point on the New Castle and Beaver Valley Rail Road, forty-eight miles from Pittsburgh, up the Mahoning Valley, to connect with the Cleveland and Mahoning Rail Road, two miles east of Youngstown, and thus form a continuous Railway from Pittsburgh to Cleveland *via* Youngstown, by the shortest and best practicable route between the two cities, have finished their track from the Eastern terminus in Pennsylvania to Lowell in Ohio, leaving six miles of track yet to put down to complete the line from Pittsburgh to Cleveland. With the material aid promised by parties along the line, who are greatly interested in a rail communication with Pittsburgh, the officers of the Lawrence Rail Road Co. promise an early completion of this six miles. This portion of the Road finished has been put into use, and when the entire line to Cleveland is in successful operation, as it ought to be in six months, the manufacturing interest of which Pittsburgh is the centre, will have three several Railway lines to Lake Erie, which will have the capacity to accommodate fully the present, and rapidly increasing, business of this region for many years to come.

Four lines of Railway are projected, each of which make Fort Wayne a terminus. All of these Roads, if completed, would be important to this Company by adding materially to our business. Some, of course, are of greater importance than others. The "American Central Railway" is to run west from Fort Wayne, very nearly on a parallel of latitude, crossing the Mississippi River at New Boston, and terminating at Omaha, the eastern terminus of the main line of the Union Pacific Rail Road. The large amount of work already done upon the line, the contracts and financial arrangements which have already been made, seem to justify the assurance of the Board of Directors of that Company, that, they will complete their Road from Fort Wayne to the Mississippi River in three years.

The Grand Rapids and Indiana Railroad Co. is a land grant Company, whose surveyed line is from Fort Wayne to the straits of Mackanaw, running through the western counties of the State of Michigan. In the work already done, and the large body of good land to come into possession of the Company, is a basis sufficient, under pro per management to complete the Road.

From Fort Wayne to New Albany, or some other point on the Ohio river opposite Louisville, the Fort Wayne and Southern Rail Road Co. is engaged in building a Road, the whole line now being under contract to, it is said, responsible parties. When completed, this would make a very good route from Pittsburgh to Southern Indiana, and to Kentucky, and thence into Tennessee.

The enterprise many years ago projected of a Road from Richmond, Indiana, to Fort Wayne, has again been revived, under the title of the Cincinnati and Fort Wayne Rail Road Co. A large amount of work has been done, and a good deal of local assistance has been promised, so that there seems to be good promise of early completion of a piece of Road which would form a link in a very good route from Chicago to Cincinnati *via* Fort Wayne.

Although your Road forms a link in the most direct route from the North-western States and Territories to the great cities North of Washington City, yet its greatest strength lies in its local advantages. At its termini are two of the greatest cities of the West, that must, from the very nature of the occupation of their citizens, interchange largely their tonage, and communicate frequently by personal contact. The agricultural capacity of the country on the entire line is most excellent, and the manufacturing facilities great and increasing. The statistics from 1862 to 1865, of the local business, exemplifies our views on this point, and confirms our theory as to the intrinsic value of your property. The local tonnage in the period named has increased from 189,896 tons to 355,470 tons, or 87 per cent., and the local travel on the two divisions has increased from 551,421 in 1862 to 1,302,516, nearly one hundred per cent. This business, on a large portion of the line, has scarcely commenced to be developed, and must continue to increase, for an indefinite period, and in the immediate future more rapidly than on other Roads east of Chicago.

Some discussions have appeared in the public prints as to the propriety of Railway Companies having any portion of their transportation business conducted by private Associations or Companies, operating independent of the officers of the Roads. There are two modes in which this species of agency is organized and conducted. One, where a commission is paid to an agency that merely solicits goods in the principal markets, and takes no charge, or assumes no control, over the property in transitu, and most usually does not even deliver the goods they contract to the consignee—the public being led to believe that the organization is a Transportation Company having charge of property, whereas, it is an agency merely soliciting freight and contracting for rates. The other mode is a Transportation Company which assumes all the duties and liabilities of a carrier to the shipper, contracts the freights at point of shipment, takes charge in transitu in its own cars, delivers it at destination, collects the freight, and settles all claims for loss, damage, or detention, the Rail Road Companies being paid by the Transportation Companies for the hauling of their cars for the actual number of tons hauled, or by the car on an assumed tonnage.

Two Transportation Companies, organized upon the last described plan, have contracts with this Company, subject to modification, or limitation, on short notice. After declining for more than ten years to admit Transportation Lines upon you Road, we found ourselves, by reason of Transportation Agencies in competing lines, compelled to establish them, and in doing so, have taken every precaution to establish them on such a basis as to give the greatest satisfaction to shippers, and protect the Company against risk and improper absorption of the profits of the business due to the Rail Road Companies. The contracts are not exclusive in their nature, are subject to modification, and may be terminated on reasonable notice, and the business generally is under a supervisory care of the General Freight Agent. Thus far we have found the result to be an increase in our business from new sources, increased confidence in our route by shippers, and an increase of net revenue without a corresponding increase of capital for our business. The Boston Board of Trade, in their recent annual report, commended highly this system of doing the through merchandise traffic, having, as appears by their report, given the subject the fullest examination.

By order of the Board of Directors.

G. W. Cass, *President.*

Pittsburgh, March 21, 1866.

Incrustation of Steam Boilers.

The numerous plans for preventing this evil show the importance the subject is assuming; and we note them as they appear. We are in receipt of a very able report on Incrustation by Prof. Chandler, in which he sets forth the certain and consequent destruction of the boilers from this cause, also the immense waste of fuel constantly going on in generating steam through this non-conducting stone lining equal to 47 per cent. The analyses of the water used on the New York Central road, show heavy deposits of Carb. Lime, Magnesia and Silex, amounting to several hundred pounds per engine per year. To this fact is due the inevitable destruction of boilers generally, and the repeated and expensive operation of new flues, fire boxes, loss of the use of the engines, waste of fuel, &c. Any one must see on a moments' reflection, the immense damage constantly accruing and the benefit to be gained by keeping the boilers free from scale; the repairs from this cause alone cannot fall short of one thousand dollars annually, while from 15 to 75 per cent. will readily be saved in fuel. Now all this loss of fuel, as well as the repairs incident to Incrustations, can be saved just as well as not. Superintendent, or those in authority, should take the matter in hand, and despite prejudices of Engineers, or ignorance of Master Mechanics, compell the use of any efficient antidote for this greatest of evils in the use of steam. We of course would recommend the use of Winans' Incrustation Powder, as we know it is a specific in the case. We have abundant proof and authority for advocating its use from parties of ten years' standing. We have repeatedly called attention to this article, and the more we know of it, the less doubts we have in regard to it, and consider it one of the greatest discoveries of the present day. The cost will not exceed one hundred dollars a year, and it will certainly save to each engine from five hundred to one thousand.

American Railroad Journal.

Saturday, April 7, 1866.

Stock Exchange and Money Market.

We notice that the increase of our foreign importations is giving some anxiety in official quarters. A report from the Internal Revenue Commission, has just found its way into print, which shows that for the year 1865, the value of the goods imported from abroad into the United States, was $224,742,419, of which but $45,800,000 were warehoused. The remainder was entered at the Custom House for consumption. The same report alleges that for the first six weeks in 1866, five times the quantity were received that had arrived during the same period in the preceding year. It also stated that these importations are chiefly on foreign account. We have often called the attention of our readers to the fact that ours is the favorite market of foreign producers, who here find a ready sale for all their surplus products, or realise what cash they can at our auction sales, and give long credits to all who will buy on those terms. In no other part of the civilized world is trade carried on with more celerity than this. It is the Dorado of European manufacturers, where they can convert their wares readily into gold. They understand this perfectly, and almost every great house in Europe, certainly in the commercial capitals, has an agency here, on which they lean heavily whenever an emergency arises at home. So that we may expect to have this country as full of foreign goods as it is possible to hold; and if there is at any time any pause in the imports, it is but to recover breath for a fresh attempt, or because the warehouses are already full. So embarrassing does this state of things become, that there are those who believe our tariff should at once be raised 50 per cent. additional, so as to check the present trade, but this would give a further and extended monopoly to our manufacturers, already largely favored and protected. The subject has its difficulties. Meanwhile the foreign producers are congratulating themselves that the American markets are still the most inviting in the world, and that cheap British labor cannot be competed with successfully by American artizans.

It is true that many recent orders for goods have been countermanded from this side, the last few weeks, but these countermands were from American houses principally; those from the foreign houses continue.

Connected with this fact is another quite as curious, that exchange has fallen from 3 to 4 per cent. below par; in fact it was said last week that specie was at once to be imported into this country, and that directions to that effect had actually gone out. But we have nothing to give for it, as we can see, but cotton, which happily holds out well. All other articles are so high priced, that it will not pay to ship them. So that we do not perceive what we are to return for this specie if it comes.

There is a very determined interest against contraction in this country; not only determined but strong; and at this moment as our paper currency, owing to the National Banks, is in fact increasing, prices keep up in the teeth of a decline in gold. They are in many remarkable instances higher now than at any period during the war. We are still paying several hundred per cent. for many articles of necessity without any real excuse for it, the result of inflation and nothing else. These singular incongruities and discrepancies make speculation on these subjects very difficult. The fact that prices of articles most abundant should now be higher with gold at 127, than when it was 285 is a puzzle which no American Ricardo has yet risen up to explain.

It is the opinion of the Secretary of the Treasury, (we quote from a late communication of his to a friend,) "Whatever may be the price of coin, we can hardly expect a material decline in prices generally without a reduction of the currency. The industry of the country never will be brought into full play as long as money is so abundant as it is at present." When men can make a living by their wits, when fortunes are made by merely manipulating public securities, when smartness not industry is the road to fortune, we may make

up our minds that we are still on the wrong track. The immense amount of paper afloat is in fact an unreal property. If it was destroyed in a bonfire, it would not make the country any poorer in fact, nor diminish the substantial and permanent resources which the currency is supposed to represent and to exchange. On the other hand the great plentifulness of cheap paper money, passing for much less than appears to be its value on its face, has a demoralizing effect on trade, commerce, contracts, business, and the very existence of society. Suppose the wampum of the Aborigines shall be again introduced as money, which every one could manufacture for himself, and yet use as a legal tender, how long would it be before there would be a convulsion in the monied world. Paper money is but an improved idea of wampum, the better executed tokens of indebtedness which civilization is able to produce. The principle is precisely identical. It is a substitution of an inferior article for the best one.

It is thought by-well informed persons that the Loan Bill will not pass the Senate without amendment; and though it is not the kind of bill demanded, it may answer the purpose, and enable the Treasury department to get through the year comfortably until another session, when it is hoped a better financial policy will prevail in Congress. The report of the Deaartment for the last month is favorable, and may be summarily stated as follows: Public debt bearing interest in coin $1,180,239,341 80; debt bearing interest in currency, $1,186,207,011 36; debt bearing no interest, $460,410,864 05; composed of legal tenders except the sum of $9,660,760 which consists of gold certificates, and $28,005,452 02 fractional currency. The total debt is $2,827,793,896 82; and the balance in the Treasury is $122,147,380 81. This is a very gratifying exhibit.

At the same time the revenues of the country continue to go on with prodigious force. The customs duties at this port for the month of March were of the unprecedented amount of $11,153,954, against $5,471,026 the same month last year.

In the nine months between July 1, 1865, and March 31, 1866, the revenue reached the sum of $101,359,975, against $39,256,052, the same period in the preceding year. We may therefore reckon from the known and estimated receipts up to the present time, that the total income from customs will be about 179 millions, and the internal revenue at the present monthly rates of receipts, at 325 millions more, say in the total about 554 millions of dollars; showing a surplus of nearly 200 millions over and above the wants of the Treasury. This result is a most remarkable one, showing the power of this country to be immense. It is certainly to be regretted that Congress delays under any pretence the restoration of the Southern States to their normal condition in the Union, which would give great additional strength to our financial fabric. Certainly we owe some feeling of kindness to these people. Since under all the disadvantages of their position, they are in fact contributing by the export of cotton to steady our foreign exchanges, and give us the only valuable cash product we can rely on as an article of export to any large amount. We are willing to take this cotton, ship it, and make the most of it, it would be more honorable if we acted on the same principle politically as well as economically.

It seems to us one of the plainest of all questions—this of reconstruction; it is what we have been fighting for, and to postpone it after we have gained our point seems to be the very "error of the moon." Besides if we wish to give perfect stability to our finances, and make our credit impregnable, all the States should be committed to the legislation which new loans or conversions of existing loans will require from time to time. It is not safe to leave this question open for further entanglements and difficulties.

Now is the time to move steadily on our triumphant march, and to show an admiring world that we are as wise and clement as we are brave and persistent. It will not do for us to say that now we have re-established our system, we are afraid to trust it. We must not eat our own words if we would retain a character for fair and honorable dealing.

Especially when it is now apparent that all the seceded States have come back to their former places, and have receded from their former position will it not do for us to ignore the past. It is not the part of statesmen, nor even of men of business, to shut our eyes to this condition of the country.

The President's proclamation, which is a carefully considered and prepared document, shows conclusively the position hitherto taken by the preceding administration, Congresses and the people, to be precisely that which we have now arrived at, and the result of reconstruction can no longer be prevented except by the most unjustifiable partizan legislation.

As a matter of finance it is highly important that the Nation should be harmonious and united. We have already stated the hopeful condition of the public debt which has been reduced in seven months by the sum of $52,134,574, and it is believed that the whole debt may be easily brought within the sum of twenty-five hundred millions of dollars, the compound notes of 1867 and 1868, the 5 per cent. notes of 1866, and the 6 per cent. certificates of 1866, being reimbursable quite easily from the surplus receipts of the Treasury. Let us then go on patriotically in the work of restoration, and give the country once again entire peace and general prosperity.

The market for Government securities continues strong both at home and abroad. The vague apprehension that any large amount of these would suddenly return upon us for sale appears to have been without any warrant. European affairs are taking a turn which must give our National loans even a higher credit than they have yet reached. The difficulties about the Duchies, presage another of those selfish and unjust wars which are waged in Europe, for the benefit of reigning families merely, and which produce bloodshed and pecuniary losses for their personal advantage only. The day cannot forever be postponed when Europe will be tired of such incessant and profitless sacrifices.

Indeed if we may judge of popular opinion on this point, we may see by the vast and unusual emigration going on at this moment, on an unprecedented scale, that this country is more than ever the object of attraction abroad, and will become the home during the present year of hundreds of thousands of persons whose native homes no longer afford them tranquillity or hope. Westward the star of empire takes its way, let its beams be mild and genial, and all will be well.

Money continues easy and plentiful, but no particular direction is given to its movements to be particularly noticed. Railway securities are in better demand, and are more esteemed as collaterals than they were a short time since. The turn of the market is upwards in this particular.

The amount of specie shipped during the week was so trifling as not to deserve notice.

The New York exports, exclusive of specie, for the week ending April 3, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,301,742	$3,953.456
Prev. reported	51,126,093	56,918,975
Since January 1	$53,427,835	$60,872,431

The balance in the Sub-Treasury on Wednesday was $81,119,891 12.

Iron Cars.—Chicago & Great Eastern R.W.

We learn from the Chicago *Tribune* that the Chicago and Great Eastern Railway Co., has recently adopted the use of passenger cars, wholly constructed of iron, which are in the highest style of railroad architecture, and complete in all their arrangements for strength and comfort.

We have for a long time been waiting for the adoption of this improvement, as it will render railway traveling much safer than it ever yet has been. The effects of collision will be almost entirely neutralised by the adoption of the iron cars; we may have contusions, but not dangerous wounds from splinters and broken beams. These new cars are manufactured in New Brighton near Pittsburgh.

Traction and Stationary Engine.

This is an invention of Mr. Perry Dickson, applicable to ordinary roads, supposed to overcome the principal difficulties which have hitherto attended the working of traction engines. The power of the engine can be graduated or adjusted at pleasure, according to the grade to be overcome, or the work to be done, position or inequality of the ground making no difference in the free working of the machinery. As a farm engine, or in the mining districts it is believed it will be found a great labor saving machine, with entire efficiency and much economy.

European and North American Railway.

At a recent meeting of the Committee of the House of Representatives of Massachusetts on Railways and canals, some very interesting statements were made in favor of a proposition to grant the State credit of one million of dollars to the European and North American Railway. About 171 miles of the road are completed eastward from St. John, 130 contracted for in Nova Scotia, and 30 in New Brunswick, and its construction if secured by the aid asked for it would hold the maritime provinces, commercially to New England. The annual number of passengers which would take the road at Halifax to come to the United States, is estimated as likely to be as great as 300,000 in ten years, and the coal transported over it many hundreds of thousands of tons. There is no doubt but that the natural and commercial relations of these maritime provinces are much closer with the United States than with Canada, and it is the part of wisdom for us to continue and encourage them by the construction of such works as this.

Interest and Dividends.

The Chicago and Rock Island Railroad Company have declared a dividend of five per cent., payable, free of U. S. Tax, on the 14th April.

The Hudson River Railroad Company have declared a semi-annual dividend of five per cent., payable, less U. S. Tax, on the 14th April.

The Lowell and Lawrence Railroad Company have declared a dividend of $3 per share, payable April 2.

The Northern, N. H. Railroad has declared a dividend of $3 per share from the earnings and $4 per share from the assets, payable May 1.

Crop Values in 1865.

The Report of the Department of Agriculture for the month of February, 1866, contains the following interesting statements of the value of various crops produced in the loyal States in 1865:

		Value.
Indian corn, bushels	704,427,853	$324,168,698
Wheat, "	148,522 877	217,330,795
Rye, "	19,543,905	21,343 283
Oats, "	225,252,295	93,745,314
Barley, "	11,391,286	10,330,294
Buckwheat, "	18,331,019	18 063,325
Potatoes, "	101,032,095	65,218 498
Tobacco, lbs.	185,316,953	23,348 018
Hay, tons	23,538,740	273,812,617
Wine crops, (value)		$837,360,767

Manufacturers' and Consumers' Anthracite Coal Company.

This act, the provisions of which we published in our issue of the 24th ult., has been signed by the Governor, together with a Supplement authorizing the company to extend locate and construct, one or more of their branch Railroads so as to connect them at such point or points at the State line of New Jersey, with any Railroad now constructed or that may hereafter be constructed in the State of New Jersey, and also with any intervening Railroad. By the original bill the company is authorized to construct a single or double track road from any point on the Delaware river near Philadelphia to any point in the Schuykill County coal region, with authority to make branches and use intervening roads.

Railway to Mount Washington.

Another great enterprise fully under way is the building of a steam railway to the top of Mount Washington from the west side. The company incorporated for this purpose by the New Hampshire Legislature are now disposing of their capital stock and are arranging to construct immediately the first half mile of the road. The track will consist of inclined planes, and stationary engines will be used. The line is to be some 2½ miles in length, and the estimated cost is $125,000.

The Great Railway Controversy.

On the 28th ult., in the Supreme Court of Pennsylvania, the case of the Pennsylvania Railroad Company, *et al.*, *vs.* The Atlantic and Great Western Railway Company, *et al.*, was called up on the motion to dissolve the injunction. The Court fixed June 19, for the argument, at Wildesbarre.

☞ The Great Western Railway Company of Canada have decided to lay a third rail upon their road from Suspension Bridge to Windsor, so as to forward cars through from the New York Central to the Michigan Central and other lines having their termini at Detroit, thus avoiding the labor and delay of transhipment at Suspension Bridge and Detroit River. The first of the iron is expected to arrive in May.

☞ In Lansingburg, N. Y., gas is being made from peat, and it is said to give a whiter, clearer and much stronger light than that made from coal. It is also stated that one pound of peat will make double the quantity of gas that a pound of coal will, and that there is no offensive smoke or smell from it.

☞ Through trains are now running over the Atlantic and Gulf Railroad. The South Carolina Railroad will be completed by April 15th.

Journal of Railroad Law.

The case of the Louisville and Nashville Railroad Company *vs.* Collins, decided in the Warren County Circuit Court, Kentucky, is a highly interesting case on the law of negligence. The facts in the case, and the questions involved, are clearly set forth in the opinion of

ROBERTSON, C. J.—This appeal presents for the first time, to the Appellate Court of Kentucky a new and unsettled question involving the legal liability of railroad companies for damages resulting to an inferior from the negligence of a superior employer while engaged in different spheres of employment in the common service of any such corporation.

The appellee, while employed by the Louisville and Nashville Railroad Company, as a common laborer, in loading and unloading its burthen cars, engaged in carrying for its road cross ties and iron, was required, with a co-laborer of the same class, to assist its engineer in righting, in Bowling Green, Kentucky, a locomotive which seemed to be out of order.

And the steam being up, the front wheels jacked, the hind wheels unscotched, the engineer on top, and the appellee working, beneath; the engine moved forward, and cut off one of the appellee's legs, and the motion being reversed by the engineer, the other leg also was cut off.

For that irreparable loss, dooming him to hopeless poverty and dependence, the appellee sued the appellant for tort, and recovered a judgment for $5,000 damages, as assessed by the jury.

The appellant denies that its engineer was guilty of culpable negligence, and insists also that as he was competent and trustworthy, it is responsible to his co-employee for his negligence, however gross.

The Circuit Court instructed the jury that, if they believed that the accident resulted from the gross negligence of the engineer, the appellant was liable for it in this action.

After full and careful consideration, we are satisfied that the engineer was guilty of some negligence.

The degree of it was a question of fact which, on such apparently conflicting testimony, the jury had the right to decide; and whatever deduction may be most logical and consistent, we are also satisfied that the circumstances, as detailed by all the witnesses, authorized the jury to find that his negligence was "gross." An elaborate analysis of all the facts would not, therefore, be either useful or pertinent in this opinion.

But the appellant assumes that the appellee's own fault contributed to the catastrophe, and he thereupon insists that the co-operation of even the gross negligence of the engineer will not sustain the action. The assumption is not sufficiently maintained, nor is the conclusion from it altogether unexceptionable or true.

The engineer does testify that he directed the appellee and his associate in the work to "block" the wheels, and says that such a precaution would have prevented the accident. The others who heard all that was said, and saw all that was done on that occasion, do not corroborate, but by strong implication, negative his statement of that fact, rather discredited by the incredible omission, and by his failure to see that danger, so imminent in his opinion, was not averted by a security so obvious to him and so easy to them, and his credibility is also impaired by his interest and zeal, and his conduct in hiding himself, and abandoning his post in the appellant's service, almost immediately after the infliction of the injury on the appellee. And not only may we presume that the appellee, a young and unskilled laborer, was ignorant of the utility of scotching, but feel sure that the engineer either did not advise or direct it, or was guilty of gross negligence in placing him in so much peril under the engine without seeing that its stationary attitude was first secured by blocking, and also in using no means of keeping down the steam, or preventing its accumulation, although the appellee was kept under the locomotive more than an hour, the steam increasing and the wheels unscotched all the time.

But had the appellee been guilty of negligence, nevertheless the injury might have been avoided by the proper care of the engineer, and is therefore attributable to his gross negligence. In such a case both principle and preponderating authority seem to decide that such a remediable fault of the person injured should not exonerate the wrongdoer from legal liability for the damage which, without gross negligence, he could have prevented, and was as much bound by law to prevent in that as he would have been in any other case.

In running its locomotive and its passenger and burthen cars, a railway corporation is required by law to observe at least ordinary care, vigilance and skill, so far as strangers may be affected by the employment of a motive power, so tremendous and destructive as unregulated, or carelessly or unskilfully regulated steam, and as in every class of cases of bailment or trust, the requisite care is proportioned to the danger of neglect, and the difficulty of conservative management, ordinary care, in many classes of cases, might be ordinary neglect, and ordinary neglect might be gross neglect in steam operations on a railway.

In all these operations the invisible corporation, though never actually, is yet always constructively present, through its acting agents who represent it, and whose acts within representative spheres are its acts. Had the appellee been a stranger, the appellant would therefore have been certainly suable and responsible in this action; and we cannot admit that the appellee's relation as an employee in its service, should exempt the corporation from that general liability, as it might perhaps do by the application of a recent rule adjudged in England, with some exceptions, and echoed with still more exceptions by a few American Courts. But this anomalous rule, even as sometimes qualified, is in our opinion, inconsistent with principle, analogy and public policy, and is unsupported by any good or consistent reason.

In the use of the control of the engine, the engineer is the chief and governing agent of the corporation, and all his associates in that employment are employees in "a common service." Neither of these subordinates under his control is, as between themselves, an agent of the railway company, and therefore it is not responsible for any damage by one of them to another while in its service. And so far the British rule has foundation in both reason and analogy; but beyond this it is baseless of any support than a falsely assumed public policy or implied contract. In the employment and control of his subordinates, the engineer acts as the representative agent of the common superior—the corporation. They have no authority to control or resist him in his allotted sphere of service. And why then, should the law imply a contract to trust him alone, and never look to the corporation, as his employer and constituent for indemnity for damage resulting from his wilful wrongs, or grossly negligent omissions? When they engaged to serve under him perhaps they knew nothing of his trustworthiness or his credit. But they knew that they would serve a corporation, and probably faith in its responsibility and protection induced them to venture into its service. And this faith may be presumed to include an assurance of safety as well as of pay.

Perhaps, if they had understood that the corporation would not be responsible for the conduct of its engineer, they would never have risked such service under him. The contract implied by law would therefore rather seem to be that the subordinates should look to the corporation, and not to its agent alone, for indemnity for loss arising to them from his unskilfulness or culpable negligence. Nor can we perceive how public policy could be subserved by the irresponsibility of the corporation in such a case. Such exemption, if known, might possibly stimulate the subordinates to a more vigilant observance of the engineer's conduct. But why should they be left to depend on that which could be of little if any avail to prevent the unskilfulness or negligence of a superior above their dictation or control?

In undertaking the perilous service they might be presumed to risk the hazards necessarily incident to their employment, and as they could not expect infallibility in the management of the locomotive and its running train, and as they knew that the most faithful and skilful managers may occasionally lapse into common blunders and ordinary negligences, the law might imply an agreement to risk their possible occurrence. But the corporation being under an implied obligation to provide sound and safe cars and engines, and a competent and faithful engineer, his subordinates cannot reasonably be presumed to expect or to hazard his gross negligence, which borders on fraud and crime.

And it seems to us, therefore, that while the corporation may not be responsible to them for his ordinary negligence, both justice and policy require that it should be held liable for his gross negligence, as its chief and controlling agent in the management of its running train. Assurance of protection to this extent, not only appears just and reasonable, but by inspiring more confidence would enable the corporation to obtain and keep better employees, and at cheaper rates. This doctrine, therefore, instead of its converse, seems to be suggested by reason and commended by policy.

But in this respect employees, like the appellee, in a distinct and altogether different department of service, stand in an essentially different category.

In their employment having nothing to do with the cars or the running of them, they, like the corporation's mere wood-choppers, are comparative strangers to the engineer and his running operations, and seem to be entitled to all the security of strangers. They may be presumed to

know no more than strangers about the skill or care of the engineer, nor have they any more control over him, or connection with his running arrangements or operations. They are therefore not, in the essential sense of contradistinctive classification, "in the same service" with the engineer and his running co-operators, who act in a different sphere and constitute a distinct class, consequently neither of the assumed reasons for the British rule as to employees "in the same service," can be in any way consistently applied as between the engineer and such common laborers as the appellee. And the apparent extension of the rule to them may be deemed inadvertent, or not carefully and logically considered with rational discrimination and precision. We therefore can neither feel the *rationale*, nor acknowledge the authority of the crude and self-contradictory decisions, or loose and incongruous *dicta*, referred to on that subject. But to harmonize the law, we must recognize a more congenial principle of normal vitality, and adjudge, as we now do, that the appellee, in his humble and isolated employment, should be treated as a stranger to the engine as a motive power, and if without fault himself, might like other strangers, recover from the railway corporation for a loss arising from the ordinary negligence of its engineer. But as the jury might possibly have found that he himself had been negligent, the Circuit Court was right in requiring proof of gross negligence by the engineer, which in that contingency would have been necessary to the liability of the appellant.

The only consistent or maintainable principle of the corporation's responsibility is that of agency: "*Que facit per alium, facit per se.*" It is therefore responsible for the negligence or unskilfulness of its engineer, as its controlling agent in the management of its locomotives and running cars; and that responsibility is graduated by the classes of persons injured by the engineer's neglect or want of skill. As to strangers, ordinary negligence is sufficient; as to subordinate employees, associated with the engineer in conducting the cars, the negligence must be gross; but as to employees in a different department of service, unconnected with the running operations, ordinary negligence may be sufficient. Among common laborers constituting a distinct class, all standing on the same platform of equality and power, and engaged in a merely incidental but independent service, no one of them, as between himself and his co-equals, is the corporation's agent; and therefore it is not, on the principle of agency or otherwise, responsible for damage to one of them resulting from the act or omission of another of them, although each of the company's employees would be its agent as to entire strangers to it.

This is the only doctrine we can recognize as consistent with the enlightened and homogenous jurisprudence of this clearer day of its ripening maturity. And looking through the mist of the adjudged cases and elementary *dicta*, we can see no other fundamental principle which can mould them into a consistent or abiding form.

That the principle is the only safe clue to lead the bewildered explorer to the light which shows the sure way of right, and proves the true doctrine of American law.

We feel authorized to conclude that the appellant was legally liable to the appellee for the injury done to him by the gross negligence of its engineer; that the Court on the trial, gave to the jury the true and only true law, and that the verdict was authorized by both the law and the facts; and we would overstep the judicial line by interfering with such a verdict in such a case, on the ground of alleged exorbitance, indicating neither passion, partiality, nor prejudice.

Wherefore the judgment is affirmed.

Eastern Shore Railroad.

Our neighbors of Kent are just now somewhat excited over railroad matters. The road at present claiming the attention of the citizens of Kent county is proposed to intersect the Delaware Railroad at or near Middletown, passing within a mile and a half of Warwic, in this county. Some difficulty arising about the point of intersection with the Delaware Railroad, it has been advised that an effort be made to make the road entirely within the territory of Maryland, by extending it to Elkton and intersecting at this point the Philadelphia, Wilmington and Baltimore Railroad. This would make the road some eight or ten miles longer, with the important advantages, however, in favor of Elkton as a terminus, of having it twenty miles nearer Baltimore, and of giving freight and travel over the road an equal advantage as to distance between the cities of Baltimore and Philadelphia.

Much of the grading of what was formerly known as the Eastern Shore Railroad is done from Elkton to Chestertown. By building it on the route already graded, a great saving would be effected, and by having the terminus at Elkton, the road would pass through a rich and populous country, from which it would receive large quantities of freight that now find its way to market by water; and by throwing the road farther from the Delaware road, would form an immediate highway for freight and travel between the Delaware Railroad and Chesapeake Bay, two points which are now reached by long and laborious travel with teams.—*Cecil Whig.*

Railroad Connections between Texas and Missouri.

The Texas papers are discussing the propriety of opening an early communication by railroad with Missouri and the Northwest. The proposition is to extend her Central Railroad to Red River, where it will be met by the road now being constructed from Kansas City to that point. The Dallas *Herald* speaks with confidence of the rapid prosecution of this great work, and remarks as follows upon it:

The completion of a railroad connecting the waters of the Upper Missouri with the Gulf of Mexico, will be an epoch in the history of the Southwest—will be a starting point from which will date the beginning of an era of prosperity now not anticipated or dreamed of by those who most hopefully and sanguinely look forward to the ushering in of that "better day coming," that we have so long heard of. The road from Kansas City to Galveston will pass through the largest belt of rich and productive land on the American Continent.

For six hundred and forty miles, the distance between Galveston, on the Gulf of Mexico, and Kansas City, on the Missouri River, the road will pass through eight degrees of latitude, over a country unsurpassed for fertility of soil, or salubrity of climate, and abounding in rich mines of valuable minerals. No railroad in the United States will traverse a country capable of producing the cereals in such abundance, with such certainty, and so little labor, as the road from Kansas City to Galveston. No road will have such a large amount of valuable freight furnished it for transportation, nor will any other road compete with this in the passenger list. In a word, this road will become the great highway of travel, for all the produce of the great West which seeks a direct outlet through the Gulf of Mexico to Europe and the West India Islands. And in less than two years after the completion of the road it will require a double track to carry the freight that will await transportation. It will make Galveston the largest grain market in America, and increase the business of Kansas City to such an extent as to make it, in a few years, rival St. Louis in population and wealth.

The amount of produce that would be raised in Northern Texas, and sent to market on this road is beyond the conception of any man, it would increase our wealth and population more than a hundred fold; it would beget a spirit of industry and enterprise among our people rarely ever before equalled in any country.

We can raise on an average, one year with another, twenty bushels of wheat to the acre, seventy five bushels of barley, and fifty bushels each, of oats and rye per acre. Wheat, at this time, can be purchased in Dallas for 75 cents per bushel, and barley usually sells here for 30 cents per bushel. The same article of wheat will command to day in Kansas City, $1 90, specie; and barley very rarely if ever sells in Kansas City for less than $1 50 per bushel; the same rate of increase applies to oats, rye and potatoes. All the articles we have enumerated can be raised in Northern Texas in great abundance and with less labor than in any other State except California.

The National Debt.

The following is a comparative statement of the Public Debt of the United States:

	March 1, 1866.	April 1, 1866.
Debt bearing int. in coin	$1,177,867,291 80	$1,180,236,341 80
Debt bearing interest in currency	1,185,428,980 50	1,186,207,011 36
Matured debt not presented	985,979 64	930,679 64
Debt bearing no interest.	463,586,707 52	460,419,864 02
Total.	$2,827,868,959 46	$2,827,793,896 82
Coin in Treasury	$55,736,192 12	$62,060,700 80
Currency	60,282,797 12	60,077,680 01
	$116,018,949 24	$122,147,380 81
Debt less cash in the Treasury	$2,711,850,000 22	$2,705,646,516 01

The total debt shows a decrease of $75,062 64. The balance in the Treasury shows an increase of $6,128,421 57. Deducting the amount on hand from the aggregate debt both on the 1st of March and the 1st of April, the decrease of debt would be $6,203,484 21. The 10-40s have decreased more than one and a half millions. There is an increase of the 6s of 1881, of $6,550; and of the 5-20s of $3,912,500. The legal tender notes have decreased $2,686,121, $2,000,000 of which is on the item of compound notes. The 7-30s also show a decrease of $1,030,000.

☞ The Delaware and Eastern Shore Railroad has been formally opened to Princess Anne, Maryland, and two trains are running daily and regularly. The road will be pushed on without delay to Somers Cove. Some are so sanguine as to say the road will be opened to its entire length by the 4th of July.

☞ The last bridge of the Dighton and Somerset Railroad, across Taunton Great River, near Summer street, in Taunton is nearly completed.

☞ The New York Canals will be opened on the 1st of May.

Seamless Shirts.

The Lawrence Manufacturing Company is now engaged in producing a thousand dozen of cotton shirts per day, full fashioned and without seams. The work is performed by the aid of ingenious machinery, and is said to be of the best description.

Weights and Measures.

The imperial gallon as established by law in 1825, must contain 10 lbs. of distilled water, and measure 277,274 cubic inches. The standard gallon of the United States contains 8,338,822 pounds avoirdupois of distilled water at a temperature of 39 83 F., the temperature of maximum density, and the barometer indicating 30 inches.

Atlantic and Great Western and Philadelphia and Erie Railroads.

The report current on the street for the last two or three days of a contemplated connection in working interest by the Atlantic and Great Western Railway and the Philadelphia and Erie Railroad, we are informed, is true. The details of the arrangement have been agreed upon by the officers of the Pennsylvania Railroad Co., the lessee of the Philadelphia and Erie, and those in this country representing the Great Western, and have been sent to Europe for ratification, which it is believed by the parties here they will receive. The arrangement differs in this from the report of it first published, that the Great Western Co. shall lay a third rail from a point eleven miles west of Corry to Cincinnati, and eventually on to the farthest point controlled by the Great Western road. Until this third rail is laid, freights coming east will be transshipped at Corry from the wide to the narrow gauge, and freights going west from New York will take the narrow gauge of the New Jersey Central, Lehigh Valley, Quakake and Shamokin to Sunbury, and thence by the Philadelphia and Erie to its junction with the Great Western, where it will be transhipped to the wide gauge. This is a much more plausible proposition than that recently litigated, which contemplated the building of a vast extent of new road over a very rough country, and involved much legal and legislative opposition from existing companies. The laying of a third rail on a wide gauge is an operation of comparatively little cost—infinitely less than the laying of a third rail on a narrow gauge, which would require new cross ties, and almost as much cost as the laying of a new track. What amount of trade may, by this proposed arrangement be invited to the narrow gauge route, we have not the data for calculation. Whatever it may be, will be so much off the broad gauge roads through New York State.—*Phila. Ledger.*

Railroad Earnings.--Weekly.

The traffic of the Great Western Railway for the week ending Mar. 30, 1866, was as follows:

Passengers	$32,013 29
Freight and live stock	30.157 71
Mails and sundries	1,952 71
Total	$64,123 71
Corresponding week of 1865	52,259 84
Increase	$11,863 86

☞ A proposition is under consideration by the Louisville, New Albany and Chicago railroad company to take up the track between Wanatah and Michigan City, and lay it on a route a little further West, striking the Michigan Central road at Lake Station.

☞ The Allegheny Valley Railroad is expected to be open to Mahoning by the middle of April. The managers propose to complete the road to Franklin in order to receive a portion of the oil trade.

☞ The water was let into the Susquehanna and Tide Water Canal on the 25th ult., and boats, upward bound, passed through on the 29th. It is in good order and ready for the season's business.

☞ Governor Lowe, of California has vetoed the bill giving State aid to the Western Pacific Railroad, and the Assembly sustained the veto by a vote of 60 to 6.

☞ The proposed lease of the Delaware Division Canal, is for 99 years, and at 8 per cent. per cent per annum on the stock, free of all tax.

☞ Regular trains on the Reno, Oil Creek and Pithole Railroad have commenced running to Plumer. Two daily express trains each way now preserve the connection between that place and Reno.

☞ The Senate of Pennsylvania has passed the bill authorizing the Southern Pennsylvania Railway Company to construct a road from Connellsville to Pittsburg. It had previously passed the House, and is intended to cripple the Connellsville road.

☞ A survey for a bridge across the Mississippi, near Fort Snelling is soon to be made. The commissioners of that county have issued bonds to the amount of $50,000 to defray the cost of its construction.

THE
Ste ling Iron and Railway Company.
Office No. 42 Pine Street, New York.
Offer for sale at the lowest market rates, in quantities to suit purchasers,
SUPERIOR MAGNETIC IRON ORE, for Blast and Puddling Furnaces;
STERLING CHARCOAL PIG IRON,
AND
STERLING ANTHRACITE PIG IRON.
J. DUTTON STEELE, President.

FOWLE & CO.,
No. 70 Broadway.

NEW BEDFORD WATER WORKS.
NOTICE TO CONTRACTORS.
SEALED PROPOSALS will be received at the office of the Water Commissioners in New Bedford, until 12 o'clock M., April 19th, 1866—
For the construction of the DAM at the Storing Reservoir, with well-chamber and gate-house, &c.
For the construction of a brick CONDUIT, nearly six miles in length, with ventilators, man-holes, &c., &c.
For the construction of a RECEIVING RESERVOIR, with influent and effluent chambers, &c.
The work consists of about 120,000 cubic yards of earth excavation; 3,000 cubic yards of rock excavation; 10,000 cubic yards of puddle bank; and about 11,000 cubic yards of brick and stone masonry.
Plans may be seen and specifications obtained at the office, on and after April 2d, 1866.
The Commissioners reserve the right to reject any one or all of the bids offered; and in making the awards will award the raising of the Road crossing the Storing Reservoir to one, the Dam to another, the Conduit to another, and the Receiving Reservoir to another—or all to one party, should the interest of the city seem so to demand.
WM. W CRAPO, WARREN LADD, DAVID B. KEMPTON, } Water Commissioners.
GEORGE A. BRIGGS, Chief Engineer.
W. J. McALPINE, Consulting Engineer.

The Crisis.

In the interests of peace, industry and progress, this Journal cannot but regard with anxiety the present unexpected position of the country. It is notorious that what may be called the Government, although in strictly constitutional hands, is at a dead lock; and while each department may be found in the strict and literal possession of its prerogatives, there is not only a want of harmony among the co-ordinate authorities, but a danger of absolute anarchy in the governing powers. Congress has assumed the right of saying who are entitled to representation in that body; and the President, on the other hand, has very plainly expressed his opinion that the right of representation has lawfully recurred to the delinquent States, once more restored to the Union. In the meantime, eleven of these States are without power, influence or position in the confederacy of which they were once a conspicuous portion; and no one can foresee when their complete restoration is probable. This doubt and uncertainty are very injurious to the character and progress of the country, and leave a bad impression on the mind of the world. We have exercised the highest power of Nationality in its preservation, and by the most remarkable efforts, passed through a bloody and distressing war with signal success. To remain a Nation we were resolved, and resolved with effect; but are we now to stop short and let the result be inconclusive, for such it will be if we are content to go on with but half a country. Certainly there must be some method devised by which we can be extricated from our present difficulties. And these are by no means small. As the Government stands at present, the President is entirely without power for the performance of his important duties. He can neither expect, nor receive the advice and consent of the Senate to any of those acts which require their co-operation; on the contrary, we may expect to see a decided negative on their part, at every convenient opportunity. We thus perceive how, while the forms of law are technically observed on all sides, there is danger of there being no responsible Government at all.

In addition, there is fear that a violent party agitation may grow up and involve interests, and create difficulties in quarters hitherto undisturbed. In other words, there is fear that even the loyal States which have hitherto been so united and resolute, may become divided, and that new sources of discord entirely unforeseen may arise to endanger the whole political edifice.

This, then, is a subject of the greatest moment; and it is, in our judgment, the duty of journalists who are entirely removed from political influences, and who are engaged in forwarding the interests of society, of industry and of progress, to use whatever influence they possess in bringing about as soon as possible, a change in the condition of public affairs, by an appeal to the reason, the patriotism, and perhaps the fears of men. The power that now controls the legislation of the country is an ephemeral one. In eleven months the seats of the members who now dictate in the House of Representatives will be occupied by others, more fresh from the people, and elected to office under entirely different influences than were the present incumbents. Very great changes may therefore be reasonably expected in the character of the next Congress. Probably of the whole number of those who are now so conspicuous and active on the stage in that body, not half a dozen will remain before the public eye.

It is impossible that this country is to remain under the permanent control of a Cabal, however ardent or determined. The institutions of this country must have their full swing and play, and it is our conviction that the country will endure no other course.

What we commend therefore, is an absolute cessation of all further violent measures on all sides. Let it be granted that the President has in the exercise of his undoubted constitutional powers refused his assent to two bills about which he has the fullest right to express his objections. These conscientiously expressed and calmly stated are entitled to respect. The exercise of the veto power has always been considered a wholesome and democratic restraint on hasty and impulsive legislation. It seems to the people as an interposition on their behalf at critical moments, and is generally popular. It is an appeal to the ballot box that is most generally successful.

Now that the Civil Rights Bill has become law, notwithstanding the veto, we may count upon it that its provisions will be executed strictly, and to the letter. There is no doubt but that the President will do his duty in this, as he has hitherto done it in all former instances. Whatever then in the law is inconsistent with the constitution and the reserved rights of the States, will be for rectification in the Supreme Court of the United States, and we have the confidence in Chief Justice Chase and his learned associates, to believe they will see that justice prevails and law triumphs. This is our guarantee against the ill effects of what may now assume a threatening aspect.

Let us then wait patiently for a few months, and the storm will blow over without any injury to the country. Certainly the independent press should not falter in its duty at this critical moment. And we advise our friends at the South to act with prudence and calmness, if any feeling of disappointment or irritation shall arise at the passage of the bill. The people of the North may be relied on as fair and honorable associates in the Union, and will do what is right.

☞ The French Company has formally signified its acceptance of the charter of the Virginia Canal Company, as amended by the Legislatures of Virginia and West Virginia.

☞ The Pennsylvania Legislature has refused to modify the Sunday laws of that State so far as to permit the running of cars on the first day of the week.

Northern Central Railway.

The earnings of this road for the fiscal year ending December 31, 1865, were as follows:

From freight		$1,707,854 27
" passengers		883,878 23
" express		75,673 78
" mails		25,450 00
" government troops & freights		437,368 31
" rents		105,117 18
" individuals and companies		64,627 51
" sundry sources		8,220 57
		$3,308,189 85

The expenses were:

Conducting transportation	$629,943 98	
Motive power	760,029 09	
Maintenance of cars	362,880 81	
" way	483,798 76	
General expenses	33,652 23	
		2,270,304 87
Leaving net earnings		$1,037,884 98

The earnings of the Elmira and Williamsport Railroad were:

From freight	$271,800 70
" passengers	184,172 69
" express	15,769 39
" mails	11,550 00
" government troops and freight	85,437 99
" rents	386 00
" individuals and companies	8,115 67
" sundry sources	3,740 87
	$580,973 81

The expenses were:

Conducting transportation	$181,130 09	
Motive power	183,118 10	
Maintenance of cars	50,678 34	
Maintenance of way	334,373 61	
General expenses	15,044 60	
		764,344 74
Showing a loss of		$183,371 43

The receipts of the Shamokin division were:

From freight	$280,367 70
" passengers	22,363 91
" express	189 95
" mails	1,400 00
" rents	9,873 51
" individuals and companies	1,754 10
" sundry sources	548 91
	$316,498 08

The expenses were:

Conducting transportation	$56,279 50	
Motive power	84,434 85	
Maintenance of cars	18,999 09	
" way	36,133 42	
General expenses	4,645 57	
		200,492 43
Leaving net earnings		$116,005 65

The receipts of the Wrightsville Branch, were:

From freight	$13,476 31
" passengers	15,280 61
" mails	650 00
	$29,406 92

The expenses were:

Conducting transportation	$5,983 84	
Motive power	11,453 55	
Maintenance of cars	1,227 43	
" way	9,939 28	
General expenses	340 22	
		28,944 42
Net earnings		$462 50

The following is a recapitulation of the above statements:

	Earnings.	Expenses.	Net.
Main line.	$3,308,189 85	2,270,304 87	1,037,884 98
Elm. Div.	580,973 31	764,344 74	*183,371 43
S. Div.	316,498 08	200,492 43	116,005 65
W. Br.	29,406 92	28,944 42	462 50
Total	$4,235,068 16	3,264,086 46	$970,981 70

*Loss.

If to the earnings of the Main line we add $7,320 02 for interest and dividends received, the total receipts will amount to $4,242,388 18; and deducting from the expenses of Main line, $283,587 96, and from those of the Elmira division $215,000, which are stated in the annexed income account as extraordinary, the total operating expenses will stand at $2,765,498 50—leaving the net earnings for the year $1,476,889 68, which are 34.8 per cent. of the earnings, against 31.5 in the preceding year. The report says:

The result for this year is exceedingly gratifying. The statements hereto annexed show an increase of gross receipts of $307,882 85 over 1864, and an increase of working expenses of only $67,611 17, leaving a net increase over last year of $240,271 68. The extraordinary expenses on the Elmira and Williamsport Road are large. This is owing to the heavy loss caused by the flood in March last. Fifteen bridges, a number of which were only built in 1864, and a great deal of the road bed were destroyed, costing (independent of the loss of trade) $215,000, in addition to the amount we stated in our last report as being necessary to place the road in the condition it was desirable to have it. That road is now in good order, and can be maintained in that condition with ordinary expenditure.

The capital stock of the company now consists of 90,378 shares of $50 each, amounting in the aggregate to $4,518,900. The funded debt comprises the following loans:

Maturing Oct. 1st 1866—6 per ct.	$150,000
To Maryland, irredeemable	1,500,000
Maturing 1870	175,000
Maturing 1871	25,000
Maturing 1877	500,000
Maturing 1885	2,500,000
Total Funded Debt	4,850,000
Total Debt and Stock	9,368,900

We have invested for the redemption of the loans $538,429 73. The accumulated interest on this investment, together with a payment of $53,000 per annum, will pay off the funded debt as it matures, except the loan due the State of Maryland, which is irredeemable.

The amount of net revenue which it is necessary to earn to meet the interest on our bonds, instalments for sinking funds, rentals of leased roads, and eight per cent. dividends upon the stock is $965,000. The net revenue for this year is $511,000, in excess of that amount, so that if the net revenue be diminished twenty-five per cent. (a state of affairs which is predicted by some as certain to follow the return of peace) we will still be able to meet the interest on our debt, and, if deemed advisable, increase the regular dividends to ten per cent. We however do not anticipate a falling off in receipts, but feel confident that the position of the road, located, as it is, through a densely populated country, and with its connections reaching the Coal fields, Pine forests and Oil wells of Pennsylvania, the trade of the Lakes, and the granaries of the West, we may surely not only expect to maintain our present revenue, but anticipate an annual increase.

The through passenger business will necessarily be diminished, but we feel confident that this will be compensated by the increased local travel upon the road. The increase in this business during the last seven years has been remarkable. In 1859 we ran but two passenger trains out of Baltimore, one running through to Sunbury and the other to Harrisburg only. This year we have eight trains leaving Baltimore daily, three of which run to Sunbury, one to Harrisburg, two to York, and two to Parkton; besides these, one between York and Harrisburg, and one between Harrisburg and Sunbury, all of which are paying as well, per mile run, as the two daily trains did in 1859.

The regularity and safety with which the trains are run, and the character of the country through which the road passes, is now, and will in the future induce many of the citizens of Baltimore to seek country residences along the line of the Road; thus securing a regular and profitable business to the company.

The coal tonnage of the Shamokin Branch for 1865 was 457,161 17 tons, and for 1864, 332,958 tons—an increase of 124,203 tons for the present year. The demand for this article along the line of the Philadelphia and Erie Railroad is growing, and will, it is believed, cause an increased tonnage during the year 1866. There has also been 69,931 tons of coal carried over the Elmira and Williamsport Railroad. With the ability we will soon have of carrying coal without transhipment from the mines to the lakes, we may anticipate a large annual increase in this traffic.

The second track has been completed, and is now in use between Baltimore and York. The work upon the double track between Dauphin and Sunbury is almost finished. This portion of our line was very much injured by the freshet last spring, and great delay was caused in consequence of this. It will be ready for the iron early during the coming summer.

In our last Annual Report we referred to negotiations which were then pending between a committee of the Board and the Mayor and Finance Committee of the city of Baltimore, in reference to an adjustment of the difficulties existing between the company and the city, growing out of an ordinance passed in 1854, relative to the extension of this road to tide-water. We were then confident that a settlement would be made. But the city council failing to carry out the agreement entered into with the Mayor and Finance Committee, or, in other words, adding to the agreement conditions which we could not accept, we failed to compromise, and the result has been that an ordinance of the city was passed in July last, offering for sale her interest in this company. This interest consisted of four thousand shares of stock and two mortgages, amounting to $850,000, with interest from April 1, 1863; making in all $1,200,000. We became the purchaser of this interest for $880,000.

This unexpected outlay of money has not causad us any embarrassment, nor do we anticipate any difficulty fn carrying it until we shall pay it out of surplus earnings, or by a new loan, as may be determined upon in the future.

At the time of our leasing the Elmira and Williamsport Railroad, in 1863, we contracted, by your authority, with the Erie Railway Company, for the joint use of the Buffalo, New York and Erie Railroad, thus securing a line through from Baltimore to Buffalo. Owing to the fact that this connection, because of that road being of wide gauge, rendering a transfer at Elmira necessary, we have not been able to secure as much business from this connection as we had reason to expect. We have therefore cancelled that contract, in consideration of a lease of the Canandaigua Railroad, which secures a narrow gauge line to Buffalo and Niagara Falls. We do not doubt but that this new arrangement will prove profitable to us, as it certainly will be of great advantage to the city of Baltimore.

Your property is in excellent condition. The road-bed, track and bridges cannot be excelled, and are equalled but by few roads in the country. The locomotives, passenger and freight cars are all in the very best order. We have added to the number of station houses along the line, and have endeavored successfully to make the road and equipment perfect in every particular.

The total tonnage was 1,451,157; of which 746,043 tons was carried on the Main Line; 155,115 on Elmira Division; 523,828 on Shamokin Divi-

sion, and 26,171 on the Wrightsville Branch. In 1864 the tonnage was 1,320,639—increase in 1865, 130,518 tons.

The total number of passengers carried was 869,262, and of soldiers 262,452, making a total of 1,131,714; and the distance traveled by these (excluding soldiers) was 34,099,503 miles.

The engine mileage for passenger service was 497,480 miles; for freight 1,042,644; distributing trains 101,891. Total 1,642,015 miles, at a cost per mile run for passengers, 14.48 cents; repairs, 12.88 cents for fuel and stores 1.88 cents. Freight repairs, 17.26 cents; fuel 20.27 cents; and for stores 2.25 cents—total, passengers 28.51 cents; freight 39.65 cents.

The company have 87 locomotives; 60 are on the Main Line, 18 on Elmira division, and 8 on Shamokin Division.

The car equipment on main line and leased roads consist of 52 passenger, 17 baggage, 10 express, 1,103 freight, 2,061 coal, 9 tool cars, and 144 trucks and 5 cabooses, making a total in passenger, freight and roadway service, 3,401. The equipment added during the year was; 8 passenger, 3 baggage, and 1 express car, there was rebuilt 5 passenger, 7 baggage, 6 house, 17 gondola, 375 coal, and 14 lime cars. One first class passenger car has been altered to a second class, two drovers cars to an express car, and 1 drovers car to an eight-wheel house car.

There have been used in repairs of track and renewals 1,934 tons new rails, 58,522 cross-ties, 8,791 chairs, and 57,171 lbs. spikes.

The receipts and expenditures of the company during the year have been as follows:

Receipts:

Balance of cash assets Dec. 31, 1864.		$237,542 07
Earnings of Main Line.	$3,308,189 85	
" Elmira Div...	580,973 31	
" Shamokin div.	316,498 08	
" Wrightsv'e Br.	29,406 92	
Interest and dividends	7,320 02	
		4,242,388 18
Augmented capital stock		1,173,640 00
Capital stock sold		177,716 42
Balance of cash liabilities—representing temporary loans contracted to pay the claims of the city of Baltimore, purchased by the company		477,668 22
		$6,308,954 89

Expenditures:

Interest		$320,547 09
Dividends		314,703 62
Taxes on dividends		31,085 73
Sinking funds		53,000 00
Expenses main line	$1,986,716 91	
Do., extraordinary	283,587 96	
Expenses Elmira Div.	549,344 74	
Do., extraordinary	215,000 00	
Exp. Shamokin Div	200,492 43	
Exp. Wrightsville Br.	28,944 42	
		3,264,086 46
Rental of E. & W. R. R. Co.		165,000 00
" S. V. & P. R. R. Co.		83,053 46
" W., Y. & G. R. R. Co.		10,911 82
Construction of Main Line.		1,385,568 07
" Canton Extension		2,785 85
Real estate		11,740 83
City of Baltimore		666,471 96
		$6,308,954 89

The total number of passengers carried on the Elmira Division was 111,180, of which 61,238 went north, and 49,942 south—equivalent number of through passengers, 73,446.

Number of tons of freight moved was 155,115, viz: through north, 86,774; do., south, 35,664; local, 32,677. Total mileage of freight, 10,492,403.

The mileage of engines, was 303,872 at a cost of $48,519 16 for repairs, $56,991 02 for fuel, and $8,393 93 for stores.

The condition of the road has been fully maintained 1,757 tons new rails, 33,475 cross ties, 9,641 chairs, and 45,512 lbs. spikes, have been used the past year.

The number of passengers carried on the Shamokin Division were 42,506, of which 22,378 went north, and 20,128 south; of these 2,675 were through.

The number of tons of freight moved was 523,828, viz: local east, 291,187; do., west, 231,999; through, 642. Total mileage of freight, 5,669,840.

There have been used in repairs the past year 88 tons new rails, 5,956 cross ties, 150 chairs and 3,530 lbs. spikes.

The engine mileage was 144,006, at a cost for repairs, $20,932 34; $25,625 81 for fuel, and $3,368 72 for stores.

President.—J. D. CAMERON.
Vice President.—C. G. MILLER.
Secretary—ROBERT S. HOLLINS.
Treasurer.—JOHN S. LEIB.
Gen'l Superintendent.—J. N. DUBARRY.

☞ The European and North American Railway Company have contracted for the building of this road to the town of Winn, 56 miles from Bangor. A bridge over the Kenduskeag is the first work before the contractors.

☞ The Union and Titusville Railroad is being pushed forward with all possible despatch. From four to five hundred men are now employed in the heaviest cuts and on the bridges and trestle work, and there is every reason to believe that the road will be in running order by the first of July.

☞ The project of building a Railroad from Richmond to Wiscasset Me., is being agitated again, after remaining in abeyance for several years. The distance is only eight miles, and the estimated cost of the road $125,000. A large portion of this sum has been subscribed, and it is believed that the road will be at once built. It is said that the Portland and Kennebec Railroad will furnish the rolling stock and guarantee a dividend of six per cent. for thirty years.

☞ A statement of the financial condition of the Allegheny County, Penna., to the first of the present year, shows a funded debt of $2,316,072, and a floating debt of $421,319, making a total debt of $2,737,391. The total in the sinking fund is $110,893. Included in the funded debt is $2,001,000 of compromise five per cent. bonds, and $169,383 of registered bonds. The value of the county, real, personal, and mixed, is $33,891,131, and the total number of taxables 48,914; 5,154 of whom are non-residents.

☞ The Treasurer of North Carolina announces that he is prepared to sell, for not less than par, bonds of that State, running thirty-four years, with coupons bearing six per cent. interest, payable semi-annually, of the denominations of $100, $500 and $1,500, principal and interest untaxable, for the purpose of paying coupons now due and to become due in 1866, and also bonds to fall due the current year.

Commerce of New York.

We give below from the *New York Journal of Commerce*, a statement of the Commerce of New York monthly for a series of years. The imports for the year 1865, contrary to the general anticipation, increased so rapidly during the last five months that the total is in excess of the corresponding figures for 1864, the gain on the twelve months being a little over six millions of dollars. To show what relation this result bears to the returns of former years, the following statement is given for each similar period since 1850. It will be seen that the returns for 1856, 1857, 1859 and 1860, were each in excess of the total given; but with these exceptions, this is the largest total on record. All the figures referring to the imports show only the foreign cost in gold, freight and duty not added—

FOREIGN IMPORTS AT NEW YORK.

Year.	Dutiable.	Free Goods.	Specie.	Total.
1851	$119,592,264	$9,719,771	$2,049,543	$131,361,578
1852.	115.336.052	12,105,342	2,408,225	129,849,619
1853.	179,512,412	12,156,387	2,429,083	194,097,652
1854.	163,494,984	15,768,916	2,107,572	181,371,472
1855.	142,900,661	14,103,946	855,631	157,860,238
1856.	193,839,646	17,902,578	1,814,425	213,556,649
1857.	196.279,362	21,440,734	12,898,033	230,618,129
1858.	128,578,256	22,924,961	2,264,120	152,867,067
1859.	213,640,363	28,708,732	2,816,421	245,165,516
1860.	201,401,683	28,006,447	8,852,330	238,260,460
1861.	95,326,459	30,353,918	37,098.413	162,768,790
1862.	149,970,415	23,291,625	1,390,277	174,652,317
1863.	174,521,766	11,567,000	1,525,811	187,614,577
1864.	204,128,236	11,731,902	2,265,622	218,125,760
1865.	212,203,301	10,410,837	2,123,281	224,742,419

Under the head of dutiable, in the above table, is given both the amount entered directly for consumption and that entered for warehousing, to show the total of duty paying goods issued at the port. The total receipts of free goods are each year decreasing, nearly all of the imports now being chargeable with duty. The following comparative summaries will show the amounts entered for consumption, entered for warehousing, free

goods, specie, and total imports for each month during the last three years. These figures represent only the foreign value in gold:

CLASSIFICATION OF IMPORTS AT NEW YORK.

	1863.	1864.	1865.
Dry goods	$67,274,547	$71,589,752	$91,965,138
Gen. mdze.	118,814,219	144,270,386	130,654,000
Specie	1,525,811	3,265,622	2,123,281
Total	$187,614,577	218,125,760	224,742,419

The increased receipts from Customs at New York in 1865 over 1864, is not owing so much to increased imports, or even higher tariff on some articles, as to the fact that a greater proportion of the imports were thrown upon the market. Many persons forget that the duties are not collected upon all the goods arriving at the port, but only upon the total thrown on the market. Nearly thirty-two millions of goods were landed in 1864 and added to the stock in bond, thus paying no duties until the following year.

The exports from New York to foreign ports represent the value in paper currency, except in the item of specie. Before giving the monthly details, we present a quarterly table of the exports, exclusive of the precious metals:

EXPORTS FROM NEW YORK TO FOREIGN PORTS, EXCLUSIVE OF SPECIE.

Quarter.	1863.	1864.	1865.
1st	$50,614,908	$41,429,756	$46,710,118
2d	41,146,736	48,446,686	24,216,587
3d	38,825,587	79,515,134	40,521,493
4th	40,223,747	52,426,966	08,178,421
Total	$170,718,968	$211,822,542	$178,626,599

It will thus be seen that while the imports for the year show an increase, the exports of produce and merchandise have fallen off from the total for 1864 about forty-three million dollars. Part of this is owing to the change in the currency, and part is due to an actual decrease in the quantity of produce that has been shipped.

The varying course of trade throughout the year will attract special attention. In 1864 the bulk of the imports came forward during the first seven months, the remainder of the year ran very light. In 1865 it was exactly reversed, the large bulk of the imports having arrived during the last five months of the year. The warehousing movement shows a wide diversity in its course. In 1864, ninety-nine millions of the imports were entered for warehousing, and only sixty-seven millions withdrawn, leaving an increase of nearly thirty-two millions added to the stock in bond. During the year 1865, the movement, up to Dec. 1st, showed a reduction of this stock; but the large entries in the last month of the year turned the scale, leaving an increase of three millions over the very large stock held at the beginning of the year.

The decrease in the exports in 1865, as compared with 1864, amounts to about sixty-four millions; of this, forty-three millions was the falling off in produce, and nearly twenty-one millions in specie.

Since the beginning of the current year there has been a most enormous gain in the imports as compared with the past and preceding years. This is partly explained by the fact that the last years' business was crowded into the closing months, while this year leads off extravagantly at the beginning. The exports thus far show also a large gain on the former totals.

Foreign imports entered at New York during the years 1860, 1861, 1862, 1863, 1864, and 1865:

The Loan Bill.

The following is a copy of the "Loan Bill," as finally passed by both Houses of Congress:

An act to amend an act entitled "An act to provide ways and means to support the Government," approved March 3, 1865.

Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled, That the act entitled "An act to provide ways and means to support the Government," approved March 3, 1865, shall be extended and construed to authorize the Secretary of the Treasury, at his discretion, to receive any Treasury notes, or other obligations issued under any act of Congress, whether bearing interest or not, in exchange for any description of bonds authorized by the act to which this is an amendment, and also to dispose of any description of bonds authorized by said act, either in the United States or elsewhere, to such an amount, in such manner and at rates as he may think advisable, for lawful money of the United States, or for any Treasury notes, certificates of indebtedness or certificates of deposit, or other representatives of value, which have been, or which may be, issued under any act of Congress; the proceeds thereof to be used only for retiring Treasury notes or other obligations issued under any act of Congress: but nothing herein contained shall be construed to authorize any increase of the public debt; provided that, of United States notes, not more than ten million of dollars may be retired and cancelled within six months from the passage of this act, and thereafter not more than four millions of dollars in any one month; and provided further, that the act to which this is an amendment shall continue in force, in all its provisions, except as modified by this act.

Section 2. *And be it further enacted*, That the Secretary of the Treasury shall report to Congress, at the commencement of the next session, the amount of exchange made or money borrowed under this act, and of whom and on what terms, also the amount and character of indebtedness retired under this act and the act to which this is an amendment, with a detailed statement of the expense of making such loans and exchanges.

Railroad Reconstruction in the South.

The South Carolina Road has been completed to Columbia, and the Northeastern to Branchville, S. C., but the delay which has occurred in the repair of the Hamburg Branch of the former has dealt a severe blow to the interests of Charleston, while it has been providential to Savannah.

Sixty thousand dollars have been subscribed for the Savannah, Griffin and North Alabama Railroad, and only forty thousand more are required to authorize a renewal of the work, and secure a final completion of the road.

In a few days the gap in the Georgia Central Road, from Macon to Savannah, will be finished, and direct communication thus restored to the seaboard.

The Louisiana Legislature has passed two acts authorizing the lease of the New Orleans and Opelousas and the Baton Rouge, Grosse Tete and Opelousas Railroad. The proposed lessees are the Pennsylvania Railroad Company and some others, who intended to push these roads through to their several destinations.

The capitalists of Tennessee are moving energetically to build the proposed Memphis, Holly Springs and Okalona Railroad. The distance is one hundred and twenty miles, and the estimated cost is $2,050,000.

The repairs to the Winchester and Potomac Railroad are fast approaching completion to Winchester, Va. The track is now laid to within two miles of the town.

Saturday, April 14, 1866.

Stock Exchange and Money Market.

The material interests of a country are always a study with real statesmanship. Political managers may seek power and party ascendancy, and make these the object of their exertions; but the real statesman never loses sight of the final objects for which society is associated, and the real good of the masses. For what use is Government; of what advantage are institutions that give no security, no tranquility, no repose. We are always justified, therefore, in regarding those men as statesmen whose large and liberal views are in the direction of general beneficial results; and whose aims are for the benefit of the whole. We may go further, and very properly look at the object of measures proposed by public men as a guide to their real views.

Thus if we see these aimed at the extension of mere political rights in the abstract, often to their extreme limit, we may hesitate before we give them our assent. We are, perhaps, in the very position at this moment to have occasion to pause before we yield to any impulsive theories of the present hour, which are inclined in the cause of optimism to maintain that everything which is to go on and forward, cannot go wrong. The real danger in this country at all times is the inconsiderateness of leading public men, to use no harsher term. Political questions, often such purely in the abstract, are agitated with a most surprising zeal, while the real ones involving the material and permanent interests of the country are lost sight of. This is a constant danger to which we are exposed in this country, and which has on more than one occasion convulsed it to its centre. This kind of discussion kept up by heated and clever men for forty years, was at the bottom of the rebellion itself, and is fairly chargeable with the blood and treasure lost in the unnecessary and useless struggle. May we not therefore look with alarm at the introduction of any new theories, however plausible, whenever they are now suddenly sprung upon us. What we commend is therefore caution, gravity, prudence in regard to any great public measures before us; and above all, forbearance and toleration of opinions in all questions, where they are rightfully entertained.

During the present session of Congress, we have had unusual excitement on many unexpected topics; so much so, as to cause great alarm and apprehension; and if there is any cause for it, there is also necessity for the exercise of the natural good sense of the people to furnish the proper corrections. Their sober second thought must be appealed to, and relied upon. It is this to which we must look as our last great protection in all cases of danger. Providence seems to have endowed the American people with the gift of eminent common sense, and they have often exercised it with great success and in good time. We still rely upon it.

We notice that notwithstanding the evident determination of the National Legislature, that there shall not be any contraction of the currency at the present time, yet it continues to appreciate and approach the gold standard in value. This is a remarkable fact, and worthy of being noticed. It is at the same time a puzzle to reflecting men. The paper money of the country is about as large as ever—is perhaps increasing, owing to the system of the National Banks; imports are still excessive, and the exports are small, and yet the price of gold declines. Many old opinions are unsettled by this appearance of things; and the theorists are at fault, as well they may be. Still further, to make all explanations difficult, we perceive that exchange continues largely below par, without the probability of much advance; and in fact, it is openly said, we may expect the importation of specie from abroad, as a very probable event. This would cap the climax of inconsistent and strange events, if it should ever occur.

The Money Market has been somewhat disturbed by the failure o a number of our country banks the last fortnight, with attending embar-

rassments in their business connections, here and elsewhere. Yet they have had no effect on the general market, or produce any change in the amount of money offered for business purposes. Interest is low, and money plentiful. It seems to be at the easy command of all business men—almost too much so, if we may judge of some of the consequences of plethora, as seen in the stoppage of houses that had no difficulty in putting forth an unlimited amount of obligations when they chose. The general ease of the market is also indicated by the returns of the associated banks. We perceive by the report of their operations up to the 7th inst., that as compared with the previous week they had increased their loans $5,287,654, while their specie had diminished $494,097, and their deposits increased only $540,-369. The circulation has kept within bounds, not being increased beyond the sum of $390,527.

So abundant has been the supply that large sums have been placed at 5 per cent., although the banks as a rule are able to obtain larger rates from their ordinary customers who are not so particular if they can only get accommodation as promptly as they require it. It is said that the large amount of increased loans shown by the association the present week, is owing to the circumstance that heavy stocks of goods are being carried by their holders, and for which there is not just now a ready or even a probable market; if this is so, it is a dangerous admission, and will result in losses on all sides. That goods are certain to fall in prices appears to be the opinion in the best informed circles of business men; and that this result cannot be staved off for any great length of time, is also the general impression. would seem the part of wisdom therefore, to grant early concessions of price during the present spring business when dealers from the country may be expected to renew their stocks. Under all circumstances, prudence with buyers and sellers may be safely laid down as a rule to be adopted in the present state of things. The country is able, strong and prosperous; it should not waste its strength, but husband it.

The general commercial report of the week ending Monday 9th inst., shows a moderate business with a declining tendency in breadstuffs. Still the prices of fancy and extra flour are quoted at from $9.90 to $15.50 per bbl., altogether too much to warrant shipments, or a very liberal home consumption. Cotton was also limited in its transactions, with a tendency to droop; sales being made at 39 to 40 cents. Provisions also feel the market unfavorably, with a tendency downwards, though there is considerable steadiness in the entire transactions. As a whole, the market for staples is in a dull condition and without much animation at present, our foreign trade being far from being in a flourishing condition and without much prospect of improvement at present. We have often spoken of the necessity of a more careful revision of our commercial arrangements and treaties, which are all of the old pattern, and much neglected. Whether our legislators will take time to look after the interests of commerce remains to be seen. They certainly could not better employ themselves than in devising some plans to extend our navigation and shipping interests into regions where they have long been strangers. The navigation interests of the United States are by no means on the footing they should be. We wait with impatience to see them waking up to a proper development, and assuming their real importance. If our public men looked at commerce as closely as they do politics, they could bring about a prosperity in this direction of which as yet we have only dreamed. It is to be hoped that the wonderful career we have already experienced is not to be cut short of its glory or usefulness by mistakes and errors which almost every American is competent to point out with precision.

The effect of a paper currency on prices and the wages of a country has been the subject of much comment. As compared with those of 1860, the advance has been enormous. We find a statement in a Cincinnati paper, which probably is nearly an average one for the country. Thus in that city, machinists who in 1860 earned from $9 to $12 per week, obtained until recently, if not now $16 to $20. Locksmiths have gained an advance of from $9 to $18, tailors who made coats at $6.50, receive $14, and for pants and vests at $1.75, now $3. Cigar makers rose from $4.50 per 1,000, to $14 for the same work. Carpenters advanced from $1.75, to $3 and $4, and hodcarriers from $1.25, to $3 per day. Gunsmiths, the most experienced, that were used to receive but $9 to $12 per week, gained double those sums. So indeed in almost all other instances an immense advance has taken place. Hand in hand with these has gone up the price of groceries, provisions and the common necessaries of life.

Coffee has advanced from 12 cents to 38 and 45 cents, sugar from 8 to 25 cents, butter from 14 to 65 cents, cheese from 8 to 22 cents, whiskey from 20 cents to $2, alcohol from 42 cents to $4 per gallon, and beer from $5 to $14 per barrel. If such a system is not working against the substantial interests of labor and consumption we do not know what is. Paper money in excess of the business of the country, and passing by law for more than it is really worth, is no friend of capital, or labor, of commerce, or industry, but their enemy. This truth we are slow to admit, but it is sure to be appreciated in the end.

Those persons whose incomes were settled at the former rate of money, who lived on 7 per cent. interest, or had saved up a capital productive at that rate, have found out by the reduction of their annual support by full two-thirds of its efficiency, what is the consequence of inflation, high prices and abundance of paper money.

The New York exports, exclusive of specie, for the week ending April 10, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$2,960,719	$6,069,510
Prev. reported	53,427,835	60,872,431
Since January 1	$56,388,554	$66,941,941

The New York imports compare as follows:

	1865.	1866.
Dry goods	$948,192	$2,918,981
Gen. merchandise	2,063,683	4,665,269
Total for the week	$3,011,875	$7,584,250
Prev. reported	32,245,465	79,770,062
Since January 1	$35,257,340	$87,354,312

The balance in the Sub-Treasury on Wednesday was $85,977,560 39.

The passage of the Loan Bill in the Senate is announced, and the comments on its effects vary. Some of the Press regard it as certain to produce a favorable change in our financial affairs, by contraction and exchange of short currency debts to long ones, while others proclaim that the changes will be small, and the policy of contraction impossible. We understand that Mr. McCulloch accepts it as the best measure available at present; and will use his power, limited as it is, to the best advantage.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Valley (Va.) Railroad.

The Valley Railroad Convention assembled in Staunton on the 4th inst. Delegates were present from Roanoke, Botetourt, Rockbridge, Augusta, Rockingham, Shenandoah, Allegheny, Berkeley and Richmond city. Books were opened under the supervision of the commissioners named in the charter, and over $100,000 subscribed, being more than was necessary to secure the charter. Col. M. G. Harman, of Augusta county, was elected President of the company, and John Wayt, of Staunton, Secretary and Treasurer, with a full board of Directors.

Vineyard Sound Railroad.

The Vineyard Sound Railroad Company, incorporated for the purpose of building a railroad from Monument, on the Cape Cod Railroad, to Woods' Hole, has been organized by the election of the following officers: President, Oliver C. Swift; Directors, Oliver C. Swift, Stephen Dillingham, Asa S. Tobey, Erasmus Gould, William Nye, Jr., B. F. Jones, Thomas H. Lawrence; Clerk and Treasurer, S. P. Bourne.

☞ The payments of the direct tax under the act of August 5, 1861, for the first quarter of 1866, ending March 31, were as follows:

Virginia	$22,270 17
North Carolina	37,310 00
South Carolina	10,297 45
Tennessee	40,000 00
Arkansas	15,230 00
Total	$125,107 62

☞ The Comptroller of the Currency last week issued $1,133,390 in National bank notes. The total amount issued since the National banking act went into operation is $265,382,500.

The Treasurer of the United States holds the following securities, given by National banks:

As security for circulation	$318,652,800
As security for government deposits in banks designated as depositories	35,579,500
Total	$354,222,300

☞ The last rail between Kansas City, Mo., and Wyandotte, Kansas, joining the Missouri and Pacific and Union Pacific Railroad, was laid on the 2d inst., by the principal officers of each road. The present terminus of the line is at Cross Creek, 90 miles west of Wyandotte. The road will be ready for traffic to Fort Riley early in June, giving 375 miles of direct rail west of St. Louis.

☞ The citizens of Otoe County and Nebraska City, have voted to issue $200,000 in bonds to aid in the construction of a branch railroad, to connect that city with the Burlington and Missouri River Railroad at Red Oak Junction. It is hoped that similar action will be taken by the counties in Iowa through which the projected branch road is to pass.

☞ The receipts from Internal Revenue during the week ending April 7th were $7,176,088 44. The total receipts since the 30th of June, 1865, the beginning of the present fiscal year, foot up $251,066,636 79. Of this amount, $75,509,832 15 has been received since January 1, 1866.

Interest and Dividends.

The Central Railroad Company of New Jersey have declared a quarterly dividend of two and a half per cent., free of government tax, payable on the 19th inst.

The Lehigh Valley Railroad Company will pay on the 16th instant, a quarterly dividend of 2½ per cent., free of tax.

The Philadelphia, Wilmington and Baltimore Railroad Company have changed the time of paying their dividend, from April and October to July and January, and will pay a dividend for nine months next July.

☞ A delegation of citizens lately visited Cincinnati to confer with the capitalists of the latter city respecting the construction of a railroad from Cincinnati to Chattanooga, which is now the common centre of five important roads. Donations of one-half the land along the route and ten thousand dollars per mile State aid were promised. A subscription was opened.

☞ At a recent meeting of the people of St. Vincent, Canada, it was resolved that "forty thousand dollars be given to any Company who would build a railroad from Collingwood, through Meaford, to Owen Sound, within two years."

☞ The railroad bridge at Welden has been finished, thus completing the connection between Petersburg and Raleigh.

Delaware Division Canal.

The Lehigh Canal Company have leased the Delaware Division canal and will consolidate it with their own works, thus giving to our city the benefit of an entire water communication from the Lehigh coal region under a single management. This arrangement secures, as we learn, to the stockholders of the Delaware Division canal an income of eight per cent. per annum, and will donbtless be advantageous to both companies as well as to the public.—*Phila. News.*

The Cases of the New York Brokers and Bankers.

We give below the recent decisions of the Supreme Court of the United States in the cases of the New York Brokers and Bankers on the question of taxing sales on their own account. In the Court below, Justice Nelson decided both cases against the Government. In the Supreme Court his decision was *reversed* in the case of the Brokers, and *affirmed* in the case of the Bankers. The latter is most important, as settling the principle that all persons or firms who have taken out a license as a Banker or Bankers, may prosecute the business of buying and selling *for their own account* without being subject to the tax on sales, (or required to render a return of such sales,) which they would have to pay and render if acting as Brokers.

SUPREME COURT OF THE UNITED STATES.—THE CASE OF THE NEW YORK BROKERS.

The United States, plaintiffs in error, *vs.* Robert L. Cutting, *et al.*—In error to the Circuit Court of the United States for the Southern District of New York.

Mr. Justice Grier delivered the opinion of the Court.

The question proposed for our decision in this case involves the construction of the 99th section of the act of 30th June, 1864.

The act of 1864 is entitled "An act to provide ways and means for the support of Government and for other purposes." It imposes specific taxes upon a large list of articles manufactured or sold, and prescribes the mode of assessing and

collecting them. In addition to these, it imposes certain taxes on all persons carrying on certain "trades or professions" enumerated. The persons on whom this tax is assessed receive what is called a "license," which is the evidence of permission to exercise such trade or calling in consequence of payment of this tax or duty. Among these is the trade or employment of broker, mentioned in the 9th paragraph of the 79th section of the act. Brokers are required to pay fifty dollars for a license. The act also defines the term broker to "be one whose business it is to negotiate purchases or sales of stocks, exchange, coin, money, bank notes, promissory notes, or other securities." Other species of the genus broker are indicated by the affix to the general term, as well as by special definition, such as "pawnbrokers," "cattle-brokers," &c., &c. Besides, the tax paid by auctioneers and the different species of brokers, under form of a license or permission "to prosecute their trade, business or profession," they were required to pay certain duties on the sales made by them respectively.

Being by means of these licenses brought within the cognizance of the revenue officers, and into a quasi-official relation with them, they were required to make "returns, assessment, and collection of these duties" under certain penalties. By the 99th section "all brokers and bankers doing business as brokers, shall be subject to pay the following duties and rates of duty upon the sales of merchandise, produce, gold and silver, bullion, and foreign exchange, &c., and shall also be subject to all the provisions of the act for making returns, assessments and collections of the duties."

Now, the ninth paragraph of the 78th section, after defining a broker to be one "whose business it is, as a broker, to negotiate purchases or sales," &c., required him also to make oath "that all his transactions are made for a commission. This clause might have been construed to forbid a licensed broker to purchase or sell stocks, &c., on his own account, so that his sales being made through the interposition of another broker, might be made liable to tax. But it has been construed to release him from the necessity of making any return of sales made for himself, or from paying any tax on such sales."

But there was no good reason why these transactions in stocks, bullion, &c., by a broker, for his own profit, should not be liable to the same tax or duty imposed on those made by him for other parties. Beside, such construction gave great opportunities of evading the tax altogether. To obviate this difficulty, an act was passed on the 3d of March, 1865, to amend the act of 30th June, 1864. Among other things, it amends the ninth paragraph of section seventy-nine, by inserting after the words "other securities," the words "*for themselves or others*," and by striking out from said paragraph the words, "and shall make oath or affirmation that all his transactions are made for a commission."

The intention of this amendment might have been better provided for by an amendment of the 99th section, but it cannot be doubted that the meaning of the act was to subject sales made by a broker for himself to the same tax as those made for others.

The definition of a broker will now read, in the section as amended, "whose business it is, as broker, to negotiate purchases or sales of stocks, exchange, bullion, coined money, bank notes, promissory notes, or other securities *for themselves or others*."

That it was the intention of Congress to subject the sales made by brokers for themselves to the same duties as those made by them for others, cannot admit of a doubt, though it must be admitted their intention is rather obscurely expressed.

The judgment of the Circuit Court *is therefore reversed* and a *venire de novo* awarded.

THE CASE OF THE NEW YORK BANKERS.

The United States, plaintiff in Error, *vs.* Harvey Fisk, *et al.*—In error to the Circuit Court of the United States for the Southern District of New York. Mr. Justice Grier delivered the opinion of the Court.

This case presents a question not considered or decided in the case of United States *vs.* Cutting. The defendants in that case were brokers, and were held liable to pay the duties and rates of duty prescribed by the 99th section of the act of March 3, 1864, whether the sales were made for themselves or for others.

In this case defendants are bankers, "doing a general business as such, making returns, and paying duties and taxes imposed by law upon their capital and deposits. As such they negotiated and sold for the United States large amounts of Government securities. At the same time they bought and sold Government securities for themselves, and not for others or for a commission."

Are they liable to pay the duties imposed by the 99th section upon "brokers and bankers doing business as brokers," in addition to those imposed upon them as bankers?

The first paragraph of the 79th section, which concerns bankers as distinguished from brokers, is as follows:

"Bankers using or employing a capital not exceeding the sum of fifty thousand dollars, shall pay one hundred dollars for each license; when using or employing a capital exceeding fifty thousand dollars, for every additional thousand dollars in excess of fifty thousand dollars, two dollars. Every person, firm or company, and every incorporated or other bank having a place of business where credits are opened by the deposit or collection of money or currency, subject to be paid or remitted upon draft, check or order, or where money is advanced or loaned on stocks, bonds, bullion, bills of exchange or promissory notes, or where stocks, bonds, bullion, bills of exchange or promissory notes are received for discount or sale, shall be regarded a banker under this act."

The 110th section prescribes the additional duties (beside the license tax) to be paid by "any person, association, company, or corporation engaged in the business of banking." We need not enumerate them.

In the construction of statutes, it is the duty of the Court to ascertain the clear intention of the legislature. In order to do this, Courts are often compelled to construe "*or*" as meaning "*and*," again "*and*" as meaning "*or*."

The purpose and intent of the Legislature in the amendment made to the ninth paragraph was evidently not to change the correct definition given of the term "broker," and to make it mean that every man who sold his own stock was a broker, and liable to pay $50 for a license. The obvious purpose of the amendment was to compel brokers to render an account of all sales made, whether for themselves or others, and to pay the duty on them. As is often the case in statutes, though the intention is clear, the words used to express it may be ill chosen.

The evil intended to be remedied by the amendment was transparent. If the amendment had been properly expressed, it should have been added as a proviso to the ninety-ninth section, which relates to the rates of duty to be paid on sales made in the stock market of brokers or others licensed and doing business as such, and in the preceding case the Court has so construed it.

Now, a banker pays a much higher license tax than a broker, and is permitted to "prosecute or carry on" the business or profession of a broker *without paying any further license*, but if he prefers he may not combine that business with his own. The 110th section prescribes the duties to be paid by a banker. *It is not amended so as to require him to render an account of his purchases or sales of Government stocks for himself.* The case before us, therefore, presents no other question than the construction of the 99th section. It enacts that "all brokers and bankers doing business as brokers shall be subject to the following duties," &c.

Now in order to subject a banker to the duties prescribed by this section, we are asked to interpolate the important word "NOT," *and to construe it as including bankers who* DO NOT *as well as those who* DO *transact "business as brokers."* This would not be a construction of the statute, but an amendment thereof in direct contradiction of its language. *This we do not feel at liberty to do.*

The judgment of the Circuit Court is therefore AFFIRMED.

Railroad Earnings.—Weekly.

The traffic of the Great Western Railway of Canada, for the week ending April 6th, 1866, were $81,459 09
Corresponding week of 1865 ..... 70,054 78

Increase..... $11,404 30

The earnings of the Grand Trunk Railway of Canada for the week ending March 31st, 1866, were $115,354 00
Corresponding week of previous year.. 139,681 00

Decrease $24,327 00

The earnings of the Chicago and Rock Island Railroad for the 1st week in April, 1866, were $44,623 00
Corresponding week of previous year.. 51,798 00

Decrease $7,175 00

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Apr., 1866, were $93,714 00
Corresponding week of 1865 ..... 91,054 00

Increase..... $2,660 00

The earnings of the Chicago and Northwestern Railway for the first week in April, 1866, were $119,332 23
Corresponding week of previous year. 111,061 04

Increase..... $8,271 19

The earnings of the Western Union Railroad, for the week ending March 31, 1866.. $13,550 33
Corresponding week previous year.... 11,622 84

Increase..... $1,927 49

Receipts from Jan. 1, to March 31:
1866 ..... $120,407 74
1865 ..... 113,359 19

Increase $7,048 60

New Orleans and Jackson Railroad.

The Report of the President of the company, C. C. Shackelford, Esq., for 1865, shows a gratifying increase of business since the return of peace. The receipts were in July, $28,548; in August, $37,174, in September, $54,442, October, $80,459, November, $114,799. The total indebtedness of the road (exclusive of the bonded debt) is $1,579,015. The President says:

Of the above amount $669,823 98 is for debts made prior to May, 1862, and the sum of $909,171 85 is for overdue coupons on the first mortgage bonds. None of the second mortgage bonds have been definitely disposed of, though some have been pledged as security for the obligations of the company. Of the $669,843 98, $220,000 is due the State of Mississippi for loans which, without doubt, can be extended to such time as will meet the ability of the company to pay. The $909,171 85, interest on the first mortgage bonds of the company, it is expected to fund, and a sinking fund created to ensure their liquidation. Such an arrangement, we are assured, will receive the assent of the foreign bondholders, as well as that of the coupon creditors of our own country. After deducting the debts due on account of coupons and to the State of Mississippi, the company will have to provide for the balance of the floating debt, say $449,000, which can, no doubt, be arranged on terms equally satisfactory as those for the overdue coupons.

The operations of the road have far exceeded the expectations of the most sanguine, and, should

a proper and judicious policy hereafter mark its administration, there can be no doubt the great interest which the two States and the city have in this corporation can be preserved to them intact, and the views and hopes of the originators and founders of this great enterprise be fully realized.

Journal of Railroad Law.

The case of Drake *vs.* The Philadelphia and Erie Railroad Company, decided that an action in tort will not lie against a railroad company for cattle killed, where there was a contract on the part of the railroad to fence the plaintiff's farm. The opinion of the court was written by

THOMPSON, J.—The plaintiff's action is in tort against the company for neglecting to fence their road through his farm, which in his narrative he charges they were bound to do "by the laws of the state, or by their agreement, or by both," by reason whereof, it is further charged, "the cattle and horses of the plaintiff on his farm" were killed; to wit, two head of cow cattle and a mare. The principal question discussed on the agreement was whether an action on the case in tort would lie to redress the wrong complained of, there being a contract to fence. The court below held, that the plaintiff could not recover as in tort, and was of opinion that he must sue on his contract.

It is undoubtedly true that many cases occur in the reports in other states, in which the action in tort has been maintained against railroad companies for neglecting to fence, and the value of cattle killed has been recovered; but in almost all such cases the duty to fence arose by law, and not merely by contract. The duty in such a case is to the public, in consideration of the privilege granted.

Since Skinner's case (7 Harris, 298), it is settled that a railroad company, unless required by their charter, are not bound to fence; and yet, whether the road pass through a man's fields or woodland they are entitled to a free clear track, against the owner's or any other person's cattle. For the reasons for this ruling I refer to the case itself, with the remark that the public seem to have fully acquiesced in them, demanding no other rule since. It is directly ruled by this case, that if cattle, while straying or roaming on a railroad, are accidentally not wantonly killed by passing trains, the owner cannot recover for them.

The reason is that they are unlawfully there—are trespassers; if injury befall them, it is the fault of the owner in not restraining them. If he permits them to roam he must take the risk of all losses by accident (Knight *vs.* Abert., 6 Barr, 472). It is true in this state, cattle are not treated as trespassers on uninclosed fields or woodlands, rather because of the inappreciable damage that would be sustained, than in any change in the common law. "But if such an intrusion," says the learned Judge in Skinner's case, "would occasion substantial damage, the English rule would be applicable to it, on the principle that the owner of a bull which has gored another's ox must pay for it;" hence the learned judge holds that cattle on a railroad are trespassers, and for any substantial injury they might do the owner is liable, although there be no fences; and as a result of his negligence he cannot recover if they be injured by accident, being where they ought not to be, Knight *vs.* Albert, supra, fully supports this view.

The loss of the cattle in this case is charged not to wilfullness or negligent conduct in running trains, but to the neglect of the company in not fencing according to their contract. This is laid as the *causa causans*, the remote cause; the proximate cause was undoubtedly the running of the trains. But could not the company run their trains without having fenced in accordance with their contract. They purchased the right to pass through the plaintiff's land for a fixed sum of money and an agreement to fence. After the plaintiff thus sold his right of way, he had no right to obstruct it by allowing his cattle to roam and brouse upon it. This would be entirely incompatible with the right the law gives to the company to a clear track, as held in Skinner's case, and would subject the public to the dangers and risks arising out of a relation between the company, and an individual which might be disastrous to life and property. To avoid such results is the merit of Skinner's case. It was the duty of the plaintiff, therefore, to keep his cattle off the defendant's road at the risk of losing them; but the opposite of this is what he contracts for, by claiming as the gravemen of his action that the cattle were killed on the road by reason of the neglect of the defendant to fence. This necessarily assumes the ground that having a contract to fence, care on his part to prevent his cattle trespassing on the road no longer existed. This the learned judge below properly denied, and in substance told the jury that the wrong of the defendant in not fencing would neither authorize nor justify a wrong on part of the plaintiff, not only towards the defendant, but to the traveling public, by permitting obstructions in the road by his cattle and horses. "A railway company is a purchaser," said GIBSON, C. J., in Skinner's case "in consideration of public accommodation and convenience, of the exclusive possessions of the ground paid for to the proprietor of it, and of a license to use the greatest attainable rate of speed, with which neither the person or property of another may interfere." This principle fully vindicates the ruling of the learned judge below.

The doctrines of this case would go for nothing if courts were to hold that a contract to fence, in payment of a right of way or otherwise was a contract that relieved the owner of cattle from keeping them off the road, and permit them to impede it in its rate of speed. Indeed, if this might be done, I see not why such an owner might not enjoin the company from running altogether, to prevent injury to his cattle. Assuming that there was a contract to fence in this case, the plaintiff should have moved the company in anticipation of damages to build it, and not relied upon making them answerable for remote consequences. And he may sue on it yet, if it be in force and will be entitled to such damages as the law declares to be incident to the breach of such a contract.

We think the learned judge was right in holding that the action of tort, which assumed that the plaintiff was not bound to keep his cattle off the defendant's road, and the latter was answerable for accidental injury to them while roaming there because they neglected to fence was not maintainable.

This action was predicated of the duty to fence. Now supposing this to be a case in which the action might be upon the duty, a thing I by no means admit, to render the defendants answerable it must appear that the result or disaster was exclusively owing to their neglect. But if the law be as the case cited and several others since show, the plaintiff was in default in permitting his cattle to be where they had no right to be, and could not recover for them if killed or injured, (N. P. R. R. Co. *vs.* Rehman, 13 Wr., 103,) if any injury is the result of contributory negligence by both parties neither can recover.

Whether the plaintiff has a remedy on his contract for the damage done to his cattle, we cannot say, for the contract is not before us, we cannot therefore determine that the learned judge erred when he said his remedy was on the contract. It is possible it is expressly so agreed. To say that there was error would therefore be conjecture. But it is questionable whether the learned judge meant more than to say that under the circumstances, the only suit the plaintiff could maintain against the defendant for failing to fence was on the contract, without reference to whether the injury to the cattle could be recovered or not, but about this we need not trouble ourselves.

The instruction as to the duty for the defendants to fence, we think was entirely justified on the first ground herein mentioned, and if there was any contract to change the law of the case it should have been shown.

Judgment affirmed.

The Peninsular Railroads.

The citizens of Cecil county are making an effort to induce the Kent County Railroad Company to extend its road from Chestertown northward to Elkton, instead of connecting it with the Delaware Railroad. In order to form a correct judgment in the matter, it is necessary to have a proper understanding of what is called the "Peninsular line" of railroads, running from Wilmington to the extreme point of Somerset county, on Chesapeake bay, and also of its lateral connections, projected and in partial operation, which are as follows:

Commencing at Wilmington, on the Philadelphia, Wilmington and Baltimore railroad, the Wilmington and Newcastle railroad runs southerly to Newcastle, about seven miles; from thence running west with the old Newcastle and Frenchtown railroad to the "Junction" with the Delaware railroad, about seven miles. These two roads are the property of the Philadelphia Railroad Company, which also operates both the Delaware and Eastern Shore railroads.

From the Delaware junction the Delaware road, eighty-three miles long, runs south to Delmar, (name formed by an abbreviation of Delaware and Maryland,) on the Delaware and Maryland line, passing through the following towns and stations: Bear, St. Georges, Mt. Pleasant, Middletown, Townsend, Blackbird, Sassafras, Smyrna, Brenford, Moopreton, Dover, Camden, Willow Grove, Canterbury, Felton, Harrington, Milford, Farmington, Greenwood, Bridgeville, Cannon's, Seaford, Broad Creek and Laurel.

Connecting at Delmar with the Eastern Shore railroad, (thirty-two miles long,) running south through Somerset county to Somers' Cove on Chesapeake bay, from which point it is eighty-three miles by water connection with Norfolk Va., the Eastern Shore railroad is only completed and operated as far as Princess Anne, running through Salisbury. Princess Anne is the county town of Somerset county, and is about eighteen miles from Delmar. This company is now at work on the remainder of the road, which is a portion of the original Eastern Shore railroad, upon which a part of the grading was executed several years since, from a portion of the one million dollars allotted to the Eastern Shore by the old "eight million loan act." The Legislature at its last ses-

sion waived the State liens on account of the proportion ($112,738) of the one million loan (subsequently appropriated) allotted to Somerset county, in favor of the bonds of the company to be issued for purposes of construction only, and also authorized Somerset county to issue its bonds in aid of the road to the amount of $50,000. An effort to divert to this road the proportion of Worcester county (99,101) in the last Legislature was opposed by Worcester county, and the bill failed to pass.

The Maryland railroads in process of construction to connect laterally with the Delaware railroad, are, the Maryland and Delaware railroad, fifty-four miles long, connecting with the Delaware railroad at Smyrna, running southwest, through Kenton, Del., and the following towns in Maryland:—Templeville, Greensboro', Hillsboro', Easton, to Oxford, Talbot county, on Chesapeake bay, where it will connect by steamboat with Cambridge, Dorchester county, only ten miles distant. Ten miles of this road to Smyrna will be opened and running within a week, and operated by the company. The grading of the road is completed for thirty-two miles to Hillsboro', Caroline county, on the line of Talbot county, which is ten miles from Centreville, the county seat of Queen Anne's county. Fourteen miles of this road is in the State of Delaware, and it runs eighteen miles through Caroline county, within a few miles of Denton. The track-laying on the graded portion of the road is progressing at the rate of one or two miles per week. The portion of the million loan allotted to Talbot county for this road was $109,512, and $36,846 86 of the $43,846 86 allotted to Caroline county was also appropriated to this road.

The Dorchester County Railroad Company is about organizing to build a railroad from Cambridge northeast to Bridgeville on the Delaware railroad, passing through New Market, Dorchester county, and Federalsburg, in Caroline county. The proportion of the one million loan allotted to Dorchester county for this road was $101,175.

The Kent County Railroad has been chartered by the Legislatures of Maryland and Delaware, and as projected, the road will run from Chestertown to either Townsend, Middletown or Smyrna, on the Delaware railroad, running northeasterly, each point being distant about twenty-three miles. The portion of the one million loan allotted to Kent county for a railroad was $101,531. The proposition urged by the citizens of Cecil county to connect this road with Elkton, on the Philadelphia road, instead of connecting at all with the Delaware road, would increase its length considerably. It is urged that the road from Elkton is graded as far as Bohemia river, under the old "eight million" loan act. Of the $168,000 of the one million loan allotted to Cecil county, $58,000 was appropriated to the Elkton and Sassafras railroad, which would form a part of the line, and perhaps could be used in aid of the Kent County railroad to Elkton. It is thought, however, that unless new interests—such as those of Baltimore city and Cecil county—combine to furnish additional means to extend the road to Elkton, the company must continue in their determination to connect their road directly with the Delaware road. The rails on the old Newcastle and Frenchtown railroad were taken up by the Philadelphia, Wilmington and Baltimore Railroad Company several years since, on the nine miles from Frenchtown to the present junction with the Delaware railroad. It is stated that a road from the latter point to connect with Elkton would only be about nine miles in length.

There was allotted by act of the Legislature to other Eastern Shore counties for other railroads, from the one million loan, $99,101 to Worcester county for the Worcester Railroad Company; $110,455 to Queen Anne's county for the Queen Anne's and Kent County railroad, to be used within the limits of Queen Anne's county, and $13,000 to Caroline county for the Choptank and Mispillion Railroad Company.

The old Eastern Shore railroad, as originally laid out, ran through the eastern part of the Eastern Shore counties, in order to avoid the numerous creeks, rivers, &c., further to the west. That road, as projected, would not have run through or near any of the county towns below Elkton, and lateral roads would have been required for the convenience of the people, even if it had been completed.

The various county railroads that we have named show that the same thing is now necessary to connect with the Delaware road, and these lateral roads are of greater length for that purpose than would have been necessary for the one Maryland road extending down through the whole Eastern Shore. It is evident that it is a misfortune to the State—the Eastern Shore and city of Baltimore especially—that the original Eastern Shore railroad project has not been carried out, connecting all the lateral county roads with it, and bringing its terminus, as an entirely Maryland road, at least as near to Baltimore as is Elkton. We have heard it suggested, however, that a line might be run to Elkton from the junction of the Delaware and New Castle railroads, and thus accommodate the travel and trade to and from Baltimore. The distance, we understand, would be less than nine miles. With this difference the passage to Wilmington from the junction, which is about fourteen miles, and back again twenty miles over the Philadelphia road to Elkton, would be saved to those coming to Baltimore. Any future stipulations with the Philadelphia, Wilmington and Baltimore company might have reference to this ultimate equitable accommodation.—*Baltimore Sun, March* 26.

☞ The Loan Bill, which we give elsewhere, has passed both Houses of Congress.

FOR SALE

LOCOMOTIVE ENGINES,

One 14x24, 6 ft. drivers.
One 14x24, 5½ ft. drivers.
One 14x24, 5 ft. 2 in. drivers.

THE

Sterling Iron and Railway Company,

Office No. 42 Pine Street, New York.

Offer for sale at the lowest market rates, in quantities to suit purchasers,

SUPERIOR MAGNETIC IRON ORE, for Blast and Puddling Furnaces;

STERLING CHARCOAL PIG IRON,

AND

STERLING ANTHRACITE PIG IRON.

J. DUTTON STEELE, President.

NEW BEDFORD WATER WORKS.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the Water Commissioners in New Bedford, until 12 o'clock M., April 19th, 1866—

For the construction of the DAM at the Storing Reservoir, with well-chamber and gate-house, &c.

For the construction of a brick CONDUIT, nearly six miles in length, with ventilators, man-holes, &c., &c.

For the construction of a RECEIVING RESERVOIR, with influent and effluent chambers, &c.

The work consists of about 120,000 cubic yards of earth excavation; 3,000 cubic yards of rock excavation; 10,000 cubic yards of puddle bank; and about 11,000 cubic yards of brick and stone masonry.

Plans may be seen and specifications obtained at the office, on and after April 2d, 1866.

The Commissioners reserve the right to reject any one or all of the bids offered; and in making the awards will award the raising of the Road crossing the Storing Reservoir to one, the Dam to another, the Conduit to another, and the Receiving Reservoir to another—or all to one party, should the interest of the city seem so to demand.

New York, Saturday, April 21, 1866.

An Important Question.

At the present moment a large commercial question remains in an unsettled condition; we refer to that of our trade with the British North American Provinces, which by the abrogation of the Reciprocity Treaty of 1854 is again at loose ends. As incidental to it is the renewing of the right to the fisheries, so long and so often a disturbing question between England and the United States, and one which has on several occasions nearly occasioned war between the two countries. In this subject we feel a deep interest, and out of it is to grow real difficulties if they are not met at once by a proper disposition of them. Whether there is statesmanship enough at Washington to meet, grasp and overcome them, remains to be seen. There has been, and is yet, a simple and straightforward method to settle this question; and it has been brought to the notice of certain members of Congress in a proper manner for their consideration. It is to pass a short act of a reciprocal character which will be readily acceptable to the maritime provinces. No one can look at the map without perceiving that the natural position of these provinces, is more favorable to trade and intercourse with the United States than with Canada. Nova Scotia, New Foundland, New Brunswick and Prince Edwards' Island are in fact nearer us in all material relations, are easier reached, and always more accessible. On the other hand a Canadian connection presents to these provinces many real difficulties, in distance, navigation, and climate, without a compensating advantage to any considerable extent. It is very evident the people of these provinces are far from being prepared to enter into any close political alliance with the western provinces, since it secures no particular benefits that are at present unenjoyed. On the contrary, it is well known that leaving out of question the loyal feeling towards the Mother Country, which undoubtedly exists, the provincials of the maritime provinces look on New York and Boston as next in their regard to Liverpool and London, and would almost accept them as their commercial capitals. It is therefore as yet a matter of doubt whether the plan of the Confederation as proposed in Quebec is likely to be adopted, and it is very doubtful whether it is to be regarded with favor by the United States. Confederation in one sense at least, will be the consolidation of a great power on our borders under the influence and government of a distant and jealous power, with which it seems to be our misfortune to have constantly recurring misunderstandings, and with whom we have always difficulty in preserving amicable relations. We have had several serious escapes from war arising out of the claims to boundary lines merely, which on land as on water have been drawn with a tight hand, and very unwillingly relaxed. If our commercial relations with these provinces can be retained by simple and straight forward legislation, it would seem very proper at once to make the attempt. Our trade with these maritime provinces is a lucrative and flourishing one both in its character and results. It furnishes money, employment and many articles of real necessity. The gas in the principle cities of the United States is manufacted out of Nova Scotia Coal, worked by American capital and American companies. The gypsum used in such large quantities to fertilize our Eastern soil comes from the same quarter. Lumber in large and important quantities is an export through the New Brunswick rivers, and is become a staple no longer to be overlooked. On the other hand, we furnish those provinces with many manufactures, flour, coarse grains, furniture, books, hardware, and, to a corresponding extent, and with a profit well understood by the merchants of Boston and Portland, and which they know counts up to many millions of dollars per annum. Now by an act of Congress of very simple phraseology we could reciprocate with these provinces at once so that they would give the fisheries to our occupation as at present and at once settle that question, the really dangerous one of the hour.

We already perceive that vessels of war have been ordered to the fishing stations by the British Government, and a similar movement is announced on the part of our own. This means nothing more nor less than possible collision and war. It is useless to shut our eyes to the true danger before us.

It is there, and may be seen. And yet it may be averted by a very simple process. We understand that a prominent member of Congress, has for some time past had his attention directed to the subject, and indeed has been nearly ready to take the initiative in settling the question in the way suggested. We trust that he will not let the opportunity pass, for accomplishing so worthy a purpose. It would be an act of statesmanship which would redound to his credit, and the interest of the country, relieving the public mind of a large part of the apprehension which now rests upon it.

No matter what estimate either nation may place on the value of the fisheries themselves, or how well disposed the government might be on the main subject, it is in the personal outbreaks and violence of individuals we must look for the disturbances. Small at first, they soon grow large, and involve actual conflicts.

Now, it is the easiest thing in the world to arrange about these fisheries, by adjusting a list of articles at very moderate duties, of reciprocal character, and the maritime provinces would at once pass the necessary acts on their part, in consideration thereof. This would make the plan of confederation more unpopular than it even is, and probably render its consummation impracticable, although so distinctly seen to be an Imperial policy.

This trade with the maritime provinces naturally belongs to our convenient coasts, and it is more

advantageous to both parties than it possibly can be to those more distant, with less affinities for business. We may therefore get rid of this dangerous question, the fisheries, by an early movement in the direction and with the object indicated.

Pewabic Mining Company.

The annual report shows the product of Ingot Copper for the year 1865, was 1,731,418 pounds, exceeding that of the previous year by 301,561 pounds, and the average percentage was 72.5, being 4.18 per cent. less, owing to the larger amount of mass and barrel work. The profits on the past year's operations amount to $43,336 85, and the surplus assets to $78,992 98, being nearly equal to the actual assets of last year after deducting the loss on sales of copper below the estimated value, and expending $32,573 50 in real estate and permanent improvements, and $16,364 91 on conglomerate vein. The condition of the mine proper can be best judged from the product of the last six months. The average has been 120 tons mineral copper per month. Thus the reduction in profits arises from the high cost of labor and supplies from the summer of 1864 to 1865, when if it had been possible it would have been more profitable to have stopped the work in all the mines of Lake Superior. The Directors close the report with expressing confidence that the mine will produce more copper than last year at a very material reduction in cost. The surface expenses will be light in comparison with the past, and the barren work on the conglomerate vein which has heretofore added so much to mining expense, will soon cease and become productive. The increase in size and richness of the Pewabic lode is another encouraging feature, as depth is attained—the quantity of copper obtained this year from a fathom of rock being 614½ pounds, against 522 pounds the year previous, and 430 pounds for the year 1863.

South Carolina Railroad.

The annual meeting of the stockholders of this company was held in Charleston, on the 13th of February last, at which the Annual Report of the President and Directors, together with the Report of the General Superintendent, and the statements of the Auditor were presented. From this we learn that the income of the company from Jan. 1, to June 19, 1865, in Confederate Currency, was:

From passage		$343,185 88
" freight		839,829 62
" mails, etc		4,209 61
		$1,187,225 11
Current expenses	$549,107 63	
Sterling interest	50,000 00	
Exp'ses paying coupons	1,694 17	
Domestic interest	27,631 11	
Damages	14,007 21	
Tax on currency	18,200 00	
		660,640 12
Net income transferred to surplus income		$526,584 99

From the 19th of June to the 31st of December, 1865, the income in Federal Currency, was:

From passage		$122,373 58
" freight		288,766 46
" incidental		2,617 15
		$413,757 19
Current expenses	$134,595 50	
Sterling interest	50,000 00	
Domestic interest	27,619 28	
Damages	4,557 41	
		216,772 19
Net income		$196,985 00

The results of the operations of the road for the whole year is as follows:

Current expenses		$688,703 13
Sterling interest		101,694 17
Domestic interest		55,250 39
Damages, etc		36,764 62
Restoration of property		335,781 18
Lands: Right of way		175 00
Cars built at company's shops		6,800 00
Materials, etc., to arrive	$92,396 15	
Less materials recover'd	28,916 19	
		63,480 96
Loss of assets	$3,612,945 57	
Less sundry items carried to surplus income	339,962 05	
		3,272,983 52
		$4,556,682 97
Total income as above		1,600,982 30
Increase in balance of indebtedness from $315,580 57 to $3,271,031 24.		$2,955,650 67

Loss of Property in 1865.

Depots, machine shops, tools, etc	$126,749 65
Estimated cost of restoring 79 miles of road, bridges, etc., and of collecting and recovering materials	541,361 00
111 negroes emancipated	190,972 85
Cars and locomotives	410,031 14
Materials and machinery	360,000 00
Total loss of property	$1,629,114 64
Reduced by balance to credit of surplus income account, after providing for loss of assets	313,095 80
Balance of loss of property as given in property and debt account	$1,316,018 84

Surplus Income Account.

Balance, December 31, 1864		$3,059,494 33
Net income from Jan. 1, to June 19, 1865, transferred		526,584 99
Results of the transfers of the following accounts representing transactions in Confederate Currency:

Transient credits	$327,988 41	
Less transient debts	266,175 50	
		61,812 91
Loss of property in part		313,095 80
		$3,926,041 37

The business operations of the year are necessary divided into two periods; the first commencing on the 1st of January, and closing in regular order at all points about the middle of February, during which time the Federal forces under Gen. Sherman passed through the State; the second commencing on the 19th of June, at which date military control was withdrawn, and the company authorized to resume possession of its property. During the interim from the middle of February to the 19th of June, no revenue was derived from the working of any portion of the road, except upon the upper end of the Augusta Branch; that portion lying between the 116th Mile and Augusta, Ga., having escaped injury. From the 116th to the 67th mile, a distance of 49 miles, the entire track, the bridge across the Edisto River, culverts, depots, etc., were completely destroyed in February. On the Columbia Division in the same month from the 78th to the 92d mile, nearly everything shared the same fate. Thence to the Congaree River, 10 miles, about 2 miles of woodwork, 600 feet of trestling and a small portion of the rail, the depots and tanks were destroyed. From the southern bank of the river to Kingville, the bridge (470 feet in length,) and about 100 feet of trestling were burnt. At Kingville the hotel depots, agent's house, and about 3,000 feet of track were destroyed. Thence to 115th mile, the depot at Gadsden, tank, 8 or 10 cars, and about 300 feet of track were destroyed. From that point to Columbia everything was swept, including all the buildings in and near the city, excepting depot and agents' house at Hopkins', and the carpenters' house 2 miles below. On the Camden Division from Kingville to the west bank of the Wateree, no injury was inflicted except the burning of Clarkson's depot, the bridge over the Wateree, and about 300 feet of trestling. Upon the occupation of Camden, all the buildings, a few freight cars and about 150 feet of track. On the Charleston Division but slight injury was sustained. This portion of the road, together with that above Branchville towards Orangeburg was taken possession of shortly after the surrender of the city, and worked by the military authorities until the 19th of June, when the entire road was surrendered to the company.

On the 19th of April, about 18 locomotives and 147 cars which were at the time on the Camden Division north of the Wateree, were destroyed by the military expedition under Gen. Potter. His forces also destroyed 720 feet of the Wateree trestling, all the buildings at Middleton, Claremont and Boykins', and all the short trestling between the first point and Raftons Creek, also the materials prepared for the construction of a temporary bridge over the Wateree. Ten or twelve freight cars were also burnt near the Charlotte depot; and a number of freight cars and locomotives which were left in Columbia upon the evacuation of that place and at the Charlotte Junction, were either destroyed or materially injured.

Immediately upon being reinstated, the officers proceeded to contract for materials, and collect all the available labor within their reach for the reconstruction of the Columbia Division. Similar efforts were also made on the Augusta Division. Work was commenced on the former at the 79th mile on the 3d of July. On the 11th of October, Lewisville was reached. On the 14th the road was operated to Hopkins', and on the 16th of January, 1866, the City of Columbia was regained. On the Augusta Division work was commenced at the Edisto on the 15th October. Trains were run to Midway on the 5th, and Hamburg on the 13th of December, to Blackwell about the 1st of February, and to Augusta April 5, 1866.

Of the 14 miles on the south side of the Congaree, 5 miles were laid with new rail, 5 miles from sidelings below Branchville, and 4 miles with straightened rail. The 15 miles next Columbia were re-ironed with rails removed from the Camden Branch. None but new rails have been laid on the Augusta Division, and if possible the same course is to be observed to completion. 4,825 tons of rails had been contracted for, sufficient to

cover 48 miles, of which 2,258 tons had been received, and 2,008 tons laid, viz: 400 tons on the Columbia, and 1,608 on the Augusta Divisions, requiring 4,086 tons for the following purposes: 950 tons to complete Augusta Division and replace defective rails on the same, 1,936 tons to replace defective rails on the Columbia and Charleston Divisions, and 1,200 tons to restore the connection with Camden.

The equipment of the road on the 19th of June, consisted of 4 locomotives, 5 passenger and baggage, and 36 freight cars. 7 locomotives and 38 cars were hired from time to time of the Charleston and Savannah Railroad Co. On the opening of the line to Adam's Cut on the 12th of October, 3 locomotives, 3 passenger, and 29 freight cars were added to the stock. Upon the opening of other portions of the road additional equipment was regained. Of the 44 locomotives now in possession of the company, 5 are in service above Charleston, 1 shifting in yard, 1 in road service, 2 running between Johnston and Augusta, 11 on Charlotte road, 19 awaiting and 5 undergoing repairs.

The company have also 15 1st class, 13 2d class, 226 box, 1 stock, and 25 platform cars. These are apportioned to the several divisions of the road.

The above details of the destruction and restoration of property is from the Report of the Superintendent. The statements concerning the financial condition of the company are from the Report of the Auditor. At the date of the Report of the President, February 7, 1866, the entire length of the Columbia road and the Hamburg Division, as far as Graham's 81 miles from Charleston were in operation. From so much of the roadway, and with limited transportation means, the gross earnings were $413,737 19, and the operating expenses, $216,772 19—leaving for general expenditures, $196,985. With the funds obtained in this mode, and from sources more recently developed, the board have supplied the means of meeting expenditures; have provided rails for the entire portion destroyed; and hope to find no difficulty in obtaining from the same sources all that may be necessary in restoring the whole property to its original condition.

By reference to the annexed "Property and Debt Account," it will be seen that a very large portion of the debt has reached maturity, and must be provided for, viz: $2,000,000 Foreign and $234,000 Domestic Debt; and to these principal sums must be added large arrears of interest, say on the former $362,166 97, and on the latter $133,632 50.

In anticipation of the maturity of the Foreign Debt, application was made to the Legislature of the State for a renewal of the State's guarantee upon the new bonds they designed to recommend to the stockholders to offer to the bondholders in substitution of those past due and the accrued interest. An act was accordingly passed authorizing the endorsement of the State's guarantee. The agents in England of the Foreign bondholders have been notified of the passage of the act, and of the company's view of the best mode of arranging the debt. The plan at present contemplated is as follows:

1. To substitute new bonds for the old, due at the same time and same rate of interest, that is to say at twenty years, and at the rate of five per cent. per annum.

2. To fund the accrued interest to Jan. 1, 1866, at same time and rate of interest as the principal of the debt.

3. To provide, by regular semi-annual payments, out of earnings, for the retirement of the entire sum at maturity.

The Domestic Debt, in the matter both of principal and accrued interest, the board propose to meet precisely as they expect to do with the Foreign. The arrangements, however, of the Domestic, will necessarily wait upon the conclusions of negotiations abroad.

PROPERTY AND DEBT ACCOUNTS, Dec. 31, 1865.

President.—W. J. MAGRATH.

Directors.—James Rose, Alfred Huger, C. M. Furman, W. C. Dukes, John Caldwell, T. B. Clarkson, Henry Gourdin, G. A. Trenholm, W. J. Magrath, J. S. Preston, L. J. Patterson, B. H. Rice, C. T. Mitchell, A. Simonds, F. J. Moses.

General Superintendent.—H. T. PEAKE.

Auditor.—J. R. EMERY.

Quincy Mining Company.

The annual report shows that the product of the mine for 1865 was 2,721,880 lbs., or 1,361 tons of mineral of this product and the balance left over at the close of each year, 2,612,035 lbs., have been melted leaving 81.36 per cent. on 2,125,150 lbs. of ingot copper. The balance was wrecked on Lake Huron, and not being insured for its full value resulted in a loss to the company of about $20,000. The value of the product, estimating the copper on hand and at the mine at 36 and 30 cents, gives gross earnings, $703,077 87; expenses, $634,571 94; profits of the year, $68,505 93. The expenses were increased by the erection of sundry buildings amounting to $22,931 83, and for exploring account $35,434 65. The Directors state that the accounts do not make up as well as the previous report for 1864 would have led the stockholders to expect, as they then overestimated the value of copper on hand; a portion did not come forward until the opening of navigation, when from the cessation of the war the price of copper had reached its lowest point. The amount actually realized was $44,030 20 less than their estimates, and reduced the assets from $351,629 89 to $307,597 69. Of this sum a dividend of $6 per share, or $160,000 was paid in February, 1865.

The assets now on hand, including stock in the Portage River Improvement Company, show a surplus in excess of all liabilities of over $187,000. There is also on hand a special reserve fund of $50,000—for the purpose of providing against loss by fire of stamp mill and other buildings.

From an analysis of the items in the statement of liabilities and assets, the Directors say it will readily appear that the surplus is all actively employed in the business of the company, and is not available for the payment of dividends, but that the mine, with all its appointments, is in excellent condition and gives promise of a large and continued production of copper. Every effort is now being made to reduce expenditures to the lowest point consistent with thorough efficiency, and needs only a fair market price in proportion to its cost to be again a highly remunerative property.

Tapping the Lehigh.

We learn that the Philadelphia and Reading Railroad Company have despatched a corps of engineers to survey a route for a branch Railroad from a point near Barnesville, this County, *via* Wetherley, to connect with Pardee's Railroad in the Lehigh region, near Hazleton, for the purpose of delivering a portion of the trade *via* the Valley of the Schuylkill. We understand the route is favorable. This of course, is in opposition to the extension of the Lehigh and Mahanoy road through Schuylkill County to Mt. Carmel.

The Reading Railroad Company is also making a road into the Shamokin region in the vicinity of the Shamokin Valley and Pottsville Railroad, now controlled by the Pennsylvania Railroad.—*Pottsville Miners' Journal.*

☞ A meeting of the stockholders of the Indianapolis and Madison Railroad Company will be held at the office of the company, at Madison, Indiana, on the 25th day of April, to consider and determine upon a proposition to intersect, join and unite their railroad with the Jeffersonville Railroad, and to merge and consolidate the stock of said companies, making one Joint Stock Company of the said railroad companies.

☞ The Manassas Gap railroad company are taking steps to put the road under way as soon as possible.

☞ The friends of the Kent County Railroad held a meeting at Chestertown, Md., on the 18th inst. for the purpose of effecting an organization.

Allegheny Valley Railroad.

The extraordinary development of the oil region has done more for the completion of this work than any other influence in Western Pennsylvania. The terminus, so long at Kittanning, is now at Pine Creek, six miles further North, and when the bridge across that stream shall have been finished the road will be open to the mouth of Mahoning creek, a distance of fifty-five miles from Pittsburgh. From Mahoning to Oil City, seventy-five miles, the road is being pushed forward rapidly, thirty-miles being now under contract, with some work done, and contracts will soon be made for the remainder. This line traverses a region rich in mineral resources. The valley of the Allegheny has long been famous for its iron and coal, as it is now for its petroleum, and the road when finished cannot fail to do at once a large and remunerative business. As an adjunct to the trade of Pittsburgh it will be invaluable. It is likely to become one of the leading routes of the oil trade, as Pittsburgh is the emporium for the distribution of oil throughout the west. It will give an immediate impetus to the development of the oil regions, as well as the coal fields in the region adjacent to its route. It will also connect with the new route of the Atlantic and Great Western Railway eastward, and thus form an avenue of communication between Pittsburgh and the places lying along that line.—*Phila. North American.*

☞ The Commissioners of the Wicomico and Pocomoke Railroad Company give notice that the sum required in order to organize the company has been subscribed, and that a meeting of the stockholders will be held at Berlin, Worcester county, Md., on the 25th instant, for the purpose of electing twelve directors of said company.

☞ The Welland Canal was opened for Navigation on the 17th inst.

Railroads of the State of New York.

Abstract of the Reports of the Railroad Corporations for the year ending September 30, 1865.—Prepared by ROBERT H. SHEARMAN, Esq., Deputy State Engineer and Surveyor.

STOCK AND DEBTS.

Roads operated by Steam:

Capital stock by Charter and acts of the Legislature	$84,816,200 00
Capital stock subscribed for	96,436,661 61
Capital stock paid in	96,040,187 24

Locomotives and fixtures and snow plows	6,305,509 72
Passenger and baggage cars	2,852,815 83
Freight and other cars	5,358,684 94
Engineering and agencies, &c.	8,462,812 44
Total cost of construction and equipment of roads using steam power	$156,363,203 32
Total cost of construction and equipment of roads using horse power	$19,591,184 98

CHARACTERISTICS.

Roads operated with Steam:

Length of roads in miles	3,089 84
Length of roads laid	2,615 15
Length of double track, including sidings	1,163 84
Length of branches laid	497 83
Length of double track on same	21 43
Length of equivalent single track	4,298 25
Number of engine houses & shops	166
Number of engines	962
Number of first class passenger cars	820
Number of second class cars	181
Number of baggage, mail and express cars	292
Number of freight cars	15,284

Roads operated with Horse Power:

Length of roads in miles	256 05
Length of roads laid	166 24
Length of double track, including sidings	123 64
Length of branches laid	3.16
Length of double track on same	.25
Number of houses and shops	22
Number of cars	959

BUSINESS OF THE YEAR.

ROADS OPERATED WITH STEAM.

Passenger Business:

Miles run by passenger trains	7,978,889
Passengers, all classes, carried in cars	16,215,427
Miles traveled by passengers, or number of passengers carried one mile	731,922,250
Average rate of speed of ordinary passenger trains, including stops.	20.57
Average rate of same when in motion	25.43
Average rate of speed of express passenger trains, including stops.	26.25
Average rate of same when in motion	30.44
Average weight, in tons, of passenger trains, exclusive of passengers and baggage	84.77

Freight Transportation:

Miles run by freight trains	11,482,788
Number of tons carried in freight trains	7,388,852
Total movement of freight, or number of tons carried one mile	866,647,450
Average rate of speed of freight trains, including stops.	11.52
Average rate of same when in motion	14.86
Average weight, in tons, of freight trains, exclusive of freight	151.10

Classification of Freight:

	Tons.
Products of the forest	527,299
Products of animals	1,345,361
Vegetable food	1,220,500
Other agricultural products	392,037
Manufactures	732,661
Merchandise	1,146,286
Other articles	2,024,708
	7,388,852

ROADS OPERATED WITH HORSE POWER.

Number of miles run by passenger cars	18,419,989
Number of passengers, all classes, carried in cars	107,349,507

COST OF MAINTENANCE OF ROAD.

Allotted to Passenger Transportation:

Repairs of road bed and way, exclusive of iron	$2,156,777 82
Cost of iron for repairs	1,576,514 74
Repairs of buildings	441,181 26
Repairs of fences and gates	56,644 21
Taxes on real estate	627,112 74
	$4,858,230 77

Allotted to Freight Transportation:

Repairs of road bed and way, exclusive of iron	$3,097,875 21
Cost of iron for repairs	2,345,008 22
Repairs of buildings	821,534 19
Repairs of fences and gates	87,733 09
Taxes on real estate	856,097 14
	$7,209,052 85
Allotted to passenger transportation	$4,858,230 77
Allotted to freight transportation	7,209,052 85
Other costs not allotted	807,560 55
Total cost of maintenance of roadway	$12,874,844 17
Roads operated with horse power.	$282,351 41

COST OF REPAIRS OF MACHINERY.

Allotted to Passenger Transportation:

Repairs of engines	$1,318,080 86
Repairs of cars	1,309,390 81
Repairs of tools, &c	165,108 97
Incidental expenses, oil, fuel, &c.	117,359 64
	$2,909,935 28

Allotted to Freight Transportation:

Repairs of engines	$1,914,157 74
Repairs of cars	2,134,870 85
Repairs of tools, &c	259,522 93
Incidental expenses, oil, fuel, &c.	178,947 68
	$4,487,499 20
Allotted to passenger transportation	$2,909,935 28
Allotted to freight transportation	4,487,499 20
Other costs not allotted	549,116 46
Total cost repairs of machinery	$7,946,550 94
Roads operated with horse power.	$116,943 25

COST OF OPERATING THE ROADS.

Allotted to Passenger Transportation:

Office expenses, stationery, &c	$159,749 64
Agents and clerks	512,740 70
Labor, loading and unloading fr'ght	54,228 61
Attendance of porters, watchmen and switchmen	355,160 24
Wood and water station attendance	93,421 68
Conductors, baggagemen & brakemen	608,879 15
Enginemen and firemen	524,476 24
Fuel, cost and labor in preparing for use	2,060,624 14
Oil and waste for engines & tenders	267,161 95
Oil and waste for cars	70,345 45
Loss and damage of goods and baggage	18,933 34
Damages for injuries to persons	141,934 16
Damages for property and for cattle killed	18,183 01
General superintendence	131,627 43
Contingencies	675,347 87
	$5,692,813 11

Allotted to Freight Transportation:

Office expenses, stationery, &c	$206,047 94
Agents and clerks	833,851 77
Labor, loading & unloading freight	1,376,713 07
Attendance of porters, watchmen and switchmen	462,628 14
Wood and water station attendance	102,869 40
Conductors, baggagemen & brakemen	843,209 66
Enginemen and firemen	956,179 85
Fuel, cost and labor in preparing for use	2,927,240 86
Oil and waste for engines & tenders	354,738 73
Oil and waste for cars	113,861 21
Loss and damage of goods and baggage	283,340 68
Damages for injuries to persons	23,874 57
Damage for property and for cattle killed	30,081 95
General superintendence	182,968 14
Contingencies	758,111 21
	$9,450,667 18

Allotted to passenger transportation	$5,692,813 11
Allotted to freight transportation..	9,450,667 18
Other costs not allotted	229,484 89
Total cost of operating roads	$15,372,965 18
Roads operated by horse power	$3,152,915 17

EARNINGS AND PAYMENTS.

EARNINGS.

Roads operated with Steam:

From passenger business	$18,586,929 71
From freight business	28,186,932 87
From other sources	1,869,103 62
Total earnings	$48,642,966 20

Roads operated with Horse Power:

From passenger business	$5,694,943 38
From other sources	253,714 11
Total earnings	$5,948,657 49

PAYMENTS OTHER THAN FOR CONSTRUCTION.

Roads operated with Steam:

For transportation expenses	$38,960,017 82
For interest	4,719,913 80
For dividends on stock	4,907,497 19
Amount carried to surplus fund	155,000 24
Total payments	$48,742,428 46

Roads operated with Horse Power:

For transportation expenses	$4,956,066 04
For interest	408,918 93
For dividends on stock	262,171 85
For payments to surplus fund	226,283 46
	$5,853,440 28

ACCIDENTS.

Roads operated with Steam:

Number of passengers killed	24
Number of passengers injured	167
Number of employees killed	92
Number of employees injured	65
Number of others killed	111
Number of others injured	40
Total number killed	227
Total number injured	272

Roads operated with Horse Power:

Number of passengers killed	8
Number of passengers injured	26
Number of employees killed	1
Number of employees injured	1
Number of others killed	21
Number of others injured	35
Total number killed	30
Total number injured	62

DEDUCTION FROM THE FOREGOING RESULTS.

If we exclude the city roads, we have as follows.

Average number of miles traveled by each passenger	45.13
Average number of passengers in each train	91.78
Average number of miles each ton of freight was transported	117.29
Average number of tons in each freight train	75.47
Aggregate movement of passenger trains is equivalent to passing over the road	3,051 times.
Aggregate movement of freight trains is equivalent to passing over the road	4,391 times.
Average number of trains passing daily over the road, about	20⅓
Average cost, per mile of road, for maintaining roadway	$4,923 18
Average cost, per mile of road, for repairs of machinery	3,038 66
Average cost, per mile of road, for operating road	5,878 42
Average cost, per mile of single track, for maintaining roadway	2,995 37
Average cost, per mile of single track, for repairs of machinery	1,848 79
Average cost, per mile of single track, for operating road	3,576 56
Average sum received for carrying one passenger one mile	2.54 cents.
Average sum received for transporting one ton of freight one mile	3.25 cents.
Average number of miles of travel for each passenger killed	30,496,760
Average number of miles of travel for each passenger either killed or injured	3,832,054
Average number of passengers carried for each one killed	675,643

Average expense is 78.59 pr. ct. of all the earnings.

Commerce of New York.

The comparative value of foreign goods entered at the port of New York, and of foreign goods actually marketed for the eight months of the current fiscal year are as follows:

	1864–'65.	1865–'66.
Total entries	$100,863,426	$202,216,403
Total marketed	92,385,285	188,406,653
Customs paid	33,496,887	89,523,076
Average duty	36⅜ per ct.	47⅝ per ct.

In addition to the above there was entered during the eight months, foreign gold and silver of the value of $1,316,351, as against $997,580 in 1865.

The following shows the imports at New York for the eight months ending with February of the fiscal year:

Six months ending	1865.	1866.
January 1	$79,767,221	$142,830,367
In January	10,620,117	30,109,830
In February	11,473,668	30,692,557
Total eight months	$101,861,006	$203,532,754

The amount paid for customs duties compares thus:

Six months ending	1865.	1866.
January 1	$24,473,902 73	$65,077,328 87
In January	4,231,737 47	12,437,474 16
In February	4,791,247 10	12,008,273 74
Total eight months	$33,496,887 30	$89,523,076 77

The exports, exclusive of specie, for the eight months ending with February, have been as follows:

Six months ending	1865.	1866.
January 1	$131,946,100	$107,699,914
In January	16,561,598	20,103,207
In February	15,750,807	17,195,507
Total eight months	$164,258,505	$145,003,628
Specie	25,881,554	16,601,290
Total	$189,439,059	$161,604,918

The exports of all descriptions for the eight months of the fiscal year are:

	1864–'65.	1865–'66.
Domestic produce	$147,535,193	$142,651,804
Foreign re-exports	16,012,312	2,351,824
Specie	15,881,554	16,601,290
Total	$189,439,059	$161,604,918
Average price of gold	282 per ct.	143 per ct.

The Anthracite Consumers' Railroad.

We find the following letter published in the Philadelphia *Press* of 12th inst.:

Harrisburg, April 11.—It is understood that a corps of engineers will commence surveys for the route of the Anthracite railroad within a few days, the southern terminal point being on the Delaware river below the city. The stock-books will be opened within a month in the cities of New York, Boston and Philadelphia; and the managers of the enterprise claim to have secured the aid of such financial parties as will insure the building of the main line of road from the Schuylkill coal-fields to the Delaware, as well as a branch road for the direct trade between Schuylkill County and New York. This branch road will also form part of a new through route connecting the Philadelphia and Erie railroad with New York city.

Interest and Dividends.

The Cleveland and Toledo Railroad Company have declared a semi-annual dividend of eight per cent., payable less U. S. tax on the 15th inst., at the office of Wells, Fargo & Co., 84 Broadway.

The Cincinnati, Hamilton and Dayton Railroad Company have declared a semi-annual dividend of four per cent., payable at the Bank of America, April 20th.

The Baltimore and Ohio Railroad Company has declared a dividend of 4 per cent. on the stock of the Main stem, payable on and after the 30th inst. Also, a dividend of 5 per cent. on the stock of the Washington Branch for the half year ending 31st March last, payable on and after the 16th inst. United States tax paid by the company.

The Dubuque and Sioux City Railroad Company have declared a scrip dividend on the preferred stock of 7 per cent. out of the earnings of the year 1865.

Sand Patch Tunnel.

We learn that the miners working in the middle section of the Sand Patch Tunnel, on the Pittsburgh and Connellsville Railroad have met, thus piercing once more the great mountain barrier between the Ohio valley and the seaboard. The Sand Patch Tunnel is four thousand seven hundred and fifty feet long, or one thousand feet longer than the Allegheny Mountain Tunnel of the Pennsylvania Railroad. It was commenced some ten years ago, is to accommodate a double track of rails all through, being twenty-two feet wide, and nineteen feet high. The greater portion of it goes through solid red sandstone, not requiring any brick-arching for that distance. The grade of the tunnel is twenty-two hundred feet above the level of the sea, or fifteen hundred feet higher than low water mark of the Ohio river at Pittsburgh. Mr. Sigismund Loew, the engineer of the Connellsville Railroad Co., informs us that it will take six months more with the force now employed, to finish the tunnel in ample time for the completion of the whole road from Cumberland to Connellsville, should that distance be put under construction this Spring.—*Pittsburg Chronicle.*

☞ The City Passenger Railway Company, Baltimore, has paid to the city Register on account of the Park Fund $15,197 65, being one-fifth of the gross receipts of that company less the Government tax, for the quarter ending March 30th—making the total received from that company since April 1, 1865, $87,934 77.

The York Passenger Railway Company has also paid on account of the same fund for the quarter ending March 31, $342 42.

☞ The Commissioners of the Covington and Ohio Railroad will meet at Baltimore on the 1st day of May next, to pass upon such proposals for the construction of that road as may be presented by responsible parties. Pamphlets, furnishing all necessary information in reference to this work, may be procured on application to the Commissioners.

☞ The Railway Department of the Russian Ministry of Public Ways require tenders for 18,362 tons of rails and fastenings for the Orel-Koursk Railway. The contract is of especial interest to the English ironmasters, as giving evidence of the increasing business springing up between England and Russia.

American Railroad Journal.

Saturday, April 21, 1866.

Stock Exchange and Money Market.

Our advices from Europe up to the beginning of the week were confirmatory of our previous intimations that American securities were still popular on the Continental Bourses, remaining firm with an inclination to advance, while other forms of indebtedness of a National character were more or less depressed by the political condition of affairs. The prediction that we were to have considerable amounts of our bonds returned upon this market to be sold at whatever price, has proved to be incorrect, on more occasions than one. For some reason or other, not immediately apparent, there is a class of financial writers who are continually asserting that we are to be overwhelmed with the sudden return of our stocks from abroad; that the holders are in fact lying in wait to flood us with more than we can carry; and that the deluge of Deculion will be nothing to it. We have waited for some time to see this influx of American bonds, and in vain; and imagine we shall have to wait some time longer. We suppose that the well known facts with regard to the financial condition of the country have had their natural influence on capitalists abroad, as well as at home; for these persons are much alike in their inquiries and convictions, and come to similar conclusions as to the safety of their money, whether it is invested at London, Paris, Hamburg or New York. They have found out that we are at peace, that our war expenditures have ceased, that our revenue is full two hundred millions of dollars in excess of the charges upon it, that no more loans are called for or are anticipated, and that we have turned into the commerce of the world a crop of cotton to the extent of two and a half millions of bales. In addition to this, is the knowledge of a return of the industrial population of the country to their usual labors, the results of which to its accumulations are about six thousand millions a year. We undertake to say, then, that these facts are well understood abroad by those who have been dealing in our securities, that large profits have been made in them by this knowledge, and we doubt not more will still be realised before many months are over. Thus we are not surprised to learn that the 5-20s of 1862 and 1865 have advanced from previous quotations, or that the demand for them continues to be active. As gold declines, and our paper currency improves, these stocks will advance; and we, for our part, do not regret it, as this was the original idea when they were issued; and the belief in them, enabled the Government to obtain the money necessary to sustain itself. We see no objections to the Bondholders reaping the rewards of their patriotic confidence by the rise of their property to its par value; on the contrary we hail it as the just consummation of the national faith.

Exchange has grown a little dearer, under the rumor that the cotton supply was running short, and the stock at the principal ports diminished to a large extent. It is wonderful that these rumor-spreaders will admit there has been any cotton at all raised or exported. Unfortunately for them, the Custom House returns stand in the way of such assertions or they would doubtless be made.

It will be noticed that as our paper currency has improved, the actual value of our exports has increased, the exports for eight months of the fiscal year, from July to February having amounted to $145,008,628 with gold at such an average as to make the valuation more than during the preceding year at the same period. At the same time the imports have kept up quite as largely as the wants of the country have required, if not more so, the customs received being on the largest scale. Thus we find that during the same period of eight months the amount received was $188,406,653 against $92,385,285 the same time during the previous year. The sum actually paid into the New York Custom House alone, up to April 14, is returned at $107,069,633, while the gold interest paid was $32,139,670, leaving a large and perceptible margin which tells its own story.

The Money Market retains extraordinary ease

and the report of the Associated Banks for the week ending 14th inst., shows it by the fact that the amount of their loans had increased beyond that of the previous week by the sum of $1,866,096; and the circulation $406,920. The plentifulness of money was further indicated by the increase of their deposits by the large sum of $4,058,508, and the addition of $2,465,305 in the amount of legal tenders, or money in that form. Their whole loans and deposits are returned at $224,009,849, their circulation at $24,553,931, their deposits at $193,153,469, and their specie on hand at $11,035,-129. From this statement it is apparent that the New York Associated Banks, would under the old rule of having one dollar in specie in hand for three of paper out, be able to resume payment in coin as they stand at the present time. But they would find themselves powerless as long as the whole circulation of the country is as large as it is. It is believed to be nearly as follows:

National bank notes as reported in Jan.	$213,239,000
State banks	45,000,000
Fractional currency	28,000,000
3 yrs notes used as currency by banks	172,000,000
National bank notes issued since Jan. 1	25,000,000
Total	$914,239,000

No amount of specie at present in the Bank vaults or in the Treasury would be adequate to the redemption of more than a tenth of this sum, and we cannot therefore expect any such result. Indeed it will not even be attempted at present. It is, however, equally evident that this volume of paper money is entirely beyond the real business wants of the country, and if maintained will lead to the return of high prices; a consequence to be regretted, and which will again open the door to excessive speculation in the necessaries of life already held far beyond their real value. The tendency of prices has been downwards for a number of months past, but the expectation of contraction, and an early resumption of specie payments have accompanied it; if this is positively checked, if it is certain our paper is to be still further swelled, we may positively expect a return to still higher prices, a still further delay in arriving at monetary stability. We have omitted to state the exact amount of our exports for the same periods of 8 months, already used in our estimates. It appears that these exclusive of specie were of the value of $145,003,628, against $105,-396,413 in 1864, and $164,258,565 in 1863.

With regard to the local credit of National securities, it is proper to observe that just now the compound interest notes have advanced to par, and are much in request, while the 5-20s are becoming scarce and rule as high as 104 and upwards.

With regard to miscellaneous securities we may remark that the stock market shows a disposition towards greater animation, but speculation nevertheless looks sharper over the movements of well-known operators, than to the intrinsic value of the property in the market. One would think that the values of railways would be easily determinable by the simplest methods. We give cost, liabilities, earnings, these are known from week to week. What is to prevent the careful calculator from forming a correct and reliable opinion as to the value of a stock. And yet who does it. Who really buys or sells in the street on any such principle. On the contrary, is it not true that the rumor of a combination, a corner, or a deferred dividend is much more eagerly regarded as the cause for an operation, and a reason for a fall or rise.

The stability of National securities, their being beyond the reach of private manipulation or control, their publicity and their open sale do a great deal to give them a preference as an article in the market, and a superiority over all other kinds of monied securities.

We have had occasion frequently of late to notice the great energy and skill with which the managers of the Southern Railroads have employed themselves to restore their companies to vitality, and their roads to their former flourishing condition. The exertions of some of the gentlemen who have taken this work in hand have been really marvellous, and the reports made by them are valuable documents in railroad history. We shall endeavor to give them due publicity in our columns, which is the least they deserve.

While on this subject, we may as well state a most interesting fact which has recently come to our knowledge. There are now resident in this city many Southern gentlemen engaged in various honorable pursuits, some of whom took an active and very distinguished part in the late rebellion. Be this as it may, they have changed their views entirely. In a group of them recently assembled in this city a few evenings since, the most sensible and changed views were freely expressed, regrets at the past, convictions of a great mistake having been committed, and great injustice to the real fairness of the Northern people. It was freely confessed, that the movement at the South was uncalled for, and that all that was got by it was the establishment of a most despotic system, and a tyranny instead of a Government. It was noticeable also, that very liberal views were expressed with regard to the condition of the freedmen and their future advancement, with a determination hereafter to regard the Union as a common and priceless heritage. These views we are happy to learn are beginning to be universal among the best and leading men of the South, and that all attempts to keep up irritation and discontent in that quarter will be treated with marked dislike and contempt. We put this statement on record in the full confidence that we are recording a most important fact.

We always notice with satisfaction the important part which cotton is performing in regulating and advancing our foreign trade. The control of this staple by the people of the United States under their free Government directed by American enterprise, is one of the great elementary powers of the age, and of this continent, especially to control the trade of the world, and worthy of all efforts on our part to retain. During the week ending on Tuesday last, 21,100 bales of the value of $3,697,518 were shipped from this port. The fortnight's shipments counted 44,242 bales. Since the commencement of the current cotton year we have received in this port, 711,857 bales, and have exported 394,538 bales, the value of this so exported since September 1, is equal to about seventy millions of dollars, a most telling item in our business. We hope to see in the renewed production of this article a most important addition to our commercial strength.

The New York exports, exclusive of specie, for the week ending April 17, and since the beginning of the year, compare as follows:

	1865.	1866.
For the week	$1,613,293	$6,267,431
Prev. reported	56,388,554	66,941,941
Since January 1	$58,001,847	$73,209,372

The New York imports compare as follows:

	1865.	1866.
Dry goods	$894,184	$2,003,467
Gen. merchandise	1,498,441	3,757,374
Total for the week	$3,392,575	$5,760,841
Prev. reported	85,257,340	87,354,312
Since January 1	$37,649,915	$93,115,153

The balance in the Sub-Treasury on Wednesday was $92,257,161 35.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Chicago and Great Eastern, 42½; Morris and Essex, 79; Milwaukee and St. Paul, 42; do., pref., 55; do., 1st mort., 82; New Jersey Central 1st mort., 100; Stonington, 100½; Connecticut 6s, 95; N. Y. 7s, Bounty Loan, 101; do., do., 5s 1874, 89½; do., 6s, 1872, 93½; Rhode Island 6s, 93½; Michigan 7s, War Loan, 93; Brooklyn 6s Water Loan, 98; N. Y. City 6s, 1883, 91; Spring Mt. Coal, 54; Spruce Hill Coal, 6; Ashburton Coal, 14; Wilkesbarre Coal, 48; Pacific Mail Scrip, 202; Cary Imp., 14; Brunswick Land, 10; Union Navigation, 105; Mariposa pref., 23; Boston Water Power, 35; Western Union Tel., 55; Mechanics Bank, 113; Continental Bank, 98; 4th National Bank, 101¼; 9th National Bank, 109; Ocean Bank, 98; Bank of Commonwealth, 103; Bank State of New York, 108; Am. Ex. Bank, 115; Bank of New York, 115; Shoe and Leather Bank, 110; St. Nicholas Bank, 101; Bank of Commerce, 107½; Bank of Republic, 109; Mech. Banking Ass., 108; Peoples' Bank, 108; Merchants Exchange Bank, 105; Central Bank, 112.

Philadelphia.—Pittsburg 5s, 68; Allegheny County 5s, 73; Reading mort., 6s, 1848–'80, 87½; Westchester 7s, 97; Sunbury and Erie 7s. 93; West Branch bonds, 82½; Delaware Division bonds, 78½; 13th and 15th streets R. R., 19½; Union R. R., 32; Phila. and Trenton R. R., 114; Hazleton Coal, 25½; N. Y. and Middle Coal Fields, 7⅜; Locust Mt., 46; Big Mt, 5; Mahanoy Coal, 3½; Shamokin, 7¾; Fulton Coal, 6½; Swatara Falls, 2⅛; New Creek ⅞; Ætna Mining, 4⅝; Mechanics Bank, 29¼; Manuf. and Mech. Bank, 30¾; Curtin Oil, ½; Dalzell, 1¼; Maple Shade, 3; McClintock, ¾; Ocean, 8½. The latest quotations are: City 6s, 88@88¾; do., new, 92⅜@92¾; State 5s, 87½@88; do., coupon, 87@88; do., 6s, W. L., 100@101; Phila., Wil. and Balt., 58⅜; Reading, 51⅝@51¾; do., 6s, 1870, 93@96; do., bonds, 87@90; do., con., 101@107; Camden and Amboy, 117⅞@118¼; Penn. R. R., 56⅛@56¼; do., 1st mort., 100@100¼; do., 2d mort., 94¾@95; Little Schuylkill R. S. Co., 95; Waverly Land, 3⅞; Belmont Coal, 4⅛; Mammoth Vein Coal, 2⅝; Short Mt. Coal, 19½; Franklin Coal, 9; Cambridge Gas, 98½; South Boston Gas, 102½; Merchants Bank, 110¾; Bank of Commerce, 111; State Bank, 105¾; Maverick Bank, 100; Hide and Leather Bank, 130; Old Boston Bank, 105; Webster Bank, 105; Bank of North America, 100; Shawmut Bank, 106; Eliot Bank, 114½; Suffolk Bank, 112½; Fanuel Hall Bank, 125; Bank of Redemption, 103¾; Traders Bank, 93¾; New England Bank, 117½; Columbian Bank, 111; Continental Bank, 107½; 3d National Bank, 101¼; Atlas Bank, 109½; Blackstone Bank, 120; 2d National Bank, 138; Union Bank, 116½; Bank of Republic, 120¼; Atlantic Bank, 113½; North Bank, 103½; Eagle Bank, 109½; Albany and Boston Mining Co., 14; Bay State,11; Boston, 1; Calumet, 9; Dana, 1¼; Humboldt, 6¾; Hancock, 21; Hanover, 1⅛; Madison, 2; Petherick, 4¼; Phœnix, 14; Pontiac, 1¼; Superior, 3¼; St. Clair, 3½; South Side, 2⅛; Star, 1⅝; Tremont, 1⅛; Winthrop, 1.

Baltimore.—Virginia 6s, registered, 42; Marietta and Cincinnati bonds, 80; N. W. Va. 1st mort., 97¾; Bare Hill Mining Co., 1; Mineral Hill, 0.70; Gardner Hill, 0.90; Guilford, 0.40; Santa Clara, 6; Am. Gas Coal, 0.85; Atlantic Coal, 1.00; Balt. and Cuba S. & M. Co., 105; Baltimore Chrome, 0.70; Penn. Oil, 0.50; National Bankers Express, 101; Marine Bank, 32; Exchange Bank, 100: Union Bank, 75. The latest quotations are: Balt. and Ohio, 108@110; do., 6s, 1867, 97@98½; do., 1875, 94@95; do., 1880, 94½@95; do., 1885, 94@94¼; Northern Central, 43¾@45½; do., bonds, 1885, 84@84; N. W. Va. 1st mort., 1873, 96@97; do., 2d mort., 93@97; do., 3d mort., 90@95; Marietta and Cincinnati 7s, 1891, 79½@80; Central Ohio, 22@30; do., 1st mort., 78@83; Western Md. bonds, 76@79; do., guar., 92½@97½; Maryland 6s, coupon, 1870, 100@101½; do., Ins., 101@101½; do., 1890, 100@101; Baltimore 6s, 1870, 96@97; do., 1873, 96@99; do., 1875, 96¼@96½; do., 1886, 98@99; do., 1890, 98⅝@99; do., coupon, 96½@99; do., Park, 99@100; do., 1892, 92½@96½; do., 5s, 1838-'70, 82@88; City Passenger R. R., 18¾@19; Canton Co. 50½@52½; Gardner, 0.80@0.90; Am. Gas Coal, 0.80@0.90; Maryland, 0.25@0.30; North State, 0.15@0.15; Springfield, 0 15@0.20; George's Creek, 108@112; Santa Clara, 6@8½; Balt. Chrome, 0.55@0.60; Bare Hill, 0.90@1.00; Atlantic Coal, 0.95@1.00; Mineral Hill, 0.65@1.00; Baltimore Coal, 140@200.

Tennessee State Bonds.

The Comptroller of the State of Tennessee gives notice that new bonds. bearing 6 per cent. interest, will be issued (under an act passed the 23d of November, 1865,) "to an amount sufficient to pay off all the bonds and interest past due, as well as that to fall due January 1, 1866, or on any bonds that may fall due during the year 1867." The new bonds are to be dated January 1, 1866, and to be paid January 1, 1892, and will be exchanged for the unpaid interest coupouns on old bonds, including those of January 1, 1866, estimating each (bonds and coupons) at their par value. The interest coupons on the new bonds falling due July 1, 1866, and all the subsequent coupons thereon, will be paid in New York, in money. The interest coupons on all the old bonds will be paid (July 1, 1866, and thereafter), as heretofore, at the places mentioned on the coupons. The conversion of the past due coupons into new bonds must be made at the Comptroller's office, in Nashville, Tennessee. The past due coupons may be sent directly to the Comptroller, Hon. S. W. Hatcheft, or to any agent the holders of them may appoint at that place, to make the exchange. No new bond will be issued for less than $1,000. The holders of coupons will have to sell or buy to make an even amount.

Philadelphia and Erie Railroad.

The principal officers of this company are soon to be moved from Williamsport to Erie. The affairs of this road are fast approaching a condition of completeness, which enables it to take position as one of the best railways in the country. The great amount of money which has been expended in improvements along the line of the road and at its terminus in Erie, has given it facilities for supplying itself with motive power and rolling stock which are not equalled by any road of the same age in the country; and the management of its business is now so systematized that the patrons of the road find it prepared for all emergencies and equal to all demands. Another year of this progress will place it beyond the power of all contingencies and in a condition inferior to no road in the country.

☞ The Baltimore and Ohio Railroad Company has commenced the construction at Grafton, West Va., of an immense engine house. The new building is designed to hold at least sixteen engines, and will besides be provided with the necessary accommodations for workmen, machinery, &c.

☞ The President has approved the bill appropriating $800,000 to reimburse the State of Pennsylvania for money expended for the payment of militia in the service of the United States.

St. Clair Flats.

The Detroit Board of Trade is soliciting the aid of Chicago and other cities and States around the Lakes to obtain a grant of $200,000, and an appropriation of $10,000 a year to cut and maintain a deep channel through the St. Clair Flats, and to erect and support additional lighthouses so that the passage may be made by night as well as by day. Before 1857 there was between seven and eight feet of water on the bar; in that year Congress voted $50,000, which was employed in making a channel nearly a hundred feet wide, with thirteen feet of water; and in consequence of this improvement a much larger class of vessels was constructed for the trade between Chicago and Buffalo; the carrying capacity being doubled. Since that time through neglect the new channe, has been filling up, and is now but fifty feet widel with a depth not exceeding 10½ feet. The effect is that trade is greatly impeded by tugs and vessels getting aground, lighter cargoes have to be carried, and heavy expenses are incurred, to the great damage of the commerce of Chicago and Lakes Michigan and Superior. It is said that 22,274 vessels pass through the channel during the season of navigation, carrying cargoes worth $440,000,000.

Opening of the New Railroad at Wilkesbarre.

The "back track" of the Lehigh Coal and Navigation Company's new railroad was formally opened on the 31st ult. by an excursion over the route. The excursionists met at the head of plane No. 1, on the top of the mountain, at which point the company had in readiness an engine and cars for their conveyance over the new road. The elevation above the level of the canal at this point is about 1,200 feet, whence the road, coursing northward along the summit of the mountain for a space, commences its gradual descent down its rugged sides at an easy grade until, winding around a prominence some distance above the town, it pursues a southward course until it reaches the valley.

The road is constructed upon a bed of solid rock almost the entire distance from the summit to the foot of the mountain, and the work of its construction was unusually heavy. The track was pronounced by competent railroad men to be unusually smooth for a new road. The train will commence running regularly over the new line in a few days.

☞ The Alexandria *Journal* says that a large force are at work laying down the ties and iron on the Alexandria, Loudoun and Hampshire Railroad, from Herndon's to Guilford Station, which were destroyed by the rebels. This will bring the road within nine miles of Leesburg, from which point stages will connect.

☞ Engineers are now making a survey of the branch road through Hamburg that is to connect the Reading Railroad at Port Clinton with the East Pennsylvania Railroad at Topton. As soon as the exact route is determined upon, the work of building the road will be commenced.

☞ The thousand shares required to organize the Dorchester and Delaware Railroad Company have been subscribed, and a meeting will be held in Cambridge, Md., on the 9th of May to elect a president, treasurer, and directors.

Railroad Earnings--Monthly.

The following is a statement of the business done by the Illinois Central Railroad for the month of March, 1866:

LAND DEPARTMENT.

Acres Construction Lands Sold	7,126.69 for	$76,902 82
Acres Int. Fund Lands sold	120.00 for	1,626 80
Acres Free Lands sold	680.00 for	8,079 80
Total sales during month of Mar., 1866	7,926.69 for	$86,609 42
To which add Town Lot Sales		1,595 00
Total of all		$88,204 42
Cash collected in March		$132,624 77

TRAFFIC DEPARTMENT.

Receipts from	Passengers	$206,127 42
do.	Freight	290,336 00
do.	Mails	6,358 33
do.	Rent of Road	4,000 00
do.	Other Sources	10,000 00
Total Receipts in month of Mar., 1866		$516,821 75
Total Receipts in month of Mar., 1865		591,917 43
Net increase in first quarter		$60,000 00

The earnings of the Pittsburgh, Fort Wayne and Chicago Railway for the month of Mar., compared with the same period last year, have been as follows:

	1865.	1866.
From freight	$494,305 36	$406,400 81
" passengers	331,253 65	224,019 40
" express matter	15,740 93	8,000 00
" mails	7,825 00	7,825 00
" rent of railway	7,083 34	7,083 34
" miscellaneous	1,375 14	1,061 49
Total	$857,583 42	$654,390 04
Earnings Jan. 1st, to Mar. 28	$1,226,231 92	$1,684,616 82

The earnings of the Cleveland and Pittsburg Railroad for the month of March, 1866, were:

From freight	$101,752 18
" passengers	60,533 84
" miscellaneous	4,500 00
" military	221 02
	$167,007 04
March, 1865:	
Freight, passengers, etc.	$209,930 11
Military	12,481 15
	222,411 26
Decrease	$55,404 22
Decrease in regular traffic	43,144 09

The Earnings of the Louisville and Frankfort and Lexington and Frankfort Railroads for February, 1866, were $34,869 09; and the expenses, $24,512 42—leaving a balance of $10,356 67.

The earnings of the Ohio and Mississippi Railroad line, from Cincinnati to St. Louis, for March were:

	1866.	1865.
Eastern Division	$191,826 89	$184,581 49
Western Division	134,409 32	129,332 63
Total	$326,236 21	$313,914 12
Increase	$12,322 09	

Comparative earnings from January 1, to March 31, inclusive:

	1866.	1865.
Eastern Division	$493,853 62	$477,618 43
Western Division	346,033 54	334,657 88
Total	$839,887 16	$812,276 31
Increase	$27,610 85	

The earnings of the Erie Railway for the month of March, 1866, including Buffalo Division, were $1,070,434 49
Corresponding month last year 1,331,124 90

Decrease $260,690 41

For three months ending March 31:

	1865.	1866.
January	$1,070,890	$1,187,188
February	1,011,735	983.855
March	1,331,124	1,070,434
Total	$3,413,739	$3,241,477
Decrease	$172,282	

The earnings of the European and North American Railway for the month ending March 31, 1866, were $10,447 37
Corresponding month of previous year 8,575 53

Increase $1,871 84

The earnings of the Hudson River Railroad for the month of March, 1866, were $500,806
Corresponding month of previous year 424,617

Increase $76,189

The earnings of the Detroit and Milwaukee Railroad for the month ending March 29, 1866, were $32,202
Corresponding month of previous year 28,767

Increase $3,435

Railroad Earnings.--Weekly.

The earnings of the Western Union Railroad, for the week ending April 7, 1866 $6,082 93
Corresponding week previous year 8,195 57

Decrease $2,112 64

Receipts from Jan. 1, to April 7:

1866	$126,490 72
1865	121,554 76
Increase	$4,935 96

The earnings of the Chicago and Northwestern Railway for the second week in April, 1866, were $120,102 73
Corresponding week of previous year. 107,220 93

Increase $12,881 80

The earnings of the Chicago and Rock Island Railroad for the 2nd week in April, 1866, were $51,878 00
Corresponding week of previous year 42,567 00

Increase $9,311 00

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Apr., 1866, were $101,600 00
Corresponding week of 1865 84,500 00

Increase $17,100 00

The earnings of the Chicago and Great Eastern Railway for 1st week in April were $23,288 00
Same period last year 19,917 00

Increase in 1866 $3,371 00

The earnings of the Michigan Central Railroad for the 1st week in April, 1866, were $78,851 00
Corresponding week of previous year 86,554 00

Decrease $7,703 00

The earnings of the Marietta and Cincinnati Railroad the first week in April, 1866. $23,045 00
Corresponding week previous year 19,479 43

Increase $3,565,57

Commencing 1st Jan. 1866 $280,844 00
Commencing 1st Jan. 1865 297,722 28

Decrease $17,878 28

The traffic of the Great Western Railway of Canada, for the week ending April 13th, 1866, were $79,926 91
Corresponding week of 1865 68,450 28

Increase $11,476 62

The earnings of the Grand Trunk Railway of Canada for the week ending April 7th, 1866, were $135,723 00
Corresponding week of previous year 132.605 00

Increase $3,118 00

Union Pacific Railroad in Colorado.

We observe that a deep interest is beginning to be displayed as to the best route through Colorado, and a correspondence has made its appearance which explains the views entertained on the subject. In a letter from Mr. Evans, Senator elect from that state, to Gen. Dix, President of the Union Pacific Railroad, dated Washington Feb. 6, he says:

I desire to call the attention of your company to the importance of a more thorough, careful and extended survey of the route for the Union Pacific Railroad that would pass through the Middle Park, and the wonderfully advantageous succession of valleys, thence westward through the Rocky Mountains to Great Salt Lake.

If my information regarding this route is reliable; and I believe it is; it has the advantage of passing much of the way through low valleys along the Bear, White, and Uitnah rivers, which extends for hundreds of miles in the right direction. It passes through a country abounding in timber, coal, and an abundance of pure water. It would pass through the rich mining country in Colorado, and also a region of thousand sof square miles, near the western line of Colorado, that is well adapted to grazing and agriculture. In other words, it is a route along which are the most abundant supplies of the necessaries for the construction and maintenance of a railroad.

From Denver to Salt Lake it is said that this route will be over one hundred and fifty miles shorter than that by way of Laramie Plains, and from the mouth of Cache la Poudre it is estimated that it would save one hundred miles in distance.

It is worthy of remark that the advantages of this route are such as to induce the Overland Stage Company to move its line to a new road, it is constructing for the purpose along it, which it is proposed to consummate at an early day. I understand that the chief objection to the adoption of this route for the Union Pacific Railroad is the difficulty of crossing the main range of the Rocky Mountains in entering the Middle Park. This difficulty, I have reason to believe, may be found much less imposing than the partial explorations that have been made would indicate. I am credibly informed that at several points between the head of the Arkansas river and of the Boulder Creek, are to be found places where the approaching valleys, on either side of the range, make it feasible to pass by a tunnel of but moderate length at a great distance below the summit of the range. This arrangement would avoid the snow that will inevitably obstruct the road on any route that crosses the range, on the surface. In this view of the case it is plain that a tunnel of moderate length is a desirable mode of passing the range instead of being objectionable, and when the great saving of distance through a mountain country, the advantages in the character of the country, and in the route already referred to, are taken into consideration, it would seem to be clear that the interests of the company, as the interests of the Government doubtless do, would call for a more thorough and careful survey of this route by engineers who will bring the skill, energy and earnest desire to success, to bear in finding a practicable passage.

To this Gen. Dix replied under date Feb. 1, as follows:

Your communication of the 5th inst. has been submitted to the directors of this company, and I am instructed to say to you that the project of carrying their road through the Central Park of Colorado, has engaged their attention for the last two years. While aiming to follow, in obedience to the act of Congress, "the most direct, central and practicable route," they have not been unaware of the importance of reaching, if possible, the district you refer to as abounding in mineral treasure and all those supplies which are necessary to "the construction and maintenance of a railroad," and of making it tributary to the great work they are engaged in.

I infer from your letter that you are advised of the surveys which have been made through Berthoud's Pass. During the last summer, examinations were made by Mr. Reed from the Southern extremity of Salt Lake eastwardly. We have not yet received his report, but we understand that the route was not feasible.

I have been in communication with Mr. Laman, who represents some railroad interests in Colorado; and Col. Seymour, our consulting engineer, has compared our surveys of Berthoud's pass with those made by engineers in the service of parties there. Between these surveyors there is no essential difference. No point of crossing the mountains in the direct course between Denver and the Salt Lake Valley has yet been discovered by our engineers, or suggested by others, more favorable than the Berthoud pass. At this point a tunnel would be required through granite three and a quarter miles long, the grade line of which is 1,882 feet higher than the grade line at the summit of the mountain on the Crow creek route, and 2,235 feet higher than the grade line at the summit of the mountain on the Cache la Poudre line, neither which last named routes require any tunnel. Besides the immense cost, the length of time required to excavate this tunnel would seem to forbid its adoption. In this connection it should also be stated that the great height of the mountain above the grade of the tunnel, which the profile in this office, made by Mr. Case, shows to be 1,280 feet, renders any temporary crossings of the creek scarcely feasible.

If any other pass promising a favorable route directly west from Denver shall be discovered, the Board will gladly cause it to be examined. But of the two years examination by our engineers candor compels me to express the belief that a railroad connecting Denver and the Salt Lake Basin must commence the ascent of the monntain at least as far north as the point where Cache la Poudre leaves the mountain and meets the level plain in the vicinity of Laporte.

Our line has not yet been definitely fixed as far as west as the 100th meridian, and careful surveys are yet to be made between that meridian and Colorado. Our present information in regard to our route through the Rocky Mountain range, seems to indicate the Cache la Poudre line as the most favorable; and should it be adopted, it is not doubted that we shall connect with Denver, and open the great mineral district west of that city to communication with the east. While the main purpose of the company is to reach San Francisco by the best route, it is our most earnest desire, not only for the benefit of the company but for the general advantage, to make the work subservient to the great interest, which have grown up in the intermediate territories.

Should you come to New York, I earnestly request that you will call at this office and examine our maps, which comprehend the whole mountainous district east of Salt Lake, and our profiles of such of the lines as we have now. In the meantime we shall be greatly indebted to you for any information in relation to the subject of your letter.

☞ The South Carolina Railroad, which was badly broken up by Gen. Shermen's forces, has been entirely re-built, and the company are now running trains both to Columbia and Augusta. The connection to the last named place was made on Thursday, the 5th inst.

Internal Revenue Decision.

Railroad companies will be interested in the following notice from the Deputy Commissioner of Internal Revenue:

"Section one hundred and twenty-two imposes a tax of five per cent. on all dividends and profits of such companies carried to the account of any fund or used for construction. As it was found to be impracticable for railroad companies to state their net gains as often as a dividend was declared, this office has not insisted upon its being done, but requires such statement to be made once a year, this being as often as the accounts of the company are settled. One return during the year on form No. 65 should show the net gains and profits over dividends declared for the entire year, and the tax should be paid on such profits. It will be observed that the amount of profits used for construction is subject to the tax of five per cent., the same as it were added to surplus or contingent funds."

Extension of the Concord and Claremont (N. H.) Railroad.

Very active efforts are now being made, with every prospect of success, to extend and complete the Concord Railroad from its present terminus at Bradford, to Claremont, on the Connecticut river. A correspondent of the Boston *Journal*, writing from Concord, says:

The advantages of this extension to the towns on and adjacent to the proposed route are sufficiently obvious. Claremont, with its numerous manufactories and extensive trade, is now *three* miles from a railroad. When this road shall be built it will have a direct connection with central New Hampshire, and be several miles nearer Boston than by way of the Sullivan, Cheshire and Fitchburg roads. Newport, with its large woolen and other manufactories, and its trade constantly increasing, would be put in railroad connection with the principal market and business centre of New England. Other towns along the route will be equally benefitted by finding an outlet for their agricultural and other productions. The value of real estate on the line of the road would be greatly enhanced, and other property would be proportionately increased in value. There is inexhaustible water power on Sugar river, which could be made available for an indefinite increase of manufactures.

But the great advatages of the road, in a business point of view, will be in making it a connecting link, in a through line, from Boston to all points West. The business men of Boston and vicinity know how seriously their interests have been affected the past season by delays in transportation from the West amounting to almost a blockade. What Boston needs most to-day is an increase in the channels of communication between itself and the West. And so the completion of the Concord and Claremont road will meet one of its greatest wants. The work on the completion once commenced, the Rutland and Burlington road will extend it to Cavendish, or some neighboring point on their road. Having struck that road a through line will be obtained by way of Rutland to any point West. The road can be built. Claremont has voted $100,000 in aid of the project. Newport, at its recent annual meeting, by an informal vote of a full meeting, agreed to raise the same sum. Other towns will contribute according to their ability. The roads connecting and the commercial men and capitalists who will be most benefited by it must make up the rest.

It will cost less and can be built and ready for use at an earlier date than any other road proposed as a connection with the West. The grading will be easy, the only considerable cut being at the summit between Connecticut and Merrimack rivers in Newbury, and this by no means difficult. The distance from Bradford to the Connecticut river is about thirty miles, and from the Connecticut river to a point on the Rutland and Burlington road twenty miles at farthest, making a distance of only fifty miles of construction. The route proposed from White River Junction, by way of Woodstock, Vt., to Rutland, would be greater in distance, more expensive in construction, could not so soon be ready for use, and if used as a link in a "through line" would make the distance from Boston to points West greater than by the route proposed here. The route by way of Hoosac Tunnel cannot be completed for many years to come, if ever. Enough money has been expended upon the tunnel to build several such roads as the Concord and Claremont, and it will take millions more to complete it. As a road which can be cheaply constructed and ready for early and immediate use, no route can compete with the Concord and Claremont, and no other link can so soon as this afford an opening to the increase of trade and communication between Boston and the West.

Western Maryland Railroad.

A meeting of the stockholders of this company will be held at Westminster, Carroll Co., Md., on the 15th of May, to take action upon one or more of the acts passed at the late session of the General Assembly of Maryland; also, the adoption of a code of by-laws; also, the ordinance recently passed by the Mayor and City Council of Baltimore, providing for a subscription to the stock of the company; also, any orders of the County Commissioners of Washington County in relation to the construction of the road of the company and subscription to its stock; also, the election of two additional Directors, citizens of Washington County.

☞ The British revenue returns for the year ending 31st March have just been published. They show the following aggregates:

	1864–'5.	1865–'6.
Customs	£22,572,000	£21,276,000
Excise	19,558,000	19,788,000
Stamps	9,530,000	9,560,000
Taxes	3,292,000	3,350,000
Property tax	7,958,000	6,390,000
Post-office	4,100,000	4,250,000
Crown lands	310,000	320,000
Miscellaneous	2,999,436	2,878,292
Grand total	£70,313,436	£67,812,292

☞ It appears from a communication prepared at the War Department in reply to a resolution of the House that the Illinois Central Railroad Company, received from the United States for transportation of troops and supplies, from March, 1862, to April 1865, $2,592,156, and from other roads $332,113. The company paid to these other roads $876,432. The net revenue received by the Illinois Central Railroad Company within the above named period was $2,047,838.

☞ The following is stated to be the total amount of vacant public lands in the Southern States; Alabama, 6,732,058 08 acres; Mississippi, 4,760,736 03; Louisiana, 6,228,102 45; Arkansas, 9,298,012 70; Florida, 19,379,635 61.

☞ Mr. Wheelwright, of Newburyport, Mass., is still at work upon his great enterprise, the construction of a railway from the River Platte across the Andes to the Pacific, and is confident that it will be completed within the next ten years. Already two hundred and forty miles of the route are in the course of rapid construction from the port of Rosatio to the interior city of Cordova.

☞ A joint resolution has passed both Houses of the Wisconsin Legislature, instructing representatives to favor the construction of the Northern Pacific Railroad.

Journal of Railroad Law.

The case of Wm. H. Lovett *vs.* Salem and South Danver Railroad Company, recently decided in Massachusetts involves the question whether, if a child of tender years wrongfully gets upon the platform of a car, and is not immediately expelled therefrom, the driver may afterwards expel him while he is driving at such a rate of speed as to make it dangerous for the child to leave. The opinion was written by

CHAPMAN, J.—The defendants' objection that the plaintiff has set forth his cause of action in more than one count is not valid. It was provided by the statute 1851, C. 233, §2, that "one count and no more," should be inserted in the declaration for each cause of action. But in the revision of this act in 1852, this provision was changed. By statute 1852, C. 312, §1, "one count only need be inserted for each cause of action." This language does not restrain the plaintiff from inserting more than one, if he deems it expedient to do so, but leaves it at his option. It was clearly intended to alter the statute of the previous year in this respect.

Under the instructions of the Court the jury must have found that though the plaintiff was wrongfully upon the defendants' car, the driver ordered him to get off from it, intending thereby to make him leave it while in motion; that the plaintiff, by reason of being so ordered, left the car while it was in motion, and was thereby injured; and that in getting off he used ordinary care.

If the plaintiff had been a person of mature age, the mere words of the driver could not have been regarded as equivalent to a forcible ejection of the plaintiff from the car at a time when it was dangerous to leave it. For such a person might have exercised his own judgment as to the peril he might incur in attempting to obey the order. But the plaintiff was a child about ten years of age. His obedience would be naturally expected without regard to the risk he might incur; and in respect to a child so young, the command would be equivalent to compulsion. As he was in fact badly injured, though it is found by the jury that he used due care, it is plain that the car was moving at such a rate that the attempt to get off was dangerous. The case therefore presents the question, whether, if a child of such tender years wrongfully gets upon the platform, and is not immediately expelled, the driver may afterwards expel him while he is driving at such a rate as to make it dangerous for the child to leave; or whether he must not first stop the car, or slacken its speed to such a degree that the child may leave the car in safety, provided he uses due care. It is different from the question what he might do for the purpose of preventing the child from getting on, or forcing him back immediately after he came upon the platform; and that subject need not be discussed here.

It was the right as well as the duty of the driver to protect the property of the defendants which had been intrusted to his care and management. But it is said in Bird *vs.* Holbrook, 4 Bing., 628, that for the protection of property no man has a right to resort to violence greater than the occasion requires. In 1 Hilliard on Torts, 2d ed., 160, the law applicable to this subject is stated as follows: "The fact that a plaintiff is a trespasser or violator of the law does not of itself discharge another from the observance of due and proper care towards him; or the duty of so exercising his own rights as not to injure the plaintiff unnecessarily. Neither will it necessarily preclude the plaintiff from a recovery against a party guilty of negligence." The case of Norris *vs.* Litchfield, 35 N. H., 271, and Kerwhacker *vs.* Cleveland, &c., Railroad, 3 Ohio, (N. S.,) 172, contain a full discussion of the doctrine, and a reference to the authorities. In Barnes *vs.* Ward, 9 C. B., 420, it is said that a trespasser is liable to an action for the injury which he does, but he does not forfeit his right of action for an injury sustained by him. These doctrines must be regarded as unreasonable. If, for example, a person were to go on board of a ship just ready to set sail, it would be very unreasonable to hold that, because he was there without right and as a mere trespasser, the master might compel him to leave the ship by jumping into the sea several miles from the shore. It must be admitted that this is an extreme case, but on the same principle it would be unreasonable to hold that when the driver of the defendants' car found the plaintiff riding upon the platform as a trespasser he might compel him to leave while he was driving at such a rate as to make the act dangerous. The plaintiff was liable to an action for the trespass committed by him, and he was liable to be removed; but it was not necessary or reasonable that the right of removing him should be so exercised as to expose him to personal injury. For the negligence of the defendants' servant in this respect, they are liable. It was in his power, by reasonable efforts to make it safe for the plaintiff to obey him, and he ought to have used such efforts.

It does not appear that the plaintiff participated in this carelessness. If we assume that he was not only guilty of a trespass, but of carelessness in getting upon the car, yet that carelessness was past, and he was riding in safety; so that his injury as a proximate cause. In leaving the car he acted by constraint.

The doctrine that a party cannot recover in a case where he must trace his title to recover through his own illegal act, as stated in Way *vs.* Forster, 1 Allen, 408, and the other cases cited by the defendants' counsel, is not applicable to such a case as this. The cause of action is the wrongful act of the defendants' servant in compelling the plaintiff to leave the car while he was driving at such a rate that, though the plaintiff used due care, the act of leaving caused an injury to him. The plaintiff's trespass is a separate matter.

It is contended that the parents of the plaintiff were guilty of negligence in permitting the plaintiff to be abroad at that time. But the Court cannot know this judicially. The question whether a boy of that age has sufficient capacity to take care of himself should be left to the jury.

Exceptions overruled.

☞ The receipts of the Lynn and Boston Railroad from December 1, 1865 to March 31, 1866 were $44,501 76. In the corresponding period of the preceding year, they were $35,141 78. The paid in capital stock of this road, is $200,000; the total debt, $104,259 29; length of railway, 10¾ miles; dividends paid in 1865, $8,421 05, or four per cent. and Government tax.

☞ The Charleston and Savannah Railroad has been declared insolvent. Its total indebtedness is over $2,200,000, while its assets are only $1,865,000—and $500,000 will be required to repair the road.

☞ The city treasurer of St. Paul has submitted his annual report; from which it appears that the receipts the past year were $98,292 78. The disbursements were $97,950 33. The estimate of expenditures for the ensuing year is $118,700. The anticipated assets are $83,000.

FOR SALE,

1,000,000 CHESNUT AND OAK RAILroad Ties. Will sell in lots to suit purchasers, delivered in amounts by the month, and cut in lengths to suit broad and narrow guage tracks. Address

JOHN W. KESTER,
328 Walnut St., Philadelphia, or
Astor House, New York.

FOR SALE

LOCOMOTIVE ENGINES,

One 14x24, 6 ft. drivers.
One 14x24, 5½ ft. drivers.
One 14x24, 5 ft. 2 in. drivers.

American Railroad Journal.

New York, Saturday, April 28, 1866.

Burlington and Missouri River Railroad.

We learn from the Burlington *Hawkeye* that the work upon the extension of this road is being prosecuted with vigor. The company have just received three new powerful locomotives from the Manchester Locomotive Works, at a cost of about $20,000 each; also a large number of freight and open cars. The increased business and prospective extension of the road farther west, render an increase of rolling stock necessary. Work on the Des Moines River Bridge and the grading each side of it is being prosecuted with vigor, and it is not doubted but the road will be completed to Albra before the 1st of October. It is thought that the first sixteen miles west of Ottumwa will be in running order as early as July.

Mississippi and Missouri Railroad.

In November last the stock and bondholders of the Mississippi and Missouri Railway, held a meeting, and appointed a committee to ratify the sale of their road, equipments and lands to the Rock Island Company for the sum of $5,500,000, payable chiefly in the bonds of the company. This has now been entirely consummated, and the bonds will be distributed among the holders of the Mississippi and Missouri securities. The stock is put in at 16 per cent., land grant bonds at 70, and the first mortgage bonds of the Eastern Division at par and accrued interest. The other securities get from 32 to 70. This gives the Rock Island nearly a half million acres of land, beside the road and equipments, at much less than the original cost.

An Important Decision.

Chief Justice Woodward recently delivered an important opinion in the case of Waterman & Beaver against the Reading Railroad Company. The constitutionality of the ninety-seventh section of the act of Congress of June 30, 1864, commonly called the "excise law," being conceded, or rather not questioned, I am of opinion that the contract of the parties, though made before the law was passed, is within the purview of the ninety-seventh section, and that the iron manufactured under that contract is subject to the excise duties imposed by the act.

By the act of July 1, 1862, railroad iron was subject to a duty of one dollar and a half a ton, and pig iron, when used by the manufacturer in making rails, was, I suppose, exempted from assessment by virtue of the 73d section of that act. But by the act of 1864 pig iron is subject to duty—two dollars per ton—and the tax on railroad iron is raised to three dollars the ton; and one of the provisos of the 94th section (which is the section that imposes these taxes) reads as follows: "Provided that castings of iron and iron of all descriptions advanced beyond pig iron, blooms, slabs, or loops, shall be assessed, and pay in addition to the foregoing rates of iron so advanced, a duty of three dollars per ton." The meaning of this legislation is that pig iron should pay a duty of two dollars the ton, and that railroad iron manufactured out of pig iron that has paid that duty shall itself be assessed with three dollars the ton, but that railroad iron made of pig iron that has not been assessed shall pay six dollars the ton.

As there was a large amount of pig iron on hand when the act of 1864 was passed, which was not likely to be returned for assessment, the Legislature probably meant by the proviso to tax it in the form of rails, and as an inducement to manufacturers of rails to return their pig iron for assessment, the proviso makes the tax on rails something higher than it would be if duty were paid on the pigs. It takes one ton and seven twenty-fourths of a ton of pig iron to make a ton of rails. At two dollars per ton the pig iron that

enters into a ton of rails would pay about..	$2 65
Add the duty on the rails....	3 00
And we have....	$5 65
But if the $2 65 be not paid on the pig iron, the rails shall pay per ton....	6 00
Add difference of tax per ton of....	35

The plaintiffs are manufacturers both of pig iron and railroad iron. They contracted with the defendants in February, 1864, to manufacture and deliver 4,000 tons of rails, of which 1,652 16-80 were by the terms of the contract to be delivered, and were actually delivered, after the 1st of July, 1864, the date of the act of Congress. These rails were manufactured out of pig iron, which the plaintiffs also manufacture, but whether before or after the date of the law is not ascertained in the case stated. It is admitted, however, that no duty had been paid on the pig iron that entered into these rails, and it is earnestly argued that no duty was assessable under the act of 1864, because this pig iron was neither sold nor insured or used by the manufacturer. Pig iron is undoubtedly an article of commerce, and it is equally certain that it was not sold as pig iron in this instance. But under the 94th section of the act it was taxable if "used by the manufacturer thereof." These are the very words of the enacting clause. And can it be doubted that a manufacturer uses the pig iron when he converts, or to use a statutory word, advances it into railroad iron, and then sells the rails? Pig iron is never used without conversion, or advancement into some other form of iron. Such conversion is, indeed, the only use of which it is susceptible, and I hold that the plaintiffs "used" their pig iron within the meaning of the statute when they made rails of it.

This conclusion, sufficiently supported by the words of the 94th section, is strongly corroborated by the 83d and 86th sections of the same act. Then it should have been returned for assessment, and should have paid the prescribed duty of two dollars the ton; but as no duty was assessed or

paid upon it, the rails manufactured out of it are within the terms of the proviso to the 94th section, and liable to "pay in addition to the foregoing rates of iron so advanced a duty of three dollars per ton." That is, the rails are subject to a duty of six dollars per ton.

It was suggested that if the plaintiff, through neglect of a public duty, had subjected the defendants to a higher rate of taxation than was necesary, the plaintiff should bear the loss. However equitable this might be, I have no power, under the case stated, to adjust the equity, I am only empowered to enter judgment for one of several fixed sums of money according to the view I may take of the meaning of the several provisions of the statute bearing on the subject.

Having endeavored to express very briefly my understanding of the statute in the particulars in question, it is apparent that judgment must be entered for the largest sum mentioned in the case stated.

Now, to wit, February 20, 1866, judgment is rendered for the plaintiffs for the sum of $8,909 91 and costs.

Michigan Southern and Northern Indiana Railroad.

The following is a comparative statement of the earnings and expenses of this road for the fiscal years ending February 28, 1865 and 1866:

Earnings:	1865.	1866.
From freight	$2,242,972 10	$2,455,402 68
" passengers	1,875,061 50	2,021,246 87
" mails	53,843 75	54,786 24
" express	74,385 56	101,556 19

Compared with the previous year the gross earnings show an increase of $396,979 29, with an increase in expenses of $341,304 76—making the increase in net earnings $55,674 53.

Of the increase of gross earnings, $146,185 37 is from passengers, $212,430 58 from freight, and $38,363 34 from miscellaneous sources.

The proportion of operating expenses to earnings, in 1865–'66 was 59 per cent. In 1864–'65 it was 56.14; in 1863–'64, 51.80; in 1862–'63, 48.50.

Of the gain on freight earnings, about 94 per cent., and on passenger earnings about 62 per cent. was from local business, 65.95 per cent. of the total tonnage was carried eastward and 34.05 per cent. westward; the gain on eastward being 5.6, and on westward 12.7 per cent. The through freight business formed 37.1 per cent. of tonnage and 44.4 per cent. of earnings. Of the passenger earnings, 45 per cent. was derived from through business, and 55 per cent. from way.

The payments for improvements and extraordinary expenses have been $461,645 74; taxes of all kinds, $206,991 24—total $668,636 98. The report says:

It will be noticed by reference to the tables following,* that the earnings up to and including November, show a large increase over the corresponding months of last year; while on the other hand the income of the last three months of the fiscal year shows a marked decrease. In making the comparison it must be remembered that during January and February, 1865, the "passport" system was in force and nearly the entire travel following the chain of Lakes was thrown upon this line. This season there has been no interruption to the successful working of the north shore line; the usual proportion of travel having passed through Canada. The general business of the West has been much depressed, and military transportation, which has been a large item during the war, has of course ceased. The foregoing reasons, in addition to the fact that for the most of the winter the price for eastward bound freight has been only about one-half the rate per ton it was last season, will account for the deficiency in the income of December, January and February. The indications thus far, however, do not show that this falling off is likely to prevail hereafter, as the earnings, so far as we have advanced in the new fiscal year, since March 1st, show a gain over the corresponding period of last year.

* See Table of Monthly Earnings p. 401.

The supplies on hand were this year inventoried at greatly reduced values from the inventory of last year, which was made at the then prevailing war prices. The consequent reduction of $123,348 11 in the assets is more apparent than real, and had the supplies on hand been inventoried at rates as high as last year's, the table of "Available Assets," amounting to $747,284 94, would have been larger than it is by nearly the amount of the apparent reduction, and our available means would have appeared larger by a like amount.

At the beginning of the fiscal year just closed, the company was contesting several suits brought by holders of the guaranteed stock for back dividends, claimed from the date of issuing the stock to the time when we began the payment of dividends thereon.

The proposition made for a settlement with guaranteed stockholders, as set forth in our last annual report, was not acted upon in consequence of the company being restrained therefrom, as was therein stated, by an order of the court. When, after argument and several months delay, a decision of the court was had dissolving the injunction, the guaranteed stockholders who had previously assented to the terms of the proposition, refused to accept of the same. New terms were made and during the year the company settled with some of these parties, paying them as a compromise a portion of their claim (40 per cent. in lieu of the amount claimed) in common stock. The same terms were then offered to all the holders of the guaranteed stock and to March 1st have been accepted by them to the extent of 17,065 shares.* The guaranteed stock so settled was termed *assented* stock. The direction then offered to all holders of the assented guaranteed stock the opportunity of converting their stock into common stock, the company paying prior to Feb. 1, 1866, 35 per cent. in cash, and since 1st February 30 per cent.,† as premium to the guaranteed stockholder for making the conversion. This offer has to March 1st been accepted to the extent of 10,939 shares,‡ the parties whose suits for back dividends had been settled being among those who accepted the conversion. These settlements and conversions increased the issue of common stock by 17,682 shares, and diminished the guaranteed stock by 10,939 shares which were cancelled.

Another large claim against the company of many years standing was that of the holders of $200,000 of the bonds of the Cincinnati, Peru and Chicago Railroad Company on a guarantee of the same by this company. In settlement of this claim this company offered as a compromise to the holders of the C. P. & C. bonds, ten shares of our common stock for the extinguishment of each $1,000 bond of the guarantee. These terms have to date been accepted by the holders of 77 of the bonds and the guarantee cancelled accordingly by an issue of 770 shares of the common stock.

The settlements so far as made of the vexed questions of back dividends on the guaranteed stock and the guarantee of the Cincinnati, Peru and Chicago Railroad bonds, have to that extent released the company from the last of the heavy burdens imposed upon the road in its infancy and the prospects for the common stock as an income yielding property are no longer impaired thereby. Whatever claims may now remain unsettled are comparatively trifling in amount and therefore need be no subject for apprehension, as they cannot divert any considerable amount of earnings from the channel of dividends.

A liability involving a ten per cent. perpetual charge upon nearly three millions of dollars, which required annually to be satisfied before the common stockholders could enjoy a dividend, was deemed so onerous a burden as to justify the management in the measure taken to extinguish or reduce, as far as possible, that liability.

The money received from net earnings and ex-

* 475 Shares have been assented since March 1.

† Later, since March 1st the rate of premium paid has been reduced to 25 per cent.

‡ 200 Shares more have been converted since 1st March.

pended in additional equipment and depot accommodations required by the increased business of the road, that invested in the Union Stock Yards at Chicago, and that expended in purchasing and cancelling guaranteed stock and effecting conversions of the same into common stock, in the aggregate amount to a fund sufficiently large for a liberal dividend on the common stock, as may be seen by reference to the tabular statement entitled "Disposition of Resources."

The company holds unsold over $800,000 of its bonds properly applicable to the expenditures above recited. The negotiation and sale of these bonds will set free, the necessary amount of the earnings money for eight per cent. of dividends on our stock, viz: two semi-annual dividends of four per cent. each to be paid during the present year.

The expenditures above recited being clearly for the benefit of our property in the future and but a small per centage of them enuring to the advantage of the stockholders of the current year, it is manifestly unjust that the entire cost should be borne by them. This is especially the case in view of the fact that the heavy liabilities which formerly threatened the company have been removed, as above stated, and no necessity now exists for husbanding a fund of net earnings for meeting possible contingencies of heavy payments therefor in the future.

As will be seen by reference to our last Annual Report, the sale of these bonds for the purpose of covering the cost of this class of expenditure was then contemplated. It was not intended at the beginning of the year that the stockholders of the current year should bear the burden of the entire cost of the year's permanent improvements, while we had on hand bonds available for that purpose. The depressed condition of the railroad bond market alone prevented the sale of the bonds and the distribution of a like amount of earnings money in dividends.

After the sale of the bonds on hand and the completion of all the settlements in progress, the aggregate liabilities of the company will be less than they were in 1860, with amount of gross and net earnings more than double what they were then, and equipment and permanent improvements added and paid for doubling the productive capacity of the road.

The Commissioners of the sinking fund have added 133 bonds to the fund during the year and now hold 1,017 of the sinking fund bonds, cancelled and withdrawn from issue.

In September last, this company joined an association in connection with the roads from Toledo to New York and Boston, *via* Albany, to establish a line of freight cars to run without change between Chicago and the seaboard. This organization known as the "Red Line," operated under the direct control of a Board composed of the Presidents of the companies in interest, has proved a complete success, and is filling a need long felt by the business community. The cars have been run with great regularity and promptness and being owned by the several roads, the profits arising from the business go directly into their treasuries.

The Union Stock Yards of Chicago, in which an investment of $150,000 has been made by this company, were opened for business January 1st. The enterprise promises to fully meet the expectations of its most sanguine friends, and it is believed that the advantages afforded by it will tend to the concentration of the live stock business at Chicago, making it the great stock market of the West. As an investment for income it is believed that no disposition could have been made of this amount of its means that would have proved more profitable to the company than will this amount invested in the Union Stock Yards.

Preparations have been made to commence in the opening of Spring, the much needed improvements in Chicago. It is intended, in common with the Chicago and Rock Island Railroad Company, to remove the main track from Clark street as far south as Twelfth, the right of way having been obtained; and to build a convenient passenger station. $33,519 55 has been paid during this year for real estate for these purposes and about $30,000 remains to be paid under contracts for which titles have not been perfected. The Board is of the opinion that no stockholder who is familiar with the situation will complain of this outlay. It will probably be also necessary to provide in the coming summer some further freight accommodations in Chicago to meet the requirements of the business.

The attention of the stockholders is called to the Reports of the General Superintendent and Chief Engineer, herewith annexed. It will be observed that a liberal outlay has been made upon the buildings, road and rolling stock; 141½ miles of track have been relaid with new, rerolled, or repaired iron; the bridges, fencing and other works have been well maintained; the sum of $42,366 52 has been expended in the construction of new buildings, and the value of the locomotives and cars has been fully maintained.

Both safety and economy requires that a large outlay should be made for iron during the coming year, to replace that which is becoming unfit for use. We find in common with other roads, that the quality of much which has been laid down in the last few years proves very unsatisfactory.

The rolling stock has been increased by the addition of four locomotives, and the car equipment of the road has been greatly increased in value by the substitution of new for old and worn out cars.

In addition to the four engines added to the equipment during the past year, three engines have been contracted for to be delivered early in the present year.

Present indications induce the belief that the business of the road in the future will be large and profitable to its stockholders.

The assets and floating liabilities of the company March 1, 1866, were as follows:

Assets.

Cash in New York		$17,836 58
" Toledo		17,794 00
Uncollected earnings		140,055 58
Freight over charges due		18,219 29
Bills receivable at Toledo		2,591 24
Individual accounts Toledo		3,762 91
Supplies on hand		547,024 74
		$747,284 34

Floating Liabilities.

Bills payable in New York	$310,000 00
" Toledo	25,000 00
Unclaimed dividends	26,868 49
February expenses & other payments	302,197 33
	$663,970 82

The apportionment of freight and passenger earnings of main line and branches for the year 1865–'66, was as follows:

	Passenger.	Freight.
Main Line	$1,468,027 40	$1,841,279 15
Air Line	172,532 35	288,444 09
Detroit, Monroe and Toledo	212,934 10	181,687 18
Jackson Branch	53,054 75	47,913 69

Military transportat'n	71,554 17	.....
Storage account	.....	44,470 01
	$2,021,246 87	$2,455,402 68

The total number of passengers carried eastward, was 437,724; do., westward, 477,751—total, 915,475, of which 142,699 were through, and 772,776 way. Of the through passengers, 103,618 were 1st class; 23,677 2d class, and 15,404 3d class, yielding $879,907 49. Of the way passengers, 770,289 were 1st class; 1,414 2d class, and 1,073 3d class, yielding $1,089,785 21. The number of miles traveled by through passengers was 35,105,489; by way passengers, 34,372,898—total, 69,478,387; an increase as compared with the previous year of 84,110 passengers, and of mileage 8,005,843.

The number of tons of through freight movpe eastward, was 137,636; do., westward, 73,508—total, 211,144, yielding $1,069,954 22. Way freight moved eastward, 237,862; do., westward, 120,334, —total, 358,196, yielding $1,385,448 46. Total tons through and way eastward, 375,498, yielding $1,489,726 69; do., westward, 193,842, yielding $921,205 98—the total tonnage being 569,340, against 527,501 the previous year, and the revenue therefrom, as above, exclusive of storage, $2,410,932 67; a gain, as compared with the previous year, of $204,520 63, or 9.27 per cent. Total mileage of freight, 83,044,900, viz: eastward, 55,163,402; westward, 27,881,498.

The equipment of the road consists of 98 locomotives; 60 1st class, and 10 2d class passenger cars, 2 sleeping, 22 baggage, 2 paymaster, 4 military, 19 drovers, 4 emigrant, 25 caboose, 185 stock, 857 box, 290 platform, and 2 wrecking cars.

Number of miles run by passenger trains, 838,778; by freight trains, 1,131,562; by wood and gravel trains, 211,275—total, 2,181,615, a decrease from the previous year of 5,509. Cost of repairs per mile run 10.80 cent.

Journal of Railroad Law.

LIABILITY OF CARRIERS FOR LOST FREIGHT.—MEASURE OF DAMAGES.

The case of Rowe *vs.* Steamship City of Dublin, &c., decided in the United States District Court, Brooklyn, last week, although relating to common carriers by water, is of equal interest and importance to railroad companies and other carriers. The opinion was by

Bennedict, J.—The proofs introduced by the respective parties lead me to the conclusion that the delay in the delivery of the case of goods must be held to have arisen from the neglect of the carrier. The case, as the bill of lading shows was plainly marked upon its covering when it was shipped, and it was also described by measurement. Cases of this kind, the dock agent of the vessel thinks, are usually marked upon the box as well as upon the covering, but the weight of evidence is that marking the covering is the more usual and a proper method of marking such merchandise. It seems to me that the interests of both merchants and shipowners require greater attention to missing cargo than is here shown. The evidence is that the case could have been found, examined and identified, and delivered within a day or two by prompt attention, and such attention the shipowner was bound to give. Upon this branch of the case my conclusion, therefore is, that there was such neglect on the part of the carrier in regard to this shipment as to make the vessel responsible for any damages caused by the undue delay. This conclusion in no way conflicts with the doctrine laid down by the New York Court of Appeals, in the case relied upon by the respondents, (Wilbert *vs.* New York and Erie Railroad Company—2 Kern, 245). That was a failure to transport within the ordinary time of running a freight train, and the cause of the delay was that the amount of merchandise offering for transportation at the same was beyond the capacity of the road to transport as fast as received. And the Court held that the carrier having provided all the trains that could be safely run upon the road, and having used all possible exertion to forward the merchandise, was not chargeable with neglect. Here the delay did not arise in the course of the transportation—that was duly accomplished—but after the merchandise had arrived at the place of delivery, and when there remained upon the carrier only the obligation to land and deliver, and when ordinary care on the part of the carrier would have insured the successful performance of his contract, the merchandise is sent to public store and allowed to remain there some twenty days before notice of its whereabouts is given to the consignee. No law laid down by the Court of Appeals in the case cited by the respondent would seem to excuse the carrier in a case like the present. There remains the question whether it has been made to appear by the libelant that he has sustained any loss which can be recovered as damages caused by the undue delay. The evidence upon this branch of the case is that the case in question contained braid composed mostly of gold tinsel, designed for the manufacture of ladies' hats, and that it was imported by the libelant to be sold by him at wholesale to the trade; that no change in the value of the article arose until the 5th day of October when, its value was diminished over fifty per cent. by reason of the fact that the season for disposing of the article to the trade then ended. This diminution of value is the loss which the libelant claims to recover. The respondent insists that such a loss if proved is remote and cannot be recovered as a damage caused by the failure of the carrier to deliver promptly, and to sustain this view the opinion of the Supreme Court of the State of New York in the case of Jones *vs.* The New York and Erie Railroad Company (29 Barb. 633) is cited, while in support of his demand the libelant cites the opinion of the Supreme Court of New York in the case of Kent *vs.* Hudson River Railroad (22 Barb. 278.) I do not consider it necessary, however, in the present posture of this case, to pass upon the question which was raised and decided in these two conflicting cases, and which was also passed upon by the learned Judge Betts, in the case of the *Lexington*, where, in a similar action, the District Court of the United States gave a decree for the difference in the market price of some seed which had been stored by a carrier without notice of arrival to the consignee, and so not received until a delay of some days had arisen; from what the Court, in that case, held to be a neglect of the carrier, for the evidence offered here presents a different question. In the cases above referred to the market value of the butter, sheep and seed in controversy there upon the day of arrival was dependent upon many contingencies which do not present themselves in the present case. In these cases the market value proved might have been affected by the arrival or non-arrival of the very parcels in question, the price might have gone up in spite of the delay and so the detention been productive of benefit instead of loss to the freightor. In this case no possible advantage could accrue to the libelant by the delay. The arrival or non-arrival of this merchandise would not prevent the termination of the season and with it the end of that demand of the trade to supply which the article was imported. What the libelant claims here is not a loss of profit, but that he lost the opportunity to dispose of his goods at all in the manner and for the purposes for which they were imported. The only circumstance which caused this loss was the lapse of time, extending beyond the season up to Oct. 5. There was no diminution of value. After that, the article had no exchangeable value in the ordinary course of trade as an article required for the manufacture of ladies' hats, but was only valuable as an article to be held over to the next season or to await the chance of finding an out-of-season customer. The diminution of value was a certain result of such delay in regard to an article like this. And I can discover no element mingled with the delay as a cause of the loss. It arose from the delay, and from nothing else, and was its natural and immediate result. A case very like the present is reported in 99 Eng. Com. Law R. p. 631, (Nelson *vs.* The Lancashire and Yorkshire Railway Company, 9 J. Scott, N. S. 632). Then the action was for undue delay in delivering a quantity of cloth, ordered by a manufacturer of caps, which failed to arrive in time to be made up so as to fill the orders of the season which his travelers had obtained; and the Court, while they disallowed all profit which would have arisen from the sale of the caps had they been made—allowed to the plaintiffs the diminution of exchangeable value of the cloth caused by failure to arrive in time to be made up for the season. The case put by Williams, J. of an order of ribbons intended to be sold at a fashionable watering-place, which should be delayed until the watering season was over, so that the opportunity of their sale is lost, and as their novelty and fashion are gone, they remain on hand materially diminished in value, seems to be on all-fours with the case presented by the libelant. The case before me, therefore, as it now stands, I consider to be free from the objections raised by the respondents, and to disclose a positive loss to this libelant, which can be recovered in an action like the present as the immediate result of the carrier's neglect. The decree must be for the libelant, with an order of reference to ascertain the amount of damage sustained. I do not consider that either party is excluded by the evidence given on the hearing from introducing before the Commissioner any evidence pertinent to the question of damages, and intend now to do nothing more than to declare the rule of damages applicable to the evidence produced before me.

Use of Steel in Railway Construction.

Steel is now being substituted for wrought iron in almost every department of railway construction. The Boston *Commercial Bulletin* says that "very heavy orders have recently been given out, by railway companies, for Bessemer metal in various forms. During the last six months a single firm, Messrs. John Brown & Co., Sheffield, England, have undertaken to supply about 10,000 tons of Bessemer steel rails to various roads, among others to the Pennsylvania, the Erie, New York and New Haven, Philadelphia, Baltimore and Washington, Philadelphia and Reading, Baltimore and Ohio, Lehigh Valley, Chicago and Northwestern, Chicago, Alton and St. Louis, Indianapolis and Cincinnati, Little Miami, Cleveland, Columbus and Cincinnati, Michigan Central, Chicago, Burlington and Quincy, Chicago and Rock Island, New Jersey Railroad and Transportation Company, and Delaware, Lackawanna and Western."

Northern Pacific Railroad.

Quartermaster General Meigs has written a long and able letter showing the advantages to be derived from the speedy construction of the Northern Pacific Railroad, upon which letter Lieut. Gen. Grant has placed the following indorsement:

Headquarters Armies of the United States, April 20, 1866.

The construction of a railroad by the proposed route would be of very great advantage to the Government, pecuniarily, by saving in the cost of transportation to supply troops, whose presence in the country through which it is proposed to pass are made necessary by the great amount of emigration to the gold bearing regions of the Rocky Mountains. In my opinion, too, the United States would receive an additional pecuniary benefit by the construction of this road, by the settlement it would induce along the side of the road, and consequently the less number of troops necessary to secure order and safety. How far these benefits should be compensated by the General Government beyond the grant of land already awarded by Congress I would not pretend to say. I would merely give it as my opinion that the enterprise of constructing the Northern Pacific Railroad is one well worth fostering by the General Government, and that such aid could well be afforded as would insure the early prosecution of the work. U. S. Grant, Lieut. General.

Boston and Lowell Railroad.

The receipts from operations of this road for the years ending September 30, 1863, 1864 and 1865, have been as follows:

	1863.	1864.	1865.
From passengers	$208,291 86	$286,636 30	$355,024 48

" equipment	27,609 42	33,842 33	54,824 26
" buildings, etc	6,397 54	21,908 72	20,658 65
Train expenses	13,317 78	17,153 64	21,405 10
Station "	15,057 26	16,878 57	20,790 22
Fuel	18,801 95	16,258 66	25,595 48
Oil and waste	3,597 21	3.511 23	6,043 34
All other expenses	9,452 26	20,605 60	24,645 40
	$149,003 46	$211.297 63	$270,393 93
Net earnings	$174,028 49	$190,726 63	$219,201 09
Miles run	186,240	176,266	171,568
No. of passengers carried	107,552	152,989	173,442
Tons of freight transported	62,155	75,951	73,197

The equipment of the road consist of 13 locomotives; 15 passenger, 5 baggage, 2 saloon, 97 covered freight, 88 platform, 33 cattle and 1 derrick car; 5 snow plows and 2 snow track clearers.

The standing of the company is shown by the accompanying General Account. Of the Million Loan Bonds, A. & K. R. R. Co., $14,900 are outstanding, and are to be taken at par in exchange for other bonds. The bonds of $350,000 loan are over due, and are to be paid in cash, or by exchange for other bonds. The stock bonds are convertible into stock at maturity. All of the $500,000 loan have become due except $68,200 which will mature previous to Jan. 1, 1866; $304,800 have been converted into stock. All of the $360,000 loan have become due, and $83,600 have been converted into stock; of this loan only $210,000 were issued. The $1,100,000 loan bonds were issued from Aug., 1860, to Sept., 1861, on thirty years, and are to be paid in cash. The 1st and 2d mort. bonds, P. & K. R. R. Co., are cash bonds. The 3d mort. bonds, of which $800 are outstanding, are to be paid, 40 per ct. in bonds, and 60 per ct. in stock of this company, when presented at the office. The $400,000 loan bonds of this company, of which $314,100 have been sold, were issued from Dec. 1, 1862, to May 1, 1863, on eight years, and are cash bonds. The stock coupons are to be paid in stock, and the interest scrip in bonds of this company.
